Case No. _____

DECLARATION OF DR. SHAUN JESTER

I, Shaun Jester, a citizen of the United States and a resident of Dumas, Texas, declare under penalty of perjury under 28 U.S.C. § 1746 that the following is true and correct to the best of my knowledge.

1. I am over eighteen years old and make this declaration on personal knowledge.
2. I am a board-certified obstetrician and gynecologist and am the Medical Director of Moore County Ob/Gyn in Dumas, Texas. I have been board-certified since 2007.
3. I received my medical degree in 1999 from the Texas College of Osteopathic Medicine at the University of North Texas Health Science Center at Fort Worth.
4. I have a busy medical practice. I am one of three doctors on call. My practice includes cesarean section deliveries, hysterectomies, and other women's health treatments. My practice includes about thirty deliveries each month.
5. A Risk Evaluation and Mitigation Strategy (REMS) is a drug safety program that the U.S. Food and Drug Administration (FDA) can require for certain medications with serious safety concerns to help ensure the benefits of the medication outweigh its risks.
6. I understand that the FDA approved chemical abortion drugs for use in the United States in 2000.

7. I am also familiar with the FDA's regulatory changes regarding chemical abortion drugs, especially the REMS issued in 2016 and associated with the use of mifepristone and misoprostol for chemical abortions.
8. I understand that the FDA approved the use of mifepristone up to 70 days (or 10 weeks) of gestation in 2016, which is longer than the previous standard of 49 days (or 7 weeks).
9. I am familiar with the FDA's suspension and elimination of the in-person dispensing requirements for administering these dangerous drugs in 2021.
10. I am familiar with the removal of the requirement for an in-person, post-abortion office visit, which is when a physician determines whether any fetal parts or other products of conception remain. These visits are essential to ensure that women experience no complications after chemical abortion.
11. I am also familiar with the relaxed reporting requirements for adverse events related to chemical abortions.
12. I believe these FDA actions will harm my patients, women, and women's medicine.
13. I believe that the FDA's approval for using mifepristone at a later gestational age, and the elimination of the in-person dispensing requirement and follow-up visit requirement, are especially dangerous for women.
14. Based on my experience, mothers are often mistaken about how far along they are in pregnancy. According to the Listening to Mothers III survey, 26% of women's due dates are changed.

15. Without an in-person visit to obtain an ultrasound, there is no way to be certain about the gestational age of an unborn child. Women may be further along in pregnancy than is currently acceptable for chemical abortion. Similarly, without an in-person examination, it is impossible to rule out an ectopic pregnancy, which would not be terminated by a chemical abortion and could put women at an increased risk of rupture or even death.
16. Based on my experience treating patients, I believe unsupervised chemical abortions are dangerous and potentially life-threatening especially due to increased risk of hemorrhage and/or infection the further along they are after 6 weeks' gestation.
17. For instance, I treated a woman who traveled from Texas to obtain chemical abortion drugs from Planned Parenthood New Mexico to complete an abortion at 10 weeks' gestation. The woman returned to Texas, suffered from two weeks of moderate to heavy bleeding, and then developed a uterine infection. At the hospital, I provided her with intravenous antibiotics and performed a dilation and curettage procedure. If she had waited a few more days before receiving care, she could have been septic and died. I reported this adverse event to the FDA.
18. The FDA's actions harm my practice by causing unnecessary harm to my patients that could have been avoided by retention and enforcement of the REMS.

mifepristone because some of these conditions can only be ascertained with an in-person examination or lab work.

23. Telemedicine does not allow for a critical ultrasound assessment to rule out ectopic pregnancies and verify that the patients are within the 70 days allowed for chemical abortions. In this way, the FDA's loosening of regulations for abortifacient drugs harms women and practitioners by exposing them to increased risk of complications.

24. I believe the relaxed reporting requirements for adverse events related to chemical abortion drugs harm women and physicians because they create an inaccurate and false safety profile for the use of mifepristone and misoprostol. Many women and girls do not fully understand the nature of chemical abortion and the risks that these drugs present to them.

25. The elimination of mandatory follow-up visits after chemical abortion drugs have been administered is also dangerous and harms women and practitioners. Without follow-up visits, physicians cannot identify potential complications like sepsis and hemorrhage, lingering products of conception, and others until the patient is at a critical time or it is too late to help the patient.

26. I care for my patients and give them the best medical care and guidance that I can. I believe that chemical abortions harm women, including my patients, and harm the medical practice. The elimination of REMS critical to ensuring safe use of the chemical abortion drugs prevents doctors from fulfilling their

oath to “do no harm” by permitting the administration of abortifacient drugs to patients without full knowledge or appreciation for the impact those drugs would have on them.

27. As with my patient who suffered an adverse event, it disturbed me that she was not informed that it was not normal to bleed for multiple weeks and that if she had a routine follow-up visit, as required by past REMS, this situation could have been avoided before requiring overnight hospitalization and her being at risk for developing sepsis.

By ASSOCIATED PRESS

UPDATED: January 20, 2021 at 7:54 p.m.

New restrictions caused a sharp drop in the number of women who had abortions at Missouri's only provider last year but the clinic has not stopped performing the procedure, Planned Parenthood said.

Officials with Reproductive Health Services of Planned Parenthood of the St. Louis Region were rejecting an assertion by Operation Rescue, an anti-abortion Christian organization, that Missouri has become the first state to no longer provide abortions.

No surgical abortions were performed at the clinic in December, with only seven in November, Planned Parenthood said, compared with nine and five during those months in 2019, [The St. Louis Post-Dispatch reported](#).

The Missouri Department of Health and Human Services said 39 surgical abortions occurred in Missouri from Jan. 1 through Nov. 15, 2020. In 2019, the total number was 1,362.

Dr. Colleen McNicholas, a Planned Parenthood chief medical officer, said the number of abortions performed at the St. Louis clinic has dropped since a clinic opened 18 miles (28 kilometers) away in Fairview Heights, Illinois, in October 2019. Patients at that clinic can avoid Missouri's 72-hour mandatory waiting period, which requires two appointments three days apart to receive an abortion.

"For some people, the additional 18 miles from our St. Louis facility to the Illinois facility is a manageable distance, especially when you reflect on the number of barriers that we can eliminate in accessing care in Illinois versus in Missouri," McNicholas said. "However, it's not an option for everybody."

Patients also are limiting the number of appointments and travel because of concerns about the coronavirus pandemic, she said.

More patients are also seeking medication abortions, which the St. Louis facility has not provided in more than two years because of Missouri's requirement that patients wanting that procedure must undergo a [pelvic exam](#). The mandatory pelvic exam is at odds with guidelines set by the American College of Obstetricians and Gynecologists.

The clinic's website tells people wanting to schedule an abortion they can visit the Illinois clinic to receive an abortion in one visit but that the procedure is still offered in St. Louis.

The exterior of the Planned Parenthood Reproductive Health Services Center in St. Louis in 2019.

It is not the first time that Operation Rescue has claimed the St. Louis facility is no longer providing abortions. In March, the organization said on its website that someone pretending to be a patient called the clinic and was not allowed to book an appointment there.

At the time, few surgical abortions were being provided in St. Louis because the clinic was fighting the Missouri Department of Health and Senior Services' refusal to renew its license. A state administrative commission [later ruled](#) the health department wrongfully denied the renewal.

Currently, Planned Parenthood is fighting a law passed in May 2019 to ban abortion after eight weeks gestation. A district court [ruling](#) that prevents the law from being enforced is currently before the 8th U.S. Court of Appeals.

Page 41	Page 43
<p>1 They will consult the OB/GYN resident</p> <p>2 on call who will then do an initial evaluation and</p> <p>3 assessment and discuss it with the fellow, as I</p> <p>4 described, or the attending on call supervising the</p> <p>5 resident and make a determination as to whether that</p> <p>6 supervising person needs to come in.</p> <p>7 Q. Is the doctor who performs the</p> <p>8 procedure notified that one of his or her patients</p> <p>9 is experiencing an emergency complication?</p> <p>10 A. Not necessarily.</p> <p>11 Q. Under what circumstances would the</p> <p>12 doctor be notified?</p> <p>13 A. If they happened to be the doctor on</p> <p>14 call.</p> <p>15 Q. So really the doctor who is notified is</p> <p>16 the on-call doctor and really there's no -- there's</p> <p>17 no -- no attempt to sort of loop in so to speak the</p> <p>18 doctor who performed the procedure necessarily?</p> <p>19 A. I wouldn't say that there's no attempt.</p> <p>20 I think it depends on the circumstances that on</p> <p>21 occasion it might be necessary, but there is a</p> <p>22 process by which any patient who is seen -- so this</p> <p>23 example that we've been working with of a woman</p> <p>24 who's called with concerns that are so -- that are</p> <p>25 requiring her to be seen in the emergency department</p>	<p>1 of follow-up is performed by Planned Parenthood with</p> <p>2 that patient once she has gone to the hospital for</p> <p>3 emergency treatment?</p> <p>4 A. We reach out to her the next day. If</p> <p>5 we happen to know she was admitted to the hospital</p> <p>6 and that information has been relayed back to</p> <p>7 Planned Parenthood, we may reach out to her the day</p> <p>8 after she's discharged, but in general we will</p> <p>9 follow up the next day.</p> <p>10 Q. The fellows or the other doctors who</p> <p>11 are occasionally providing coverage other than the</p> <p>12 fellows -- let me rephrase that.</p> <p>13 In this scenario where a patient is</p> <p>14 receiving emergency care at Barnes-Jewish Hospital,</p> <p>15 does the on-call OB/GYN have direct access to the</p> <p>16 medical records of that particular patient who</p> <p>17 received a procedure at the RHS facility?</p> <p>18 A. Do they have access to the RHS medical</p> <p>19 records?</p> <p>20 Q. Correct.</p> <p>21 A. No.</p> <p>22 Q. How -- what if they feel -- does it</p> <p>23 happen from time to time that viewing the patient's</p> <p>24 full record from the facility where the procedure</p> <p>25 was performed would be necessary or deemed necessary</p>
Page 42	Page 44
<p>1 and she's given permission for us to -- for the</p> <p>2 Planned Parenthood nurse or physician on call to</p> <p>3 call a report, during that experience right there</p> <p>4 the doctor who did the abortion might actually be</p> <p>5 informed because they may be the physician who --</p> <p>6 who's supervising the nurse on call.</p> <p>7 Q. Uh-huh.</p> <p>8 A. In addition, there is the possibility</p> <p>9 that the resident OB/GYN doctor would reach out to</p> <p>10 the physician on call as I mentioned and that could</p> <p>11 be the physician who performed the abortion. It</p> <p>12 doesn't -- it's not routinely that, though.</p> <p>13 And then there is a process by which</p> <p>14 any patient who has shown up in the emergency</p> <p>15 department for abortion-related care, especially in</p> <p>16 this circumstance where there has been a proactive</p> <p>17 communication that our Planned Parenthood affiliate</p> <p>18 does everything they can to follow up on what's</p> <p>19 happened, and part of that is what we call our</p> <p>20 quality improvement or quality assurance program,</p> <p>21 and so yes, at that time not in the midst of this</p> <p>22 urgent care, but there is a feedback loop that gets</p> <p>23 completed with the physician who performed the</p> <p>24 abortion.</p> <p>25 Q. You mentioned follow-up. So what kind</p>	<p>1 to treat that patient?</p> <p>2 A. No, I don't believe so.</p> <p>3 Q. What records of the procedure that</p> <p>4 resulted in the complication does the on-call doctor</p> <p>5 have access to?</p> <p>6 A. As I said before, the patient would</p> <p>7 have been discharged with instructions about</p> <p>8 postabortion care and instructed by the nurse if she</p> <p>9 felt necessary to go to the emergency department to</p> <p>10 bring those instructions with her.</p> <p>11 That's about all that the on-call</p> <p>12 physicians would have access to. Abortion patients,</p> <p>13 there isn't anything particularly unique about the</p> <p>14 abortion care that is performed that requires a</p> <p>15 detailed knowledge of the level of care and the</p> <p>16 medical records related to that care.</p> <p>17 Q. What is in the information that the</p> <p>18 patient is given to bring with her to the emergency</p> <p>19 department in the event of a complication?</p> <p>20 A. I don't have the discharge instructions</p> <p>21 that we routinely provide in front of me, but I'm</p> <p>22 sure we can get you a copy of them if that's what</p> <p>23 you're asking.</p> <p>24 Q. Do you know what is in them generally</p> <p>25 speaking?</p>

11 (Pages 41 to 44)

Page 45	Page 47
<p>1 A. Generally speaking.</p> <p>2 Q. What is the nature of that information?</p> <p>3 A. There's information about normal</p> <p>4 expected physical symptoms and emotional symptoms.</p> <p>5 In a patient who is having a pill abortion versus a</p> <p>6 surgical abortion, there may be a slight variation</p> <p>7 in the kind of what's normal and then the what's not</p> <p>8 normal, and -- but the thing that is common across</p> <p>9 those two sets of instructions is who to call if</p> <p>10 you're having a problem.</p> <p>11 Q. Is there anything that the patient has</p> <p>12 that would identify for the emergency room team that</p> <p>13 identifies what procedure she underwent?</p> <p>14 A. Again, I don't have the instructions in</p> <p>15 front of me, so I don't remember -- I don't recall</p> <p>16 if it says surgical abortion or medical abortion at</p> <p>17 the top of the instructions, but it might.</p> <p>18 But I will say that a patient who</p> <p>19 presents with the kinds of -- you know, in this</p> <p>20 theoretical scenario that we're talking about, this</p> <p>21 hypothetical, you know, as I stated before the</p> <p>22 patient may tell us don't call the emergency</p> <p>23 department because she may want to present and not</p> <p>24 disclose that she's had an abortion.</p> <p>25 That's her prerogative. The care</p>	<p>1 Q. And my question is do those documents</p> <p>2 include any document that identifies for potential</p> <p>3 future emergency treaters what was the procedure</p> <p>4 that she had?</p> <p>5 A. As I stated, I don't have those</p> <p>6 instructions in documents as you call them in front</p> <p>7 of me, so I don't recall specifically that one fact</p> <p>8 of does it say medication abortion, does it say</p> <p>9 surgical abortion, does it say miscarriage</p> <p>10 management? I don't recall off the top of my head.</p> <p>11 Q. So you do not know whether those</p> <p>12 documents include something that identifies the</p> <p>13 procedure that was undergone?</p> <p>14 A. We have lots of discharge instructions</p> <p>15 that we send patients home with. I do not recall.</p> <p>16 Q. Turning to Exhibit 1, which is in front</p> <p>17 of you, the first half of this document or more than</p> <p>18 half of this document is actually an expert</p> <p>19 declaration that you prepared, correct?</p> <p>20 A. That's correct.</p> <p>21 Q. Did you prepare this personally? Like</p> <p>22 did you sit at a computer and write the first draft</p> <p>23 or did you work with somebody in preparing this?</p> <p>24 A. I definitely worked with the attorneys</p> <p>25 who are representing the plaintiffs. As I've stated</p>
Page 46	Page 48
<p>1 that's necessary for her in the emergency department</p> <p>2 would be the same as if she was having a miscarriage</p> <p>3 and had a procedure to have treated that spontaneous</p> <p>4 abortion, the medical term for a miscarriage.</p> <p>5 Q. So the documents that she's given when</p> <p>6 she leaves the facility after the procedure to your</p> <p>7 knowledge do not include any document that would</p> <p>8 identify what procedure she underwent in -- for</p> <p>9 emergency -- emergency treatment in the event she</p> <p>10 experiences an emergency complication?</p> <p>11 MR. HAAR: Let me just object. I think</p> <p>12 that misstates his testimony.</p> <p>13 THE WITNESS: Right.</p> <p>14 MR. HAAR: But subject to that.</p> <p>15 Q. (By Mr. Sauer) You understand the</p> <p>16 question.</p> <p>17 A. Is it possible for him to read back --</p> <p>18 Q. Why don't I restate the question? All</p> <p>19 I'm asking is a patient leaves the RHS facility.</p> <p>20 She's -- you said she's given some documents that</p> <p>21 she's going to take with her if she happens to have</p> <p>22 an emergency --</p> <p>23 A. Correct.</p> <p>24 Q. -- complication later on, correct?</p> <p>25 A. That's correct.</p>	<p>1 at the beginning of this deposition, I've written --</p> <p>2 I participated in a lot of these declarations, and</p> <p>3 whether it was me writing the first draft or not, I</p> <p>4 don't recall for this one.</p> <p>5 Q. So you don't know whether or not you</p> <p>6 wrote the first draft of this one?</p> <p>7 A. I don't recall.</p> <p>8 Q. On some occasions have you accepted</p> <p>9 first drafts written by others and used them for</p> <p>10 your expert declarations?</p> <p>11 THE WITNESS: Can I ask a question of</p> <p>12 you guys?</p> <p>13 MR. HAAR: Do you want -- do you have a</p> <p>14 question? Do you want to step out?</p> <p>15 THE WITNESS: Yeah. Is that all right?</p> <p>16 MR. HAAR: Is that all right?</p> <p>17 MR. SAUER: Yeah.</p> <p>18 MR. HAAR: There's no real -- he</p> <p>19 just --</p> <p>20 THE WITNESS: I just don't</p> <p>21 understand --</p> <p>22 MR. SAUER: That's okay.</p> <p>23 THE WITNESS: -- where we're going with</p> <p>24 that.</p> <p>25 MR. SAUER: I object to doing this</p>

12 (Pages 45 to 48)

<p style="text-align: right;">Page 49</p> <p>1 while a question is pending, but in the interest of 2 collegiality. 3 (WHEREIN, a recess was taken.) 4 COURT REPORTER: Question: On some 5 occasions have you accepted first drafts written by 6 others and used them for your expert declarations? 7 A. Yes. On some occasions that's correct, 8 but I always have made significant changes and/or 9 modifications and reviewed the final draft before 10 submission. 11 Q. (By Mr. Sauer) What -- who has written 12 first drafts for you of expert declarations, other 13 doctors, attorneys, research assistants? Who has 14 done it? 15 A. I would say for the most part it's been 16 the attorneys. 17 Q. Do you remember anyone other than 18 attorneys writing first drafts of expert 19 declarations for you? 20 A. No. 21 Q. Do you do -- when you have prepared 22 expert declarations like Exhibit 1, do you do 23 original research for them or do you rely on others 24 to do research for you? 25 A. I do both. I 100 percent do a lot of</p>	<p style="text-align: right;">Page 51</p> <p>1 content of the expert declaration? 2 A. Yes. 3 Q. And the attorney would produce a first 4 draft for your review and editing? 5 A. That's correct. 6 Q. And the attorney may do some research 7 looking up articles, for example? 8 A. That's correct. 9 Q. And you might also do research in 10 preparing them looking up articles on your own? 11 A. I wouldn't say might. I definitely 12 would. 13 Q. You would. And then you would edit the 14 work of the attorney in producing an expert 15 declaration? 16 A. Yes. 17 Q. Do you know if that process was 18 followed, for example, for this exhibit, Exhibit 1 19 to this deposition? 20 A. Most likely. 21 Q. Do you recall whether that process was 22 a process you went through for the other expert 23 declarations you submitted in the ambulatory 24 surgical center and hospital privileges case? 25 A. Most likely.</p>
<p style="text-align: right;">Page 50</p> <p>1 research on my own, and anything that someone else 2 has identified as a potential, you know, 3 justification for a statement I review. 4 Q. But you have relied on others to do 5 original research for you? 6 A. I have relied on others to identify 7 articles that are worth looking at, but I still do 8 my own research. 9 Q. So you would -- who have you relied on 10 to look up articles for you? 11 A. So if, for instance, in that first 12 draft an attorney might have identified an article 13 that would -- so most of the time that first draft 14 would be based on a conversation that we've had 15 regarding whatever the testimony is. 16 Q. You say we've had. Who is we? 17 A. The attorney that's helping to draft 18 the declaration. And I may have pointed them in the 19 direction of the research in the first place and 20 asked them to review it for whether I'm quoting the 21 right number, for example. 22 Q. So the way the process would work where 23 you'd have an initial discussion with the attorney 24 you're working with on the case where you gave that 25 attorney sort of high-level guidance as to the</p>	<p style="text-align: right;">Page 52</p> <p>1 MR. SAUER: Let me give you a document 2 I'm asking the reporter to mark as Exhibit 2. 3 (WHEREIN, Exhibit 2, 10-24-17 RHS of 4 Planned Parenthood Procedure Manual, was marked for 5 identification by the Court Reporter.) 6 Q. (By Mr. Sauer) Is this a document you 7 recognize? 8 A. Yes. 9 Q. Okay. Did you prepare this document? 10 A. I was involved in the preparation of 11 it. 12 Q. When was this document prepared? 13 A. The effective date listed on the 14 document is October 24, 2017. 15 Q. So would it have been prepared shortly 16 before that? 17 A. Yes, sir. 18 Q. And what -- what was the reason for the 19 preparation of this document? 20 A. As it states in the purpose, it's to 21 ensure that the on-call program both serves the 22 needs of our patients and to comply with the new 23 legal statute Senate Bill 5. 24 Q. And in compliance with Senate Bill 5, 25 was this document focused on complying with the</p>

13 (Pages 49 to 52)

Page 57	Page 59
<p>1 A. I believe that it does.</p> <p>2 Q. Let me ask you this. Have you ever had</p> <p>3 a situation where one of your patients, someone on</p> <p>4 whom you had performed let's say an abortion</p> <p>5 procedure, experienced a serious complication and</p> <p>6 you got personally involved in the treating of that</p> <p>7 complication on an emergency basis?</p> <p>8 A. Yes.</p> <p>9 Q. Okay. How often has that happened?</p> <p>10 A. I currently am one of the four</p> <p>11 supervising physicians in the family planning</p> <p>12 division as described in what you just read through,</p> <p>13 so 25 percent of the time I'm covering for</p> <p>14 emergencies.</p> <p>15 I'm also -- I don't know what</p> <p>16 proportion of the abortion services that we perform</p> <p>17 at RHS I personally perform, but I would guess it's</p> <p>18 somewhere around a similar number, maybe less in</p> <p>19 fact because there's a larger pool of abortion</p> <p>20 providers at Planned Parenthood. And so however</p> <p>21 often those two numbers intersect.</p> <p>22 Q. So you say basically if you happen to</p> <p>23 have performed the abortion and then you happen to</p> <p>24 be on call to provide emergency care, that is when</p> <p>25 you would be treating a complication that arose from</p>	<p>1 OB/GYN who is available to address emergencies</p> <p>2 happens to be treating another emergency?</p> <p>3 A. Yes.</p> <p>4 Q. What happens then?</p> <p>5 A. Well, it depends on the circumstances.</p> <p>6 I can speak to the hospital where I work, where we</p> <p>7 have more than a hundred OB/GYN physicians on staff</p> <p>8 at that hospital, and there is quite likely going to</p> <p>9 be another OB/GYN physician who might be available</p> <p>10 to help in that circumstance until the person who's</p> <p>11 actually on call is available to provide the direct</p> <p>12 care that's necessary.</p> <p>13 I'm familiar with other institutions</p> <p>14 where there isn't a plethora of other OB/GYN</p> <p>15 physicians available, and in general then the</p> <p>16 emergency room physician will manage the care that's</p> <p>17 necessary until that OB/GYN who is on call becomes</p> <p>18 available.</p> <p>19 Q. Are emergency room physicians typically</p> <p>20 trained to do, for example, aspiration procedures?</p> <p>21 A. I can't speak to the typical training</p> <p>22 for emergency room physicians, but I do know of</p> <p>23 emergency room physicians who are trained to do so.</p> <p>24 Q. Do you know of emergency room</p> <p>25 physicians who are not trained to do so?</p>
Page 58	Page 60
<p>1 a procedure that you had performed?</p> <p>2 A. That is correct.</p> <p>3 Q. Are there any other circumstances where</p> <p>4 you have gotten personally involved in treating an</p> <p>5 emergency complication from a -- from an abortion</p> <p>6 where you performed the procedure other than when</p> <p>7 you happened to be on call when the emergency</p> <p>8 happened?</p> <p>9 A. It's unlikely, but if, for instance,</p> <p>10 the person who was on call was already in the</p> <p>11 operating room doing something else and was</p> <p>12 unavailable and, you know, the care team needed the</p> <p>13 next person and I happened to be available, but for</p> <p>14 the most part, no.</p> <p>15 Q. Does that happen from time to time that</p> <p>16 there would be an emergency that goes to the</p> <p>17 emergency room, a patient with an emergency goes to</p> <p>18 the emergency room and there's -- the OB/GYN is not</p> <p>19 available because they're dealing with another</p> <p>20 emergency?</p> <p>21 A. There are also examples where --</p> <p>22 Q. If I may, if you just answer the</p> <p>23 question I've asked, which is does that happen from</p> <p>24 time to time where a patient with an emergency</p> <p>25 complication goes to the emergency room and the</p>	<p>1 A. I do.</p> <p>2 Q. Do all hospitals have an OB/GYN on call</p> <p>3 24/7?</p> <p>4 A. No.</p> <p>5 Q. Obviously Barnes-Jewish Hospital does</p> <p>6 have a large number of OB/GYNs available. What</p> <p>7 about hospitals in rural areas, do they tend to have</p> <p>8 OB/GYNs on call 24/7?</p> <p>9 A. I don't know the circumstances of those</p> <p>10 rural hospitals, but I do know that many of them</p> <p>11 don't.</p> <p>12 Q. We talked a lot in considering the</p> <p>13 patient who's experiencing emergency complication</p> <p>14 who goes to the Barnes-Jewish Hospital for treatment</p> <p>15 of that emergency complication. What happens to a</p> <p>16 patient who say is not very close to Barnes-Jewish</p> <p>17 Hospital when she experiences the emergency</p> <p>18 complication and as a result is sent to another</p> <p>19 hospital, either elsewhere in the St. Louis area or</p> <p>20 maybe, you know, somewhere else If the patient</p> <p>21 happens to be out of town? What happens to that</p> <p>22 patient?</p> <p>23 A. And you're speaking about a patient who</p> <p>24 we don't think it's clinically appropriate for her</p> <p>25 to come in the next morning, for instance, when our</p>

15 (Pages 57 to 60)

Page 161	Page 163
<p>1 Medicaid program, right?</p> <p>2 A. Correct.</p> <p>3 Q. And that was considered an advantage</p> <p>4 over previous studies because the authors</p> <p>5 anticipated there would be a higher follow-up rate</p> <p>6 for those particular patients because of their</p> <p>7 involvement in Medicaid, correct?</p> <p>8 A. I think that they believed there was a</p> <p>9 better chance that they would see subsequent patient</p> <p>10 care. When you say follow-up rate, to me that means</p> <p>11 the patient coming back to the facility in which</p> <p>12 care was provided. You're -- when you say</p> <p>13 follow-up, are you referring to subsequent care?</p> <p>14 Q. I meant there being records that the</p> <p>15 researchers could readily access to conduct their</p> <p>16 study by follow-up rate.</p> <p>17 A. If that's what you mean, then yes, I</p> <p>18 agree.</p> <p>19 Q. And if you look actually at the very</p> <p>20 first paragraph on -- on the right side at the right</p> <p>21 column of the first page after the executive</p> <p>22 summary, it states the last sentence of that</p> <p>23 paragraph (quote as read):</p> <p>24 Furthermore, complication rates</p> <p>25 are underestimated by low</p>	<p>1 sentence.</p> <p>2 Q. Okay. So let's -- is that an issue in</p> <p>3 providing postabortion healthcare, that women</p> <p>4 sometimes go to a different facility than the</p> <p>5 facility in which they obtained the abortion?</p> <p>6 A. Yes.</p> <p>7 Q. And as a result of that is it sometimes</p> <p>8 difficult to ascertain or quantify how many women</p> <p>9 needed postabortion care because the facility that</p> <p>10 performed the abortion lacks a record of the fact</p> <p>11 that those women were treated?</p> <p>12 A. I agree, which is why this is such a</p> <p>13 useful database that the authors chose for this</p> <p>14 study.</p> <p>15 Q. And in particular, this study views</p> <p>16 itself as having a methodological strength in that</p> <p>17 women in California, you know, because they were</p> <p>18 relying on Medicaid records, even if a woman went</p> <p>19 elsewhere in California to obtain postabortion</p> <p>20 healthcare the Medicaid would have a record of that,</p> <p>21 correct?</p> <p>22 A. Of having paid for it, that's correct.</p> <p>23 Q. Whereas other studies that is a</p> <p>24 methodological limitation in that the researchers do</p> <p>25 not -- aren't able to capture whether or how many</p>
Page 162	Page 164
<p>1 follow-up rates.</p> <p>2 Correct?</p> <p>3 A. Yes, that states that there.</p> <p>4 Q. And that phrase follow-up rates is</p> <p>5 being used in the sense that I was using it in this</p> <p>6 study, namely that there's a problem of getting</p> <p>7 accurate records as to whether or not women</p> <p>8 experience postabortion complications in many</p> <p>9 studies, correct?</p> <p>10 A. No. I actually think that what they're</p> <p>11 talking about here is that the low follow-up rate</p> <p>12 after which women receive the abortion care in the</p> <p>13 first place, and that your initial statement about</p> <p>14 what follow-up is was correct about why they chose</p> <p>15 this database because women who get abortion care at</p> <p>16 healthcare facility A may or may not go back to</p> <p>17 healthcare facility A, but will go somewhere within</p> <p>18 the state of California Medicaid system for payer</p> <p>19 for care and be likely to be able to follow -- to</p> <p>20 find what happened to that woman subsequent to the</p> <p>21 abortion care at facility A.</p> <p>22 The lack of follow-up that's stated in</p> <p>23 the last sentence of the first paragraph is that the</p> <p>24 women don't come back to facility A in the first</p> <p>25 place is I think what they're referring to with that</p>	<p>1 women may have gone to a different facility to</p> <p>2 obtain follow-up care, correct?</p> <p>3 A. That can be a limitation of other</p> <p>4 studies.</p> <p>5 Q. In the executive summary on the first</p> <p>6 page -- actually, no, can you turn to -- I</p> <p>7 apologize. Can you turn to the third page in table</p> <p>8 one?</p> <p>9 A. Uh-huh.</p> <p>10 Q. And towards the middle of table one</p> <p>11 under abortion procedure type it lists medication</p> <p>12 abortion there; is that correct?</p> <p>13 A. I see it.</p> <p>14 Q. And it indicates that the</p> <p>15 abortion-related complication rate per 100 abortions</p> <p>16 was 5.19 percent, correct, in the third column?</p> <p>17 A. This says rate per 100. 5.19 per 100</p> <p>18 abortions.</p> <p>19 Q. Yeah, sorry. I shouldn't have added</p> <p>20 the percent. 5.19 per one hundred?</p> <p>21 A. Right. With a confidence interval of</p> <p>22 4.7 to 5.6.</p> <p>23 Q. Right.</p> <p>24 A. 4.8 to 5.6, that's correct.</p> <p>25 Q. That's correct.</p>

41 (Pages 161 to 164)

<p style="text-align: right;">Page 225</p> <p>1 have to do with the frequency of office hours in 2 Springfield and Joplin. Is that fair to say? 3 A. No. I think the contingencies are 4 based on the clinical situation at hand. Yes, one 5 of them is the availability of medical personnel, 6 but that is not the most important one. The most 7 important one is what's going on with the patient, 8 what level of service does the patient need, and 9 where can it be delivered? 10 Q. Suppose that office hours in 11 Springfield are conducted only once per week and the 12 patient calls the day after office hours, so the 13 next office hours won't be for six days. Is there 14 advantage to the patient to having a coverage 15 physician available so she can be examined without 16 having to go to the ER? 17 A. I just don't feel like that's a 18 realistic scenario where we only see patients once a 19 week. 20 Q. Assuming -- assuming the hypothetical 21 is true. 22 A. I just -- it seems ludicrous to assume 23 the hypothetical is true. I really -- it just seems 24 ridiculous. 25 Q. Just under that hypothetical would</p>	<p style="text-align: right;">Page 227</p> <p>1 help that care provider that's there trying to 2 assess what this patient needs to be able to, you 3 know, do well. 4 Q. That's interesting. Let me ask you a 5 follow-up about that. You referred to situations 6 where patients are sent to the hospital and receive 7 more interventions than necessary. What does that 8 mean? What interventions are unnecessarily 9 provided? 10 A. So my experience in taking care of 11 women in the St. Louis metro area and far afield is 12 that when they go somewhere postabortion, if they 13 have bleeding of any kind they get an aspiration 14 procedure that is unnecessary fairly often. 15 If they have an ultrasound that's done 16 and that ultrasound shows anything other than a thin 17 homogenous endometrial stripe, but might be totally 18 within the realm of normal expectation postabortion, 19 they get an aspiration procedure that isn't always 20 necessary. 21 Q. And that's a function or result of the 22 ER doctors at that particular hospital being less 23 experienced in dealing with postabortion situations? 24 A. It might be a function of the OB/GYN on 25 call being less experienced as well, but the fact is</p>
<p style="text-align: right;">Page 226</p> <p>1 there be an advantage to the patient? 2 A. I mean, if that nurse decides the 3 patient cannot wait till the next business day when 4 the health center is open, it would be reasonable 5 for her to be referred to an emergency department if 6 that's what was available because nothing else 7 was -- the health center wasn't open. 8 Q. Would it be preferable for the patient 9 who's in this second bucket to go to the clinic 10 during the next available office hours if they're 11 available to being referred to the ER? 12 A. We would always prefer our patients to 13 get the care that they need within our health 14 centers because we know the kind of care that we 15 provide. What I know is that sometimes when a 16 patient shows up to another hospital that isn't 17 familiar with the care of abortion patients they may 18 get more interventions than are necessary, which is 19 again one of the reasons why we have the patients go 20 with the instructions in hand. 21 That includes how to contact us to talk 22 about what's going on. We ask the patient's 23 permission to call ahead. If the patient gives 24 permission we do so, and we try to be a part of that 25 care team, you know, not direct, but indirect to</p>	<p style="text-align: right;">Page 228</p> <p>1 that if we can speak to that care team, whether it's 2 the ER doctor or the OB/GYN who sees that patient or 3 the family practice doc who's trained to do 4 miscarriage management and abortion care and help 5 them understand that this is actually within the 6 realm of normal and no intervention is reasonable at 7 this time, then we can hopefully avoid that 8 unnecessary intervention, but sometimes that care 9 happens without us having that conversation. 10 Q. And when you say we in the sense as you 11 just said, the we you're referring to is actually 12 you and the doctors affiliated with you who are 13 providing apportion care in the first instance? 14 A. Yes, I guess that would be what I was 15 referring to. 16 Q. So in other words, there's an advantage 17 to having a communication, a direct line of 18 communication between the doctors who provided 19 abortion care and the ER doctors who are treating 20 the postabortion situation in order to dissuade the 21 ER doctors from providing unnecessary care in some 22 situations, correct? 23 A. It is advantageous to have 24 communication, but it's not necessary to have any 25 preexisting arrangements or agreements.</p>

57 (Pages 225 to 228)

Page 229	Page 231
<p>1 Q. Right. But in other words, the fact 2 of – the fact that you would be in direct 3 communication with the ER doctors may be 4 advantageous to prevent – prevent the provision of 5 unnecessary procedures? 6 A. Yes. 7 Q. Such as – such as asp – unnecessary 8 aspirations? 9 A. Yes. 10 Q. And – and that's because there is an 11 issue with ER doctors sometimes over – overreacting 12 to situations that are really normal after 13 medication abortion? 14 A. For example, one of the most common 15 diagnoses that brings patients to the emergency 16 department, with abortion care or not, is abdominal 17 pain, and CT scans get done on nearly all those 18 patients to make sure they don't have appendicitis 19 when 20 percent of them are going to have 20 constipation as the diagnosis. 21 Q. And you're – obviously constipation is 22 not an abortion-related issue? 23 A. No, it is not. But my point is that 24 the overutilization of healthcare diagnostics and 25 healthcare-related procedures is a common problem</p>	<p>1 can simply be a phone call, then yes, I agree. 2 Q. Earlier you testified that giving the 3 patient comfort and confidence is an independent 4 value; is that fair to say? 5 A. That is fair to say. 6 Q. Remember the two scenarios we're 7 talking about, one where there are coverage doctors 8 available around the clock in Springfield and the 9 other where there is only one doctor in Springfield 10 and the others are located in St. Louis and Kansas 11 City. With a patient who is aware of the 12 around-the-clock coverage, that there would be a 13 doctor prearranged and predesignated to treat her in 14 the event of complication, would a patient draw 15 comfort and confidence from that in your experience? 16 A. I don't know. 17 Q. So you don't know whether a patient 18 might react better to being told, look, you're going 19 to have this medication abortion. If you have 20 problems I, Dr. Grebe, will be available to treat 21 you, and if I'm not available doctor so and so also 22 in Springfield will be here and available to treat 23 you. Might draw – you don't know whether a patient 24 would draw comfort and confidence from that? 25 A. I don't.</p>
Page 230	Page 232
<p>1 across healthcare services and especially in the 2 emergency department setting. 3 Q. So the involvement at least of an 4 OB/GYN with experience in abortion and postabortion 5 complications is an advantage to a patient who is 6 presenting at an ER for treatment in some cases? 7 A. I would say the involvement of any 8 physician with abortion care experience. So for 9 example, if that emergency room physician happened 10 to be a medical student that I worked with who did a 11 rotation doing abortion care with me at Planned 12 Parenthood and is now the attending emergency room 13 physician, they will be more comfortable with it. 14 If they happen to be a family medicine 15 doctor who does miscarriage management and other 16 abortion-related care, they will be more comfortable 17 with it. 18 Q. Okay. So the involvement of a doctor 19 who has specific experience and training relating to 20 postabortion complications is advantageous in 21 preventing unnecessary treatments? 22 A. I would say that's more accurate. 23 Q. Do you in fact agree with that 24 statement? 25 A. I think when you say involvement, if it</p>	<p>1 Q. And again, you don't know whether a 2 patient might have less comfort and confidence in an 3 arrangement where she was told you're undergoing a 4 medication abortion. Some of the time I, Dr. Grebe, 5 will be available to treat you, but if I'm not 6 available you'll have to go to the ER? 7 A. I expect that patients are comfortable 8 with that as they go to the emergency department for 9 all kinds of things. We provide patients with 10 instruction that there is a nurse on call 24/7, and 11 I believe that gives them the comfort and confidence 12 to do their medication abortion. 13 Q. So you don't think based on your 14 experience interacting with patients that patients 15 will draw additional comfort and confidence from 16 being told, not just that there is a nurse on call 17 24/7, but there is a doctor on call 24/7 to treat 18 complications? 19 A. No, I do not. 20 Q. How about – do you know what attitudes 21 towards abortion are in the Springfield and Joplin 22 communities? 23 A. Whose attitudes? 24 Q. Just general community attitudes. 25 A. As I stated before, I feel like that my</p>

58 (Pages 229 to 232)

Page 237	Page 239
<p>1 understand that if they are going to an emergency</p> <p>2 room for care that they need to be forthright in</p> <p>3 what's happening, just as much as a drug addict is</p> <p>4 going to be forthright in what they've put in their</p> <p>5 system so that the healthcare providers can take</p> <p>6 good care of them if they're --</p> <p>7 Q. Is it your view that drug addicts</p> <p>8 provide reliable information to healthcare providers</p> <p>9 when they're experiencing an overdose?</p> <p>10 A. I think drug addicts don't look at</p> <p>11 healthcare providers as the police.</p> <p>12 Q. And in your view, women usually --</p> <p>13 women who are experiencing emergency situations</p> <p>14 usually would be comfortable telling an ER doctor</p> <p>15 that they have had an abortion and that's what</p> <p>16 result -- what's resulting in the problem?</p> <p>17 A. Yes, but on occasion when a woman is</p> <p>18 specifically asked me could I -- could the same</p> <p>19 thing be happening to me if I had a pregnancy loss,</p> <p>20 and the answer is yes.</p> <p>21 Q. And so you have inferred from that that</p> <p>22 they would have some reluctance in sharing the fact</p> <p>23 they've had an abortion with the ER doctor?</p> <p>24 A. Yes.</p> <p>25 Q. Would it be more likely your view that</p>	<p>1 A. I still can't say. I mean, I would say</p> <p>2 I don't know. Just because she tells that to me</p> <p>3 doesn't mean that when she shows up at the doctor's</p> <p>4 office for that evaluation that she's actually</p> <p>5 disclosed that.</p> <p>6 Q. But you're basing that on conversations</p> <p>7 with patients who have expressed to you -- who have</p> <p>8 drawn a distinction between the nonjudgmental in</p> <p>9 your words, nonjudgmental care they receive from</p> <p>10 Planned Parenthood contrasted to their experience</p> <p>11 with other doctors who are not affiliated with</p> <p>12 Planned Parenthood?</p> <p>13 A. Yes.</p> <p>14 Q. You testified earlier that there are</p> <p>15 situations where hospitals that provide emergency</p> <p>16 care do not have an OB/GYN on call 24/7 to address</p> <p>17 gynecological -- gynecologically related</p> <p>18 emergencies, correct?</p> <p>19 A. That's correct.</p> <p>20 Q. In those situations the care is</p> <p>21 provided by the emergency room doctor and that team,</p> <p>22 correct?</p> <p>23 A. It depends on the circumstance, but I'm</p> <p>24 certain that's part of the process.</p> <p>25 Q. And then -- and then you testified</p>
Page 238	Page 240
<p>1 a woman would be willing to confide that she had had</p> <p>2 an abortion with a doctor who had been predesignated</p> <p>3 by Planned Parenthood as her coverage doctor?</p> <p>4 A. I don't know.</p> <p>5 Q. Do you think it would be reasonable to</p> <p>6 infer that there would be situations where a woman</p> <p>7 would be more comfortable making that kind of</p> <p>8 disclosure to a doctor who was presented to her as</p> <p>9 the doctor that the abortion clinic had prearranged</p> <p>10 to cover her complications and treat her?</p> <p>11 A. I think women know when they come to</p> <p>12 Planned Parenthood that they are going to receive</p> <p>13 the care they need without judgment, and that if</p> <p>14 they are given a referral that it's affiliated with</p> <p>15 Planned Parenthood, they will expect that the</p> <p>16 Planned Parenthood ethos of providing care without</p> <p>17 judgement will be upheld by that doctor. I can't</p> <p>18 say whether that's actually true, but I do believe</p> <p>19 that's the impression that would be given.</p> <p>20 Q. So it sounds like your answer to the</p> <p>21 question is yes, it might well be more likely that a</p> <p>22 woman would be comfortable making that kind of</p> <p>23 disclosure to a doctor who was presented to her as a</p> <p>24 prearranged coverage physician by -- by Planned</p> <p>25 Parenthood?</p>	<p>1 earlier that you -- you expect but do not know</p> <p>2 whether there are OB/GYNs on staff in the hospitals</p> <p>3 in the Springfield area, correct?</p> <p>4 A. That is correct.</p> <p>5 Q. And same as to Joplin, you expect but</p> <p>6 you do not know whether there are OB/GYNs on call at</p> <p>7 the Joplin area hospitals, correct?</p> <p>8 A. That's correct.</p> <p>9 Q. Assuming that there is not such an</p> <p>10 OB/GYN on staff at the hospital, is it advantageous</p> <p>11 from the woman's perspective that there would be an</p> <p>12 OB/GYN in the community who would be available to go</p> <p>13 to the hospital to address her situation in the</p> <p>14 event of a major complication?</p> <p>15 A. I don't think it needs to be an OB/GYN.</p> <p>16 It needs to be a physician who has training, you</p> <p>17 know, necessary to deal with whatever the</p> <p>18 complication is that she's suffering. So for</p> <p>19 example, if the hospital attending who is on call is</p> <p>20 an internist and the patient presents with signs and</p> <p>21 symptoms of a pelvic infection after abortion and</p> <p>22 the internist knows how to treat a pelvic infection,</p> <p>23 they will know how to admit the patient and to get</p> <p>24 the patient the kind of antibiotics or other</p> <p>25 interventions that they might need.</p>

60 (Pages 237 to 240)

<p style="text-align: right;">Page 253</p> <p>1 physicians, internists, you name it are more than 2 capable of administering a mifepristone pill to a 3 patient to induce a medication abortion and 4 explaining the instructions related to 5 self-administering the misoprostol at home. 6 Q. How about the treatment of 7 complications from a medication abortion? Suppose a 8 patient needs an aspiration to sort of remove 9 retained issue. Are the skill and experience of the 10 doctor performing that procedure important 11 determinants of its safety? 12 A. When it is necessary to do an 13 aspiration procedure having experience and the 14 skills to do so is important. 15 Q. And ER doctors you testified earlier 16 are not always trained to do even aspirations, 17 correct? 18 A. I testified to that, yes. 19 Q. And I think you testified as well that 20 they're not always trained to do more serious 21 surgical interventions that might be required to 22 treat major complications of medication abortion? 23 A. ER doctors? 24 Q. Correct. 25 A. Yes.</p>	<p style="text-align: right;">Page 255</p> <p>1 interventions that are required to treat, sometimes 2 treat major complications of medication abortion? 3 A. Yes. 4 Q. What sorts of surgical interventions 5 are required to treat major complications? 6 A. So again, going back to the definition 7 we described for major complications in a patient 8 who has a bad infection, you might have to do an 9 aspiration procedure because of the concern that 10 there may be some infected tissue left inside the 11 uterus, that is a surgical procedure to treat a 12 major complication if that major -- if that 13 infection rose to the level of major, meaning 14 needing IV antibiotics and admission to the hospital 15 as an example. 16 Q. So there would be situations where a 17 surgical intervention would be done to -- other than 18 an aspiration, but a surgery would be performed to 19 treat a complication of medication abortion? 20 A. There are very rare circumstances 21 beyond the aspiration. 22 Q. What would those circumstances be? 23 A. Again, kind of sticking with the severe 24 infection, that if the infection has caused 25 additional infectious burden in the peritoneal</p>
<p style="text-align: right;">Page 254</p> <p>1 Q. Is it fair to say that regardless of 2 how safe abortion is in the hands of an unskilled or 3 inexperienced physician, the risks could go up from 4 a aspiration procedure used to treat postabortion 5 complications? 6 A. I think it's reasonable to -- to infer 7 that. I think you asked -- to assume that, whatever 8 your word was. 9 Q. I don't remember my word, but you agree 10 with the statement I made? 11 A. Yes, but I also know that there are a 12 lot of clinicians who have been trained to do 13 aspiration procedures who don't have the level of 14 experience that I have who are more than capable of 15 doing it safely because an aspiration procedure is 16 such a safe and simple procedure to do. 17 Q. Provided there has been adequate 18 training, skill -- 19 A. Provided there has been adequate 20 training -- 21 (Court reporter interruption.) 22 Q. (By Mr. Sauer) Adequate skill, 23 training, and experience, correct? 24 A. I agree with that. 25 Q. And then are there surgical</p>	<p style="text-align: right;">Page 256</p> <p>1 cavity such as a pelvic abscess, that might have to 2 be drained. 3 That might even be done by a 4 nonsurgeon, but an interventional radiologist, for 5 instance, might put an ultrasound-guided needle into 6 the fluid collection and place a drain in that 7 location. 8 Q. Would a surgical intervention of that 9 nature be one that an ER doctor is trained to 10 perform? 11 A. ER doctors are trained to do 12 ultrasound-guided aspiration, that's correct, but to 13 place a drain I can't speak to. I don't know if 14 that's something they're trained to do. 15 Q. Is that something that OB/GYNs would be 16 ordinarily trained to do? 17 A. Depends on their training. Sometimes. 18 But so would a radiologist and many other types of 19 physicians. 20 Q. Lower down in the same paragraph in 21 this document, document 20 -- or Exhibit 20 it says 22 (quote as read): 23 Even less experienced operators 24 may perform several hundred cases 25 before encountering a serious</p>

64 (Pages 253 to 256)

Page 281	Page 283
<p>1 A. I -- yes.</p> <p>2 Q. Okay. I mean, you don't dispute that</p> <p>3 RHS did not file a single abortion complication</p> <p>4 report in 15 years for postabortion complications</p> <p>5 with DHSS, correct?</p> <p>6 A. In the time that I've been at RHS as</p> <p>7 their medical director my understanding is that</p> <p>8 we've been -- that we have not and that was not in</p> <p>9 effect.</p> <p>10 Q. So your understanding is that you were</p> <p>11 not legally required to file abortion complication</p> <p>12 reports with DHSS while you have been medical</p> <p>13 director of RHS?</p> <p>14 A. As you described, that came up during</p> <p>15 the other case, and there was a memo published by</p> <p>16 the director of DHSS on May 31st that made it clear</p> <p>17 that that law is in effect, but prior to that time I</p> <p>18 was told that that was not an enforced area of the</p> <p>19 law.</p> <p>20 Q. You were told by whom?</p> <p>21 A. The folks at Planned Parenthood.</p> <p>22 Q. The folks at Planned Parenthood?</p> <p>23 A. At Planned Parenthood.</p> <p>24 Q. Who in particular told you that that</p> <p>25 law was not in effect?</p>	<p>1 whom had participated in annual inspections from the</p> <p>2 health department, all of whom had been involved in</p> <p>3 ensuring the induced termination of pregnancy</p> <p>4 reports are reported, and so I had no reason to</p> <p>5 question their understanding because they've been</p> <p>6 through these state-level inspections and other</p> <p>7 things and it has never been discussed or brought up</p> <p>8 as an area of concern.</p> <p>9 Q. So do you specifically recollect having</p> <p>10 conversations with all four of those individuals?</p> <p>11 A. No. You asked me who are the human</p> <p>12 beings. I said that's probably who it would be plus</p> <p>13 a few others.</p> <p>14 Q. Do you remember any specific</p> <p>15 conversation with another human being where that</p> <p>16 person advised you that it was not required to file</p> <p>17 complication reports?</p> <p>18 THE WITNESS: Can I ask you a question?</p> <p>19 MR. SAUER: That's fine with us.</p> <p>20 THE WITNESS: I know he has a question</p> <p>21 on the table, but can I ask you a question?</p> <p>22 MR. HAAR: Sure.</p> <p>23 (WHEREIN, a recess was taken from</p> <p>24 2:11 p.m. to 2:25 p.m.)</p> <p>25 Q. (By Mr. Sauer) When before we broke</p>
Page 282	Page 284
<p>1 A. I don't remember, but I -- as I said,</p> <p>2 I've been medical director since August 2009. I've</p> <p>3 read the statutes covering abortion care in my</p> <p>4 physician's training reading law and asked the</p> <p>5 regulatory folks at RHS and the higher-ups</p> <p>6 throughout the organization and was told that it</p> <p>7 wasn't required, and that was true of other</p> <p>8 healthcare facilities where I had provided</p> <p>9 postabortion care, and there have been a number of</p> <p>10 conversations as you've pointed out about this issue</p> <p>11 that resulted in the Dr. Williams memo May 31st, and</p> <p>12 since that time we have been reporting those.</p> <p>13 Q. So you have taken steps since May 31st</p> <p>14 of 2017 to ensure that the RHS facility is filing</p> <p>15 postabortion complication reports?</p> <p>16 A. Yes.</p> <p>17 Q. You referred in your answer a moment</p> <p>18 ago to higher-ups and regulatory personnel who</p> <p>19 advised you that it was not required to file those</p> <p>20 reports. Who are those human beings?</p> <p>21 A. Our previous CEO, Paula Gianino. Our</p> <p>22 current CEO, Mary Kogut. Our lead clinician Suzy</p> <p>23 Bender and our quality assurance person Caroline</p> <p>24 Spencer are at least four of them.</p> <p>25 There may have been others, but all of</p>	<p>1 for you to talk with counsel --</p> <p>2 MR. HAAR: Yeah.</p> <p>3 Q. (By Mr. Sauer) -- my understanding was</p> <p>4 I had asked you about with whom you had discussed</p> <p>5 the conclusion that RHS was not required to file</p> <p>6 abortion complication reports with DHSS. You recall</p> <p>7 that?</p> <p>8 A. Yes.</p> <p>9 Q. And I understand from an off-the-record</p> <p>10 conversation with your attorney that there's going</p> <p>11 to be an assertion of attorney-client privilege as</p> <p>12 to those conversations?</p> <p>13 MR. HAAR: Let me state that it was</p> <p>14 clear after discussing this issue with</p> <p>15 Mr. Eisenberg -- Dr. Eisenberg that these</p> <p>16 conversations in large part, in totality again were</p> <p>17 in the context of soliciting advice, collecting</p> <p>18 information, consultation with counsel, and</p> <p>19 therefore under the circumstances I believe I'm</p> <p>20 going to have to instruct him not to answer.</p> <p>21 Q. (By Mr. Sauer) So following up on what</p> <p>22 your attorney stated, is it your testimony that all</p> <p>23 the conversations you had on this topic were either</p> <p>24 conversations with counsel or conversations that you</p> <p>25 had for the purpose of seeking advice of counsel?</p>

71 (Pages 281 to 284)

Page 289	Page 291
<p>1 regardless of which type they wanted. So I can't</p> <p>2 speak to that, no.</p> <p>3 Q. So you don't have any firsthand</p> <p>4 knowledge of, you know, situations where a woman</p> <p>5 might have surgical abortion available nearby, but</p> <p>6 because of her preference for medication abortion</p> <p>7 might be willing to travel significant distances to</p> <p>8 get it? That's something that you just don't have</p> <p>9 any knowledge of?</p> <p>10 A. I do know that there are women in the</p> <p>11 state of Missouri since the new law went into effect</p> <p>12 that makes it harder for women to be able to obtain</p> <p>13 medication abortion who might choose to go to</p> <p>14 Illinois for medication abortion services.</p> <p>15 Q. Have you had any patients who are from</p> <p>16 the Columbia area who have come to St. Louis for</p> <p>17 medication abortion rather than getting surgical</p> <p>18 abortion in Columbia?</p> <p>19 A. Oh, yeah, that is true. And since the</p> <p>20 abortion facility license was granted in Columbia</p> <p>21 where they can only now do surgical abortions, this</p> <p>22 past week I consented a woman who is going to be</p> <p>23 getting a medication abortion this week who</p> <p>24 preferred a medication abortion, but she drove from</p> <p>25 Columbia to get the medication abortion at RHS.</p>	<p>1 perform both surgical and medication abortions at</p> <p>2 the Springfield facility?</p> <p>3 A. I do recall that.</p> <p>4 Q. And in fact, that may be in some of</p> <p>5 your affidavits or declarations, correct?</p> <p>6 A. I believe so.</p> <p>7 Q. So at some time within the past year</p> <p>8 there was a plan for Springfield to do surgical</p> <p>9 abortions as well as medication abortions, correct?</p> <p>10 A. If we can get the appropriate</p> <p>11 licensure.</p> <p>12 Q. Has -- has RHS given up that plan? Are</p> <p>13 they now only seeking medication abortions to do</p> <p>14 medication abortions in Springfield?</p> <p>15 A. No, I don't believe so.</p> <p>16 Q. So your understanding is that RHS is</p> <p>17 seeking authorization to do both surgical and</p> <p>18 medication abortions in the Springfield facility?</p> <p>19 A. My understanding is that RHS initially</p> <p>20 applied to do medication abortions only, and that we</p> <p>21 would eventually be applying to do surgical</p> <p>22 abortions as well, but I don't know what those</p> <p>23 timelines were at the time the application was made</p> <p>24 or what they are now.</p> <p>25 Q. Why is medication abortion on a more</p>
Page 290	Page 292
<p>1 Q. And do you -- I guess do you have any</p> <p>2 way of knowing how many women who are getting</p> <p>3 surgical abortions in Columbia would have preferred</p> <p>4 medication abortion had it been available in</p> <p>5 Columbia, but took surgical abortion because it was</p> <p>6 nearby?</p> <p>7 A. I don't know because I don't work in</p> <p>8 Columbia.</p> <p>9 Q. And you're aware of at least one</p> <p>10 patient who traveled to St. Louis to get medication</p> <p>11 abortion because of that preference rather than</p> <p>12 obtaining surgical abortion in Columbia?</p> <p>13 A. I'm aware of at least one.</p> <p>14 Q. Are you aware of any -- are you aware</p> <p>15 of more than one?</p> <p>16 A. I would guess that is -- that is not an</p> <p>17 uncommon experience, but I don't have any personal</p> <p>18 knowledge beyond that one.</p> <p>19 Q. And you -- we talked earlier about the</p> <p>20 earlier case involving the challenge to the</p> <p>21 ambulatory, surgical, and hospital privileges</p> <p>22 requirements, correct?</p> <p>23 A. We did.</p> <p>24 Q. And in that case do you recall that RHS</p> <p>25 put in evidence indicating that it would like to</p>	<p>1 accelerated timeline?</p> <p>2 A. For a number of reasons. Number one</p> <p>3 is, as we've talked about, there's a growing patient</p> <p>4 demand for medication abortion. Majority of women</p> <p>5 with whom we care for are less than ten weeks and</p> <p>6 would therefore be eligible for medication abortion.</p> <p>7 The amount of capital expense</p> <p>8 associated with performing medication abortions now</p> <p>9 that the ASC rules do not apply is excessively</p> <p>10 lower -- exceedingly lower I should say than doing</p> <p>11 surgical abortions.</p> <p>12 So for instance, I mentioned the</p> <p>13 Berkeley suction machine as an example of a piece of</p> <p>14 equipment that is necessary for miscarriage</p> <p>15 management. That would be a piece of equipment that</p> <p>16 would be necessary to have on hand to routinely</p> <p>17 provide medication -- or I'm sorry, surgical</p> <p>18 abortion services.</p> <p>19 Q. Is that an expensive piece of</p> <p>20 equipment?</p> <p>21 A. I don't know what one costs.</p> <p>22 Q. But suffice to say that there are some</p> <p>23 startup costs to doing surgical abortion that you</p> <p>24 don't have with medication abortion, which just</p> <p>25 involves pills?</p>

73 (Pages 289 to 292)

Page 293	Page 295
<p>1 A. That is correct.</p> <p>2 Q. And your testimony is that is one</p> <p>3 reason why -- that is one reason why RHS is seeking</p> <p>4 authorization to do medication abortion first for</p> <p>5 the Springfield facility?</p> <p>6 A. That is correct. It would be a phased</p> <p>7 approach. Some of the other reasons are -- have to</p> <p>8 do with staff training, for example.</p> <p>9 Q. Tell me about that.</p> <p>10 A. Staff who are assisting at the time of</p> <p>11 surgical abortion in the procedure room or exam room</p> <p>12 don't need the same level of training as staff who</p> <p>13 are doing intake and counseling with a patient</p> <p>14 regarding medication abortion and the actual</p> <p>15 abortion is happening at home with that woman taking</p> <p>16 medication the next day.</p> <p>17 Q. So there is less staff training that</p> <p>18 has to happen to do medication abortion compared to</p> <p>19 surgical abortion?</p> <p>20 A. Yes.</p> <p>21 MR. SAUER: Let me give you this</p> <p>22 document, Exhibit 23?</p> <p>23 COURT REPORTER: 23.</p> <p>24 MR. SAUER: 23.</p> <p>25 MR. HAAR: How much more do you think</p>	<p>1 and some highlighting and redlining and things of</p> <p>2 that nature, correct?</p> <p>3 A. It does.</p> <p>4 Q. Okay. But you don't -- this is not a</p> <p>5 document you were involved in preparing?</p> <p>6 A. No.</p> <p>7 Q. Let me direct your attention to</p> <p>8 paragraph five. Here it says (quote as read):</p> <p>9 Once the EMS has arrived,</p> <p>10 identify the hospital emergency</p> <p>11 department they're planning to</p> <p>12 transfer the patient to and have</p> <p>13 the clinician providing care call</p> <p>14 report to the ER triage and/or</p> <p>15 charge nurse.</p> <p>16 Correct?</p> <p>17 A. It states that.</p> <p>18 Q. Is that what you do, because my</p> <p>19 understanding -- is that what is done by Planned</p> <p>20 Parenthood in Springfield in situations where there</p> <p>21 is an emergency? Because my understanding from your</p> <p>22 earlier testimony was that you did not initiate</p> <p>23 contact until there was a clear authorization from</p> <p>24 the patient for privacy reasons?</p> <p>25 A. In this situation as it states, once</p>
Page 294	Page 296
<p>1 you have, John?</p> <p>2 MR. SAUER: I'm very near done, but</p> <p>3 Richard wants to ask some questions.</p> <p>4 THE WITNESS: I've made arrangements.</p> <p>5 As long as we have a hard stop at three.</p> <p>6 MR. SAUER: I'll probably be done by</p> <p>7 then.</p> <p>8 THE WITNESS: Okay.</p> <p>9 MR. SAUER: I'm not promising.</p> <p>10 THE WITNESS: I understand.</p> <p>11 (WHEREIN, Exhibit 23, PPSLR</p> <p>12 Springfield/Joplin EMS Call Communication Plan For</p> <p>13 Staff, was marked for identification by the Court</p> <p>14 Reporter.)</p> <p>15 Q. (By Mr. Sauer) Do you recognize this</p> <p>16 document?</p> <p>17 A. No, not on first glance.</p> <p>18 Q. So at the top it says PPSLR</p> <p>19 Springfield/Joplin EMS Call Communication Plan For</p> <p>20 Staff. Correct?</p> <p>21 A. That's what it states.</p> <p>22 Q. And it appears to be a draft document</p> <p>23 that was updated on October 31st of 2016, correct?</p> <p>24 A. That's what it appears.</p> <p>25 Q. And it's got some comments on the side</p>	<p>1 the hospital emergency department has been</p> <p>2 identified we know what the hospital is they're</p> <p>3 going to. So in order to protect patient</p> <p>4 confidentiality we do not call hospitals in advance</p> <p>5 unless the patient has given us permission and says</p> <p>6 I'm going to hospital A and then we'll call hospital</p> <p>7 A.</p> <p>8 But if we call an ambulance for an</p> <p>9 emergent situation and we need to call report to the</p> <p>10 emergency room physicians who will be treating that</p> <p>11 emergent situation, we generally know as explained</p> <p>12 here what hospital that ambulance is going to arrive</p> <p>13 at and that's part of continuity of care, and we</p> <p>14 don't necessarily need that patient's permission.</p> <p>15 Q. Okay. So there's a distinction between</p> <p>16 a situation where you're calling 911 from your</p> <p>17 facility because there's an emergency that's</p> <p>18 happening at your facility and a situation where the</p> <p>19 patient is called in and she's being directed to go</p> <p>20 to the nearest emergency room?</p> <p>21 A. Right. And if she -- and if I call</p> <p>22 whatever emergency room she identifies and she ends</p> <p>23 up not going, now I've just disclosed a bunch of</p> <p>24 healthcare information about her and she's not even</p> <p>25 their patient.</p>

APPEARANCES

For Plaintiffs:

MR. RICHARD MUNIZ
Planned Parenthood Federation of
America
1110 Vermont Avenue, NW, Suite 300
Washington, DC 20005

MS. JENNIFER R. SANDMAN
MS. MAITHREYI RATAKONDA
Planned Parenthood Federation of
America
123 William Street, 9th Floor
New York, NY 10038

MR. ARTHUR A. BENSON
Arthur Benson & Associates
4006 Central Ave.
Kansas City, MO 64111

For the State
Defendants:

MR. DEAN JOHN SAUER
MS. EMILY A. DODGE
Missouri Attorney General's Office
P.O. Box 899
Jefferson City, MO 65102

For Defendant Jean
Peters Baker:

MS. ASHLEY N. GARRETT
Jackson County Counselor's Office
415 East 12th Street, Suite 200
Kansas City, MO 64106

For Defendant Dan
Patterson:

MR. TIMOTHY MYERS
Greene County Prosecutor's Office
1010 N. Boonville
Springfield, MO 65802-3851

1 APRIL 3, 2018

2 - - -

3 THE COURT: Good morning. We're here in the case of
4 Comprehensive Health of Planned Parenthood Great Plains, et
5 al., versus Randall Williams, et al., Case No. 17-4207. Could
6 counsel please enter their appearance?

7 MR. BENSON: Arthur Benson for plaintiffs, and three
8 pro hac vice lawyers are here: Jennifer Sandman, Richard
9 Muniz, and Mai Ratakonda.

10 THE COURT: Thank you.

11 MR. SAUER: John Sauer on behalf of the state
12 defendants, Hawley and Williams.

13 MS. DODGE: And Emily Dodge for the state
14 defendants, Your Honor.

15 THE COURT: Thank you. Well, we're obviously here
16 today for a hearing on the --

17 MR. MYERS: Your Honor?

18 THE COURT: Yes. Oh, I'm sorry.

19 MR. MYERS: I'm sorry, Your Honor. Todd Myers on
20 behalf of Defendant Dan Patterson.

21 THE COURT: Yes.

22 MS. GARRETT: Ashley Garrett on behalf of Travis
23 Willingham on behalf of Jackson County.

24 THE COURT: Okay, thank you, and welcome. And I
25 apologize. I saw you back there, and then it didn't even

1 register.

2 We're obviously here today on the plaintiffs' motion
3 for preliminary injunction. Before we get started, I want to
4 first compliment the parties on the briefing on this issue.
5 The briefing is some of the best that I've read, and I
6 wholeheartedly appreciate that. I will tell you that if we had
7 this type of briefing in all cases, we wouldn't have page
8 limits because there would be no need for page limits. So I
9 appreciate it. I know that that type of briefing comes with a
10 lot of hard work and revising and editing, and so I appreciate
11 that because it made my job in reading the briefs much, much
12 more -- much easier and much more enjoyable.

13 As a result, I don't really have any questions. I
14 do think that I understand the parties' positions, and I
15 personally don't feel the need for any type of opening
16 statement. I know that we're limited in time. If the parties
17 have something that they wish to make a record on, I'm more
18 than happy to hear it, but I don't see the need for any type of
19 opening statements.

20 Before we get started, however, I do have one quick
21 issue or question that I want to make sure the parties don't
22 have any need to make a record on, and that's the
23 jurisdictional issue that the defendants raised regarding
24 whether or not there was standing at the time that the
25 complaint was filed.

1 Mr. Sauer, I will tell you that I'm not persuaded by
2 the state's argument that there currently isn't standing. I
3 understand your arguments that they haven't made a sufficient
4 attempt to find a physician who would meet the requirements,
5 but I am most persuaded by the fact that they've made
6 application and the application was denied.

7 And so it seems to me that one answer is to take an
8 hour-and-a-half break and let them go down and file a new
9 petition and resume the hearing here shortly. That doesn't
10 seem to be to be the most efficient, given the circumstances
11 and the fact that we're here today.

12 Do you have any other argument or thoughts on how
13 you'd like to proceed, given that mindset?

14 MR. SAUER: Your Honor, as I understand the Court's
15 question, the Court believes that we have raised a valid
16 argument as to whether or not there was jurisdiction at the
17 time the complaint was filed.

18 THE COURT: Well, an argument. I don't know that
19 it's valid. I don't know that I -- I most certainly am not
20 ruling on the fact that they don't have standing. I think that
21 there's some arguments otherwise. But it seems to me that that
22 would be one way for them to address it.

23 MR. SAUER: So I understand the Court is inclined to
24 rule, or anticipates ruling that the conduct of the plaintiffs
25 since the filing of the petition would be sufficient to create

1 a controversy, a --

2 THE COURT: Yes, I most certainly do believe that
3 statement to be accurate.

4 MR. SAUER: Understood. And so if the Court is not
5 deciding whether or not it would rule on if standing were
6 absent at the time the case was filed, but that if the Court
7 were to rule that way, we take the position that the only thing
8 the Court would have the power to do would be to dismiss the
9 case for lack of jurisdiction. And if the Court is not ruling
10 on that issue at this time, I don't see any reason why we
11 shouldn't go forward with this hearing now.

12 We just await the Court's ruling on that
13 jurisdictional argument and see what's appropriate at that
14 time. And, obviously, we do believe and we do request that the
15 Court dismiss the entire case for lack of jurisdiction on both
16 grounds, you know, lack of Article III standing at the time the
17 case was filed, and failure to cure that, even if legally that
18 could be cured, which we believe it cannot. Even if it could
19 be cured, the efforts taken since then would be insufficient to
20 cure it, even if curing it was possible.

21 If the Court is not granting either of those motions
22 at this time, I don't think -- I don't see any reason the Court
23 can't go forward with this hearing today.

24 THE COURT: Okay. Thank you. And I think in the
25 initial hearing, Mr. Muniz, you were lead counsel. Does that

1 remain the case today?

2 MR. MUNIZ: Yes, Your Honor.

3 THE COURT: Do you have any thoughts or argument
4 you'd like to make on this issue?

5 MR. MUNIZ: Yes, Your Honor, just briefly. As Your
6 Honor is aware, this argument first came up in the state's
7 brief that was filed on Thursday, so we would appreciate an
8 opportunity to respond in writing, as well.

9 But as Your Honor has indicated, we believe that we
10 have standing, and just to note that we filed an action also
11 against Senate Bill 5, and so far it's required us to comply
12 with the department's regulations. And as of the bill's
13 effective date, October 24th, we certainly had standing because
14 the bill prevented us from -- prevented plaintiffs from
15 providing medication abortions.

16 So I think the Court is correct that we had standing
17 as of the date of filing; and if the state were correct, as
18 Your Honor was sort of indicating, we could just amend that,
19 and I do agree that -- with the state that it's not efficient
20 that we take a break now to do that, that we continue with the
21 hearing and proceed.

22 THE COURT: Okay. Any other record that any party
23 would like to make on any issue before we start hearing
24 evidence in this case?

25 MR. SAUER: No, Your Honor.

1 MR. MUNIZ: No, Your Honor.

2 THE COURT: Okay. Then you may proceed. And I
3 think maybe your co-counsel has --

4 MS. SANDMAN: Your Honor, if I could confer with my
5 colleague.

6 THE COURT: Sure.

7 (So done.)

8 MR. MUNIZ: Your Honor, just briefly on the --
9 whether or not we should file an amended complaint, perhaps we
10 can seek leave from the Court, in the event that the state is
11 correct that we did not have standing, that we could file an
12 amended complaint today by the end of business. That way,
13 there's no need for a dismissal and refiling of a preliminary
14 injunction motion.

15 THE COURT: Mr. Sauer, I assume you oppose that?

16 MR. SAUER: We would, Your Honor. If you've read
17 our brief, you know that we've taken the position that a defect
18 in jurisdictional facts as opposed to jurisdictional defect in
19 pleading cannot be cured by amended complaint. In other words,
20 if they are planning to say there are new facts now that
21 establish Article III intervening facts, that would be
22 insufficient. In fact, the Court would have to dismiss the
23 entire case, and it's our position the Court should dismiss the
24 entire case, and they would have to start over from ground
25 zero.

1 THE COURT: Why don't I take that issue under
2 advisement, and why don't we go ahead and take some evidence,
3 and I'll think about that.

4 MR. MUNIZ: Okay. Then plaintiffs would call Daniel
5 Grossman.

6 THE COURT: Sir, if you could please step forward
7 here to my right, your left, to be sworn.

8 - - -

9 DANIEL GROSSMAN,
10 being first duly sworn by the courtroom deputy, testified as
11 follows:

12 MR. MUNIZ: Your Honor, may I approach with your
13 exhibits?

14 THE COURT: Yes.

15 MR. MUNIZ: And witness exhibits?

16 THE COURT: Yes. And don't worry, either party,
17 about requesting permission to approach the witnesses. It's
18 not necessary under these circumstances.

19 MR. MUNIZ: Thank you, Your Honor.

20 - - -

21 DIRECT EXAMINATION

22 By Mr. Muniz:

23 Q. Dr. Grossman, will you introduce yourself to the Court,
24 please?

25 A. My name is Daniel Grossman.

1 Q. Dr. Grossman, in the binder in front of you, turn to
2 Exhibit 17, please. What is Exhibit 17?

3 A. This is a copy of my CV prepared in January of 2018.

4 Q. And does it appear to be an accurate copy as of January
5 2018?

6 A. Yes, it does.

7 MR. MUNIZ: Your Honor, Plaintiffs move Exhibit 17
8 into evidence.

9 MR. SAUER: No objection, Your Honor.

10 THE COURT: Exhibit 17 will be admitted.

11 (Plaintiffs' Exhibit 17 was admitted into evidence.)

12 BY MR. MUNIZ:

13 Q. Dr. Grossman, I don't want to spend too much time on
14 your credentials since the Court now has your CV, but would you
15 briefly describe your educational and professional history for
16 the Court?

17 A. Sure. I obtained a Bachelor of Science from Yale
18 University in molecular biophysics and biochemistry. I
19 obtained my Doctor of Medicine Degree from Stanford University.
20 I did my residency in obstetrics and gynecology at the
21 University of California at San Francisco. After that, I was
22 in practice for five years in San Francisco at St. Luke's
23 Women's Center. I was vice-chair of the Department of
24 Obstetrics and Gynecology there.

25 I then moved to Mexico City and worked with a

1 nonprofit research organization called the Population --

2 COURT REPORTER: I'm sorry, could you please slow
3 down?

4 THE WITNESS: I'm sorry.

5 A. I moved to Mexico City and worked with a nonprofit
6 research organization called the Population Council. I got
7 training in research methodology while I was there and led
8 several studies.

9 After that, I returned back to San Francisco and
10 worked with a nonprofit research organization called IBIS,
11 I-B-I-S, Reproductive Health. I did clinical work again at St.
12 Luke's, and I became a full professor at the University of
13 California, San Francisco, in the Department of Obstetrics,
14 Gynecology and Reproductive Sciences in 2015. I'm currently --
15 I'm there. I direct a research program within the OB-GYN
16 department called Advancing New Standards in Reproductive
17 Health, or ANSIRH.

18 BY MR. MUNIZ:

19 Q. And briefly describe your research activities.

20 A. I perform clinical and social science research related
21 to sexual and reproductive health, including contraception,
22 abortion, abortion access, medication abortion in particular.
23 Much of my work is focused in the United States, but I also do
24 work globally in Latin America and in Africa. One area of
25 focus of my work has been in Texas, and I'm an investigator

1 with the Texas Policy Evaluation Project.

2 Q. How many peer-reviewed articles would you say you've
3 published?

4 A. A little over 150.

5 Q. Do you have any editorial responsibilities?

6 A. I'm on the editorial board of the peer-reviewed journal
7 *Contraception*, which is a journal that focuses on reproductive
8 medicine.

9 Q. And do you have a role with the *Journal of Obstetrics*
10 *and Gynecology*?

11 A. I peer review for many journals, including *Obstetrics*
12 *and Gynecology*, which is the official journal of the American
13 College of Obstetricians and --

14 COURT REPORTER: Could you please slow down?

15 THE WITNESS: I'm very sorry.

16 A. It's the official journal of the America College of
17 Obstetricians and Gynecologists. I also perform peer review
18 for the *New England Journal of Medicine*, the *Journal of the*
19 *American Medical Association*, and several other journals.

20 Q. And have you published any research that is relevant to
21 the opinions you intend to offer today?

22 A. Yes, I have.

23 Q. Can you briefly describe the research?

24 A. I have performed research specifically on medication
25 abortion, on the safety of medication abortion, on the impact

1 of geographical barriers to access to abortion care, the effect
2 of increasing access to medication abortion, all those type
3 things.

4 Q. I'd like to now discuss your clinical experience. What
5 medical services do you provide?

6 A. I currently provide outpatient gynecology care,
7 including general gynecology, family planning, and abortion
8 services, at Zuckerberg San Francisco General Hospital in San
9 Francisco.

10 Q. And does that include treatment of complications for
11 those procedures?

12 A. Yes, it does.

13 Q. What methods of abortions do you provide?

14 A. I perform first-trimester medication abortion,
15 first-trimester and second-trimester surgical abortion.

16 Q. And you said you provide those services at Zuckerberg
17 San Francisco General Hospital. What's -- in what capacity?

18 A. I mean, I function as an attending physician there, so
19 I'm -- I'm in a teaching role, so I'm working with medical
20 students, residents, fellows in family planning. I also do
21 training of all of those trainees, as well as training advanced
22 practice clinicians to perform abortion care, usually with
23 nurse practitioners or certified nurse midwives.

24 Q. Have you previously testified as an expert?

25 A. Yes, I have.

1 Q. In what matters?

2 A. I was an expert in the case that became *Whole Woman's*
3 *Health v. Hellerstedt* in Texas which was around the impacts of
4 admitting privileges and the requirement that abortions be
5 performed in ambulatory surgical centers in Texas. I was
6 involved -- then I served in a case in North Dakota related to
7 restrictions on medication abortion. I've been a witness in a
8 case in Mississippi that centered around, again, admitting
9 privileges and a requirement that abortion providers be
10 board-certified or board-eligible obstetrician-gynecologists.

11 Q. Briefly, what were the opinions you offered in the
12 Texas case?

13 A. The Texas case was focused largely on my research that
14 I performed with the Texas Policy Evaluation Project where we
15 found that after House Bill 2, or HB2, went into effect, which
16 the main effect of that was -- the main provision that was at
17 issue was the admitting privileges. We documented that about
18 half of the clinics closed in the state, and during the first
19 six months after the law went into effect, there was a 13
20 percent decline in the number of abortions performed, there was
21 a 70 percent decline in the number of medication abortions.
22 Medication abortions were a small -- there was a small,
23 insignificant increase in second-trimester abortions.

24 Q. Based on your experiences, your training, education,
25 knowledge of the literature, are you familiar with the norms

1 and standards for providing gynecologic services, including
2 abortions in outpatient settings, including how complications
3 from those procedures are managed?

4 A. Yes, I am.

5 Q. And based on your experiences, training, education, and
6 knowledge of the literature, are you familiar with the research
7 on effects -- on the effects abortion restrictions have on
8 access to abortion?

9 A. Yes, I am.

10 MR. MUNIZ: Your Honor, plaintiffs move to qualify
11 Dr. Grossman as an expert in the areas of obstetrics and
12 gynecology and the provision of abortion care, including
13 treatment of abortion complications, as well as the burdens
14 abortion restrictions have on abortion access.

15 THE COURT: Any objection?

16 MR. SAUER: No objection to the first two areas that
17 he objected [sic] to. I'm not sure what it means to qualify
18 someone as an expert in --

19 COURT REPORTER: I'm sorry, I can't hear you.

20 MR. SAUER: I'm not sure what it means to qualify an
21 expert witness as an expert in burdens on access, so I would
22 object to that particular aspect of their offering him as an
23 expert.

24 THE COURT: Okay. The objection will be overruled,
25 and the doctor will be considered an expert as requested by

1 counsel for plaintiffs.

2 MR. MUNIZ: Thank you, Your Honor.

3 BY MR. MUNIZ:

4 Q. Dr. Grossman, I'd now like to turn to your opinions in
5 this matter. Directing your attention to Exhibit 16, and I
6 realize this is not convenient, but also Exhibit 18. What are
7 these documents?

8 A. These are my expert report and my rebuttal report.

9 Q. And just to be clear, Exhibit 16 is your expert report,
10 Exhibit 18 is your rebuttal expert report, correct?

11 A. Correct.

12 Q. Do these documents accurately reflect your expert
13 opinions in this matter?

14 A. Yes.

15 MR. MUNIZ: Your Honor, plaintiffs move Plaintiffs'
16 Exhibits 16 and 18 into evidence.

17 MR. SAUER: No objection.

18 THE COURT: Exhibits 16 and 18 will be admitted.

19 (Plaintiffs' Exhibits 16 and 18 were admitted into
20 evidence.)

21 BY MR. MUNIZ:

22 Q. Dr. Grossman, what is your understanding of the
23 complication plan regulation in this case?

24 A. My understanding is that it would require the
25 plaintiffs to have a locally available OB-GYN available 24

1 hours a day, seven days a week, who would be available to
2 manage any complications related to medication abortion. My
3 understanding is that essentially the physician would need to
4 have admitting privileges at a local hospital, as well.

5 Q. And what is your expert opinion of this law?

6 A. That this would have no medical benefit to women and
7 that, if it is not possible for plaintiffs to arrange such to
8 comply with the regulation, that it will continue to restrict
9 access to medication abortion in many parts of the state, and
10 that ultimately that harms women.

11 Q. Let's focus in now on medication abortion and safety.
12 What are the methods of abortion?

13 A. We generally talk about medication abortion in the
14 first trimester. There's also surgical abortion, which in the
15 first trimester can involve vacuum aspiration, and in second
16 trimester dilation and evacuation, or D&E.

17 Q. And can you describe what you mean by medication
18 abortion?

19 A. So generally when I'm talking about medication
20 abortion, I'm talking about use of a regimen that's been
21 approved by the FDA for use up through ten weeks of pregnancy,
22 counted from the last menstrual period.

23 So this involves two medications. The first is
24 mifepristone, which acts to block the progesterone receptor.
25 The effect of this medication is to make the lining of the

1 uterus very thin and essentially to kind of loosen the
2 connections between the pregnancy and the uterus. The second
3 medication is misoprostol, which is a prostaglandin. And like
4 all prostaglandins, it has an effect to cause the cervix to
5 start to open, soften, and cause contractions, and that expels
6 the pregnancy.

7 These medications are taken by the woman at home,
8 and she expels the pregnancy at home. And, really, the process
9 is indistinguishable from a natural miscarriage, except it's
10 being induced with medications.

11 Q. What's your understanding of the -- I'll withdraw the
12 question.

13 Can you describe the specific regimen of dosage that
14 women take?

15 A. So the regimen that is described in the FDA-approved
16 labeling of Mifeprex, which is the mifepristone product that's
17 registered in the U.S., and I believe it's the same regimen
18 that plaintiffs were using, involves mifepristone, 200
19 milligrams taken orally, and then that's followed 24 to 48
20 hours later by misoprostol, 800 micrograms, which is
21 administered buccally, which involves placing it in the cheek
22 pouch between the gums and the cheek, and it's allowed to
23 dissolve for 30 minutes and then swallowed. That's the
24 regimen.

25 Q. What about second-trimester medication abortion?

1 A. So these medications can be used later in the first
2 trimester, and also into the second trimester. These are
3 off-label uses, not -- these are not described in any
4 FDA-approved labeling of the drug.

5 They're different regimens that involve repeated
6 doses of misoprostol. This is generally done in an inpatient
7 setting like a hospital because it will take eight hours,
8 sometimes longer, after starting the misoprostol for the
9 expulsion to take place. But it's usually done in a facility,
10 people don't usually do this at home.

11 Q. Now let's talk about complications. Under the regimen
12 you just described, generally what's your understanding of the
13 safety of medication abortion?

14 A. Medication abortion is very safe. In fact, there was a
15 recent report that was issued by the National Academies of
16 Sciences, Engineering, and Medicine that reviewed the safety
17 and quality of care of abortion in the United States, including
18 medication abortion, and determined that abortion as currently
19 practiced in the United States, including medication abortion,
20 is very safe.

21 Q. What do you understand the occurrence of major
22 complications related to medication abortions?

23 A. I'm sorry, you're asking me what they are or what the
24 prevalence is?

25 Q. The prevalence.

1 A. Major complications with medication abortion is on the
2 order of .3 percent.

3 Q. What are they?

4 A. A major complication involves hospitalization, blood
5 transfusion, surgery, or death. And these are -- this is a
6 standard definition that has been -- that's used widely in the
7 literature.

8 Q. And so what are minor complications?

9 A. Minor complications are essentially anything other than
10 a major complication. So these might be adverse events that
11 might be treated in an outpatient setting and not require
12 treatment at a hospital. Even something, perhaps, treated in
13 an emergency department where the patient isn't admitted would
14 be considered a minor complication, again, if it doesn't
15 involve a blood transfusion, for example.

16 I will say that in -- particularly around medication
17 abortion, I think it's useful to recognize that some of these
18 adverse events are known and are expected to occur. So it's
19 known that approximately 2 to 5 percent, even, depending on the
20 gestational age of patients, will have an incomplete abortion,
21 and patients are given that information when they are
22 considering medication abortion, so they understand there's a
23 small chance that medications will not be effective and they
24 will need to have an aspiration procedure to complete the
25 procedure. So while these are technically put in the category

1 of a minor complication, they're really anticipated or expected
2 outcomes.

3 Q. And you mentioned the term incomplete abortion. What
4 is that?

5 A. An incomplete abortion is when essentially the
6 medications don't fully expel the uterine contents. It may be
7 that there's blood or a blood clot inside the uterus, there may
8 be pregnancy tissue still inside. The pregnancy is not
9 continuing to grow, but not all of the pregnancy has been
10 expelled from the uterus.

11 Q. What is an ongoing pregnancy?

12 A. An ongoing pregnancy is a pregnancy that is continuing
13 to develop, so the medications have been ineffective at
14 stopping the pregnancy to grow, and the pregnancy is continuing
15 to develop.

16 Q. And you stated the prevalence for incomplete abortion.
17 What is the prevalence for ongoing pregnancy?

18 A. It's less than 1 percent.

19 Q. Dr. Grossman, turn to Exhibit 31 in your binder,
20 please. What is this document?

21 A. This is a peer-reviewed article by a colleague,
22 Upadhyay, U-P-A-D-H-Y-A-Y.

23 Q. And would you turn to Page 178 of this document, Table
24 3, please? What does this table show?

25 A. So this shows the prevalence of major and minor

1 abortion-related complications by procedure type. And you can
2 see here for medication abortion, among over 11,000 patients,
3 the proportion or rate of major complications was 0.31 percent,
4 and for minor complications it was 4.88 percent.

5 MR. MUNIZ: Your Honor, plaintiffs move Exhibit 31
6 into evidence.

7 MR. SAUER: No objection.

8 THE COURT: Exhibit 31 will be admitted.

9 (Plaintiffs' Exhibit 31 was admitted into evidence.)

10 BY MR. MUNIZ:

11 Q. Dr. Grossman, will you turn to Exhibit 32, please? Do
12 you recognize this document?

13 A. I do.

14 Q. What is it?

15 A. This is the FDA-approved labeling for Mifeprex.

16 Q. When was this document approved by the FDA?

17 A. It was approved in March of 2016.

18 Q. And is this -- is this the label that you were
19 discussing earlier when you were referencing the medication
20 abortion regimen that you described?

21 A. Yes.

22 Q. And would you turn to Page 13, please? Table 3? What
23 does this table show?

24 A. This table summarizes the data from both U.S. trials
25 and non-U.S. trials of the outcomes with mifepristone

1 administered orally, followed by buccal misoprostol used
2 through 70 days gestation, or ten weeks.

3 Q. And what does it report for U.S. trials?

4 A. So among close to 17,000 patients, the complete
5 abortion rate was 97.4 percent, and 2.6 percent had a surgical
6 intervention, like a vacuum aspiration. Among those, 0.7
7 percent of the total had an ongoing pregnancy.

8 Q. What are the reasons for the surgical intervention --

9 COURT REPORTER: I'm sorry?

10 Q. What are the reasons for the surgical intervention that
11 are listed there?

12 A. So the reasons that are listed for surgical
13 intervention include ongoing pregnancy, medical necessity,
14 persistent or heavy bleeding after treatment, patient request,
15 or incomplete expulsion.

16 Q. And you said that of the 2.6 percent, there were 0.7
17 percent ongoing pregnancy. So if you exclude the ongoing
18 pregnancy, what's the percentage of medication abortion that
19 were not complete and you did surgical intervention?

20 A. It's about 1.9 percent.

21 MR. MUNIZ: And, Your Honor, plaintiffs move Exhibit
22 32 into evidence.

23 MR. SAUER: No objections.

24 THE COURT: Exhibit 32 will be admitted.

25 (Plaintiffs' Exhibit 32 was admitted into evidence.)

1 BY MR. MUNIZ:

2 Q. Do you have any reason to disagree with the statistics
3 reported on Table 3 of this FDA label?

4 A. I do not.

5 Q. And to put these complications in context, how do they
6 compare to the risk of carrying to term delivery?

7 A. So the risk of death with childbirth is 14 times higher
8 than the risk associated with abortion.

9 Q. Let's talk now about treatment of these complications.
10 First -- I think you mentioned, sir, when do medication
11 abortion complications occur?

12 A. Excluding the very rare cases of allergy to
13 mifepristone, which I've never seen in my career, all of the
14 complications of medication abortion occur after the woman goes
15 home.

16 Q. What are the most common symptoms that would prompt a
17 woman to seek medical attention?

18 A. The most common symptoms would be things like bleeding,
19 cramping or abdominal pain, fever, or possibly symptoms that
20 might be associated with continuing or ongoing pregnancy.

21 Q. And what are the common causes of those symptoms?

22 A. The common causes of heavy bleeding can be uterine
23 atony, for example, which is where the uterus just doesn't
24 contract fully and there can be bleeding. Incomplete abortion
25 or retained tissue can be a cause of bleeding. Obviously,

1 infection can be a reason why a woman has a fever, but not the
2 only reason. And, of course, an ongoing pregnancy may be the
3 reason why the woman continues to have pregnancy-related
4 symptoms.

5 Q. Are these symptoms typical of any medical situation
6 other than an abortion?

7 A. I think you're talking about the symptoms related to
8 complications really are identical to the symptoms that a woman
9 might have with complications after miscarriage, after a
10 spontaneous miscarriage.

11 Q. Generally speaking, what are the treatments for
12 medication abortion complications?

13 A. Well, for ongoing pregnancy, the most -- the vast
14 majority of women decide to proceed with termination, and that
15 may involve repeating the course of both medications, or it may
16 involve a vacuum aspiration.

17 In the case of incomplete abortion, which is really
18 the most common complication, there are really three treatment
19 options. One is expectant management, which is simply watching
20 and waiting. Again, this all depends upon the clinical
21 presentation of the patient, but assuming the patient is stable
22 and they're not bleeding heavily, there really are three
23 options.

24 The first is expectant management, simply watching
25 and waiting, and often the remaining tissue will come out. A

1 patient can be given an additional dose of the misoprostol, and
2 there is some published evidence that that is about 90 percent
3 effective to cause a complete expulsion of the remaining
4 tissue. And then the third option is to proceed with vacuum
5 aspiration.

6 Q. And who can provide these three management options you
7 described?

8 A. Well, I mean, a nurse practitioner or a physician could
9 evaluate the patient and, you know, again, if the patient is
10 clinically stable and essentially eligible for any of the three
11 treatments, a nurse practitioner could give the second dose of
12 misoprostol, could obviously counsel the patient about
13 expectant management.

14 In terms of performing a vacuum aspiration, any
15 physician or family medicine physician who has been trained in
16 OB-GYN. Other physicians such as internal medicine or a
17 pediatrician could have even been trained to do aspiration
18 abortions safely and effectively. And certainly advanced
19 practice clinicians, such as nurse practitioners, certified
20 nurse midwives, and physician assistants can also perform an
21 aspiration procedure.

22 Q. Aside from that last procedure, aspiration, what other
23 surgical procedures may be needed to treat a complication?

24 A. Very, very, very rarely there may be a need for another
25 invasive kind of surgery, such as a hysterectomy, for example,

1 in a serious infection where the uterus is severely infected.
2 In exceedingly rare case of uterine rupture where the
3 medications have caused the uterus to essentially rupture, it
4 may be necessary to, perhaps, perform exploratory laparoscopy
5 or laparotomy to, first of all, diagnose that and then treat
6 it.

7 But these are extremely rare. For example, in a
8 recent paper -- in my experience, I've never seen these. In a
9 recent paper that I published in the *Journal of Obstetrics and*
10 *Gynecology* looking at close to 20,000 patients who received
11 medication abortion in Iowa, there were no cases of these major
12 surgeries.

13 Q. And you said they were major surgeries. Where would
14 these surgical interventions be given?

15 A. These are procedures that would be done in a hospital
16 in an operating room.

17 Q. Let's talk now about the process of diagnosing and
18 treating complications. If a medication-abortion patient is
19 experiencing bleeding or cramping, or just has a concern,
20 what's the standard practice for how that is handled
21 procedurally?

22 A. Part of the standard practice is that, first of all,
23 the patient would be given written instructions about what to
24 expect with medication abortion, what symptoms are normal and
25 what symptoms would be concerning and that she should seek

1 attention for. And then it's also standard to have a telephone
2 line that's staffed by a nurse that's available 24 hours a day,
3 seven days a week, to be able to answer calls from patients who
4 have concerns about their symptoms.

5 Q. What's your understanding of plaintiffs' protocols --
6 plaintiffs' protocols in this regard?

7 A. Again, I believe it's consistent with what I just said.
8 I know that the Planned Parenthood, your medical standards and
9 guidelines require that the patients be given standard written
10 information, and I believe also that they have a 24-hour nurse
11 advice line.

12 Q. Who typically staffs that 24-hour number?

13 A. Again, I believe it's a nurse, and she has access to a
14 physician at all times in case she needs to consult with the
15 physician about a patient.

16 Q. So assume a patient calls the after-hours number and
17 describes the symptoms she's having. What happens next?

18 A. So the nurse would evaluate the patient's complaints
19 and, you know, perform some kind of triage. I would say
20 generally patients can be categorized into three different
21 groups. The majority of patients -- I should say that I'm not
22 aware of published literature on this, this is really more from
23 my experience.

24 But most patients who call with a complaint after
25 medication abortion are really having normal bleeding and pain

1 and may be given advice by the nurse. I review her -- the
2 printed information, but no further evaluation is really
3 needed.

4 Of course, you know, patients' symptoms in clinical
5 presentation will evolve over time. So, of course, the nurse
6 would be -- would review the warning signs again with the
7 patient and, of course, advise her that if her clinical picture
8 changes or her symptoms change, that she should call back. So
9 that's the first group. These are patients who have
10 essentially normal symptoms who don't need anything else.

11 There's another group of patients who have symptoms
12 that are outside of the norm and they need to be evaluated, but
13 they don't need to be evaluated urgently, and they might be
14 told to come -- scheduled to come at the next time that the
15 office is open, for example. So that might be in a day, that
16 might be the next morning. Again, the warning signs would
17 again be reviewed with the patient, and if her situation
18 changes, of course, she should be told to call back.

19 And then there's a third group of the patients who
20 clearly have very abnormal -- clearly abnormal symptoms and
21 need to be evaluated urgently.

22 Q. What happens in a situation when the triage nurse is
23 unsure where to categorize the patient?

24 A. Well, I think probably -- certainly if she or he is
25 unsure, and he probably -- probably most of the cases in the

1 second two categories that I mentioned, the nurse would be in
2 discussion with the physician to make sure that the course of
3 action is appropriate.

4 Q. So I want to discuss the second category that the
5 patient should be assessed in person but it's not urgent. In
6 what circumstances would that be the case?

7 A. So it might be bleeding that is persistent, sort of
8 been going on for more days than you might have expected, but,
9 again, not so heavy it needs to be evaluated immediately. It
10 might be a patient, for example, who didn't have bleeding at
11 all, but clearly had a documented intrauterine pregnancy at the
12 time of her first assessment, so we're not worried about an
13 ectopic pregnancy, but she didn't have any bleeding at all, you
14 might be concerned that she has an ongoing pregnancy. Again,
15 that's not urgent, it doesn't require urgent evaluation, but
16 she could be seen, you know, the next time the clinic is open.

17 Q. Where should those assessments occur?

18 A. I mean, these ones that are important but not urgent
19 usually could be -- would be scheduled at the health center or
20 clinic where the patient receives her treatment at the next
21 available appointment.

22 Q. At that next available appointment, a patient presents
23 and says she's complaining of cramping and bleeding. What
24 happens next?

25 A. The patient would have a history taken, she would have

1 a physical examination, it may involve a pelvic exam, depending
2 on -- of course, vital signs would need to be taken, an
3 ultrasound may be performed. And it depends, there may be
4 other laboratory tests that might be performed, as well.

5 Q. And who could do those various aspects of the
6 assessment?

7 A. Certainly a nurse practitioner could do all of them.

8 Q. Does an OB-GYN need to do the assessment?

9 A. No.

10 Q. After the assessment, what happens?

11 A. Then all the data would be reviewed, and it would be
12 determined whether the patient needs any kind of treatment.

13 Q. And if the patient -- if it's determined that the
14 patient has, for example, an incomplete abortion, what
15 treatments are available to her?

16 A. Again, as I said before, there really are three
17 treatment options available. Again, assuming that the patient
18 is stable, she's not bleeding heavily, and she just has
19 clinical and, perhaps, ultrasonographic findings consistent
20 with an incomplete abortion, in those cases, any of three
21 treatment options would be possible, including expectant
22 management, just watchful waiting, given an additional dose of
23 misoprostol, or proceeding to vacuum aspiration.

24 Q. And if she isn't stable, how should she be managed?

25 A. Again, it depends what you mean by stable. Obviously,

1 if she's very unstable, you know, concerning that she's going
2 into shock or something, then she would be transported to a
3 hospital for management. But if she's in -- but say the
4 bleeding is just so much that we don't think it's appropriate
5 to just watch and wait or even give medications, then we
6 proceed to vacuum aspiration.

7 Q. Does an OB-GYN need to personally treat all
8 complications?

9 A. No.

10 Q. Can a nurse practitioner do that? Excuse me. Yeah,
11 can a nurse practitioner provide any of those treatments?

12 A. I mean, a nurse practitioner could certainly counsel a
13 patient about options, give instructions about expectant
14 management, give the dose of misoprostol, again, in
15 consultation with a physician. I don't -- I mean, in many
16 settings, yes, a nurse practitioner can provide an aspiration
17 abortion -- that aspiration procedure, as well.

18 Q. Do you know about how many women would opt for that
19 repeat dose of misoprostol?

20 A. We don't have great data about that, but in one
21 published review article, approximately half of patients who
22 had an incomplete abortion and are offered a second dose of
23 misoprostol choose that option.

24 Q. What happens if a physician is not available that day
25 and the nurse practitioner determines the patient has an

1 incomplete abortion?

2 A. If a physician is not available, again, the nurse
3 practitioner could be in consultation with the physician
4 remotely by telephone to review the patient, the patient's
5 history, and clinical findings.

6 Again, if it's determined the physician agrees that
7 any of these three treatment options are appropriate, then they
8 can proceed with certainly the expectant management or
9 misoprostol on that date, and, if the physician weren't
10 available, with the nurse practitioner providing those
11 services.

12 If the aspiration -- if the patient were to opt for
13 an aspiration procedure and the physician isn't available and,
14 again, that's not urgently needed, it could be that the patient
15 could be scheduled for the next time the physician will be at
16 the health center to perform the aspiration. The patient could
17 be given the option to travel to where that physician is. If
18 it's more urgently needed, then the patient would have to be
19 referred to, for example, an emergency department to have the
20 procedure performed there.

21 Q. Is that referral to the emergency department that you
22 just described consistent with the standard of care for
23 outpatient gynecologic procedures?

24 A. Yes.

25 Q. Let's focus now on the last category, the patients who

1 call the after-hours number and who are determined to need an
2 immediate assessment. How often does that happen that the
3 patient calls and is referred for an immediate assessment?

4 A. It's quite rare. You know, I would say it's less than
5 half a percent of patients, according to -- that's my
6 experience. I would say it's rare, and that number really came
7 from our most recent published study from Iowa.

8 Q. What symptoms would prompt the triage nurse or the
9 on-call physician to refer the patient for immediate
10 assessment?

11 A. These would be symptoms like signs of heavy bleeding,
12 so we generally say that bleeding through two pads an hour for
13 two hours consecutively is too much bleeding, a fever over
14 100.4 degrees that is persistent for several hours, pain that
15 is not being adequately treated by the pain medications that
16 the patient is given, those are some of the symptoms that would
17 be worrisome enough to require urgent evaluation.

18 Q. What conditions are those symptoms indicative of?

19 A. Infection is the concern with the fever. The heavy
20 bleeding can be, again, related to uterine atony or incomplete
21 abortion.

22 Q. And again, where is she likely to be when she
23 experiences one of these complications?

24 A. She will be home.

25 Q. If it is after hours and the patient should be assessed

1 immediately in person, where should she be referred?

2 A. She should be told to go to her nearest emergency
3 department.

4 Q. And if during business hours?

5 A. Again, it might depend a little bit on her
6 symptomatology, but most of those patients would still be told
7 to come in to the clinic or health center to be evaluated.

8 Q. And if she can't get to the clinic, where should she be
9 referred?

10 A. Again, to her closest emergency room.

11 And I would just say a bit about that. It might
12 also depend what personnel resources are available at the
13 health center on those days when the health center is open. So
14 if the patient is complaining of a degree of heavy bleeding I
15 mentioned but there isn't someone available who can perform an
16 aspiration procedure at the clinic, then it would be
17 appropriate to have her go directly to the emergency
18 department.

19 Q. In your experience, do your patients always live near
20 the health center where they obtain the medications for a
21 medication abortion?

22 A. Where I'm practicing currently, many of our patients do
23 live nearby, but I have certainly practiced at other points in
24 other places where patients travel quite far to access
25 medication abortion.

1 Q. And is that consistent -- your past practice, is that
2 consistent with what you know about other parts of the country?

3 A. Yeah. We know that nationally 39 percent of women of
4 reproductive age live in a county without an abortion provider,
5 so those women have to travel. That proportion is a bit higher
6 in the Midwest. I think it's about 55 percent of women of
7 reproductive age live in a county without an abortion provider.

8 I believe it's even higher in Missouri, it's about
9 80 percent of women of reproductive age live in a county
10 without an abortion provider. In fact, if you look at sort of
11 the ratio of the number of abortion clinics to the population,
12 Missouri ranks quite low in terms of abortion access. I would
13 say it's probably among the worst ten since there are only two
14 clinics -- two facilities, or three, if you count the surgical
15 services provided in Columbia, for a population of about 1.2
16 million women of reproductive age.

17 Q. Thank you. Let's focus now on what happens if a woman
18 calls the 24/7 number and the nurse or physician assesses and
19 determines that she should go to the emergency department.
20 Walk us through that process. After that determination is
21 made, what contact, if any, should the abortion provider have
22 with the emergency department?

23 A. Generally, in my experience where I practice currently,
24 but I believe it's also true here, there wouldn't be sort of a
25 proactive outreach to the emergency department. The patient

1 would be told to go to her nearest emergency department, to
2 bring her printed information about the treatment that she
3 received, and then the patient would be told to call when she
4 gets to the emergency department. And then the 24-hour advice
5 nurse and/or the backup physician, the abortion provider, would
6 be able to be in contact with the emergency department and have
7 communication with them.

8 Q. And how should the abortion provider ensure she got the
9 care she needed at the emergency department?

10 A. Like I said, several ways. No. 1 is telling her that
11 she needs to go to the emergency department, giving her the
12 printed information that includes information about the
13 treatment that she was given. And then there's communication,
14 then, ideally once the patient arrives at the emergency
15 department and she contacts the abortion provider so the
16 abortion provider can be in communication with the emergency
17 department staff.

18 Q. In your experience, are emergency departments equipped
19 to manage medication abortion complications?

20 A. Yes, in my experience, they are equipped. These
21 complications are really identical to the complications with
22 spontaneous miscarriage, and emergency departments are equipped
23 to handle those.

24 Q. Are there any communications the -- I'll withdraw that.

25 What's your understanding of plaintiffs' protocols

1 regarding this communication?

2 A. The communication with the emergency department?

3 Q. Correct.

4 A. I believe it's similar to what I described. The
5 patient would be told to bring her printed information about
6 the treatment that she received with her; and when she arrives
7 at the emergency department, the patient would be encouraged to
8 call back to the nurse line and to her referring physician, who
9 then could be -- get informed consent for records release from
10 the emergency department, and then be in contact with the
11 emergency department to give information about the patient.

12 Q. If the patient presents at the emergency department
13 without the written paperwork and without a referral from the
14 emergency department, would she get the care she needs at the
15 emergency department?

16 A. I believe she would get the care that she needs.
17 Again, these are generally young, healthy patients who are
18 using a standard regimen that is included in the FDA-approved
19 labeling of the medication. So this is a very standard
20 treatment, and there's generally not much additional
21 information that would be transmitted from the abortion
22 provider to the emergency department.

23 So -- and, again, these complications are really
24 identical to the complications after spontaneous miscarriage.
25 So I believe that even if she didn't have all of the

1 information, the printed information about her treatment, that
2 she would receive the care that she needed.

3 Q. Okay. So she's arrived at the emergency department.
4 Let's talk about what happens next. Who would be -- who would
5 she first be assessed by at the emergency department?

6 A. It might vary in different settings, but in -- there
7 would be -- she would be evaluated by the emergency department
8 staff, which might involve a triage nurse, and a clinician of
9 some sort would evaluate her history and vital signs, physical
10 exam, and possibly laboratory tests, possibly an ultrasound.

11 Q. And if it's diagnosed that she has an incomplete
12 abortion, how would that be managed in the emergency
13 department?

14 A. Again, that would be managed by one of the three
15 treatments that we talked about earlier, including possibly
16 expectant management, just watchful waiting, an additional dose
17 of misoprostol, or an aspiration.

18 Q. When would an OB-GYN need to become involved?

19 A. You know, that really might vary, according to what the
20 emergency department's -- the clinician who is seeing the
21 patient, who is managing the emergency department, what their
22 comfort level is. So they might be in -- for example, in the
23 setting where I am, they might be in phone consultation with an
24 OB-GYN to kind of review the patient's clinical presentation
25 and determine which of those three treatment options is most

1 appropriate. They might ask if it's appropriate to give an
2 additional dose of misoprostol, confirm the dosage, and make
3 sure that she's going to have follow-up somewhere, and -- but
4 might not necessarily have to actually see the patient in
5 person.

6 Q. And is that -- is the situation you're describing any
7 different for a woman presenting with severe cramping?

8 A. No, it would be the same.

9 Q. How about signs of infection, how would that be
10 evaluated and managed?

11 A. Again, it depends on the severity of the infection.
12 Again, there might be -- it might involve phone consultation
13 with a specialist, which might be an OB-GYN, might even be an
14 infectious disease specialist. But, again, it would depend if
15 the patient needed to be admitted or not. But like I said,
16 again, requiring admission for infections is very, very rare
17 after medication abortion.

18 Q. And are the treatment options you've just described for
19 these conditions different for miscarriage than for medication
20 abortion complications?

21 A. No, they're the same.

22 Q. If a patient, whether experiencing miscarriage or a
23 complication from medication abortion, needed an aspiration
24 procedure, how is that handled in the emergency department?

25 A. Some emergency department physicians have been trained

1 in aspiration. In my experience, it's a small number. But,
2 obviously, if the emergency department clinician is trained,
3 she or he could do it. If -- they could have the OB-GYN who is
4 on call perform an aspiration. In the worst case where a
5 patient needs to -- there could also be a family medicine
6 physician who has been trained in aspiration who could be on
7 call who could perform that service.

8 In the extreme situation where there is none of
9 those at the emergency department, the EMTALA, the Emergency
10 Medical Treatment & Labor Act, would require them to stabilize
11 the patient and transfer her to a higher level of care to
12 receive that procedure.

13 Q. What if she had an ongoing pregnancy? Would that be
14 provided in the emergency department, that treatment?

15 A. I believe not in Missouri. She would have to be
16 referred to an abortion facility.

17 Q. In the case of an incomplete abortion, if she -- after
18 her assessment it's determined that she could wait for an
19 aspiration procedure for any number of days, is it possible
20 that she would be referred out, or would they provide the
21 procedure in the emergency department, the treatment?

22 A. Again, in my experience, if the patient is stable but
23 essentially needs to have an aspiration sometime soon, then she
24 would be advised to follow up, for example, with the person who
25 is -- the clinic who had started the medication abortion to

1 have that procedure done.

2 Q. At your hospital, if a patient presented at the
3 emergency department with a suspected medication abortion
4 complication, would the providing physician meet her at the
5 hospital?

6 A. Generally, no.

7 Q. Is that typical of the way adverse events after
8 outpatient gynecologic procedures are handled in emergency
9 departments?

10 A. In my personal experience, it is not typical for the
11 treating physician to always meet the patient in the emergency
12 department.

13 Q. In your opinion, would the regulation improve the
14 quality of care in medication-abortion patients seeking care in
15 an emergency department?

16 A. I do not believe it would improve quality of care.

17 Q. I understand you've taken call as an OB-GYN at a
18 hospital. What were some of the outpatient gynecologic
19 procedures that resulted in complications that you treated in
20 the emergency department?

21 A. We certainly saw patients who had complications after
22 abortion, after -- associated with miscarriage, after things
23 like a loop electrosurgical excision procedure, or LEEP,
24 L-E-E-P procedure, in the cervix. So a few examples.

25 Q. These outpatient gynecologic procedures, where are they

1 generally performed?

2 A. In an office.

3 Q. Generally speaking, what are the rates of complication
4 of these procedures compared to medication abortion?

5 A. They're comparable.

6 Q. Again, in your experience taking call as an OB-GYN at a
7 hospital, was it always the case that these patients were yours
8 or your partners' patients?

9 A. They were not always mine.

10 Q. Why would that be the case if you were treating those
11 patients and not the physician who provided the initial
12 procedure?

13 A. Sometimes it would be a physician who was associated
14 with the hospital, but for whatever reason wasn't available,
15 and it was easier for me to just take care of it since I was
16 the physician who was on call. Sometimes it was -- the patient
17 was from a physician from another hospital system where the
18 physician didn't have admitting privileges at this hospital,
19 and so the physician couldn't come, even if she or he wanted
20 to. It could be that the, which is quite common, is the
21 patient is just traveling and far away from the facility where
22 she had the procedure.

23 Q. Do you always communicate with the doctor who performed
24 the procedure?

25 A. I mean, usually we would try to communicate in some way

1 at the very least with the discharge summary after the patient
2 is being discharged or give the patient a copy of the discharge
3 summary, then, to bring with her. But I would say it is pretty
4 uncommon to actually be in direct communication always with the
5 treating physician at the time.

6 Q. Did that lack of direct communication hinder the care
7 the patient received?

8 A. No, I don't believe it did.

9 Q. Are you aware whether Missouri law requires providers
10 of these procedures to have local hospital privileges?

11 A. I believe it does not require them.

12 Q. How about a written agreement with an OB-GYN physician
13 to treat complications?

14 A. I don't believe it does.

15 Q. Any written arrangement with the physician to treat
16 complications from other outpatient gynecologic issues or
17 procedures?

18 A. No.

19 Q. What's your understanding of the availability of
20 medication abortion in Missouri?

21 A. It's very limited. It's only available in one facility
22 in St. Louis and one facility in Kansas City.

23 Q. So assume a woman from either the Columbia or
24 Springfield area obtains a medication abortion -- obtains the
25 medications, excuse me, from the health center in St. Louis or

1 Kansas City and she returns home to Columbia or Springfield and
2 experiences one of these rare complications we've been
3 discussing. How is that complication managed?

4 A. I believe it's managed in exactly the way I described,
5 where the patient would be assessed by the nurse on the hotline
6 or told to come in to the health center and be evaluated.
7 Again, if urgent treatment is needed, she would be sent to the
8 emergency department.

9 Q. From the perspective of patient safety, what's the
10 difference between this situation in which the patient travels
11 to obtain the medication and experiences any complications at
12 home in Columbia or Springfield and a woman being allowed to
13 obtain the medications locally in Columbia and Springfield?

14 A. I mean, in terms of the absolute medical safety, there
15 are -- it's the same, but I think her quality of care is really
16 diminished by the fact that she is having to drive so far to
17 access the medications in St. Louis or Kansas City. For some
18 women, that's going to be not possible to do that kind of
19 travel. For some women, it will end up delaying them in the
20 process, perhaps making medication abortion inaccessible
21 because of that delay.

22 And it's certainly not patient-centered, it's not
23 timely. It's also not equitable care because certainly lower
24 income people are more adversely affected by this requirement
25 to drive so far than are people who have more resources.

1 Q. I know you've reviewed plaintiffs' complication plans
2 for the Columbia and Springfield facilities. In your opinion,
3 are plaintiffs' plans consistent with the standard of care?

4 A. I believe they are.

5 Q. And why is that?

6 A. Again, because of everything that we just went through,
7 that it really would facilitate a timely and appropriate
8 evaluation of the management -- evaluation and management of
9 any complication.

10 Q. In your opinion, do plaintiffs' plans adequately ensure
11 patient health and safety?

12 A. Yes, they do.

13 Q. In your opinion, do plaintiffs' plans adequately ensure
14 continuity of care?

15 A. Yes, I believe they do.

16 Q. In your opinion, is the regulation necessary to protect
17 medication-abortion patients' health or safety?

18 A. No, I do not believe it protects a woman's health or
19 safety.

20 Q. Finally, in your opinion, will the regulation improve
21 the health or safety of medication-abortion patients?

22 A. No.

23 Q. Dr. Grossman, would you turn to Exhibit 40 in your
24 binder? Do you recognize this document?

25 A. Yes, I do.

1 Q. What is it?

2 A. It's a recent consensus study report that was issued by
3 the National Academies of Sciences, Engineering, and Medicine.

4 Q. And this is a report that you referenced earlier in
5 your testimony about the safety of medication abortion,
6 correct?

7 A. Yes.

8 Q. Is this the kind of document -- is this report the kind
9 of document that experts in your field review in forming your
10 opinions?

11 A. Yes. And, I mean, this very well-esteemed, highly
12 esteemed body reviewed similar kinds of data that I review in
13 my -- in this kind of work.

14 Q. What is the National Academies?

15 A. It's a nongovernmental institution that was established
16 in 1863 that advises on various issues related to science and
17 technology. It's a very highly esteemed group of experts.
18 It's very difficult to get into the National Academies. And --
19 yeah.

20 Q. And the cover page says that this is a consensus study
21 report. What is that?

22 A. So these are reports where they put together a
23 committee to address a specific question or sort of given a
24 specific task to address, and then they do a systematic review
25 of the literature. The study report is peer-reviewed, it's

1 very rigorous, and then their final statement from the report
2 is the official statement from the National Academies.

3 MR. MUNIZ: Your Honor, plaintiffs move Exhibit 40
4 into evidence.

5 MR. SAUER: No objection.

6 THE COURT: Exhibit 40 will be admitted.

7 (Plaintiffs' Exhibit 40 was admitted into evidence.)

8 BY MR. MUNIZ:

9 Q. Dr. Grossman, would you turn to Page S-12, please. S
10 comes before the numbers.

11 A. I'm not sure that I have the S ones.

12 Q. Exhibit 40?

13 A. Oh, Exhibit 40?

14 Q. Yes, Exhibit 40, Page S-12.

15 A. Oh, I'm sorry, Page S-12. Yes.

16 Q. Please read the second sentence in the first paragraph
17 there.

18 A. (Quoted as read.) "No special equipment or emergency
19 arrangements are required for medication abortions. Clinics
20 should provide a 24-hour clinician-staffed telephone line and
21 have a plan to provide emergency care to patients after hours."

22 Q. Do you agree with this statement?

23 A. I do.

24 Q. Why?

25 A. Because this is what the best available evidence

1 related to managing complications of medication abortion
2 indicates.

3 Q. Would you read the second paragraph there?

4 A. (Quoted as read.) "The committee found no evidence
5 indicating that clinicians that perform abortions require
6 hospital privileges to ensure a safe outcome for the patient.
7 Providers should, however, be able to provide or arrange for
8 patient access or transfer to medical facilities equipped to
9 provide blood transfusions, surgical intervention, and
10 resuscitation, if necessary."

11 Q. Do you agree with that statement?

12 A. I do.

13 Q. Why?

14 A. Again, because there's no evidence that requiring
15 hospital privileges improves the quality of care for patients.

16 Q. Just to be clear, in your opinion, do plaintiffs have
17 adequate plans to ensure continuity of care?

18 A. I believe they do.

19 Q. Then finally turn to Page S-8, please. In the
20 paragraph labeled Quality, will you read the fourth sentence
21 starting with "overall" to the end?

22 A. (Quoted as read.) "Overall, the committee concludes
23 that the quality of abortion care depends to a great extent on
24 where women live. In many parts of the country, state
25 regulations have created barriers to optimizing each dimension

1 of quality care. The quality of care is optimal when the care
2 is based on current evidence and when trained clinicians are
3 available to provide abortion services."

4 Q. In your opinion, does that statement apply to the
5 regulation that plaintiffs are challenging in this case?

6 A. I believe it does apply.

7 Q. Dr. Grossman, what is ACOG?

8 A. ACOG is the American College of Obstetricians and
9 Gynecologists.

10 Q. And what is the American College of Obstetricians and
11 Gynecologists?

12 A. It's the premier professional organization for
13 obstetricians and gynecologists. I think about 90 percent of
14 OB-GYNs, practicing OB-GYNs, are fellows or members of ACOG.

15 Q. Are you a member of ACOG?

16 A. I am.

17 Q. Do you have any other roles within ACOG?

18 A. I'm currently the Vice-Chair of the Committee on Health
19 Care for Underserved Women, and I will be Chair of that
20 committee starting next month.

21 Q. Do other experts in your field rely on ACOG's
22 statements or guidance in forming their opinions?

23 A. Yes, they do.

24 Q. Please turn to Exhibit 38 in your binder. Do you
25 recognize this document?

1 A. I do.

2 Q. What is it?

3 A. It is ACOG's statement on state legislation requiring
4 hospital admitting privileges for physicians providing abortion
5 services.

6 MR. MUNIZ: Your Honor, plaintiffs move Exhibit 38
7 into evidence.

8 MR. SAUER: No objection.

9 THE COURT: Exhibit 38 will be admitted.

10 (Plaintiffs' Exhibit 38 was admitted into evidence.)

11 MR. MUNIZ: Thank you.

12 BY MR. MUNIZ:

13 Q. Dr. Grossman, please read the first sentence.

14 A. (Quoted as read.) "The American College of
15 Obstetricians and Gynecologists, or ACOG, believes physicians
16 who provide medical and surgical procedures, including abortion
17 services, in their offices, clinics, or freestanding ambulatory
18 care facilities should have a plan to ensure prompt emergency
19 services if a complication occurs and should establish a
20 mechanism for transferring patients who require emergency
21 treatment. However" -- oh, I'm sorry.

22 Q. Excuse me. Does this statement suggest medication
23 abortion providers should have a written agreement with an
24 OB-GYN to treat complications?

25 A. No, it does not.

1 Q. What's ACOG's position, if any, on state laws requiring
2 hospital admitting privileges for abortion services?

3 A. They oppose such laws.

4 Q. Why does ACOG oppose privileges requirements?

5 A. Because, again, as I said before, there's no evidence
6 that it improves the quality of care and, instead, can be a
7 barrier to access.

8 Q. What's ACOG's position, if any, on state laws requiring
9 abortion providers be a certified OB-GYN?

10 A. They oppose those laws.

11 Q. Why?

12 A. Again, because there's evidence that general medicine
13 physicians, as well as physicians of other specialties and
14 advanced practice clinicians, can safely and effectively
15 provide abortion care, and, again, limiting to OB-GYNs can
16 restrict access.

17 Q. Are you aware of any other statement or guidance from
18 ACOG that suggests medication abortion providers should have a
19 written agreement with an OB-GYN to treat complications?

20 A. I am not aware.

21 Q. Now, let's shift gears and discuss the burdens of the
22 regulation. How common is medication abortion in Missouri?

23 A. My understanding is that it's the most common procedure
24 up through ten weeks. I think it's about 53 percent, if I
25 remember correctly, of abortion patients in Missouri up through

1 ten weeks obtain a medication abortion.

2 Q. I understand you've done research on the reasons why
3 women choose medication abortion over surgical. Briefly tell
4 the Court about that research.

5 A. As part of our research in Iowa, we documented some of
6 the reasons from women's perspectives related to their choice
7 for medication abortions. These were among women who obtained
8 a medication abortion. 71 percent said that they strongly
9 preferred having a medication abortion at the time they made
10 their decision to have the abortion, so very early on in the
11 process. We also found that a large proportion of these women
12 wanted to have the abortion as early as possible in pregnancy.
13 They also wanted to have it close to their home.

14 I've also done research in -- as part of our work in
15 Texas where one of the provisions of HB2 severely restricted
16 access to medication abortion. And in that research, that
17 qualitative research, we documented how women had a strong
18 preference for medication abortion and often would travel
19 farther to try to find a facility where she could access that
20 service.

21 Q. Is that research consistent with your clinical
22 experience?

23 A. Yes, it is. In my own clinical experience, I would say
24 patients often have a very strong preference for either
25 medication abortion or aspiration, and they will essentially do

1 whatever they can to get their preferred procedure.

2 Q. Based on your experience and the literature, what are
3 some of the reasons why women prefer medication abortion to
4 surgical?

5 A. Some women say that they prefer to have a medication
6 abortion because they see it as more natural, less invasive.
7 They feel that they have more control over the experience.
8 They're able to have the abortion at home surrounded by their
9 partner, friend, or family members.

10 Some women just feel very strongly that they don't
11 want to have instruments placed in their vagina to have the
12 procedure. Some of those women have a history of sexual
13 trauma.

14 Q. Have you personally had patients who were victims of
15 sexual assault or domestic violence who expressed a preference
16 for medication abortion?

17 A. Yes.

18 Q. We've been discussing women's preferences for
19 medication abortion. Let's talk about situations for which
20 medication abortion is medically indicated. Have you had
21 patients for whom medication abortion was medically indicated?

22 A. Yes, I have.

23 Q. And what does medically indicated mean?

24 A. Medically indicated means that we look at the risks and
25 benefits of the two treatment options of medication abortion

1 versus surgical abortion and make a determination that from a
2 medical perspective it would be advisable to proceed with
3 medication abortion first. It doesn't mean that surgical
4 abortion is strictly contraindicated because, of course, as we
5 talked about, there's always a small chance that a woman with a
6 medication abortion may end up needing to have a vacuum
7 aspiration or surgical procedure, so that always has to be a
8 possibility. But it may still be the advisable course from a
9 medical perspective to first start with a medication abortion.

10 Q. Why would medication abortion be medically advisable
11 over surgical abortion?

12 A. These could be cases of certain kinds of, like, uterine
13 anomalies like a double uterus, for example, where it may be
14 more challenging to perform the surgical procedure. In a case
15 of uterine fibroids, which are benign tumors of the uterus that
16 might make the uterus large and, perhaps, difficult to access
17 the pregnancy with the vacuum aspiration approach. It could be
18 cases of vaginismus where a patient has extreme pain or -- and
19 increased muscle tone of the vagina that makes it difficult to
20 place the speculum to perform the procedure.

21 So these might be some of the kinds of patients
22 where you, again, in the discussion with the patient, might
23 medically recommend proceeding with medication abortion first.

24 Q. In your experience, how often does it occur that a
25 woman has a medical condition that makes medication abortion

1 the medically advisable method of abortion?

2 A. I mean, it certainly happens. It's not common, though.
3 I would say it's 5 percent of patients or less.

4 Q. Let's discuss how the regulations affect abortion
5 access in Missouri. We talked briefly about this earlier.
6 What percentage of Missouri women of reproductive age reside in
7 a county without an abortion provider?

8 A. So it's -- without an abortion provider, I believe it's
9 about 78 percent. I think specifically without a medication
10 abortion provider, it's about 82 percent.

11 Q. With only three abortion providers and only two
12 medication abortion providers in the state of Missouri, what
13 does that mean in terms of the distance women must travel to
14 access abortion care?

15 A. Well, typically women who are living in central or
16 southern parts of the state, these distances could be quite
17 long, since they'll have to drive to either St. Louis or Kansas
18 City.

19 Q. This may seem obvious, but why would it be the case
20 that increased travel distances prevents some women from
21 obtaining an abortion?

22 A. I mean, there are monetary costs associated with these
23 travel distances. People have to arrange transport, arrange
24 time off work, arrange child care. About 60 percent of
25 abortion patients nationally are mothers and have children that

1 they're caring for, so they have to arrange child care for
2 those children. And the -- I think that these distances --
3 also, of course, for students, obviously they have to get --
4 arrange time off away from their studies.

5 And these geographical burdens perhaps are even
6 magnified by the other regulations in Missouri that require
7 patients to have two in-person visits, so they would have to
8 make those trips twice.

9 Q. You have been asked to estimate the number of women who
10 are prevented from obtaining a medication abortion because of
11 the regulation, correct?

12 A. Yes.

13 Q. What is that estimate?

14 A. My estimate is that approximately 50 women per year who
15 live in Columbia, Springfield, or one of the surrounding
16 counties are prevented from obtaining medication abortion each
17 year.

18 Q. And describe for the Court the process you underwent to
19 arrive at that estimate.

20 A. So I reviewed the published literature that looks at
21 the effect of increasing geographic distance to an
22 abortion-providing facility and how that's associated with
23 declines in the abortion rate, and I also reviewed the data
24 from the one published study that I'm aware of that looks at
25 the effect of increasing access to medication abortion.

1 I looked at the range of the proportional changes
2 associated with these distance changes and selected a
3 proportional change that I thought was a conservative estimate.

4 Q. What was that conservative proportional change that you
5 selected?

6 A. So I selected the lowest proportional change from all
7 of these studies, which is 14 percent, a 14 percent change.

8 Q. And can you discuss those sources that you reviewed
9 that you relied upon to arrive at your conservative
10 proportional change of 14 percent?

11 A. Sure. So some of these data come from Texas, including
12 some of the work that we've done with the Texas Policy
13 Evaluation Project, including a research letter that we
14 published in the *Journal of the American Medical Association*
15 where we did a fairly simple analysis, looking based just on
16 tabular data that were available at that time from the Texas
17 Department of Health and to look at how the change in distance
18 to the nearest clinic as clinics closed was associated with a
19 reduction in the number of abortions at the county level for
20 counties that did not have an abortion provider.

21 Another paper I relied on was a paper by Cunningham,
22 et al., which is -- uses a much more detailed analysis, an
23 multivariable analysis, that looked at similar data, more years
24 of data, though, and had microdata, so detailed individual
25 level data from Texas and -- from Texas on abortions and was

1 able to control for other factors, including things like
2 sociodemographic characteristics of the patients, congestion at
3 the clinics, and other factors. And, again -- but then made
4 estimates about the -- and actually purports to make a causal
5 association between the change in distance to the nearest
6 clinic as clinics closed and the resulting decline in the
7 abortion rate.

8 And then the other study which I looked at, which is
9 the only published study that I'm aware of that looked at what
10 happened when abortion access improved, or specifically access
11 to medication abortion, came from our research in Iowa, which
12 was looking at what happened when the Planned Parenthood
13 affiliate there began offering medication abortion services
14 using telemedicine, which expanded the number of sites where
15 medication abortion was available from about six to on order of
16 about 15, I believe. And, among other things, we saw that
17 among patients who lived more than 50 miles from the nearest
18 surgical abortion provider, that overall there was a 14 percent
19 increase in the number of abortions performed. So those were
20 the...

21 Q. And what do -- what do the findings in those studies
22 suggest about the prior lack-of-services effect on abortion
23 access?

24 A. I'm not sure if I completely understand the question,
25 but it suggests --

1 Q. Let me rephrase it.

2 A. I believe, if I understand correctly, that the studies
3 are consistent in that we see that with restricting access and
4 changing the -- increasing the distance to the nearest abortion
5 facility results in a decline in abortion; and then conversely,
6 when those distances are shortened and abortion access is
7 improved, that there's an increase in the number of both
8 abortion and medication abortion.

9 Q. Let's talk now about the Cunningham paper that you
10 mentioned. Can you turn to Exhibit 36 in your binder? Do you
11 recognize this document?

12 A. Yes.

13 Q. What is it?

14 A. This is the paper, the National Bureau of Economic
15 Research working paper by Cunningham, et al.

16 Q. Did you rely on this paper in forming your opinions?

17 A. Yes, it was one of the papers I relied on.

18 MR. MUNIZ: Your Honor, plaintiffs move Exhibit 36
19 into evidence.

20 MR. SAUER: No objection.

21 THE COURT: Exhibit 36 will be admitted.

22 (Plaintiffs' Exhibit 36 was admitted into evidence.)

23 BY MR. MUNIZ:

24 Q. Generally speaking, what is the goal of this paper?

25 A. The goal of the paper is really to look at the

1 association between increasing distances to the nearest
2 facility, again, because of the closure of clinics that was
3 happening in Texas, and the resulting decline in the abortion
4 rate at the county level. And then these authors purport to
5 make a causal association between the increasing change in
6 distance and resulting decline in abortion numbers.

7 Q. Do you know what caused those clinic closures?

8 A. These clinics closed after HB2, House Bill 2, went into
9 effect and were primarily -- or most of those closures were
10 related to specifically the admitting privileges restriction of
11 that law.

12 Q. Thank you. And you said there were clinic closures.
13 Do you know how many clinics closed as a result of the
14 privileges requirement?

15 A. It depends which -- it depends which period compared to
16 which period, but shortly before HB2 was introduced, there were
17 41 clinics. At the lowest point in June 2015, there were 17
18 clinics in Texas providing abortion care.

19 Q. Did HB2 have an effect on the number of physicians who
20 could provide abortion services?

21 A. Yes. We documented that as part of our research in the
22 Texas Policy Evaluation Project, and I believe the number of
23 abortion providers in Texas declined from 48 to 28 after HB2.

24 Q. How does this paper differ from the report you
25 published in the *Journal of the American Medical Association*

1 last year?

2 A. As I said, this is a much more detailed and rigorous
3 analysis that, because they had more detailed data, they had
4 the microdata from the state and they were able to control for
5 both patient factors, but other factors, including congestion
6 or, essentially, the -- like the density of the clinics
7 relative to the population in various metropolitan centers.

8 Q. And turn to the authors' findings. What did they find
9 with regard to the increased travel distance on -- its effects
10 on the abortion rates?

11 A. They found that there was clear relationship. I don't
12 remember the exact numbers off the top of my head.

13 Q. I can direct you to the abstract.

14 A. I believe on Page 3. So relative to having an abortion
15 clinic within 50 miles, abortion rates fell by 15 percent if
16 the nearest clinic is 50 to 100 miles away, by 25 percent if
17 the nearest clinic is 100 to 150 miles away, and by 40 percent
18 if the nearest clinic is 150 to 200 miles away, with additional
19 reasons having little additional effect. And they're talking
20 about changes in distance to the nearest facility.

21 Q. And directing you to Page 25, the second full paragraph
22 there starting with might, will you read the -- just the second
23 sentence?

24 A. (Quoted as read.) "Based on our estimated models, if
25 access to abortion clinics had remained at pre-HB2 levels,

1 Texas women would have had 122 to 315" -- I'm sorry. "122,315
2 legal abortions in 2014 to 2015, rather than the 107,830
3 observed in the abortion surveillance data, an estimated
4 reduction of 14,485 abortions due to HB2."

5 Q. That estimated reduction of 14,485 represents what
6 percentage of abortions prevented because of HB2, according to
7 the authors?

8 A. I'm not sure if that proportion was given here, but
9 dividing that by 122,315, I would have to do the math, but it's
10 about 11 or 12 percent.

11 Q. You testified earlier that your 14 percent proportional
12 change is conservative. Why is that?

13 A. I believe it's conservative for several reasons. First
14 of all, as I said, I looked at several different published
15 papers that looked at this, both in terms of what happens when
16 access is constrained, and the one published paper where access
17 is improved, and they had a variety of different proportional
18 changes, and I selected the smallest one.

19 As we just reviewed here in the Cunningham paper,
20 also what we found in our JAMA paper, there is a -- I think
21 it's an additional burden that appears to happen, be with
22 distances beyond 50 miles, and then beyond 100 miles, and then
23 beyond 150 miles. I chose to only look at what happened with
24 this proportional change as reported in Iowa for women living
25 more than 50 miles from the nearest surgical facility and

1 didn't consider that there might be, perhaps, additional for --
2 larger proportional changes if that distance change was 100
3 miles or 150 miles.

4 So, for example, in -- for patients in Springfield,
5 the -- if they suddenly had medication abortion available
6 there, I believe that the distance that they would not have to
7 travel would be certainly over 100 miles if they no longer have
8 to travel to Kansas City or to St. Louis. Similarly for
9 Columbia. So I didn't take into effect that there may have
10 been a larger proportional change if it was more than 50, more
11 than 100 miles, and more than 150.

12 The -- I only looked at in Iowa the -- I based that
13 proportional change as a change on all abortions. There was
14 actually a much larger proportional change for medication
15 abortion, and overall statewide, I believe statewide surgical
16 abortion decreased, while medication abortions statewide
17 increased by about 20 percent. But, again, I took a more
18 conservative estimate just of looking at the change in all
19 abortions for women living more than 50 miles, and that was the
20 14 percent.

21 I also think it's conservative because of the
22 different policy environment here in Missouri as compared to
23 Iowa. So as I mentioned before, as you know, in Missouri,
24 women are required to make two in-person visits to the abortion
25 provider, and so removing that geographic barrier to accessing

1 abortion care might mean that even more people would take
2 advantage of the services because they've been prevented by the
3 extreme geographic burden of having to make the visit twice.
4 That's not the case in Iowa, there is not a requirement for two
5 visits.

6 So those are some of the reasons why I think the
7 estimate is conservative.

8 Also, the unintended pregnancy rate in Missouri
9 is -- has been documented to be higher compared to Iowa. So,
10 again, if these barriers are removed, might anticipate more
11 abortions or higher abortion rate for population in Missouri as
12 compared to in Iowa.

13 Q. So we just discussed how you arrived at the 14 percent
14 estimate of proportional change. How did you apply that
15 percent change to arrive at your estimate that, on average, at
16 least 50 women from the Columbia and Springfield areas are
17 prevented from having a wanted medication abortion?

18 A. So, again, I decided to focus just on the counties
19 where Springfield and Columbia are and the surrounding
20 counties. So first I identified those counties. Again, I
21 think this is another example of why I believe the estimate is
22 conservative is because I'm only applying the estimate, then,
23 to the residents of those immediate counties and the
24 surrounding counties around Springfield and Columbia. So I
25 identified those counties. I believe they're in my report.

1 Q. Exhibit 16. Can you tell us where in Exhibit 16 those
2 are documented?

3 A. So in Table 2 and Table 3. I then obtained data from
4 you, the plaintiffs, of Missouri residents who live in one of
5 those counties and obtained a medication abortion in 2016 or
6 2017 at any of the clinics that -- the plaintiffs' clinics in
7 the state or in, I believe, Belleville, Illinois, Overland
8 Park, Kansas, which are just across the border on either side,
9 and also the Fayetteville, which is the closest facility
10 providing medication abortions to Springfield.

11 Those numbers -- the numbers of patients who
12 obtained medication abortion from those providers lived in one
13 of these counties presented in Table 2 and Table 3 in the first
14 two columns for 2016 and 2017.

15 Q. Just one quick question. Why did you choose these
16 counties as opposed to a larger set of counties?

17 A. These are the counties that I would anticipate that
18 the -- we would expect to have the biggest effect, that these
19 are patients who currently face the largest geographic barriers
20 to accessing medication abortion currently, and we would likely
21 see the greatest increase in change when those barriers are
22 removed if provision started in Springfield and Columbia.

23 However, obviously, it is important, there are other
24 counties beyond just these that are also -- for whom it would
25 be closer for them now to go to Springfield or Columbia if

1 services were available there, as compared to traveling
2 currently to St. Louis or Kansas City. And I would anticipate
3 that there would be some increase in medication abortion for
4 women in those counties, as well, but I did not include them in
5 this estimate.

6 Q. And looking at Tables 2 and 3, explain the last column
7 there.

8 A. This essentially shows the change in distance to
9 these -- that the patients in these counties would experience,
10 by Table 2, if services were now available in Columbia and they
11 didn't have to travel to either St. Louis or Kansas City,
12 essentially how much closer the services would be to them.

13 And so this actually just confirms, as you can see,
14 that for all of these counties, it's a greater than 50-mile
15 change, and for Table 2, obviously, for Boone County it's 125
16 miles. In Table 3, for all of these counties, it's a distance
17 change of more than 100 miles.

18 Q. So after you determined this distance change, what did
19 you do next?

20 A. I then added up the total number of patients living in
21 one of these counties who obtained a medication abortion in
22 2016 and 2017. I think you had the total of four columns from
23 2016/2017 on Table 2 and Table 3. You've got, I believe it's
24 about 716, and then I applied the 14 percent to that, which
25 works out to about -- an increase of about 100 additional women

1 who would access medication abortion in the next two years
2 after the services were -- would be made available, and so that
3 works out to be about 50 women every year.

4 Q. And Dr. Grossman, in your opinion, what is the
5 regulation's effect on abortion access?

6 A. I believe it constrains access, particularly to
7 medication abortion.

8 Q. I think you said this before. Your conservative
9 estimate is that, just confirming that this is right, that you
10 conservatively estimate that the regulation prevents on average
11 50 women a year from obtaining abortions in the Springfield and
12 Columbia areas?

13 A. That's correct.

14 Q. Why do you say your estimate is conservative?

15 MR. SAUER: Objection, asked and answered in a very
16 lengthy response earlier.

17 THE COURT: I do think it's been asked. I will
18 accept a brief summary as a reminder of his earlier answer.

19 MR. MUNIZ: I think it's actually different, Your
20 Honor. The previous question was about why his 14 percent
21 proportional change is conservative. The question here is why
22 he believes the calculation, the 100 women per every two years
23 is conservative.

24 THE COURT: Okay. Then in that case, the objection
25 will be overruled and you may answer.

1 A. I mean, just briefly, I think I mentioned -- did
2 mention part of this that I applied then just to the specific
3 counties of Springfield and Columbia and the surrounding ones.
4 I also didn't take into account, I recognize that there are
5 other independent providers out of state that Missouri patients
6 may be going to. So if there were -- if I had data from those
7 providers, that would make the denominator larger that I would
8 then apply the 14 percent to, would have resulted in a larger
9 number than 100 women every two years. So those are some of
10 the examples, again, why this is conservative.

11 Q. Have you read the declaration of Dr. Solanky in this
12 case?

13 A. I have.

14 Q. Dr. Solanky states that you made a mathematical error
15 in applying your 14 percent change and that, in fact, your
16 estimate should be 25 women per year. What's your opinion of
17 his critique?

18 A. With all due respect to Professor Solanky, I don't
19 believe he's correct. The -- I was -- what happened in Iowa
20 was sort of a one-time adjustment, an increase of 14 percent
21 that occurred as supply of services increased, and that demand
22 was then reached, and then a new plateau was established. So
23 there was an overall 14 percent increase, and that remained
24 relatively constant.

25 Our published paper only looked at two years after

1 the service was introduced, but I know from colleagues on the
2 ground in Iowa that, of course, it did not continue to increase
3 at that rate and that it stabilized.

4 It's also possible to look on the website at the
5 Iowa Department of Health, and you can see quite clearly what
6 happened in these areas where the telemedicine services were
7 introduced that were more than 50 miles from the nearest
8 surgical facility, that there was an initial increase in
9 medication abortion that then stabilized. It was not a 7
10 percent increase that occurred year on year on year.

11 Also, just to mathematically, if you -- if it were 7
12 percent in the first year after telemedicine and 7 percent in
13 the second year, even if those are compounded, they're not
14 additive. That wouldn't get you a 14 percent increase over two
15 years. I believe if it were 7 percent in the first year and
16 then 7 percent on top of that, that would be about a 10.75
17 percent increase over two years, and that's not what we
18 observed. We observed a 14 percent increase overall in the
19 first two years after telemedicine was introduced.

20 Q. Dr. Solanky also has an opinion on the effects of
21 abortion restrictions on the legal abortion rates. Briefly,
22 what do you understand that opinion to be?

23 A. I believe that he does not believe that there's an
24 association between restrictions in abortion rates.

25 Q. Do you agree with him?

1 A. I do not agree.

2 Q. And why not?

3 A. For one thing, some of the data that he looked at was
4 looking specifically at the abortion data by state of
5 occurrence, and that doesn't allow you to then look at the
6 patients who travel out of state, and that's particularly
7 important here in Missouri where over a third of Missouri
8 residents who obtained an abortion obtained the service out of
9 state.

10 Q. Finally, Dr. Grossman, in your opinion, is it medically
11 necessary to require medication abortion providers have an
12 agreement with an OB-GYN who agrees to personally treat all
13 complications related to medication abortion?

14 A. I do not believe that that's necessary.

15 Q. And will the regulation do anything to help women?

16 A. I do not believe it will do anything to help women.

17 MR. MUNIZ: That's all the questions I have. I'll
18 pass the witness.

19 THE COURT: Why don't we go ahead and take a morning
20 break. We'll take about a 15-minute break and come back at 11
21 o'clock. We're probably going to go a little bit past noon,
22 maybe take a slightly later lunch break around 12:30 or
23 something along those lines, and then I'll be open for
24 suggestions from the parties as to how long of a lunch break
25 you would like to take since we don't have a jury here that we

1 need to accommodate their needs. So I'll hear from you when we
2 return.

3 (A recess was taken from 10:44 a.m. to 11:02 a.m.)

4 THE COURT: Are you ready to proceed, Mr. Sauer?

5 MR. SAUER: Yes, Your Honor.

6 THE COURT: Doctor, if you could please take the
7 stand.

8 MR. SAUER: We have hard copies of our exhibits, and
9 so I've made our binders available to the witness. What I'd
10 like to do is offer a hard copy to the Court, as well, if the
11 Court would like them.

12 THE COURT: Okay.

13 MR. SAUER: We have several binders, but I
14 anticipate that almost all of the exhibits we'll be referring
15 to will be in Volume II of our binder.

16 THE COURT: Okay. Thank you. You may proceed.

17 MR. SAUER: Thank you, Your Honor.

18 - - -

19 CROSS-EXAMINATION

20 By Mr. Sauer:

21 Q. Good morning, Dr. Grossman.

22 A. Good morning.

23 Q. Dr. Grossman, Mr. Muniz asked you about your CV,
24 correct?

25 A. Correct.

1 Q. And your qualifications as an expert in this case; is
2 that right?

3 A. Yes.

4 Q. And you have no graduate training in mathematics; is
5 that correct?

6 A. That is correct.

7 Q. And your graduate training in statistics is limited to
8 a single biostatistics course that you took during medical school;
9 is that correct?

10 A. That's correct.

11 Q. You have no graduate training in econometrics; is that
12 correct?

13 A. That's correct.

14 Q. You've never been offered as an expert or received by a
15 court as an expert in the area of mathematics, correct?

16 A. Correct.

17 Q. And you've never been offered or received as an expert
18 in the area of statistics, correct?

19 A. Correct.

20 Q. And you've never been offered or received in the
21 area -- as an expert in the area of econometrics, correct?

22 A. Correct.

23 Q. You have expertise in obstetrics and gynecology,
24 correct?

25 A. Yes.

1 Q. And you have some experience and training from your
2 research work in public health research generally, correct?

3 A. Correct.

4 Q. But as far as mathematics, statistics, and econometrics
5 are concerned, that's not an area of your expertise, correct?

6 A. As I've said, I've had the training in biostatistics in
7 medical school, but I am not -- do not consider that my area of
8 expertise.

9 Q. You have served as an expert witness in several
10 abortion-related cases, correct?

11 A. Yes.

12 Q. In fact, I think there are five of them; is that right?

13 A. Are we including this one, or...

14 Q. Including this one, yes.

15 A. I believe that is correct, yes.

16 Q. So there's this case in Missouri, correct?

17 A. Yes.

18 Q. And the case in Texas involving HB2 that became the
19 *Whole Woman's Health* case, correct?

20 A. Yes.

21 Q. A case in Mississippi, as well?

22 A. Yes.

23 Q. And the case in Iowa?

24 A. Yes.

25 Q. And there's one more, what is that?

1 A. The North Dakota one that I mentioned earlier.

2 Q. In each of those cases, you were -- you were serving as
3 an expert witness on behalf of the plaintiffs; is that right?

4 A. Correct.

5 Q. And in each of those cases, you were offering testimony
6 to support a constitutional challenge to a regulation of
7 abortion, correct?

8 A. Yes.

9 Q. You were also -- have a role in NARAL, or the National
10 Abortion Rights Action League; is that correct?

11 A. In the foundation, the 501(c)(3) of NARAL.

12 Q. What is that exact role, can you tell us?

13 A. I'm on the board, and the 501(c)(3) is involved in
14 educational efforts related to issues related to reproductive
15 health.

16 Q. And by and large, NARAL is an advocacy group in support
17 of abortion rights, correct?

18 A. Yes.

19 Q. In addition to that, you have a role on Planned
20 Parenthood Federation of America's National Medical Committee;
21 is that right?

22 A. I'm a liaison member to the National Medical Committee.

23 Q. In addition to that, you're a board member of the
24 National Abortion Federation, correct?

25 A. Yes.

1 Q. And you perform abortions yourself, as well, correct?

2 A. Yes.

3 Q. And you do at Zuckerberg San Francisco General
4 Hospital, or ZSFG, correct?

5 A. Yes.

6 Q. And, in fact, you -- there is a -- I take it there's a
7 clinic called the Women's Options Center that is on the same
8 campus as that hospital; is that right?

9 A. Yes.

10 Q. And then you're also in a hospital-based practice
11 through your role as a faculty member at University of San
12 Francisco Medical School; is that right?

13 A. At University of California San Francisco School of
14 Medicine, I'm on faculty, and my clinical responsibilities
15 focus primarily on outpatient OB-GYN.

16 Q. You also from time to time have published not just
17 academic papers, but also kind of op-eds in popular media,
18 correct?

19 A. Yes.

20 Q. And these op-eds have related issues related to
21 abortion care, correct?

22 A. Among other things, yes.

23 Q. And on several occasions, you've published in
24 publications like the *Huffington Post* and *USA Today* that were
25 all advocating in favor of increased access to abortion

1 services, correct?

2 A. Correct.

3 Q. And you perform abortions up to 18 weeks gestation
4 yourself, correct?

5 A. Correct.

6 Q. I take it you do not perform medication abortions in
7 the second trimester personally?

8 A. That is correct.

9 Q. But those can be performed using misoprostol, correct?

10 A. Actually, the evidence-based regimen is a combined
11 protocol involving mifepristone, together with misoprostol, in
12 the second trimester.

13 Q. So, in a sense, it's very similar to the course of
14 drugs that's used for first-trimester medication abortion, but
15 I assume the doses are different.

16 A. The regimen is very different. It involves repeated
17 doses of misoprostol and, as I mentioned earlier, usually with
18 the patient in a facility so that the expulsion of the
19 pregnancy happens while she's in the facility.

20 Q. And those are abortions that use the same two drugs,
21 the mifepristone and misoprostol, correct?

22 A. Yes.

23 Q. Are there other ways to do a second-trimester
24 medication abortion that are used in the United States?

25 A. Misoprostol can be used alone, but, again, there's

1 quite a bit of evidence showing that it's more effective and
2 faster when mifepristone is used together with misoprostol.

3 Q. You prepared two expert declarations in this case,
4 correct?

5 A. Yes.

6 Q. And those, I think, are Plaintiffs' Exhibits 16 and 18;
7 is that right?

8 A. Yes.

9 Q. And your CV is Exhibit 17, correct?

10 A. I would have to check, but I believe so, yes.

11 Q. In any event, the method you took to prepare these
12 declarations involved relying on counsel to draft the
13 declaration in the first instance, correct?

14 A. We had a conversation to review what my findings would
15 be and what evidence I wanted to rely on, and then he drafted a
16 first draft of the report, which then I edited, and we
17 exchanged drafts back and forth after that.

18 Q. And so there was a -- the first draft was done by Mr.
19 Muniz, in fact, correct?

20 A. Yes, after our discussion.

21 Q. And so first there was a discussion, correct, between
22 you and Mr. Muniz where you talked about what the affidavit
23 would say, correct?

24 A. Yes.

25 Q. And then Mr. Muniz did the first draft of the

1 declaration for you, correct?

2 A. Correct.

3 Q. And then you edited that, and you had a process by
4 which you went back and forth; is that right?

5 A. Yes.

6 Q. And certain portions of this were -- the original
7 research was done by Mr. Muniz, correct?

8 A. Yes.

9 Q. And, in particular, in your deposition you talked about
10 Paragraphs 18 and 19 of your declaration, correct?

11 A. I don't recall. I'm happy to look at those, if you
12 want me to.

13 Q. So if you turn to Pages 6 and 7 of your declaration,
14 there's a discussion about statistics relating to sexual
15 violence in the United States.

16 A. Yes.

17 Q. And there's a series of footnotes in there, Footnotes
18 11 to 16 of your declaration, correct?

19 A. Yes.

20 Q. And they cite something like -- there are maybe ten or
21 eleven sources there, correct?

22 A. Yes.

23 Q. And you testified previously that Mr. Muniz is the one
24 who looked up all of those sources, right?

25 A. Yes.

1 Q. And then you reviewed them, and some of them you
2 reviewed more closely than others, correct?

3 A. Yes.

4 Q. And then later in your declaration, you have a table
5 where you estimate the number of women of reproductive age in
6 Missouri, right? Or report, not estimate, on Page 22 at the
7 end of Paragraph 56 of your declaration?

8 A. It's on Page -- yes. And as we discussed during my
9 deposition, there was an error producing this table. We had
10 initially talked about including all people of reproductive
11 age, and so the numbers reflect both men and women, and that
12 was an error, then. The title was changed to women of
13 reproductive age but the numbers were not. The point I was
14 making about the proportion of people, women living in a county
15 without any provider or without a medication provider, those
16 proportions are the same.

17 Q. In other words, all of those numbers listed there
18 reflect human beings of reproductive age in Missouri in the
19 various -- in the four slots, correct?

20 A. Correct.

21 Q. And, in fact, the number of women of reproductive age
22 is a little bit more than half of that in each case, correct?

23 A. Correct.

24 Q. And that was a table that was prepared in the first
25 instance by Mr. Muniz, correct?

1 A. Yes.

2 Q. And the error was not caught by you in your review --

3 A. That is correct.

4 Q. -- of the declaration, correct?

5 A. Yes.

6 Q. Are there any areas in this declaration where the
7 language in it is principally your words?

8 A. I would have to go through it, I guess, line by line
9 and perhaps review some of my old drafts, but I think much of
10 it is my words as I worked on editing what Mr. Muniz sent me.
11 He then sometimes edited my words to make it more appropriate
12 for a legal audience, which I'm not familiar with. But quite a
13 bit of this is my words.

14 Q. So as you sit here today, there's nothing specific you
15 would point to in this declaration, your opening declaration to
16 be your words rather than Mr. Muniz's words?

17 A. I'm happy to go through the whole thing to try to find
18 some pieces.

19 For example, I mean, in Paragraph 1, I wrote,
20 actually, all of this because this is who I am, and so those
21 were my words.

22 In Paragraph 2, I provided him a list of the cases
23 that I was involved in, and I think he put the exact citations,
24 so some of that is his words.

25 Paragraph 3, I think those are my words.

1 Paragraph 4, those are my words because I was
2 talking about my areas of research and my numbers of
3 publications.

4 I think Paragraph 5 was probably his words.

5 Paragraph 6, I believe that was probably more
6 drafted by him.

7 Q. In any event, is it fair to say that as you went
8 through here, you think you would be able to pick out what was
9 your words and what was his words?

10 A. Yes.

11 Q. You treat patients for abortion and also other
12 gynecological procedures in San Francisco, correct?

13 A. Yes.

14 Q. And you have a system in place in your practice in San
15 Francisco for how you treat post-procedure complications,
16 correct?

17 A. Yes.

18 Q. And that process is essentially the same for your
19 abortion patients and your other gynecological patients; is
20 that right?

21 A. Yes.

22 Q. And as I understand it, a patient who is experiencing
23 concerns that they may be having a post-procedure complication
24 has a 24-hour number to call in your practice, correct?

25 A. Yes.

1 Q. And if that number -- if that happens to occur during
2 regular office hours, that patient would be connected to a
3 triage nurse at the Women's Options Center, the abortion
4 facility where you practice, correct?

5 A. If we're talking about abortion, yes. If it's an
6 outpatient gynecology procedure or even a surgical procedure,
7 she would be connected to the triage nurse and the gynecology
8 clinic.

9 Q. Gotcha. So let's focus on abortion patients for now.
10 So a patient thinks she's experiencing post-abortion
11 complication. If she calls during regular office hours, she is
12 connected to a triage nurse on the phone at the clinic,
13 correct?

14 A. Yes.

15 Q. And if she calls outside of office hours, she would end
16 up being connected directly to an OB-GYN, probably a medical
17 resident at the hospital, correct?

18 A. To an OB-GYN resident, yes.

19 Q. And a resident, to be clear, is a doctor, right?

20 A. Correct.

21 Q. And it is a doctor who is in a supervisory relationship
22 with you and partners, who are fully qualified doctors, right?

23 A. Supervised relationship, yes.

24 Q. Yes, very clear. You are the ones who are doing the
25 supervising, correct?

1 A. Correct.

2 Q. And the residents report to you, and their work is
3 overseen by you and your partners, correct?

4 A. Correct.

5 Q. And in certain cases -- and if the patient were deemed
6 to be raising questions of insufficient concern, that patient
7 might be told, don't worry about it, or give us a call back if
8 things get worse, correct?

9 A. Yes.

10 Q. And you testified -- you talked about this with Mr.
11 Muniz, that there might be three classes of patients, right?

12 A. Yes.

13 Q. There would be a second class of patients who would
14 have symptoms of concern but not requiring emergency assessment
15 who might be told to come back on the next **business** day to the
16 clinic, correct?

17 A. Yes.

18 Q. And some of them would -- might be told to come back in
19 the next couple of days, correct?

20 A. Yes.

21 Q. But you testified previously, I think, that you
22 couldn't imagine a case where someone would be told to come
23 back like in eight or ten, or ten or fourteen days for an
24 initial assessment, correct?

25 A. There could be a situation. I mean, we have patients

1 sometimes that are traveling, and they can't come back until
2 then. And if there is not a concern that they need to be
3 evaluated before then, we might say that they could come back
4 when they're back from their travels.

5 Q. Would there be a situation where you -- I believe when
6 you talked to Mr. Muniz, you were talking about patients who
7 had symptoms of significant concern who needed to be looked at
8 fairly promptly, correct?

9 A. No, that's correct. They would be seen relatively
10 soon.

11 Q. And some of those, it would make no sense to tell them
12 to come back in ten to fourteen days, correct?

13 A. For some of them, it would not make sense to do that.

14 Q. And then there are also patients who have symptoms of
15 very significant concern requiring immediate assessment, right?

16 A. Correct.

17 Q. I think when you testified in your deposition, you
18 might say there might be some patients who sort of fall on the
19 fence between that second and third bucket where the symptoms
20 sound pretty serious and you can't tell whether that patient is
21 undergoing an emergency, but the doctor would feel more
22 comfortable if there was immediate face-to-face assessment,
23 correct?

24 A. Correct.

25 Q. And that patient would not be told to go to the

1 emergency room, necessarily, but would be told to come to a
2 place where a doctor would look at her, correct?

3 A. Correct.

4 Q. And that doctor typically, if this is after hours,
5 would be the resident who is on call at the hospital, correct?

6 A. I'm sorry. I'm getting a little confused about how
7 you're talking about the categories. If it's after hours,
8 there really isn't a place for us to see patients to check them
9 out, other than the emergency department. So that patient
10 would -- if it's after hours, if she needs to be evaluated in
11 some way, she would be told to go to the emergency department.

12 Q. And so there would -- would there be situations where
13 the resident would come down personally and assess that patient
14 face to face?

15 A. Possibly, but more frequently when a patient would be
16 sent to the emergency department -- it might depend on the
17 specific situation, but more frequently, the emergency
18 department would start the evaluation, obtain a history and
19 physical, perhaps laboratory work, possibly an ultrasound, and
20 then communicate with the OB-GYN resident on call.

21 Q. And so typically, the initial assessment would be
22 performed by the emergency room staff, correct?

23 A. Correct.

24 Q. But in some cases, possibly, you say the OB-GYN who is
25 on call at the hospital might get immediately involved in that

1 patient's care, correct?

2 A. Possibly. I mean, it might involve -- it might depend
3 on the specific complaint that the patient has for presentation
4 and, quite honestly, what else the resident is doing. I mean,
5 the residents are always in the facility. Often they're
6 involved in other stuff. But if they aren't involved with
7 other stuff and they're free, they might go down and see the
8 patient.

9 Q. When you say other stuff, it's possible they may be
10 treating other urgent situations, correct?

11 A. Correct.

12 Q. And, in fact, that's -- I take it at the same time
13 they're providing coverage for your patients from the abortion
14 clinic, they would also be on call for other patients at the
15 hospital, correct?

16 A. Of course, including laboring patients in labor and
17 delivery, patients who may need to go to the operating room
18 urgently, postoperative patients, other patients in the
19 emergency department.

20 Q. When you formulated your opinions and produced your
21 affidavits in this case, it was your understanding that a
22 doctor would be available performing abortions in the Columbia
23 clinic two times per week, correct?

24 A. That was my understanding.

25 Q. And, in fact, it turned out that the doctor -- a doctor

1 is available in that clinic only two to three days per month,
2 correct?

3 A. That is my understanding now, correct.

4 Q. And in addition, when you formulated your opinion, you
5 had the understanding that in the Columbia clinic, there was
6 one local OB-GYN in the community, in addition to the doctor
7 performing abortions, who would be available to treat
8 complications from that clinic, correct?

9 A. I believe so, yes.

10 Q. And now your understanding is different, that there is
11 no such doctor for the Columbia facility, correct?

12 A. Correct.

13 Q. Mr. Muniz showed you a study by Ms. Upadhyay?

14 A. It's actually Dr. Upadhyay.

15 Q. Dr. Upadhyay, correct? He showed you that study,
16 right?

17 A. Correct.

18 Q. And you are a co-author of that particular study, is
19 that right?

20 A. Yes.

21 Q. And could you turn to Exhibit 17 in Volume II of our
22 binder? This is a copy of the same study, correct?

23 A. Yes.

24 Q. And you're listed there in -- directly under her name
25 in the list of authors, right?

1 A. Yes.

2 Q. And this study, if you look at the second column of the
3 first page, reports that in certain studies of abortion
4 complications, complication rates are underestimated by low
5 follow-up rates, correct?

6 A. Yes.

7 Q. And from low follow-up means the patient -- essentially
8 there's a loss of contact between the abortion facility and the
9 patient, correct?

10 A. Yes.

11 Q. And it was perceived as a strength of this study that
12 it attempted to control from the problem of low follow-up rates
13 by looking at Medicaid recipients in California, correct?

14 A. It has better follow-up information than those other
15 studies, correct.

16 Q. And, of course, it isn't perfect follow-up information
17 because that would be very hard to find, correct?

18 A. Correct.

19 Q. And one of the reasons that an abortion facility
20 that -- would not be aware, for example, that one of their
21 patients may have sought treatment for a post-abortion
22 complication would be if that patient went to some other
23 provider to be treated, correct?

24 A. Yes.

25 Q. And that's what's referred to as low follow-up rates

1 when that happens with some frequency, correct?

2 A. Yes.

3 Q. Turning to the second page of this study, Page 176, in
4 your Figure 1, or the column on the right describing Figure 1,
5 about two thirds of the way down, you define major
6 complications as serious unexpected adverse events requiring
7 hospital admission, surgery, or blood transfusion, correct?

8 A. Yes.

9 Q. And then you say minor complications were all other
10 expected adverse events, correct?

11 A. Yes.

12 Q. And Mr. Muniz asked you about what those were. Those
13 include retained tissue or retained products, correct?

14 A. Yes.

15 Q. And that's really the same thing as incomplete
16 abortion, correct?

17 A. Yes.

18 Q. And that's the most common of complication in that
19 minor bucket, correct?

20 A. Yes.

21 Q. And that complication is typically treated by an
22 aspiration of the uterus most frequently, correct?

23 A. No.

24 Q. Let me ask you this. So that's the -- that -- that is
25 treated in the three ways you talked about with Mr. Muniz,

1 correct?

2 A. Yes.

3 Q. So there's expectant management that could be done
4 there?

5 A. Yes.

6 Q. And also there could be repeat dose of misoprostol,
7 correct?

8 A. Yes.

9 Q. And there could also be an aspiration procedure,
10 correct?

11 A. Yes.

12 Q. And that would depend on the severity of the symptoms,
13 in part, on that decision, correct?

14 A. In part on the severity of symptoms, and in part on
15 patient preference.

16 Q. So some patients would choose to have a repeat dose of
17 misoprostol?

18 A. Yes.

19 Q. And you testified earlier that that happens -- based on
20 published literature that that happens about half the time,
21 that a patient would say, I would like a second try at the
22 drugs, as opposed to having an aspiration?

23 A. On the limited published literature, there is -- when
24 patients are given that choice, it looks like it's about 50
25 percent. But I will admit that those are small -- a small

1 number of studies and a small number of patients.

2 Q. And are you aware that the complications reported by
3 the RHS facility in St. Louis in this case indicate that they
4 provide -- they provide a repeat dose of misoprostol about 10
5 percent of the time?

6 A. I'm not aware of those data. I would imagine, though,
7 that particularly if they're seeing more patients who are
8 traveling a long distance, which we talked about earlier would
9 be common here in Missouri, that patients would like to just at
10 that point get things over with if they're in the clinic and
11 they've been diagnosed with an incomplete abortion, and they
12 might choose then in that case to have an aspiration.

13 Q. Do you know what proportion of the patients at that
14 particular clinic come from the St. Louis area, as opposed to
15 traveling -- as opposed to traveling from further away?

16 A. I do not.

17 Q. Can you turn to two more pages in this study, the
18 Upadhyay study? In Table 3, Mr. Muniz asked you about that on
19 Page 178, correct?

20 A. Yes.

21 Q. He asked you about that Table 3?

22 A. Yes.

23 Q. And these are results of your research, correct? That
24 minor complications occurred in 4.88 percent of the time,
25 correct?

1 A. Yes.

2 Q. And major complications, .31 percent of the time,
3 correct?

4 A. Correct.

5 Q. And for a total rate of 5.19 percent; is that right?

6 A. Correct.

7 Q. And then if you flip ahead to Page 181 of this study,
8 which I think is the third to the last page. If you're there,
9 in the first column here, just about six lines up from the
10 bottom, you reported that medication abortions were 5.96 times
11 as likely to result in a complication as first-trimester
12 aspiration abortions, correct?

13 A. Yes.

14 Q. Now, the major complication rate from two procedures
15 was closer to each other in your research, right?

16 A. Correct.

17 Q. But these minor complications, like retained products
18 or ongoing pregnancy, hematometra, things of that nature, were
19 much more frequent for medication abortion; is that right?

20 A. That is correct.

21 Q. And also, as I think Mr. Muniz pointed out, that
22 post-abortion complications for medication abortion tend to be
23 experienced later after the second dose of a drug is taken, of
24 misoprostol; is that correct?

25 A. Later than what? I wasn't sure if your question was

1 comparing something.

2 Q. In other words, the complication is typically not
3 experienced right there at the abortion facility, correct?

4 A. Correct.

5 Q. And, in fact, you testified that the only time you
6 think there would be a complication for medication abortion
7 that occurred right there at the abortion facility would be if
8 someone had an allergic reaction to the mifepristone; correct?

9 A. Correct.

10 Q. Whereas once you take misoprostol at home or at another
11 location, typically that is where the complications emerge for
12 medication abortion, correct?

13 A. Yes. Some women will have even bleeding, though, after
14 the mifepristone, which rarely can be heavy. But, yes, all of
15 this is occurring at home.

16 Q. In most of the cases, it's happening later on, right?

17 A. Correct.

18 Q. Whereas for surgical abortion, the complications,
19 especially the major complications, I take it, would be
20 experienced kind of right there on the spot; is that right?

21 A. Not all of them. I mean, it's certainly possible to
22 have delayed hemorrhage, and infection always occurs later
23 after the patient goes home. That doesn't happen when the
24 patient is still in the facility.

25 Q. So there is some from surgical abortion that might be

1 experienced later, correct?

2 A. Yes.

3 Q. But there are many that are experienced right there on
4 the scene as the procedure is occurring, correct?

5 A. Yes.

6 Q. And that includes like uterine perforation, for
7 example, correct?

8 A. Yes.

9 Q. Or surgical laceration; is that right?

10 A. Yes.

11 Q. And there are others from surgical abortion where --
12 including many very serious ones that would be experienced
13 right there at the scene, correct?

14 A. Yes, other than the ones I mentioned.

15 Q. Can you turn to Exhibit 19 in that binder, two tabs
16 later? This is a clinical practice guideline from Canada,
17 correct?

18 A. Yes.

19 Q. And this clinical practice guideline is essentially a
20 summary or survey of literature about medication abortion,
21 correct?

22 A. Yes, it looks like a review document.

23 Q. And this review concluded that, on average -- if you
24 turn to Page 380 of the document, this review concluded that,
25 on average, approximately 3 percent to 5 percent of women who

1 have a mifepristone-based medication abortion have a subsequent
2 aspiration, correct?

3 A. I'm sorry, can you just point to me where you are at?

4 Q. Are you on Page 380?

5 A. Yes.

6 Q. Second column, under the heading Complications of
7 Medication Abortion --

8 A. Yes.

9 Q. -- Retained Products of Conception, third sentence?

10 A. That's what it says here, yes.

11 Q. That is consistent with the findings, or similar, is it
12 fair to say, with the findings of your research in the -- in
13 Exhibit 17, correct?

14 A. Yes.

15 Q. And by that, I mean the study you co-authored with Dr.
16 Upadhyay, correct?

17 A. Yes.

18 Q. If you would just flip to Exhibit 20, the next exhibit.
19 This is a recent study from Australia co-authored by Goldstone,
20 et al., correct?

21 A. Yes.

22 Q. And this, if you go to the first page, to the results
23 section, it indicates they were 674 adverse events, or 5.15
24 percent, mainly due to method failure, correct?

25 A. I'm sorry, could you point me to the page?

1 Q. On the first page of the study --

2 A. Oh.

3 Q. -- in the results section of the abstract.

4 A. Uh-huh. Yes. I think, as we discussed, I take issue
5 with them calling these serious adverse events, but assuming
6 that these are what we would classify as all complications
7 together, I -- that seems appropriate.

8 Q. And, in fact, that number is very, very close to the
9 one that you and Dr. Upadhyay reported in Exhibit 17, correct?

10 A. Correct.

11 Q. And if you'd flip ahead really quickly two pages later
12 in this particular study, it's Page 368, in the right column
13 under safety, it indicates -- the very first sentence indicates
14 that overall, 674 serious adverse events were reported by a
15 woman undergoing EMA, 5.15 percent, with most related to cases
16 of method failure. Incomplete abortion requiring surgical
17 intervention was reported by 633 women, or 4.84 percent,
18 correct?

19 A. Yes.

20 Q. So these numbers are very, very close. That 4.84
21 percent is very close to the 4.88 percent that you reported in
22 your study, correct?

23 A. Yes.

24 Q. All three of these studies are quite recent; is that
25 right?

1 A. Yes.

2 Q. And all three of these studies are based on the dosages
3 and the method of administration that you talked about with Mr.
4 Muniz, correct?

5 A. I have not reviewed which regimen they used in this
6 Australia, so I would have to confirm that. If you would like
7 me to -- it looks like they did use the same -- yes.

8 MR. SAUER: And, Judge, I would move for the
9 admission of these studies that we've been talking about.

10 THE COURT: Can you give me the exhibit numbers
11 again?

12 MR. SAUER: It's State Defendants' Exhibits 17, 19,
13 and 20.

14 THE COURT: Any objection?

15 MR. MUNIZ: Your Honor, I don't believe counsel has
16 laid a foundation for 19, so I would object on 19.

17 BY MR. SAUER:

18 Q. Have you reviewed Exhibit 19 before?

19 A. I have.

20 Q. And it is, in fact, a true and correct copy of that
21 study?

22 A. The clinical practice guideline.

23 Q. Correct, yes, sorry. It's a clinical practice
24 guideline, to the best of your knowledge?

25 A. Yes.

1 MR. SAUER: Your Honor, I would move for the
2 admission.

3 THE COURT: Exhibits 17, 19 -- State's Exhibits,
4 Defendants' Exhibits 17, 19, and 20 will be admitted.

5 (State Defendants' Exhibits 17, 19, and 20 were
6 admitted into evidence.)

7 BY MR. SAUER:

8 Q. And then Mr. Muniz asked you about what do you think
9 the overall complication rate is for medication abortion when
10 you include issues like retained products and incomplete
11 abortion and all of the --

12 COURT REPORTER: I'm sorry?

13 Q. Mr. Muniz asked you what you think the overall
14 complication rate is for medication abortion, correct?

15 A. Correct.

16 Q. And I think you testified 2.5 percent -- or I'm sorry,
17 2 to 5 percent, correct?

18 A. Yes.

19 Q. And in your deposition, I think you said 2 to 7
20 percent, based on gestational age; is that right?

21 A. That's correct.

22 Q. And, in fact, that's taking into account as you get
23 closer to that 70 days or ten weeks that the failure rate
24 increases; is that fair to say?

25 A. That's correct.

1 Q. And I believe you testified in your deposition that if
2 you were advising a patient, you would tell them that there
3 would be a failure or other complication in approximately 2 to
4 7 percent of cases; is that right?

5 A. Well, I usually try to give a more specific estimate
6 based on the exact gestational age of the patient.

7 Q. The range that you would tell them would be 2 to 7
8 percent?

9 A. Yes. But if they were 49 days, I would give the lower
10 estimate; and if they were 69 days, I would give a higher
11 estimate.

12 Q. Mr. Muniz asked you about the symptoms that patients
13 who have had medication abortion experience, correct?

14 A. Yes.

15 Q. And those include bleeding that can come in various
16 volumes and durations, correct?

17 A. Yes.

18 Q. And they include fever in certain cases?

19 A. Yes.

20 Q. And pain or cramping, abdominal pain or cramping?

21 A. Yes.

22 Q. Also dizziness or light-headedness can be experienced
23 by women; is that right?

24 A. Yes.

25 Q. And fainting, even, can occur, as well, correct?

1 A. Yes.

2 Q. And then women who have had these drugs can also
3 experience various adverse effects that are really not symptoms
4 of any complication, correct?

5 A. Yes.

6 Q. Can I just call them side effects so they're
7 distinguished from complications, such as nausea and also some
8 bleeding, fever, all of those can also be mere side effects of
9 the drugs, correct?

10 A. Correct.

11 Q. And -- and so bleeding, fever, pain, nausea, dizziness,
12 these might be symptoms of a very serious complication in
13 certain circumstances, correct?

14 A. Yes.

15 Q. And they also might be symptoms of a significant but
16 not emergency complication in other circumstances, correct?

17 A. Yes, depending on what the patient is experiencing.

18 Q. For example, if a patient is experiencing retained
19 tissue, she might have bleeding, she might have abdominal pain,
20 she might have other of those symptoms, as well, correct?

21 A. Yes.

22 Q. And then fever even could be experienced for a
23 significant but not emergency complication, correct?

24 A. I'm not -- I mean, it is possible to have some fever
25 and chills immediately after taking the misoprostol, but really

1 any fever that persists beyond the four hours after taking
2 misoprostol needs to be evaluated.

3 Q. And I take it that the guidelines you testified to,
4 that is, if the fever is below 100.4, then typically the
5 patient is not assessed; is that right?

6 A. Generally not, although it might depend on what other
7 symptoms she has, of course.

8 Q. And a fever of 100.4 and above is something that's
9 going to require an assessment, correct?

10 A. Yes.

11 Q. And a fever of 102.5 or above is definitely going to go
12 to the emergency room; is that right?

13 A. Generally, yes.

14 Q. And could you turn to Exhibit 19 in the binder -- I'm
15 sorry, Exhibit 22 in the binder in front of you? This is the
16 FDA label, correct?

17 A. For Mifeprex, yes.

18 Q. And this is the same document that was admitted as one
19 of Mr. Muniz's exhibits, correct?

20 A. Yes.

21 Q. Can you turn to Page 6 of this document? And just
22 under Section 5.4 there, it discusses ectopic pregnancy,
23 correct?

24 A. Yes.

25 Q. And that can be a very serious situation, correct?

1 A. Yes.

2 Q. It can be life threatening?

3 A. Yes.

4 Q. And here, the FDA label tells healthcare providers to
5 remain alert to the possibility that a patient who is
6 undergoing a medication abortion could have an undiagnosed
7 ectopic pregnancy because some of the expected symptoms
8 experienced with a medical abortion, such as abdominal pain and
9 uterine bleeding, may be similar to those of a ruptured ectopic
10 pregnancy, correct?

11 A. That is correct.

12 Q. And you agree with that statement in the FDA label,
13 correct?

14 A. I do.

15 Q. And then the next page, Page 7 of the FDA label, the
16 second full paragraph talks about what the FDA label calls
17 adverse reactions, correct?

18 A. Uh-huh, yes.

19 Q. And it reports that up to -- about 85 percent of
20 patients report at least one adverse reaction following
21 administration of Mifeprex and misoprostol, and many can be
22 expected to report more than one such reaction, correct?

23 A. Yes.

24 Q. And these adverse reactions include nausea -- nausea,
25 weakness, fever/chills, vomiting, headache, diarrhea, and

1 dizziness, correct?

2 A. Yes.

3 Q. And, of course, some of those experiences could also be
4 symptoms of a complication, correct?

5 A. Some of them could be, yes.

6 Q. For example, weakness and dizziness might be symptoms
7 of a patient who is experiencing infection, for example.

8 A. Yes, or even hemorrhage with severe blood loss.

9 Q. And headache and fever obviously could be problems that
10 are symptoms of a serious problem, correct?

11 A. Correct.

12 Q. Now, some of these various symptoms that we've been
13 talking about are fairly quantifiable, right? In the sense
14 that the patient can give accurate information over the phone
15 about what her volume of bleeding is, correct?

16 A. Correct.

17 Q. And I think you testified on direct that more than two
18 pads per hour for more than two hours is always going to be
19 someone that you want to assess, correct?

20 A. Correct.

21 Q. But some of these symptoms obviously are more
22 subjective in nature, right?

23 A. They are more subjective in nature, perhaps, in terms
24 of their intensity, but they are quantifiable in terms of the
25 duration and timing.

1 So, for example, you know, nausea that's associated
2 with -- that happens within the first six hours after taking
3 the misoprostol would be likely to be thought of as being
4 related to the medication. Nausea that develops later,
5 particularly severe, might be concerning about, perhaps, even
6 an atypical presentation of an infection. So patients are very
7 good at quantifying and being specific about the timing of
8 their symptoms.

9 Q. But abdominal pain is something that people experience
10 differently, correct?

11 A. Yes.

12 Q. And some people are very stoic and will not report a
13 lot of pain when they, in fact, may be experiencing a lot of
14 pain, correct?

15 A. That's correct. I mean, we in medicine have gone a
16 long way to try to address that by trying to standardize how
17 people report pain. According to the worst pain that they can
18 imagine, asking them to use a ten-point scale, asking them
19 multiple times to try to quantify their pain.

20 But, yes, it can be hard to determine sometimes, or
21 compare a patient's pain levels among patients.

22 Q. Because, in fact, there's an inherent subjectivity in
23 reporting how much pain they're experiencing, correct?

24 A. Yes, but patients are often good at relating the pain
25 that they're experiencing to other pain they have experienced.

1 One thing that commonly we ask patients to compare their pain
2 to is the pain that they have with menstruation.

3 Q. And, for example, dizziness is also something that
4 people might describe differently as they experience it,
5 correct?

6 A. Yes.

7 Q. And that would apply to feeling faint also?

8 A. Yes.

9 Q. None of these symptoms is to -- none of these symptoms
10 just in and of itself demonstrates exactly what the underlying
11 problem is, correct? So, for example, you couldn't say, oh,
12 you're experiencing bleeding of a certain volume, and,
13 therefore -- excuse me -- you must have such-and-such a
14 complication, correct?

15 A. If you mean can -- based on history alone, can we
16 definitively determine the diagnosis? No, we cannot.

17 Q. And, in fact, the process of diagnosing post-medication
18 abortion complications would be individual in every particular
19 case, correct?

20 A. Yes.

21 Q. And, in fact, it would depend on the constellation of
22 symptoms that the patient reported; is that right?

23 A. Yes.

24 Q. And it may also depend on other factors in the
25 patient's medical history, as well, correct?

1 A. Yes, it may.

2 Q. I think you testified in your deposition that in your
3 practice at ZSFG that there are situations where there are
4 cases of telephone diagnosis where a face-to-face assessment
5 has occurred -- occurs, correct?

6 A. I'm sorry. I didn't get the first part. There are
7 cases where what?

8 Q. Let's talk about a situation where a patient calls in
9 experiencing symptoms after a medication abortion, and there
10 are cases where it's difficult to diagnose exactly what the
11 problem is just over the phone, correct?

12 A. Yes.

13 Q. And in those cases, the doctor who is answering the
14 phone, if it's after hours, would arrange for a face-to-face
15 assessment, correct?

16 A. Again, she might be -- if it's after hours, she would
17 be advised to come in to the emergency department.

18 Q. Whereas, if it's during regular office hours, she would
19 be advised to come in to the clinic, typically?

20 A. Yes.

21 Q. And are doctors available at your clinic during office
22 hours?

23 A. Yes.

24 Q. I think you testified on direct that only certain
25 doctors are typically trained to do aspirations, correct?

1 A. It is not a routine part of training so that all
2 physicians are trained in aspiration, that is correct.

3 Q. In fact, most emergency room doctors are not trained to
4 do aspirations?

5 A. That is generally my experience, yes.

6 Q. And you don't have any firsthand knowledge of how many
7 emergency room doctors in Missouri are trained to do
8 aspirations, are you -- do you?

9 A. I do not have any firsthand knowledge.

10 Q. And, typically, nurses or nurse practitioners, at least
11 in Missouri, do not perform aspirations; is that correct?

12 A. That is my understanding.

13 Q. And sometimes aspirations are performed promptly when
14 patients are experiencing post-medication abortion
15 complications, correct?

16 A. Yes, that is correct.

17 Q. And that can happen if the patient comes into the
18 clinic on the next business day and it's determined there
19 should be a prompt aspiration, correct?

20 A. Correct.

21 Q. And sometimes it's important to do an aspiration
22 immediately in the emergency department, as well, correct?

23 A. Sometimes, yes.

24 Q. Mr. Muniz asked you some questions about the reason
25 that -- reasons some women choose medication abortion, correct?

1 A. Yes.

2 Q. And he asked you -- he asked you in particular about
3 situations where I believe you said it would be medically
4 advisable to have medication abortion over a surgical abortion,
5 correct?

6 A. Correct.

7 Q. And I think you estimated that there -- or you
8 described, for example, that uterine fibroids and some other
9 conditions might result in a situation where it would be
10 recommended or advisable to do a medication abortion instead of
11 a surgical abortion, correct?

12 A. Correct.

13 Q. And you estimated that all of those cases where there
14 is this relative indication in favor of medication abortion
15 comprised 5 percent or less of all medication-abortion
16 patients, correct? Or, sorry, all first-trimester abortion
17 patients, correct?

18 A. Correct.

19 Q. So less than 5 percent of the time when a patient goes
20 to the clinic to obtain a first-trimester abortion, there will
21 be less than 5 percent of the time where she is told that it
22 would be advisable to have a medication abortion for medical
23 reasons, correct?

24 A. 5 percent or less, correct.

25 Q. Can you turn to Exhibit 30 in the binder in front of

1 you? Do you recognize this ACOG practice bulletin?

2 A. I do.

3 Q. In fact, you're a co-author of it, right?

4 A. Yes.

5 Q. And if you would turn -- I think it actually was
6 offered into evidence by Mr. Muniz under a different exhibit
7 number, correct?

8 A. I'm sorry. I don't know.

9 Q. Never mind. Turn to the third page of it, please, if
10 you would. In the first column of the third page under
11 counseling patients, second sentence in the second full
12 paragraph, it states that most women who seek early abortion
13 will be eligible for medical and surgical methods, correct?

14 A. Yes.

15 Q. And you agree with that statement because that's
16 consistent with your estimate of 5 percent or less, right?

17 A. I do.

18 Q. And you testified that even among that 5 percent or
19 less, typically these are all patients who can have a surgical
20 abortion, but it would just be more complicated or risky to
21 perform one than a medication abortion, correct?

22 A. Yes, I would say it's more complicated.

23 Q. And the -- the situations where surgical abortion is
24 absolutely contraindicated are much less than that, correct?

25 A. Oh, yes.

1 Q. Can you estimate what that number is? Is it 1 percent
2 or less than 1 percent of the total number of first-trimester
3 patients?

4 A. For which surgical abortion is to be --

5 Q. Contraindicated.

6 A. -- contraindicated?

7 Q. Yes.

8 A. Much less than 1 percent.

9 Q. That would be much less than 1 percent; is that right?

10 A. Yes.

11 Q. And, in fact, it would be at least complicated to
12 advise such a patient to have a medication abortion, as well,
13 correct?

14 A. Yes.

15 Q. Because, as you testified, in 2 to 7 percent of the
16 cases, depending on gestational age, that a patient may end up
17 needing an aspiration, correct?

18 A. Yes.

19 Q. And first-trimester surgical abortion is done by
20 aspiration, correct?

21 A. Correct.

22 Q. Can you flip to Exhibit 25? You've seen this document
23 before, correct?

24 A. Yes.

25 Q. And this is a frequently asked question -- clinical

1 questions document prepared by the World Health Organization,
2 correct?

3 A. Yes.

4 Q. And will you flip to the page marked Page 8? In the
5 first full paragraph of main text, it says there's little, if
6 any, difference between medical and surgical abortion in terms
7 of safety and efficacy. Thus, both methods are similar from a
8 medical point of view, and there are only very few situations
9 where a recommendation for one or the other method for medical
10 reasons can be given, correct?

11 A. Yes.

12 Q. And you agree with that statement, as well, based on
13 your prior testimony, correct?

14 A. We can argue about what very few means, but, as I said,
15 I believe it's 5 percent or less, the number of abortion
16 patients for whom it would be recommended to have a medication
17 abortion.

18 MR. SAUER: Your Honor, I would move for admission
19 of Exhibit 25 -- Exhibit 22 is already into evidence, so
20 Exhibit 25 and Exhibit 30.

21 THE COURT: Any objection?

22 MR. MUNIZ: Your Honor, no objection to 22.

23 THE COURT: I don't think 22 -- 25 and 30 is what
24 was offered.

25 COURTROOM DEPUTY: I don't have 22 admitted.

1 MR. MUNIZ: No objection as to 30, Your Honor. As
2 to 25, it appears to be a reproduction of a book, but not a
3 complete reproduction, and it's unclear -- it appears there are
4 missing parts, and I would say that it lacks foundation.

5 MR. SAUER: As to foundation, he's testified that
6 he's reviewed it before and he agrees with the statement in it.
7 And it is, indeed, excerpts of a textbook -- or a book, I'm not
8 sure it's a textbook, but there's nothing in the context that's
9 excluded. I merely asked him if he agreed with that one
10 statement, and he said he did.

11 THE COURT: The objection will be overruled, and
12 both 25 and 30 will be admitted.

13 (State Defendants' Exhibits 25 and 30 were admitted
14 into evidence.)

15 BY MR. SAUER:

16 Q. And, Dr. Grossman, Mr. Muniz asked you about other
17 reasons that women choose medication abortion, correct?

18 A. Correct.

19 Q. And turn to Exhibit 30 -- back to Exhibit 30, which is
20 the ACOG Practice Bulletin No. 143. Can you turn to the third
21 page of that document again?

22 This particular -- in the second column there, in
23 the first full paragraph, first sentence, it says most women
24 choose medical abortion because of a desire to avoid surgery
25 and perception that medical abortion is safer than surgical

1 abortion and a belief that medical abortion is more natural and
2 private than a surgical procedure, correct?

3 A. Yes.

4 Q. And that's consistent with the reasons you gave that
5 women have in your experience expressed a preference for
6 medication abortion over surgical abortion, correct?

7 A. Yes.

8 Q. And I think you testified that you had done one study
9 where it was found that 71 percent of the participants in that
10 study stated that they had strongly wanted a -- or strongly
11 preferred a medication abortion, correct?

12 A. Correct.

13 Q. And if you would flip back one page, if you look at
14 Exhibit 29. Or one tab. This is, in fact, a copy of that
15 particular study related to that issue, correct?

16 A. Correct.

17 Q. And this is a study you were referencing in your
18 testimony on direct where the 71 percent figure is found,
19 correct?

20 A. Correct.

21 Q. And if you'd turn to the fifth page of that study on
22 Page 300, in the second column in the second to the last
23 paragraph, you state that 71 percent of participants said they
24 strongly wanted medical abortion when they were making their
25 decision, no difference between cohorts, correct?

1 A. Correct.

2 Q. And the study doesn't provide any more specific
3 information about the reasons they gave, does it?

4 A. I'm sorry. The reasons they -- we do have additional
5 information about the questions related to how important it was
6 to have the abortion as early as possible, which sometimes is a
7 reason women choose medication abortion.

8 Q. Without exception, there's no further information given
9 in this particular study of the reasons --

10 A. Correct.

11 Q. -- it was preferred, correct?

12 A. That is correct.

13 Q. And when you say no difference between cohorts, this
14 was a two-cohort study, correct?

15 A. In this study, patients were given the option of
16 obtaining abortion through telemedicine versus with a standard
17 in-person visit.

18 Q. And so there were two cohorts that were compared in
19 this study, correct?

20 A. Yes.

21 Q. And one cohort was women who had obtained medication
22 abortions through telemedicine, correct?

23 A. Correct.

24 Q. And the other cohort was women who had obtained
25 medication abortion through a face-to-face visit, correct?

1 A. Through an in-person visit, yes.

2 Q. And so all of the study participants were women who had
3 actually chosen medication abortion, correct?

4 A. Correct.

5 Q. So when you say that 71 percent of the women say they
6 strongly wanted medication abortion, the women who were
7 answering that question don't include any women who had a
8 surgical abortion, correct?

9 A. That is correct.

10 Q. So in other words, the 71 percent is a polling of only
11 women who actually chose the medication abortion, correct?

12 A. That is correct. I think I was trying to make the
13 point here that women who choose medication abortion have a
14 strong preference for it.

15 Q. 71 percent of the women who actually chose it had a
16 strong preference for it, correct?

17 A. Right.

18 Q. According --

19 A. And an additional 16 percent said they were leaning
20 toward medical abortion as soon as they had made their decision
21 toward -- about having the abortion.

22 Q. I think you mentioned on your direct examination that
23 in some cases there may be situations where a woman has a
24 history of sexual trauma, such as rape or sexual assault, where
25 she would prefer a medication abortion for that reason,

1 correct?

2 A. Yes.

3 Q. And the idea would be that the notion of placing
4 instruments in the vagina would be offensive or traumatic for
5 that particular patient, correct?

6 A. The whole experience would be seen as invasive and sort
7 of recreating the trauma.

8 Q. And I take it you -- you're not aware of any studies
9 that address that particular issue, correct?

10 A. Specifically that -- as related to the choice of
11 medication versus surgical abortion, is that your question?

12 Q. That is my question.

13 A. I'm not aware of any studies.

14 Q. So you're not aware of any study that attempts to
15 quantify how many women of first-trimester abortion patients
16 would strongly prefer medication abortion because of history of
17 sexual trauma?

18 A. I'm not aware of any study.

19 Q. And you have some anecdotal evidence from your own
20 experience that suggests that this occurs, correct?

21 A. Yes.

22 Q. And we talked about that in your deposition, and I
23 asked you how frequently, and you said that it has occurred in
24 your experience less than, perhaps, 1 percent, correct?

25 A. Yes.

1 Q. And you estimated that maybe in 20 cases over your
2 career of providing abortions there was a situation where you
3 were aware -- were aware that that was the reason for the
4 decision, correct?

5 A. Where I was aware, but I think, as I also mentioned
6 during my deposition, that patients may not express that
7 history or specifically say that that is the reason why they're
8 choosing this over the other, but that might be the reason why
9 they're doing it.

10 Q. And those 20 patients comprised less than 1 percent of
11 the abortions you performed in the first trimester, correct?

12 A. Correct.

13 Q. Can you turn back to Exhibit 19, the clinical practice
14 guideline from Canada? On the third page of that study, Page
15 369 at the bottom of the first column under patient
16 preference -- sorry, not that study. It's a clinical practice
17 guideline, so it summarizes the results of studies, correct?

18 A. Yes.

19 Q. And then there under patient preference, it says in
20 studies where women were given a choice between medical
21 abortion and surgical abortion, 35 to 84 percent of women chose
22 medical abortion, correct?

23 A. Yes.

24 Q. So there was a wide range of results in the studies
25 that are reported here, correct?

1 A. Yes.

2 Q. And the footnotes indicate that they surveyed about 16
3 studies at this point, correct?

4 A. I believe so. I have not reviewed all of those
5 references to know for sure if they were the exact same regimen
6 and the exact same gestational age window that we're talking
7 about here in this case, so I'm a little hesitant to draw a
8 direct comparison there.

9 Q. Sometimes women will be in a community where only
10 surgical abortion is available, correct?

11 A. Are we talking specifically about here in Missouri or
12 in general?

13 Q. Let's focus on Columbia, for example. Let me ask you
14 this question. Does the comprehensive -- the complication plan
15 regulation that's being challenged in this case address
16 surgical abortion in any way, to your knowledge?

17 A. To my knowledge, it does not.

18 Q. So it prevents no -- presents no barrier to the
19 provision of surgical abortion services anywhere in Missouri,
20 correct?

21 A. Correct.

22 Q. It would only apply to medication abortion, correct?

23 A. Correct.

24 Q. And so, for example, in Columbia, surgical abortion is
25 currently available, correct?

1 A. Correct.

2 Q. And in Springfield it's not available now, but RHS is
3 in the process of applying to do surgical procedures at that
4 facility, correct?

5 A. That is my understanding.

6 Q. And in fact, in the previous case, they had suggested
7 they wanted to do both surgical and medication abortion
8 procedures in that particular facility; is that correct?

9 A. I'm not familiar with that case.

10 Q. But in this particular case, they have applied to do
11 medication abortion procedures in Springfield, correct?

12 A. Yes.

13 Q. And -- but the facility also could be equipped to do
14 surgical procedures, correct?

15 A. I believe that to be the case, yes.

16 Q. And certainly nothing in the regulation would prevent
17 anyone from doing surgical abortion procedures in Springfield,
18 correct?

19 A. In this regulation, no.

20 Q. So focusing on women in Columbia, if you will,
21 currently surgical abortion is available in Columbia, but
22 medication abortion is not, correct?

23 A. Correct.

24 Q. And I take it you don't know how many women who prefer
25 medication abortion will travel to Kansas City or St. Louis to

1 get it, as opposed to getting a surgical abortion in Columbia,
2 correct?

3 A. I do not know those numbers.

4 Q. And you don't know, for example, how many -- well, for
5 how many women the travel might be prohibitive, you know, who
6 might otherwise have been stopped from getting an abortion at
7 all, will nevertheless go to get a surgical abortion available
8 in Columbia, correct?

9 A. I do not know that exact number, no.

10 Q. And you also don't know how many -- the converse of
11 that, you don't know how many women do travel to St. Louis and
12 Kansas City from the Columbia area, even though -- because they
13 prefer medication abortion, correct?

14 A. I'm sorry. I thought that was the first question you
15 asked. I don't know that.

16 Q. Right. It's the converse of the first. You don't know
17 how many go get a surgical abortion --

18 A. Okay.

19 Q. -- even though they would prefer to get a medication
20 abortion, correct?

21 A. Correct.

22 Q. And you don't know how many go get a medication
23 abortion, even though surgical abortion would be available in
24 their community, correct?

25 A. Correct.

1 Q. Can you talk about a situation, a hypothetical
2 situation we could call it, where there's a coverage physician
3 available 24/7 for the Columbia facility? Do you understand
4 that hypothetical?

5 A. I do.

6 Q. In the event that a coverage physician were available
7 at the Columbia facility, that doctor presumably would be
8 available to attend office hours at that facility, correct?

9 A. Presumably, yes.

10 Q. In other words, if a patient came -- suppose a patient
11 came, or called in after hours and had a problem and was told
12 to come back in the next business day, correct? Suppose that
13 happened. Is that fair?

14 A. Yes. But I would anticipate, even if there were a
15 backup physician available and this was not a situation where
16 it was clear that the patient needed to have an aspiration but
17 just could wait until the next business day -- and that's very
18 hard, again, to figure out just on the phone. Barring that, I
19 would imagine that they would still have the patient come in to
20 the health center to be evaluated by a nurse practitioner to
21 determine what's the best treatment for them.

22 Q. So there's a couple of things there. Sometimes things
23 are just very hard to evaluate on the phone, correct?

24 A. Yes.

25 Q. And so there are -- you talked about these three

1 buckets of patients who are calling in, some where they have no
2 significant medical concern, some where they may have a
3 significant but not emergency problem, and some where your --
4 they may have an emergency problem, right? There are those
5 three kind of class -- you talked about those three classes of
6 patients who are calling in on the phone, correct?

7 A. Those three categories, yes.

8 Q. And they sometimes can be -- what's difficult to
9 evaluate over the phone sometimes is which of those three
10 buckets you're in, correct?

11 A. Let's not use buckets, let's say categories. I would
12 say that, yes, sometimes it is hard to determine, and then we
13 err on the more -- you know, either closely following a patient
14 and having a patient call back in an hour, or sometimes just
15 having the patient go to the emergency department when we're
16 not sure.

17 Q. So in other words, there may be situations where you
18 err on the side of arranging for a face-to-face evaluation of
19 that patient.

20 A. Correct.

21 Q. And sometimes that can be done at the emergency
22 department, correct?

23 A. Yes.

24 Q. And sometimes it can be done at the facility during
25 regular office hours, correct?

1 A. Correct.

2 Q. And if there's a coverage physician available in the
3 community, that physician would be available to participate in
4 a face-to-face diagnosis during office hours, correct?

5 A. Yes. But I think it would still be -- I would imagine,
6 even if they had that backup physician available, that it would
7 still make sense for the patient to come in to the health
8 center and be evaluated by the staff who have been treating
9 her, who gave her the initial medications, and determine what
10 is the best course of treatment. I can't imagine that -- a
11 situation where all the patients would be sent to this backup
12 referring OB-GYN.

13 Q. But the backup physician would be available to go to
14 the clinic to assess a patient who had a significant issue; is
15 that fair to say?

16 A. The physician would be available, but the way that the
17 medical care works in a collaborative practice situation like
18 this is that a lot of that would still be done by the phone,
19 over the phone. I'm sure that the nurse practitioner would
20 evaluate the patient, confer with the physician over the phone,
21 and it's very likely that that backup physician would not see
22 the patient if the patient doesn't require an aspiration.

23 Q. And that might be likely, but not always, correct?

24 A. Yeah, there may be some cases where even after the
25 patient would be then evaluated at the health center, it may be

1 so unclear that the nurse practitioner, in consultation with
2 the physician, would request the physician to come over to see
3 the patient, possibly perform an aspiration at the health
4 center. Or it may be just decided that the patient needs to
5 be -- needs to go directly to the emergency department.

6 Q. So there could be situations where the nurse
7 practitioner would think it would be advantageous to have the
8 doctor come and take a look at the patient at the health
9 center, the coverage doctor, correct?

10 A. Yes. But in my assessment, my experience with this,
11 and also review of the literature, I would bet that in the
12 majority of cases, even in a situation where that backup
13 physician is available and there's a contractual arrangement,
14 that a lot of that would happen over -- in the majority of
15 cases, the only consultation would happen over the phone.

16 Q. And you mentioned the performance of an aspiration at
17 the health center, correct?

18 A. Yes.

19 Q. A doctor would have to do that in Missouri, correct?

20 A. Correct.

21 Q. Because there are no nurse practitioners who are
22 qualified to perform aspirations in Missouri, correct?

23 A. I don't know the exact mechanism why it is prohibited,
24 but I know it is prohibited.

25 Q. And, in fact, if the coverage physician were available,

1 the coverage physician could perform an aspiration at the
2 health center, correct?

3 A. Yes.

4 Q. Whereas, with no coverage physician available, a
5 patient who needed an aspiration would probably be sent to the
6 emergency department, correct?

7 A. Not necessarily. I think we talked about earlier in my
8 direct that there are many cases where it may be determined
9 that the patient needs an aspiration and -- but it's not
10 urgent, and it could be that the patient would be given some
11 options in terms of the scheduling. It may be that -- and also
12 the location. An option might be for the patient to travel,
13 for example, to St. Louis to have the same physician who was
14 involved with her care do the aspiration in a more timely way.

15 Q. Certainly a -- certainly if the patient needs or
16 prefers to have a prompt aspiration done at the clinic, a
17 coverage physician would be required, correct?

18 A. If a prompt aspiration needed to be done at the clinic,
19 then the backup physician would be available to do that.

20 Q. And there are circumstances where that would arise that
21 a prompt aspiration would be appropriate to do at the clinic,
22 correct?

23 A. Yes.

24 Q. I think you testified in your deposition that sometimes
25 when a patient has come in to the emergency department, the

1 OB-GYN will want to go straight to the ER to meet that patient
2 when she comes in, correct?

3 A. Sometimes.

4 Q. So there's sometimes circumstances where it's believed
5 that the coverage OB-GYN at the hospital wants to get involved
6 right away at the emergency department, correct?

7 A. I'm sorry, I got a little confused. Are we talking
8 about the coverage at the emergency department, or the original
9 treating OB-GYN?

10 Q. I'm talking about the coverage OB-GYN. Let's talk
11 about your practice at ZSFG. I think you testified that there
12 may be circumstances where a patient might be experiencing a
13 potential emergency who would come to the ER, and then the
14 resident or the other OB-GYN who is providing coverage at the
15 hospital will go straight to the ER to meet that patient,
16 correct?

17 A. Correct.

18 Q. And if there were a coverage physician available in
19 Columbia, that physician could do that, as well, correct?

20 A. They might do that, yes.

21 Q. Whereas, if there's no coverage physician available,
22 then that patient would not be met by the on-call OB-GYN at the
23 hospital prior to screening or triage by the emergency staff,
24 correct?

25 A. I don't know. I mean, I think that there could be a

1 specific situation, for example, where there is a concern about
2 the patient was very high risk of an ectopic pregnancy and is
3 having symptoms where the referring clinician might alert the
4 ER about that patient, and I'm sure that they would probably
5 call the on-call OB-GYN who would be there promptly to meet the
6 patient. So it really depends on the situation, I think.

7 I can just say from my own personal experience of
8 being that on-call OB-GYN that, yeah, there were certainly
9 times where I was given a heads-up about a patient that was
10 coming into the emergency department that I had no prior
11 relationship to who I essentially met in the emergency
12 department.

13 Q. Is that frequent that you get the heads-up about
14 patients that you have no prior relationship to?

15 A. No, it's not frequent, but it's infrequent that, in
16 general, that the patient needs to be met urgently in the
17 emergency department.

18 Q. Sometimes the -- sometimes the on-call OB-GYN at the
19 hospital will be involved in treating complications for
20 post-medication abortion, correct?

21 A. Correct.

22 Q. And there are certain procedures that are performed to
23 treat post-medication abortion complications that typically
24 only an OB-GYN would perform, correct?

25 A. Those procedures that I talked about earlier that are

1 exceedingly rare.

2 Q. So that would include hysterectomy, is that one of
3 them?

4 A. Yes.

5 Q. And laparotomy?

6 A. Yes.

7 Q. And laparoscopic surgery, correct?

8 A. Correct.

9 Q. And those two procedures could also be used to treat
10 ectopic pregnancy, correct?

11 A. Correct.

12 Q. And in addition to that, an OB-GYN would be trained to
13 do aspirations, but most ER doctors would not be trained to do
14 that, correct?

15 A. Correct.

16 Q. And some hospitals have OB-GYNs on staff and some
17 don't, correct?

18 A. That is correct.

19 Q. So for some hospitals, there would be no OB-GYN on
20 call, correct?

21 A. That is correct. My understanding is that in both
22 Springfield and in Columbia, those hospitals, there are OB-GYNs
23 on call.

24 Q. Do you know that for sure?

25 A. That's what Mr. Muniz told me.

1 Q. In other words, you have no firsthand knowledge of
2 whether or not hospitals in Columbia or Springfield have
3 OB-GYNs on staff, correct?

4 A. I was told this by Mr. Muniz.

5 Q. And, obviously, not all hospitals in Missouri have
6 OB-GYNs on call at all times, correct?

7 A. That is correct.

8 Q. And if there was a patient experiencing medication
9 abortion and the coverage physician was available, that
10 coverage physician would be available to go to the hospital and
11 assist in the treating of that patient, correct?

12 A. I'm sorry. Surely you're not suggesting that if there
13 is a backup physician in Springfield that's been arranged, that
14 that OB-GYN is going to travel to Branson if the patient goes
15 to the emergency department. I mean, if we're talking about
16 places -- I mean, they would be available in -- nearby to
17 possibly --

18 Q. Let me ask the question this way. It guarantees the
19 availability of an OB-GYN in the community to go to the
20 hospital and participate in the treatment of that patient who
21 is experiencing an emergency if the coverage physician is
22 prearranged, correct?

23 A. I'm not really understanding the question because my
24 understanding is that there are OB-GYNs on staff at the
25 hospitals in Columbia and Springfield, so there are OB-GYNs who

1 are immediately available to treat complications at those
2 facilities.

3 Q. If there was a community where the hospitals lacked
4 that, an OB-GYN on call, the availability of the coverage
5 physician would guarantee the availability of an OB-GYN to
6 treat emergency complications, correct?

7 A. I don't -- again, to get back to my Branson question,
8 you're not asking -- the regulation does not require that the
9 OB-GYN, the backup OB-GYN be able to travel to any hospital
10 anywhere in Missouri and provide care for that patient,
11 correct?

12 I mean, we're assuming that this would be helpful
13 locally, and I believe also part of the requirement is that the
14 physician needs to live nearby, near the facility where he or
15 she has privileges. So I don't know how the regulation helps
16 us at all, that hypothetical woman who traveled to Springfield
17 to get a medication abortion but lives in Branson, and she then
18 goes to an emergency department there. She's going to get
19 whatever care she can get at the emergency department there.

20 Q. But, of course, if she lived in Springfield and the
21 Springfield hospitals do not, in fact, have coverage OB-GYNs
22 available, then it would be a benefit to her to have a coverage
23 physician available to participate in her emergency care,
24 correct?

25 A. Okay. My understanding is that that is not the case

1 and that there are OB-GYNs available in Springfield.

2 Q. But you understand I asked a different question,
3 though. I ask you to respond to my question, which is --

4 A. A hypothetical.

5 Q. Yes, a hypothetical where there is no emergency -- or
6 there's no OB-GYN on call at the hospital, and a woman
7 experiences a medication abortion complication in that
8 community.

9 A. Okay. I'm finding this very -- I suppose there is a
10 hypothetical other city that we could think of that's not
11 Springfield or Columbia where that might be the case, yes.

12 Q. For example, Joplin, if that were to occur in Joplin.
13 Do you know whether there are OB-GYNs on staff at the hospitals
14 in Joplin?

15 A. I do not know.

16 Q. And if there were a provider of medication abortion in
17 the Joplin area who had a coverage physician available, women
18 who experience post-abortion complications in Joplin would be
19 guaranteed the availability of an OB-GYN to participate in
20 their emergency treatments at the hospital there, correct?

21 A. I suppose that is true.

22 Q. Could you go to Exhibit 30? This is ACOG bulletin,
23 Practice Bulletin No. 143. If you turn to Page 6, in the first
24 column, at the very first full sentence in that column, it says
25 clinicians who wish to provide medical abortion services either

1 should be trained in surgical abortion or should be able to
2 refer to a physician trained in surgical abortion, correct?

3 A. Correct.

4 Q. And you're actually a co-author of this, so you believe
5 that statement, correct?

6 A. I do.

7 Q. And the reason -- I take it the reason that it's
8 recommended that clinicians who are providing medication
9 abortion be trained in surgical abortion is that, you know, 3
10 to 5 or 2 to 7 percent of the time, an aspiration has to be
11 done to treat problems that arise after a medication abortion,
12 correct?

13 A. They should either be trained or be able to refer for
14 that service, correct.

15 Q. And when you say -- again, the second part says, "or
16 should be able to refer to a clinician trained in surgical
17 abortion." That would be an alternative way to address this
18 based on this document, correct?

19 A. Correct.

20 Q. Do you consider sending a patient to the emergency
21 department to be a referral to a clinician trained in surgical
22 abortion?

23 A. I believe that that plan for being able to provide
24 urgent aspiration procedures meets this criterion, yes.

25 Q. And you testified earlier that most ER doctors are not

1 trained to perform surgical aspirations, correct?

2 A. That is correct.

3 Q. And many hospitals do not have an OB-GYN on staff,
4 correct?

5 A. I have to say I do not know what the proportions are --
6 is here in Missouri. But every hospital sees patients who are
7 suffering complications after spontaneous miscarriage, and, as
8 I testified earlier, the complications are really identical, as
9 is the need for an aspiration.

10 Q. Can you turn to Exhibit 34? Do you recognize that
11 document?

12 A. I do.

13 Q. What is that document?

14 A. This is the risk evaluation and mitigation strategy, or
15 REMS, document for Mifeprex.

16 Q. And this document is cross-referenced in the FDA label,
17 right?

18 A. Yes.

19 Q. And so these are requirements or recommendations that
20 the FDA has approved; is that right?

21 A. They're requirements, yes.

22 Q. And turn to the second page, starting under Paragraph
23 (A)(1), (ii)(1), it says to become specifically certified to
24 prescribe Mifeprex, healthcare providers must have the
25 following qualifications. And then at the top of the second

1 page, ability to provide surgical intervention in the case of
2 incomplete abortion or severe bleeding, or to have made plans
3 to provide such care through others, and ability to assure
4 patient access to medical facilities equipped to provide blood
5 transfusions and resuscitation, if necessary; correct?

6 A. Yes.

7 Q. So at the very least, this would require someone
8 providing medication abortion services to make sure that
9 there's a fully staffed hospital available to treat patients;
10 is that right?

11 A. That a patient has access to emergency services at a
12 hospital, yes.

13 Q. And it says to have made plans to provide such care
14 through others, referring to surgical intervention in cases of
15 incomplete abortion or severe bleeding, correct?

16 A. Yes.

17 Q. And it's your -- I take it it's your view that
18 referring patients to the local emergency department in the
19 vast majority of cases is a way of making plans to provide such
20 care through others, correct?

21 A. I do not believe it's the vast majority of patients.

22 Q. The majority of patients who are experiencing retained
23 products of conception?

24 A. I do not believe it's the vast majority of patients.

25 Q. The majority of patients who need them on an urgent or

1 emergent basis.

2 A. So that's a very small proportion of the -- say 5
3 percent, we want to talk about 5 percent who are going to have
4 a complication. We talked about it's a very small proportion
5 that would require to go to -- have treatment in an emergency
6 department.

7 Q. And emergency departments sometimes are overburdened;
8 is that fair to say?

9 A. Yes.

10 Q. And sometimes they -- the patients can experience long
11 delays in receiving care at emergency departments, correct?

12 A. Correct.

13 Q. Do you know of any -- are you aware of any evidence or
14 statistics that would quantify that for the state of Missouri?

15 A. I am not.

16 Q. Do you have any idea how long the waits typically are
17 for care in emergency departments in Columbia?

18 A. I do not.

19 Q. Do you know how long the waits for care are for
20 emergency departments in Springfield?

21 A. I do not.

22 Q. Are you aware that Dr. Eisenberg in his deposition
23 referred to the fact that a woman, quote, may spend eight hours
24 in an emergency department waiting to be diagnosed with a
25 routine yeast infection?

1 A. I didn't -- I have not read -- have not read his
2 deposition.

3 Q. Is that statement consistent with your understanding of
4 how care is sometimes delivered in emergency departments?

5 A. I mean, it would be very unfortunate for a woman to
6 have to go to an emergency department because of a yeast
7 infection, and I fear that that is a sign of really challenges
8 to accessing -- severe challenges to accessing primary care
9 here that is very concerning.

10 But yes, it is certainly true that even when
11 patients are in the emergency department for something they
12 need treatment for in the emergency department, that the wait
13 can be very long.

14 Q. If a coverage physician is available who has admitting
15 privileges in a hospital in the community, that coverage
16 physician can go ahead and admit the patient without going
17 through the emergency department, correct?

18 A. That really depends on how the facility is set up.
19 Actually, in some of the hospitals that I've worked at, it's
20 very hard to do a direct admit, and patients still have to come
21 in through the emergency department. But, yes, it can be
22 certainly facilitated.

23 Q. And can be accelerated, in fact, even if they're being
24 admitted through the emergency department, correct?

25 A. Yes.

1 Q. And so the long delays for care aren't -- in other
2 words, if the OB-GYN has admitting privileges at that hospital,
3 they can go to the emergency department and bypass the waiting
4 line that might be there, correct?

5 A. I mean, again, it would really depend on the individual
6 situation, but I will say certainly that, yes, there are times
7 when an admitting physician can make the admitting process
8 faster.

9 Although I also just want to highlight that we're
10 talking about not many of these situations where a patient
11 needs an urgent treatment in the emergency department.
12 Oftentimes they are not actually being admitted. They first of
13 all need to be evaluated to determine what the problem is, so
14 they're going to still unfortunately have to go through that
15 wait, whether or not there's an OB-GYN with admitting
16 privileges. And then they also might need to go to an
17 operating room, unfortunately, to have an aspiration done since
18 many emergency departments are not set up to do an aspiration
19 in the emergency department. And so they may have a very long
20 wait where -- usually where they're sitting in the emergency
21 department.

22 Q. You mentioned there might be a wait in the emergency
23 department before an evaluation would occur, correct?

24 A. Yes.

25 Q. But if a coverage physician were available, that

1 coverage physician could engage in that assessment personally,
2 correct?

3 A. Possibly. I think I also mentioned during my
4 deposition that there are sometimes cases where I've seen that
5 care can sometimes be delayed and the whole process because the
6 triage nurse at the emergency department says the patient's
7 primary physician is coming in, so just let's have her wait
8 until that physician comes in, and there could be a delay.
9 Obviously, if the patient is presenting with clinical signs
10 that needs more urgent assessment, the emergency department
11 staff will move forward with that.

12 Q. ACOG Bulletin 143 that we just referred to --

13 MR. SAUER: Oh, Judge, I would move for the
14 admission of Exhibit 34.

15 THE COURT: Any objection?

16 MR. MUNIZ: No objection.

17 THE COURT: Exhibit 34 will be admitted.

18 (State Defendants' Exhibit 34 was admitted into
19 evidence.)

20 BY MR. SAUER:

21 Q. Turning back to Exhibit 30, ACOG Bulletin No. 143, it
22 states that a physician performing medication abortions should
23 have the ability to refer to a clinician trained in surgical
24 abortion, correct?

25 A. I'm sorry, which page?

1 Q. Starting on 6, the top right.

2 A. Yes.

3 Q. Should be trained or should be able to refer to a
4 clinician trained in surgical abortion, correct?

5 A. Yes.

6 Q. Typically, when a referral relationship is set up,
7 there's an opportunity to assess the credentials of one's
8 referral partner, correct?

9 A. Sometimes, yes.

10 Q. So, in other words, if you're setting up a referral
11 relationship with another doctor, you would have a chance to
12 sort of find out about that doctor's background, skill, and
13 experience, correct?

14 A. Sometimes. I mean, sometimes that's just based on the
15 report from another physician. But, yes.

16 Q. Can you turn to Exhibit 31? Do you recognize this
17 document?

18 A. Yes.

19 Q. And this is excerpts from a Clinician's Guide to
20 Medical and Surgical Abortion published by the National
21 Abortion Federation, correct?

22 A. Yes.

23 Q. And this is an older document, right?

24 A. Yes.

25 Q. Can you turn to Page 111 of this document? In the

1 first column, in the second full paragraph of that column,
2 first sentence says the skill and experience of the surgeon are
3 important determinants of the safety of abortion, correct?

4 A. Yes.

5 Q. And that statement applies equally true to the
6 treatment of post-medication abortion complications, correct?

7 A. Yes.

8 Q. So if a facility has set up a relationship with a
9 coverage physician, they have had a chance to assess the skill
10 and experience of the surgeon who will be treating your
11 patients, correct?

12 A. Yes.

13 Q. Whereas, if they're referring to the local hospital,
14 that opportunity may not exist; is that fair to say?

15 A. But that a physician who has privileges at that
16 hospital has gone through the whole process of privileging,
17 which involves proctoring, and so they are essentially able to
18 assess the quality of that person's skills.

19 Q. Would they be able to tell, for example, if the
20 emergency room doctor who treats their patient has been trained
21 in aspirations?

22 A. No, but they would be able to know if that hospital has
23 granted privileges to the emergency department physician to
24 perform aspirations that that physician can perform them to
25 competency.

1 Q. So that you rely on other people to assess the skill
2 and experience of the doctor who will be treating post-abortion
3 complications?

4 A. Which is the case of -- with the way we always assess,
5 I think, any physician. I'm not going to go personally observe
6 them to assure that they meet competency.

7 Q. Sticking with Exhibit 31, lower down on that page, very
8 bottom of the first column, it talks about confidence and
9 comfort being enhanced when the surgeon acts professionally,
10 conveys warmth and empathy, provides useful information, and
11 addresses the patient's questions and concerns, correct?

12 A. That is correct.

13 Q. And you agree that giving the patient comfort and
14 confidence and reassurance throughout the process is an
15 important thing to do, is an important value, correct?

16 A. Of course.

17 Q. And if a patient is told that -- in the course of
18 obtaining a medication abortion, the patient is counselled
19 about the risks of that, correct?

20 A. Yes.

21 Q. And in particular, you would advise your patients that,
22 depending on their gestational age, they would have a 2 to 7
23 percent chance of needing a surgical aspiration after an
24 abortion, correct?

25 A. Correct.

1 Q. And you in ZSFG are able to say that, you know, if
2 you're in San Francisco, my residents and the doctors I partner
3 with, as well as myself, would be available to provide that
4 surgical aspiration, correct?

5 A. Correct.

6 Q. Whereas, Columbia, without a coverage physician
7 available, would have to tell its patients that if they need a
8 surgical aspiration on an urgent basis, they would have to be
9 sent to the emergency room, correct?

10 A. If it were the small subset of those 2 to 7 percent
11 that needed to be done urgently, yes.

12 Q. And a patient might derive comfort and confidence and
13 reassurance from the fact that an abortion facility had a --
14 had prearranged with a doctor who has a preexisting
15 relationship with them to treat the complications that may
16 arise, correct?

17 A. I don't know how much comfort and confidence it will
18 give a patient to see a name on a piece of paper that they
19 don't know, so I don't know.

20 Q. Do you think it would give them comfort and confidence
21 to be told, look, problems do come up in these situations, but
22 if there is a problem, we have a doctor we have predesignated,
23 and they will be available to address your problem?

24 A. I mean, they are being told. I mean, there is a doctor
25 who is available to assess these patients over the phone in

1 consultation with the 24-hour/7 triage nurse and nurse
2 practitioner who is available at the site, and they will have
3 met that doctor in person, so I think that's where the
4 confidence and comfort come from.

5 Q. Do you think there would also be comfort and confidence
6 coming from the fact that they're told we have a doctor, we
7 have vetted that doctor, we have confidence in their ability,
8 and that doctor will be available to treat you, if necessary?

9 A. Again, I really am not sure. We're talking about a
10 very small number of patients who are going to be in that
11 situation. I'm not sure that that's going to increase the
12 comfort and confidence that much.

13 Q. Do some women -- are some women reluctant to confide in
14 a strange doctor, such as an ER doctor, that they had an
15 abortion at all?

16 A. Some.

17 Q. So there may be a situation where, if a patient is sent
18 to the emergency room, she may be reluctant to tell the doctor
19 that what she's experiencing is a result of an abortion.

20 A. In my experience, you know, women are very smart about
21 their health care, and they recognize that when they have
22 complications that's going to be related to a treatment that
23 they had, they're going to be very upfront with their
24 physicians who are treating them, even if this is a stigmatized
25 issue like abortion.

1 So -- but might someone -- might some women not tell
2 the emergency department? Possibly, but they probably also
3 wouldn't, if they're really wanting to keep this a secret, try
4 to contact this backup OB-GYN that has been prearranged.

5 Q. Would a patient be less reluctant to do that if there's
6 a situation where they've been told there's a backup provider
7 who is already affiliated with the abortion facility?

8 A. I have no reason to believe that they would be less
9 likely to do that.

10 THE COURT: Mr. Sauer, why don't we go ahead and
11 take our lunch break at this point. As I indicated at our
12 initial break, I'm open to suggestions from the parties as to
13 how long you would like to take for the lunch break, given the
14 fact that we appear to have a lot to do. Mr. Sauer, do you
15 have any thoughts on that?

16 MR. SAUER: I think -- we talked about it. I think
17 we all agree that a short lunch break would be appropriate.
18 The parties would be fine with a half an hour, if that's not
19 too short for the judge.

20 THE COURT: Why don't we take a half-an-hour break,
21 and we'll come back close to 1 o'clock.

22 (A recess was taken from 12:32 p.m. to 1 p.m.)

23 THE COURT: Mr. Sauer, are you ready to proceed?

24 MR. SAUER: Yes, Your Honor.

25 THE COURT: Dr. Grossman, could you please take the

1 stand again?

2 (So done.)

3 THE COURT: You may proceed.

4 - - -

5 RESUMED CROSS-EXAMINATION

6 By Mr. Sauer:

7 Q. Dr. Grossman, could I direct your attention to Exhibit
8 32 in the binder in front of you? Are you familiar with that
9 document?

10 A. Yes, I am.

11 Q. And that is a committee opinion by the ACOG, correct,
12 No. 517?

13 A. Correct.

14 Q. And this discusses communication strategies for patient
15 handoffs, correct?

16 A. Correct.

17 Q. I want to direct your attention to the first paragraph
18 of this document, the second -- the second and third full
19 sentences in the first column. It says accurate communication
20 of information about a patient from one member of the
21 healthcare team to another is a critical element of patient
22 care and safety. It is also one of the least studied and
23 taught elements of daily patient care, correct?

24 A. Correct.

25 Q. I gather you would agree with at least the first part

1 of that sentence, all but the part about it being least taught,
2 correct?

3 A. Correct.

4 Q. And the next sentence says one of the leading causes of
5 medical errors is a breakdown in communication, correct?

6 A. Correct.

7 Q. And you agree with that, as well?

8 A. Yes.

9 Q. And you agree with the general principles that setting
10 up a relationship where there is effective communication among
11 providers is a very important principle of providing patient
12 care, correct?

13 A. I believe it is an important piece of it, yes.

14 Q. And then in the second column in particular, if you
15 look in that first full paragraph, most of the way down, it
16 says communication at the time of the handoff should result in
17 a clear understanding by each clinician about who is
18 responsible for which aspects of patient care, correct?

19 A. Correct.

20 Q. And you agree with that statement, as well, right?

21 A. Yes.

22 Q. In other words, it's very important for all of the
23 providers to be on the same page as to who is responsible for
24 what when it comes to taking care of a patient, correct?

25 A. That is correct.

1 Q. And there has to be clear and effective communication
2 on that particular issue, correct?

3 A. Correct.

4 Q. Flipping to the next page, if you go to the second
5 column under communication method, it says that the most -- at
6 the very bottom of that first full paragraph, it says that the
7 most effective handoff of patient information includes both
8 verbal and written components, correct?

9 A. Correct.

10 Q. And then higher up in the same paragraph, it says --
11 and you agree with that statement about effective communication
12 including verbal and written components, correct?

13 A. Correct.

14 Q. And, obviously, you can't always have written
15 communication, correct?

16 A. That is correct.

17 Q. And sometimes there may be scenarios where you can't
18 have verbal communication either, correct?

19 A. That is correct.

20 Q. But as an ideal, verbal and written communication are
21 both useful and valuable for making sure there's clarity about
22 who is treating which aspect of the patient's care, for
23 example, correct?

24 A. That is correct.

25 Q. And then higher up in the same paragraph, it says

1 face-to-face exchange of information is generally the preferred
2 form of verbal communication because it allows direct
3 interaction among those present, correct?

4 A. Correct.

5 Q. And so there are scenarios where it's advantageous for
6 doctors to be interfacing directly face to face about the
7 treatment of a patient when responsibility for aspects of care
8 are being transferred from one doctor to another; is that fair
9 to say?

10 A. Yes, but I think it's important to note that this is
11 mostly talking about a situation when a patient is under the
12 care of one clinician, either -- who is already in the
13 hospital, maybe being transferred to an ICU, or potentially
14 being in an outpatient setting where a procedure is performed
15 and a complication has immediately occurred and we're now
16 transferring the patient. Those are the kind of handoffs in
17 general that this is talking about.

18 I think -- I would be curious if you could point me
19 to a place where they're specifically talking about a patient
20 who is being -- who is coming in from home and then entering
21 into the healthcare system, if they're specifically giving an
22 example of a handoff in that situation.

23 Q. I'm just wondering if these principles are generally
24 true in your view when it comes to clinician-to-clinician
25 communication.

1 A. Procedurally in taking care of a patient, when transfer
2 is happening for a patient who is already an inpatient or who
3 is being transferred in with a complication from a procedure
4 that's been just performed at an outside facility.

5 Q. And also when a patient may be transferred from one
6 facility to another facility, correct?

7 A. Yes.

8 Q. And these principles would apply when one doctor is
9 handing off the patient, even if there's not an emergency,
10 correct?

11 A. I don't know that I completely understand. I'm not
12 sure that this exact same -- these exact same principles
13 necessarily apply when we're talking about a patient who has
14 had a treatment and is now at home and is coming into the
15 healthcare system. If all of these principles are -- as you
16 yourself have said, some of them are not necessarily even
17 possible to happen because the first physician or clinician who
18 is -- was overseeing the initial treatment is no longer in the
19 physical presence of the patient.

20 I'm just saying this is specifically talking about
21 one scenario, and it's hard to extrapolate to a scenario where
22 the patient is at home, experiencing a complication at home and
23 is now being told to enter into the hospital facility.

24 Q. Do you think that it's important or effective for there
25 to be clear and effective communication between the abortion

1 provider and the hospital when there is a post-abortion
2 complication?

3 A. I think it's important for the information about the
4 abortion procedure, or treatment in the case of a medication
5 abortion, to be communicated to the treating team at the
6 emergency department, and that can be accomplished through a
7 number of ways which we talked about earlier in my direct.

8 Q. And are there situations where it's advantageous for a
9 physician with responsibility for the patient's care in advance
10 to be communicating directly with physicians at the hospital?

11 A. Yes, there may be specific situations, yes.

12 Q. Can you flip back to your affidavit? It's at
13 Plaintiffs' Exhibit 16. I believe it's Exhibit 4 in our
14 binder, but I'll ask you to use the white binder.

15 Can you turn to Page 20 of your initial declaration?
16 It's Paragraph 53.

17 A. Yes.

18 Q. Are you there?

19 A. Yes.

20 Q. On the fourth line of that paragraph, you talk about
21 other medical procedures, including hysteroscopy, endometrial
22 ablation, loop electrical excision of precancerous cervical
23 lesions, and wide excisions of skin cancers, correct?

24 A. Correct.

25 Q. I take it those are all gynecological procedures; is

1 that fair to say?

2 A. Most of them are primarily performed by gynecologists.
3 Some of them, like colonoscopy, are also performed by other
4 physicians.

5 Q. You don't do colonoscopy yourself, do you? Is that a
6 no?

7 A. I do not.

8 Q. The other ones you perform?

9 A. I certainly have performed. Some of them I am not
10 currently performing.

11 Q. You testified, I think, on direct that those,
12 hysteroscopy and the following ones, endometrial ablation,
13 LEEP, and excision of skin cancers, those have risks of
14 complications that are comparable to the risk of complication
15 from medication abortion, correct?

16 A. Generally, yes.

17 Q. And are you aware -- let me ask you this.

18 Is it common practice for OB-GYNs who perform these
19 procedures to have a prearrangement with someone to provide
20 coverage to treat those complications when they arise?

21 A. As I discussed during my deposition, I am most familiar
22 with OB-GYNs that practice generally in a group setting of some
23 sort where they -- either in a direct group practice or they
24 have group call coverage because many of them, the majority are
25 providing obstetric care.

1 So, yes, they have an arrangement with other OB-GYNs
2 who are providing coverage for their obstetric patients and
3 their gynecologic procedure patients.

4 Q. So in your deposition, you testified that it is, in
5 fact, common practice for an OB-GYN who performs those
6 procedures to have a prearrangement with other doctors to be
7 available to treat the complications when the doctor who
8 performed the procedure is not available, correct?

9 A. Yes.

10 Q. And you agree with that today still, correct?

11 A. Yes.

12 Q. And other than the abortion context, I believe you
13 testified in your deposition that you couldn't think of any
14 area where OB-GYNs are performing elective procedures that have
15 a significant risk of complications where it would not be
16 common practice to engage in such a prearrangement with other
17 physicians to provide coverage to treat complications for
18 those; is that correct?

19 A. Again, what I said was that my familiarity -- again, I
20 have not reviewed national data on this, but my understanding
21 is it's very common for OB-GYNs to be in these kinds of
22 practice arrangements where they have call coverage, including
23 coverage for their -- any complications of the gynecologic
24 procedures that they perform.

25 Q. So it is fair to say that, to the best of your

1 knowledge, it is common practice for there to be such coverage
2 arrangements, correct?

3 A. That is my understanding, yes.

4 Q. In fact, I think you testified that -- in your
5 deposition, I think you said it's hard to think of another
6 scenario where an OB-GYN has had to travel long distances to
7 perform a procedure that no local OB-GYN is willing to perform.
8 Correct?

9 A. Correct.

10 Q. Implied -- and by that, you're saying abortion is a
11 different context because there's a scarcity of providers in
12 some areas, correct?

13 A. Correct.

14 Q. So it might be less common in the abortion context for
15 providers to be setting up coverage arrangements, correct? Is
16 that what you were saying?

17 A. That it is very -- I mean, there are very few
18 providers, so providers are traveling in so that they're not
19 going to naturally have that call coverage that they would have
20 in their home practice, and, at the same time, it's a
21 stigmatized procedure that few OB-GYNs in some areas are
22 willing to perform and even to perform backup care for.

23 Q. And so would the -- let me ask you this.

24 So you are agreeing that you're not -- other than
25 abortion, you're not aware of any elective gynecological

1 procedure with significant risks of complications where such a
2 prearrangement is not common practice. Correct?

3 A. I believe we were talking about OB-GYNs. As I've also
4 mentioned, family medicine physicians may also perform
5 aspirations or treatment for miscarriage, for example. And I
6 don't believe that necessarily -- if they weren't providing
7 obstetric care, they may not necessarily be in that similar
8 kind of call schedule, so they may not have similar
9 prearrangement, certainly with an OB-GYN, for backup. I don't
10 think that that's common.

11 Q. Do you -- are you -- now, do you know what the standard
12 of care is for family practice doctors?

13 A. The standard of care in terms of what?

14 Q. In terms of providing coverage for post-procedure
15 complications.

16 A. I mean, I'm familiar with some -- I am not very
17 familiar with the standard of care nationally. I work with
18 family medicine physicians in the Bay Area, and I'm familiar
19 with that.

20 Q. On direct examination, you offered some testimony about
21 the -- about the burdens of access for women in Missouri from
22 this regulation, correct?

23 A. Correct.

24 Q. Have you ever calculated for how many women in Missouri
25 the closest facility is either Kansas City or St. Louis?

1 A. As opposed to Columbia or Springfield?

2 Q. Correct.

3 A. I have not done that calculation.

4 Q. Would it surprise you that -- I mean, obviously, the
5 population of Missouri is heavily concentrated in Kansas City
6 and St. Louis, correct?

7 A. Correct.

8 Q. So you would expect that for the majority of women in
9 Missouri, the closest facility would be Columbia or -- I'm
10 sorry, it would be St. Louis or Kansas City, correct?

11 A. I would expect that.

12 Q. And for those women, obviously, they face no increased
13 driving distance to attend a medication abortion from this
14 regulation, correct?

15 A. Correct.

16 Q. Would it surprise you if that number was about 70
17 percent? That for most women, this regulation as things stand
18 right now has had no impact on their driving distance to obtain
19 a medication abortion?

20 A. That would not surprise me.

21 Q. You have provided some calculations -- testimony and
22 estimates about increased driving distance, distances as a
23 result of this regulation, correct?

24 A. Increased driving distance. Yes.

25 Q. But in your deposition, in your direct testimony, and

1 in your affidavits, you haven't offered any evidence that this
2 regulation has increased congestion at the St. Louis or Kansas
3 City facility, have you?

4 A. No.

5 Q. And so you don't have any evidence that there's been
6 any effect on, say, waiting times in St. Louis because of
7 patients coming from Columbia to St. Louis, correct?

8 A. That is correct.

9 Q. And you don't have any evidence of any effect like that
10 in Kansas City either, correct?

11 A. Correct.

12 Q. So you have not relied on any evidence that relates to
13 increased congestion at other facilities in your assessment of
14 the burdens -- of the alleged burdens on access to abortion
15 from this regulation, correct?

16 A. That is correct.

17 Q. And I think we've talked about this before, but you
18 also have no information or no basis to quantify how many women
19 faced with increased traveling distance for a medication
20 abortion would simply obtain a less-preferred surgical abortion
21 in their community, correct?

22 A. I do not have data on that.

23 Q. And that -- no data of that nature is sort of worked
24 into the analyses you've provided, correct?

25 A. That's correct.

1 Q. You've -- and the same question as to women who -- for
2 whom the travel might otherwise be prohibitive, who wouldn't be
3 able to get an abortion at all, you have no data on how many of
4 those women, if they exist, would forgo an abortion altogether,
5 as opposed to getting a surgical abortion in their community,
6 correct?

7 A. I do not.

8 Q. You alluded to several studies about the -- related to
9 increased driving distance and access to abortion in your
10 direct testimony, correct?

11 A. Correct.

12 Q. And several of these studies were cited in your
13 declarations, correct?

14 A. Correct.

15 Q. Can I direct your attention to Exhibit 37?

16 THE COURT: Defendant's 37?

17 MR. SAUER: Yes, sorry, Judge. This is
18 Defendant's 37.

19 BY MR. SAUER:

20 Q. This is a copy of your research letter that was
21 published in the *Journal of the American Medical Association*,
22 correct?

23 A. Correct.

24 Q. So this is a true and correct copy of the study that
25 you discussed with Mr. Muniz on your direct examination,

1 correct?

2 A. Correct.

3 MR. SAUER: Judge, I move for the admission of 37;
4 and, going back, I would also move for the admission of 32 and
5 31, if I have not done so.

6 THE COURT: Any objection?

7 MR. MUNIZ: No objection.

8 THE COURT: Exhibits 32 -- excuse me -- 31, 32, and
9 37 will be admitted.

10 (State Defendants' Exhibits 31, 32, and 37 were
11 admitted into evidence.)

12 BY MR. SAUER:

13 Q. And this is an observational study, correct?

14 A. Yes.

15 Q. And that means that it doesn't attempt to prove
16 causation, it merely observes a correlation between two
17 factors, correct?

18 A. Correct.

19 Q. And in particular, the two factors for which you
20 observed a correlation was a decrease in the abortion rate in
21 Texas after House Bill 2 had been passed in that state and the
22 increase in driving distances to the nearest facility, correct?

23 A. Correct. As facilities closed after HB2, the driving
24 distances increased, and then we looked at the association
25 between that and the abortion rate.

1 Q. And House Bill 2 had an impact on the availability of
2 both surgical abortion and medication abortion in Texas,
3 correct?

4 A. Correct.

5 Q. So the ASC requirements and the hospital privileges
6 requirements in the Texas law applied to providers of
7 medication abortion and surgical abortion.

8 A. Correct. But we're not really looking at the ASC
9 regulation here in this paper.

10 Q. In fact, you were looking at the correlation between
11 increased driving distance after House Bill 2 and decrease in
12 the abortion rate, correct?

13 A. Correct.

14 Q. But, of course, in Missouri, this regulation hasn't
15 stopped anyone from providing surgical abortion, has it?

16 A. That is correct.

17 Q. So the effect on women in Missouri is very different
18 from the effect on women in Texas, correct?

19 A. I mean, the -- I think that this is still informative
20 because this gives us some idea about how changes in driving
21 distance, increases in the driving distance are associated with
22 reductions in the abortion rate or number. The Cunningham
23 paper looked at the same scenario in a much more detailed way
24 with additional data and claims to show causation between
25 increased driving distances and the abortion numbers.

1 Similarly, we saw when only one type of abortion,
2 access to one type of abortion increased in Iowa, that actually
3 the total number of abortions for women who were living at the
4 distances greater than 50 miles from the nearest clinic, the
5 total number of abortions increased.

6 So I was looking at all of these papers together to
7 try to make an estimate.

8 Q. And just focusing on this paper, is it fair to say that
9 in Texas, House Bill 2 shut down clinics providing both
10 medication and surgical abortion?

11 A. That is correct.

12 Q. In addition, there was evidence of increased congestion
13 at the remaining clinics in Texas, correct?

14 A. Correct.

15 Q. And in particular, it was reported, I believe, in both
16 judicial opinions and in evidence that wait times increased to
17 approximately three weeks at many clinics in urban centers in
18 Texas after HB2 was passed, correct?

19 A. Correct, that was our research.

20 Q. And, in fact, I believe in your deposition you
21 testified that this study alone is not a basis to draw any
22 causal inferences; is that fair to say?

23 A. That is correct.

24 Q. And I think you said you could not draw causal
25 conclusions from the Texas study because we were not able to

1 control for many factors, correct?

2 A. Correct.

3 Q. And you said nowhere in the paper did you claim
4 causality, correct?

5 A. Correct.

6 Q. And there are many factors that may have otherwise
7 affected abortion rates in Texas, correct?

8 A. There are several.

9 Q. For example, we talked in your deposition about the
10 fact that media, at least, had reported that many women in
11 heavily populated areas of south Texas had been going -- even
12 before House Bill 2 had passed, had been going to Mexico to
13 obtain medication abortions through over-the-counter pills
14 there, correct?

15 A. That was reported in the media, correct.

16 Q. And this study does not account for that particular
17 phenomenon, correct?

18 A. Correct.

19 Q. In addition -- in fact, that was reported in the media,
20 and you were cited, actually, in the *New York Times* article
21 about that, correct?

22 A. I was referred to. It's not a direct quote from me in
23 that piece of the *New York Times*.

24 Q. And they reported that you had said thousands of women
25 are doing that, but in your deposition you said, "I don't

1 believe I ever said that"; is that fair to say?

2 A. I don't believe I used the word thousands. We didn't
3 document that, in fact, it was thousands until a paper that --
4 a research brief that came out in 2015 where we did document
5 that it was at least 100,000 women in their lifetime have ever
6 done this.

7 But, again, this is something that's been happening
8 for years and it's hard to -- we definitely have no data
9 indicating that it has increased since HB2.

10 Q. But it was a trend that was already ongoing at that
11 time when HB2 passed, correct?

12 A. It was a phenomenon, it was not a -- when you say
13 trend, I don't know if you mean something that was increasing
14 or decreasing. But it was a phenomenon that was happening, as
15 it is happening here in the Midwest too.

16 Q. And, in fact, the abortion rate had declined nationwide
17 during the same period that's looked at in this study from 2012
18 to 2014, correct?

19 A. Correct, but it was a steeper decline here.

20 Q. You say there was a steeper decline in Texas, correct?

21 A. Correct.

22 Q. Can you look at Exhibit 38?

23 MR. SAUER: Judge, I would move for the admission of
24 Exhibit 37.

25 THE COURT: Any objection?

1 MR. MUNIZ: No objection.

2 THE COURT: Oh, 37 -- oh, 38?

3 MR. SAUER: I'm sorry, 37.

4 THE COURT: 37 will be admitted. Yes.

5 (State Defendants' Exhibit 37 was admitted into
6 evidence.)

7 MR. SAUER: I apologize.

8 BY MR. SAUER:

9 Q. And now could you look at Exhibit 38? Is this a copy
10 of the Iowa study that you've alluded to -- that you
11 co-authored that you alluded to in your direct examination?

12 A. Correct.

13 Q. And is this a true and correct copy of it?

14 A. Yes. The only thing I will is say that is,
15 unfortunately, a black-and-white copy, and some of the findings
16 are, in fact, in color figures, so those cannot be adequately
17 represented in this copy.

18 MR. SAUER: Your Honor, with that caveat, I would
19 move for the admission of 38, as well.

20 THE COURT: Any objection?

21 MR. MUNIZ: No objection, Your Honor, but I would
22 note that plaintiffs have this exhibit in color in our
23 exhibits. It's 35.

24 THE COURT: 38 will be admitted.

25 (State Defendants' Exhibit 38 was admitted into

1 evidence.)

2 THE COURT: And if I find the need to look at it in
3 color, I'll refer to plaintiffs' version.

4 BY MR. SAUER:

5 Q. Just turning to the last page of this study on Page 78.
6 It says (quoted as read), "Our study had several limitations.
7 Because it was an observational study, we cannot infer
8 causality from our results in factors other than" --

9 COURT REPORTER: I'm sorry.

10 MR. SAUER: I apologize.

11 BY MR. SAUER:

12 Q. (Quoted as read.) "Because it was an observational
13 study, we cannot infer causality from our results, and factors
14 other than telemedicine and the variables that we were able to
15 control for may have contributed to our findings," correct?

16 A. Correct.

17 Q. So this is -- this is, again, an observational study
18 like the Texas study, correct?

19 A. Correct.

20 Q. And it observes a correlation between the advent of
21 telemedicine in Iowa and a proportional increase in the
22 abortion rate in counties that are more than 50 miles from an
23 abortion provider, correct?

24 A. The geographic data we were dealing with actually
25 weren't county-based, it was ZIP-Code based.

1 Q. But with that caveat, I've accurately described this
2 study; is that fair to say?

3 A. Yes.

4 Q. And I take it that you relied on and observed increase
5 in the -- in the abortion rate after the advent of telemedicine
6 in counties that were more than 50 miles away from the nearest
7 provider; is that fair to say?

8 A. Again, areas that were more than 50 miles based on ZIP
9 Code, yes.

10 Q. I apologize again, based on ZIP Codes.

11 Can you turn to the third page of the study? And
12 here in your Table 2 at the bottom line, at the very bottom
13 line of that table, is that where you're deriving the figure of
14 a 14 percent increase in abortions after the advent of
15 telemedicine?

16 A. Yes, the increase from 2084 to 2382.

17 Q. So, in other words, that 2382 divided by 2084 would be
18 1.14, correct?

19 A. Or the difference divided by 2084 is .14.

20 Q. Yes. So those two figures is where you derived the 14
21 percent figure that's the basis of the estimate in your
22 declaration, correct?

23 A. Again, I wouldn't say that that was the basis of my
24 estimate. I did not rely just on this paper, but I relied on
25 my review of all of the literature, looking at the papers that

1 have documented a decrease in the abortion rate when access is
2 constrained and geographic distances increase, and I looked at
3 this, which is the only paper I'm aware of that looked at that
4 sort of in the converse, where services are then opened and
5 access is increased and geographic barriers are essentially
6 removed.

7 I looked at the whole -- all of these papers, looked
8 at the proportional changes in the abortion numbers that all of
9 those papers reported, and went with the proportional change
10 that was the lowest of all of those.

11 Q. When you say all of those studies, I take it you're
12 referring to the Texas study. That's one of all of those
13 studies, right?

14 A. Well, there are two Texas studies.

15 Q. Correct, the 2017 study and the 2013 study?

16 A. No, there's the Cunningham paper, as well.

17 Q. Oh, I'm sorry. Yes, so there's the Texas study
18 that you -- or the Texas research letter that you co-authored,
19 correct?

20 A. Correct.

21 Q. And there's the Cunningham paper that you testified
22 about on direct examination, correct?

23 A. Correct.

24 Q. And there's this Iowa study that we're looking at right
25 now, Exhibit 38, correct?

1 A. Correct.

2 Q. And then I think you also referred to a study by
3 Fuentes, et al., that's a qualitative study that involves
4 interviewing 23 women in Texas about their experience; is that
5 correct?

6 A. Correct.

7 Q. Is that the universe of studies that you're referring
8 to when you refer to all studies?

9 A. I mean, there are other studies that I also looked at
10 that don't quantify the geographic burden in the same way. For
11 example, one of the Joyce papers that looked at that in Texas.
12 I may have reviewed those other papers, but I didn't find them
13 relevant because they don't quantify a specific geographic
14 distance change and associate that with the change in the
15 abortion number or rate.

16 Q. So in other words, these -- those four studies we've
17 referred to, your Texas study, the Cunningham Texas study, your
18 Iowa study, and the Fuentes study, are the studies that you
19 relied on to make your estimates about the impact on Missouri
20 women; is that fair to say?

21 A. Correct.

22 Q. Now, if you turn back one page in the Iowa study, at
23 the beginning of Table 1, in the third line it shows that the
24 overall abortion rate in Iowa overall went through a 12 percent
25 drop in this period from 2006 to 2010, correct?

1 A. Correct, which makes the finding of an increase in
2 abortions in women living more -- in more distant or rural
3 areas of the state particularly even more noticeable.

4 Q. And so, whereas, for people who are 50 miles away from
5 the nearest abortion provider, the rate increased 14 percent,
6 correct?

7 A. Correct.

8 Q. And if you turn to the next page under service delivery
9 statistics, here you're assessing the number of abortions. If
10 you look at Table 2 in the heading, abortion patient
11 characteristics and service delivery statistics from Planned
12 Parenthood of the Heartland, Iowa, before and after
13 telemedicine was introduced, correct?

14 A. Correct.

15 Q. So this data, the data that showed a 14 percent
16 increase, is -- relates to abortions that were actually
17 procured at Planned Parenthood providers, correct?

18 A. Correct.

19 Q. And, in fact, overall, even though the abortion rate in
20 Iowa declined, the number -- the absolute number of abortions
21 at Planned Parenthood increased during this period, correct?

22 A. Slightly, yes.

23 Q. And I think we talked about in your deposition that
24 that indicates that there was a transfer of market share from
25 the other provider or providers in Iowa to Planned Parenthood

1 when Planned Parenthood was the only one who implemented
2 telemedicine; is that fair to say?

3 A. I think during the deposition I declined to endorse
4 that terminology. I don't see this as transfer of market
5 share.

6 First of all, we do see that there were -- the
7 abortion numbers increased. These were patients who were not
8 being served by anyone, and then became served by Planned
9 Parenthood.

10 Q. You say these are women who weren't being served by
11 anyone. How -- your study does not indicate whether or not
12 these women would have or could have gotten abortions at a
13 different provider; is that fair to say?

14 A. That's fair to say, but, of course, you can look at all
15 of the data from all abortions in Iowa on the website of -- the
16 Iowa Board of Health has data for all abortions that were
17 performed on Iowa residents, according to their region of
18 residence.

19 Q. Turning to the -- Page 77 of this study, in the second
20 column. Or I guess it's the only column off to the right,
21 second full paragraph. It says -- you wrote, despite this
22 apparent involvement -- improvement in access to abortion care,
23 we observed a relatively small reduction in the distance when
24 they traveled from their home to the clinic, correct?

25 A. Correct.

1 Q. And although this finding may seem surprising, distance
2 to the clinic is one of the several factors -- only one of
3 several factors women consider when choosing to obtain the
4 service, correct?

5 A. Correct.

6 Q. And I believe the study indicates that the average
7 distance women traveled to obtain an abortion in Iowa after the
8 advent of telemedicine went from something like 33 to 31 miles;
9 is that fair to say?

10 A. I think it was about a three-mile decrease, but it's
11 about from 33 to -- 33.2 to 30.7.

12 Q. So you're looking at Page 75 of the study; is that
13 right?

14 A. Correct.

15 Q. There it says the average distance that women traveled
16 from their home to the clinic decreased slightly from 33.2
17 miles before telemedicine introduction to 30.7 miles after,
18 correct?

19 A. Correct. And just to highlight how -- one reason why
20 that might have happened is more women who live in these more
21 rural parts of the state started obtaining abortions. They
22 still had relatively longer distances to travel to get to even
23 a telemedicine site, but before in the pre-period, they weren't
24 obtaining abortions at all, so they weren't -- their distances
25 weren't factoring at all.

1 In the post period and after telemedicine was
2 introduced, they were obtaining abortions, but they were still
3 driving farther than women might be driving in Des Moines to
4 access care.

5 Q. And the explanation you've just provided is not
6 quantified anywhere in the study or stated therein, correct?

7 A. The finding that medication abortion in particular
8 increased in the more outlying areas of the state, that is
9 quantified. I mean, that is discussed in the paper, and that's
10 presented in the color maps, as well.

11 Q. But the reason why -- well, even though there were 16
12 new clinics providing telemedicine abortion, there was a very
13 small change in the average distance traveled to obtain an
14 abortion. The explanation you've provided for that is not
15 stated in this study, correct?

16 A. No, it's not in the text of the paper.

17 Q. Can you turn to Exhibit 48, which would require you to
18 go to the third binder? Are you there?

19 A. Yes.

20 Q. Do you recognize this study?

21 A. Yes.

22 Q. And this is the study that's -- I believe the author is
23 Fuentes, correct?

24 A. Correct.

25 Q. And you are actually listed as an author of this study,

1 as well?

2 A. Yes.

3 Q. And this is one of the four studies you just testified
4 that you relied on in making your estimate on the impact to
5 abortion access in Missouri, correct?

6 A. It was one of the papers that I considered.

7 Q. This study is actually not a quantitative study at all,
8 but is a qualitative study, correct?

9 A. Correct.

10 Q. And, in fact, it reports on the results of 23 in-depth
11 interviews with women and their experience of medication -- or
12 experience of abortion generally after the passage of House
13 Bill 2 in Texas, correct?

14 A. Correct.

15 Q. And, again, House Bill 2 shut down medication and
16 surgical abortion facilities, correct?

17 A. Correct. And in addition to doing that, it also
18 prevent -- many of the facilities that remained opened stopped
19 offering medication abortion.

20 Q. So in any event, medication abortion became less
21 available, as did surgical abortion, correct?

22 A. Correct.

23 Q. In the results section of this study, you report that
24 eight of the 23 women delayed obtaining an abortion more than
25 one week, two delayed obtaining abortion until after 12 weeks

1 of pregnancy, and two did not obtain a desired abortion at all,
2 correct?

3 A. Correct.

4 Q. And the total number of study participants was 23 for
5 this study, correct?

6 A. That is correct.

7 Q. Can you turn to Exhibit 47? This is the Cunningham
8 study, correct?

9 A. Correct.

10 Q. And this is one that you testified about in direct
11 examination, correct?

12 A. Correct.

13 Q. And this is one that you testified that you relied on
14 in forming the basis of your opinions about abortion access,
15 correct?

16 A. Correct.

17 MR. SAUER: Your Honor, I would move for the
18 admission of 48 and 47, if I may.

19 THE COURT: Any objection?

20 MR. MUNIZ: No objection.

21 THE COURT: Exhibits 47 and 48 will be admitted.

22 (State Defendants' Exhibits 47 and 48 were admitted
23 into evidence.)

24 BY MR. SAUER:

25 Q. Now, the Iowa study expressly stated that it was an

1 observational study and that causation could not be inferred
2 from its results, correct?

3 A. Correct.

4 Q. In Texas -- your 2017 Texas research letter, you
5 testified earlier that you could not draw causal conclusions
6 from the correlation observed in that case, correct?

7 A. Correct.

8 Q. And the Fuentes study is merely a qualitative study,
9 right? Not a quantitative study, correct?

10 A. I would remove merely from that description, but it is
11 a qualitative paper which gives us important information about
12 the kinds of experiences that women faced in Texas and helps to
13 paint a picture of the -- what was happening in terms of
14 women's actual experiences and why they weren't obtaining the
15 abortions that they wanted or why they weren't obtaining them
16 later, and helps give us insight into the quantitative findings
17 that we demonstrated.

18 Q. In other words, it doesn't attempt to quantify how many
19 women were prevented from getting an abortion in Texas by House
20 Bill 2, for example, does it?

21 A. Correct.

22 Q. And the Cunningham paper does purport to draw causal
23 conclusions, correct? Of that nature?

24 A. Correct.

25 Q. And of those four studies you relied on, it's the only

1 study that purports to make the causal conclusions; is that
2 fair to say?

3 A. That is correct.

4 Q. And can you turn to the first page of the abstract of
5 the study, the introduction section, which is the third page of
6 the document?

7 In the beginning of the second full paragraph, it
8 says, quite notably, there is very little empirical evidence on
9 the causal effects of targeted regulation -- targeted
10 regulation of abortion provider laws and, more generally, on
11 the causal effects of abortion clinic closures and access to
12 abortion services, correct?

13 A. Correct.

14 Q. It goes on to say that they believe their study may be
15 the first attempt to control other -- control for other factors
16 and draw causal conclusions; is that fair to say?

17 A. I mean, generally I agree with that. I'm not sure if
18 you're pointing me to a specific sentence where they say that
19 or -- but, yes, I believe that that is generally correct.

20 Q. If you would turn to the second page of this study, the
21 first full sentence on the second page of the introduction
22 section. Right there at the end of the paragraph, they report
23 that survey evidence indicates that wait times climbed as high
24 as three weeks for some of the remaining clinics in Texas,
25 correct?

1 A. Yes, and they cite my work.

2 Q. And there's no -- you testified before that you didn't
3 rely on any evidence of that nature in Missouri in your
4 analysis, did you?

5 A. I was not given data about that.

6 Q. Lower down on the same page, it says, basically four
7 lines up from the bottom, an approach that focuses on distance
8 alone ignores the possibility that reductions in per-capita
9 capacity --

10 COURT REPORTER: I'm sorry.

11 MR. SAUER: I'm sorry.

12 BY MR. SAUER:

13 Q. An approach that focuses on distance alone ignores the
14 possibility that reductions in per-capita capacity could
15 influence abortion rates through increased waiting times,
16 correct?

17 A. Correct.

18 Q. So in other words, congestion, they conclude, is an
19 important factor to control for, correct?

20 A. Correct.

21 Q. And they go on on the next page to state that if you
22 don't control -- if you don't account for the question of
23 increased congestion that your results may overstate the
24 effects of driving distance; is that fair to say?

25 A. Correct.

1 Q. And then turn to the fourth page of the introduction.
2 At the very end of the first paragraph, they also report that
3 the data do not allow us to determine whether all of the,
4 quote, **missing abortions resulted in additional births or**
5 **whether they're offset by other behavioral changes**; is that
6 fair to say?

7 A. That is exactly what it says.

8 Q. And, obviously, one behavioral change that might occur
9 in Missouri is that a woman might obtain a surgical abortion in
10 Columbia, for example, as opposed to getting a medication
11 abortion that she has to drive further for, correct?

12 A. Correct.

13 Q. And as you testified before, **we have no way to quantify**
14 **whether or how often that occurs, correct?**

15 A. I do not have data on that.

16 Q. Turning to the fifth page of the introduction
17 section -- or actually, I withdraw that, I apologize.

18 Higher up on the fourth page in the very beginning,
19 it suggests that there's substantial anecdotal evidence
20 suggesting that many women sought self-induction abortion using
21 an abortifacient sold over the counter at Mexican pharmacies
22 under the brand name of Cytotec, correct?

23 A. Correct.

24 Q. And they're reporting that as an unknown factor in
25 their particular analysis in the Cunningham study, correct?

1 A. They did attempt to control for that in their analysis.

2 Q. But they -- let me put it this way. The Cunningham
3 study doesn't have specific data on that particular question,
4 does it?

5 A. I mean, they try to address this issue by controlling
6 for distance to border crossing points in one of their models.
7 So they do take that into account. But, of course, they don't
8 have data on the exact number of women who are obtaining
9 Cytotec as referred to here to self-induce an abortion.

10 Q. On Page 9 of this study, they note that the effects of
11 access to abortion clinics may interact with other laws that a
12 state has in important ways that could make it difficult to
13 extrapolate from the results of the analysis to other contexts,
14 correct?

15 A. Correct.

16 Q. And, obviously, one difference between House Bill 2 and
17 Missouri's complication plan regulation is that the
18 complication plan regulation has no impact on surgical
19 abortion's availability, correct?

20 A. Correct.

21 MR. SAUER: Can I have a moment, Your Honor?

22 THE COURT: Yes.

23 (Pause in proceedings.)

24 MR. SAUER: That's all the questions I have right
25 now.

1 THE COURT: Any redirect?

2 MR. MUNIZ: Yes, Your Honor, briefly.

3 - - -

4 REDIRECT EXAMINATION

5 By Mr. Muniz:

6 Q. Dr. Grossman, to your knowledge, do plaintiffs provide
7 second-trimester medication abortion?

8 THE COURT: I'm sorry. You were talking way too
9 fast for me to hear, and maybe it would be better also if you
10 talk into the microphone.

11 MR. MUNIZ: I'm sorry, Your Honor.

12 THE COURT: I did not hear that question at all.

13 BY MR. MUNIZ:

14 Q. To your knowledge, do plaintiffs provide
15 second-trimester medication abortion?

16 A. To my knowledge, they do not.

17 Q. And Mr. Sauer spent some time asking about your
18 mathematical training. Do you need such training to offer any
19 opinions that you offered in this case?

20 A. I do not believe I do. I mean, I am involved in doing
21 much more complicated math during my -- the research work that
22 I do in working closely with biostatisticians, so I understand
23 math. I don't believe that I needed additional graduate level
24 courses in that.

25 Q. Mr. Sauer asked you some questions about whether when

1 you drafted your expert report in this case you understood that
2 a doctor would be in Columbia twice a week versus what is, in
3 fact, more likely two or three times per month. Does that
4 difference change any of the opinions you've offered in this
5 case?

6 A. It does not.

7 Q. In your report, are the medical observations yours or
8 mine?

9 A. They're mine.

10 Q. Are the medical conclusions that you've drawn yours or
11 mine?

12 A. Mine.

13 Q. And are the opinions yours or mine?

14 A. Mine.

15 Q. Briefly, let's talk about ectopic pregnancies. How
16 often is -- pregnancy outside of the uterus, how often does
17 that occur?

18 A. I believe that overall in the general population, it's
19 perhaps about 3 percent. It seems to be somewhat lower among
20 abortion patients, but it is still a very important thing that
21 we're all very attuned to. And all the protocols around early
22 abortion, both early medication abortion and both surgical
23 abortion, take that into account. I say that because sometimes
24 the abortion is being initiated before we can definitively
25 say -- or it's possible to start the procedure before we can

1 definitively say at the outset that the pregnancy is inside the
2 uterus or an ectopic.

3 Q. Do you know whether plaintiffs perform an ultrasound
4 before a medication abortion?

5 A. My understanding is that they do.

6 Q. And what's the purpose of the ultrasound?

7 A. It's both to date the pregnancy and to confirm its
8 location.

9 Q. Mr. Sauer asked you several questions about whether
10 some symptoms may be difficult for a patient to describe that
11 would allow the nurse to accurately assess by phone whether the
12 patient requires an in-person assessment. In your experience,
13 how successful is the telephone triage system in assessing
14 patient symptoms?

15 A. I think overall the system works well. Of course, when
16 you look at measures of accuracy, we want to have high
17 sensitivity to be able to make sure we get all -- pick up all
18 of the actual serious complications and have those people come
19 in for further immediate evaluation, and we do that at the
20 expense of specificity, meaning that we tell a lot of people to
21 come in who really don't need to be brought in. And so -- and
22 we accept that trade-off, so generally I think that the system
23 works very well.

24 Q. Is that telephone triage system we've been discussing
25 any different for other outpatient procedures than abortion?

1 A. No, it's not.

2 Q. Are aspiration abortions sometimes necessary -- sorry,
3 excuse me.

4 Are aspiration procedures sometimes necessary
5 following a miscarriage?

6 A. Yes.

7 Q. And how common is it for a woman to miscarry?

8 A. I mean, it's about 10 or 15 percent of all pregnancies.

9 Q. And you and Mr. Sauer talked about the rate of
10 medication abortions being medically indicated. Does medically
11 indicated mean surgical is contraindicated?

12 A. No, it does not.

13 Q. And I want to direct you to Defendants' Exhibit 19, the
14 clinical practice guidelines from Canada. And on Page 369, Mr.
15 Sauer called to your attention the range provided here of
16 patient preference, 35 percent to 84 percent. He also called
17 attention to the end note range of 23 to 32. Do you see that?

18 A. Yes.

19 Q. Would you flip to the end note starting at End Note 23?

20 23 to 32, what are the ranges there of the years of
21 publication?

22 A. Several in the 1990s. Some of them are from other
23 populations, like in China where they're offering -- using a
24 different regimen.

25 Q. Is it fair to say that many of these articles are from

1 the '90s?

2 A. Yes. And just also to highlight that some of these are
3 dealing -- are talking about gestational age, gestational ages
4 of pregnancy beyond ten weeks' gestation.

5 Q. What's your understanding of women's preference for
6 medication abortion in the United States since it was approved
7 by the FDA in 2000?

8 A. I mean, the proportion of women who end up having
9 abortion with medication continues to rise as a proportion of
10 all abortions, but the most recent data from 2014 show that
11 about 31 percent of non-hospital abortions are done with
12 medication, which is about 45 percent of all eligible abortions
13 up to nine or ten weeks. And that increases from like 5
14 percent back in 2001.

15 Q. And Mr. Sauer and you discussed a hypothetical
16 situation where a patient who is at the health center may need
17 a prompt aspiration at the health center. In this hypothetical
18 prompt situation, could that aspiration be provided elsewhere?
19 For example, at the emergency department or the patient's
20 private OB-GYN?

21 A. Yes, it could.

22 Q. Just a few more questions. Mr. Sauer asked you some
23 questions about whether all hospitals have OB-GYNs on call.
24 And that's certainly true, I believe from your testimony, that
25 that is not the case.

1 Do hospitals without OB-GYNs sometimes see patients
2 experiencing a complication or experiencing a miscarriage?

3 A. Yes.

4 Q. And do hospitals without OB-GYNs -- I'll withdraw that.

5 And we've talked about this before. How do
6 hospitals without an OB-GYN on call treat a patient
7 experiencing a miscarriage or a complication for a medication
8 abortion?

9 A. I think we've talked before about the various treatment
10 modalities. But, again, if any of the treatments are not
11 available at that site, under EMTALA, they would be required to
12 stabilize the patient and then transfer her to a higher level
13 of care where she could get the treatment that she needs.

14 Q. What's your understanding of the number of Missouri
15 counties without an OB-GYN?

16 A. I do not know.

17 Q. If I can refresh your memory, if you pull out your
18 report, which is Exhibit 16.

19 A. This may be coming back to me.

20 Q. If I can direct you to Paragraph 70.

21 A. Yes, it was about 58.7 percent of Missouri's 114
22 counties do not have an OB-GYN.

23 Q. Sorry to make you switch back and forth, but the REMS
24 document, which is Defense Exhibit 34, Mr. Sauer had you read
25 from there the requirements that -- wait.

1 This is Exhibit 34, and it is the second page,
2 sub-bullet (c), the ability to provide surgical intervention.
3 Does this document, or specifically that paragraph, say
4 anything about whether a provider of medication abortion must
5 have a written arrangement with an OB-GYN?

6 A. It does not specify that.

7 Q. And Mr. Sauer relayed something that came up in Dr.
8 Eisenberg's testimony, his deposition testimony about a patient
9 with a yeast infection waiting in the emergency department for
10 eight hours. In your experience, would a true emergency ever
11 wait eight hours?

12 A. No.

13 Q. Take the rare instance of a patient with a complication
14 that needs hospital care. Mr. Sauer asked you some questions
15 about whether patients ever hide from -- hide the fact that she
16 had a medication abortion from the hospital physician.

17 Suppose a patient does not tell the emergency
18 department physician that she had a medication abortion. Would
19 that impact the care she would receive?

20 A. Generally, no. As we've said, the complications with
21 medication abortion are essentially identical to those
22 associated with spontaneous miscarriage. So I think that she
23 would be treated appropriately.

24 Q. And shifting really briefly to the Cunningham paper,
25 the statistics you reported earlier, I believe it was 15

1 percent for an additional 50 miles of travel, does that control
2 for congestion?

3 A. Yes, it does.

4 Q. And this may be obvious, but a self-induced abortion is
5 not what we consider a legal abortion, correct?

6 A. It's not what we consider?

7 Q. A legal abortion?

8 A. That is correct.

9 Q. And would you agree that it is in the public health
10 interest for a woman to obtain an abortion through the medical
11 system?

12 A. I agree with that.

13 Q. And final questions here. Complications from
14 medication abortion are very low, correct?

15 A. We've reviewed all of the numbers. They are low, yes.

16 Q. And those requiring surgical intervention are even
17 lower.

18 A. Correct.

19 Q. About 2 percent?

20 A. I'm not sure how we're getting to that number, but,
21 yes. I mean, it's on the order of 2 percent.

22 Q. And major complications are even lower, right?

23 A. Correct.

24 MR. MUNIZ: That's all I have.

25 THE COURT: Any recross?

1 MR. SAUER: If I may, Judge, just one issue.

2 - - -

3 RECROSS-EXAMINATION

4 By Mr. Sauer:

5 Q. Dr. Grossman, Mr. Muniz asked you about a situation
6 where the patient may be reluctant to confide in an emergency
7 room doctor that she had an abortion at all, correct?

8 A. Correct.

9 Q. And you stated you don't believe that would impact
10 patient care for a post-medication abortion complication,
11 correct?

12 A. I think in the vast majority of cases, that would not
13 affect her care.

14 Q. Are there circumstances where it would affect her care?

15 A. There may be. I would have to think through this. It
16 might be something particularly related to her history, for
17 example, or if there was something related to her abortion.

18 There's a potential case -- a potential that this could affect
19 her care, but I think for the vast majority of women who just
20 simply take the medications and they have -- you know, there's
21 no other extenuating circumstances, really the complications
22 would present exactly like a complication of spontaneous
23 miscarriage and would be treated the same way too.

24 Q. So it's your testimony that there may be circumstances
25 where it would be advantageous for the doctor to know that the

1 patient had had a medication abortion, but you can't think of
2 specific instances where that would be true.

3 A. There may be cases; but, again, I don't know how this
4 regulation is going to force women to tell this to an emergency
5 department staff person or the referring OB-GYN if she doesn't
6 want to.

7 MR. SAUER: That's all I have.

8 THE COURT: I assume that there's no re-redirect?

9 MR. MUNIZ: No, Your Honor, and I think we can
10 release Dr. Grossman.

11 THE COURT: Okay. Thank you, sir, you may step
12 down.

13 Is the plaintiff ready to call your next witness?

14 MS. SANDMAN: Yes, Your Honor. Your Honor, if I
15 may, I'll just put this binder with the plaintiffs' exhibits
16 back. Thank you.

17 THE COURT: I assume this is the next witness?

18 MS. SANDMAN: Yes.

19 THE COURT: Ma'am, if you could come over to my
20 right, your left, first to be sworn.

21 - - -

22 COLLEEN McNICHOLAS,

23 being first duly sworn by the courtroom deputy, testified as
24 follows:

25 THE COURT: If you could have a seat in the witness

1 chair right there.

2 - - -

3 DIRECT EXAMINATION

4 By Ms. Sandman:

5 Q. Dr. McNicholas, please introduce yourself to the Court.

6 A. My name is Dr. Colleen McNicholas. I'm a
7 board-certified OB-GYN at Washington University School of
8 Medicine in St. Louis.

9 Q. And Dr. McNicholas, could you turn to the tab marked 22
10 in the binder in front of you? Do you recognize that document?

11 A. I do.

12 Q. And what is it?

13 A. It's my CV.

14 Q. And is it up to date, to the best of your knowledge?

15 A. It is.

16 MS. SANDMAN: Your Honor, plaintiffs move Exhibit 22
17 into evidence.

18 MR. SAUER: No objection.

19 THE COURT: Exhibit 22 will be admitted.

20 (Plaintiffs' Exhibit 22 was admitted into evidence.)

21 BY MS. SANDMAN:

22 Q. Doctor, I won't spend too much time on your
23 credentials, as the Court has your CV. But briefly, what is
24 your profession and where do you work?

25 A. I am a board-certified obstetrician-gynecologist. I

1 work at Washington University School of Medicine where I
2 maintain both clinical responsibilities and academic
3 responsibilities.

4 Q. And do you have any medical school affiliation?

5 A. I do. I'm an Assistant Professor in the Department of
6 Obstetrics and Gynecology.

7 Q. Are you involved in any residency programs?

8 A. I am faculty for the OB-GYN residency department, and
9 I'm the Director of our Ryan Residency Training Program.

10 Q. Can you briefly describe the nature of the Ryan
11 Residency Training Program?

12 A. The Ryan program is a national initiative to fully
13 integrate abortion and contraceptive education into OB-GYN
14 residencies across the country.

15 Q. And how many residents do you oversee as part of that
16 program?

17 A. We have nine residents per training year. It's a
18 four-year training program, so 36, generally, at any given
19 time.

20 Q. And, Doctor, what types of patient care do you provide?

21 A. I provide general gynecology. I have my faculty
22 practice in which I see private patients out of that space. I
23 provide -- I oversee prenatal care and other obstetric and
24 gynecologic care under their resident OB-GYN service. And I
25 also provide abortion care.

1 Q. And where do you provide abortion care?

2 A. We provide both an inpatient service at the hospital,
3 that's Barnes-Jewish Hospital, as well as outpatient services
4 at the Planned Parenthood in St. Louis and the Planned
5 Parenthood in Columbia, and then I also provide abortion
6 services in two independent clinics outside of Missouri.

7 Q. And, Doctor, do you know how many abortion providers
8 there are in Missouri and where they're located?

9 A. There are currently three locations where you can
10 achieve an abortion. That would be at the Planned Parenthood
11 in St. Louis, the Planned Parenthood in Columbia, and the
12 Planned Parenthood in Kansas City.

13 Q. And turning just briefly back to your professional
14 background, can you describe your professional history and
15 education?

16 A. I completed medical school at Kirksville College of
17 Osteopathic Medicine here in Kirksville, Missouri. I then went
18 on to complete my internship at Atlanta Medical Center in
19 Atlanta, Georgia. And then I transferred for the remainder of
20 my training to Washington University, where I completed my
21 OB-GYN residency there, followed by a two-year fellowship in
22 family planning, and a two-year Master's Degree in Clinical
23 Investigation.

24 Q. And, Doctor, you testified that you hold admitting
25 privileges at Barnes-Jewish Hospital in St. Louis. Is that the

1 hospital that's associated with Washington University?

2 A. It is.

3 Q. And what is the approximate split in your time along
4 your various duties?

5 A. So my time is split approximately 50 percent clinical
6 work and 50 percent academic or research work. My clinical
7 duties include both inpatient and outpatient gynecology, so
8 that includes the full spectrum of reproductive health care,
9 from anything that an adolescent might need, all the way
10 through sort of end-of-life or geriatric care as it pertains to
11 gynecology, as well as, as I said, supervision of prenatal care
12 and gynecologic care in an outpatient setting with resident
13 physicians. And then abortion care is the last piece of that
14 clinical picture.

15 Q. What methods of abortion care do you provide?

16 A. Both medical and surgical abortion.

17 Q. And do you teach these methods at the medical school,
18 as well?

19 A. I do.

20 Q. And does part of that teaching include what to do in
21 the case of an abortion-related complication?

22 A. It does.

23 Q. And in addition to all of the other positions you just
24 discussed, do you conduct research and publish in peer-reviewed
25 journals?

1 A. I do.

2 Q. And what's the focus of your research?

3 A. The vast majority of my research centers around the
4 provision of contraception, particularly around long-acting
5 reversible contraceptives, as means to reduce pregnancy and
6 abortion, with some interest in the intersection of
7 contraception and sexually-transmitted infection.

8 MS. SANDMAN: Your Honor, plaintiffs move at this
9 time to qualify Dr. McNicholas as an expert in the areas of
10 obstetrics and gynecology, with a specialty of abortion
11 practice.

12 MR. SAUER: No objection, Your Honor.

13 THE COURT: The doctor will be qualified as
14 requested.

15 BY MS. SANDMAN:

16 Q. Doctor, directing your attention to Exhibit 21 in the
17 binder in front of you, do you recognize that document?

18 A. I do.

19 Q. And what do you recognize it to be?

20 A. That is my declaration.

21 Q. Does that document accurately reflect your opinions in
22 this case and the facts as you understand them to be?

23 A. It does.

24 MS. SANDMAN: I would move to admit Exhibit 21.

25 MR. SAUER: No objection.

1 THE COURT: Exhibit 21 will be admitted.

2 (Plaintiffs' Exhibit 21 was admitted into evidence.)

3 BY MS. SANDMAN:

4 Q. Now, Dr. McNicholas, you're here today in part to offer
5 expert opinions about the necessity and impact of the Missouri
6 requirement regarding the provision of medication abortion; is
7 that correct?

8 A. That's correct.

9 Q. And are you familiar with the requirement?

10 A. I am.

11 Q. What do you understand it to require?

12 A. My understanding is the requirement, it requires that
13 any abortion facility or abortion provider who intends to
14 perform medication abortion or offer the service of medication
15 abortion also must identify two local OB-GYN physicians that
16 maintain admitting privileges in the local area to serve as
17 backup for that facility.

18 Q. And based on your experience and expertise, do you
19 believe this requirement is necessary for the safe provision of
20 medication abortion?

21 A. No.

22 Q. Is it medically beneficial in any way?

23 A. I can't think of a single reason it's medically
24 beneficial.

25 Q. Does it help women?

1 A. To the contrary, I think, in fact, it hurts women.

2 Q. Dr. McNicholas, you testified earlier that you provide
3 abortion services at Planned Parenthood health centers in St.
4 Louis and Columbia. When did you start providing -- first
5 start providing abortions at the Columbia health center?

6 A. In 2015.

7 Q. And do you know how long before that the Columbia
8 health center was providing abortions?

9 A. I don't know the exact timing, but I do know that there
10 was a large gap in services, as the facility was unable to
11 identify a provider.

12 Q. And when you say they were unable to identify a
13 provider, could you explain that?

14 A. Under that current time, the facility was required to
15 have a physician that held local admitting privileges, and so
16 there wasn't a physician in the local community who was able to
17 provide services, or a physician outside of the local community
18 who was able to secure admitting privileges.

19 Q. And when you became their provider in 2015, did that
20 change that situation?

21 A. It did.

22 Q. And were you the only physician providing abortions at
23 the Columbia health center?

24 A. I was.

25 Q. And did something happen that caused you to have to

1 stop?

2 A. Yes.

3 Q. And what was that?

4 A. I -- the admitting privileges that I had, the class of
5 admitting privileges I held at the University Hospital were
6 discontinued.

7 Q. And we'll come back later in your testimony to the
8 events that led to that loss of privileges.

9 For now, as a result of that loss of privileges, you
10 were forced to stop providing abortions at the Columbia health
11 center; is that correct?

12 A. That is correct.

13 Q. And were they able to find a different provider to take
14 your place?

15 A. They were not.

16 Q. And at that time, was the Columbia health center
17 providing surgical abortions or only medication abortions?

18 A. At that time we were only providing medication
19 abortion.

20 Q. And once they were forced to stop providing abortions,
21 how many abortion providers were there at that point in
22 Missouri?

23 A. That left the only remaining abortion provider at the
24 Planned Parenthood in St. Louis.

25 Q. How do you know that, Doctor?

1 A. As a provider at that facility, I saw women from across
2 the state, vouching for the fact that there was no other place
3 for them to get those services.

4 Q. And did there come a time that you were able to start
5 providing abortions at the Columbia health center again?

6 A. Yes.

7 Q. And when was that?

8 A. In 2017.

9 Q. What happened that allowed you to do that?

10 A. Following the Supreme Court decision in the *Whole*
11 *Woman's Health* case, Planned Parenthood filed lawsuit against
12 Missouri's admitting privileges and ambulatory surgical center
13 requirements. When those two pieces were enjoined, I was able
14 to restart services at that point.

15 Q. Dr. McNicholas, I'd like to focus now on your role at
16 the Columbia and St. Louis health centers. First, are you
17 employed by any Planned Parenthood affiliate?

18 A. I am not.

19 Q. What's your relationship with Planned Parenthood?

20 A. I'm an independent contractor that provides abortion
21 services.

22 Q. Do you have any administrative duties at Planned
23 Parenthood?

24 A. I do not.

25 Q. Are you involved in its management of either affiliate?

1 A. No, I am not.

2 Q. How often are you at each health center?

3 A. I'm at the Columbia clinic approximately two to three
4 days per month and at the St. Louis affiliate on a rotating
5 basis about once a month where one week I provide consenting
6 services, and then a second week I provide clinical services.

7 Q. And what is the reason for dividing your time that way
8 between the consent day and the procedure day?

9 A. Missouri now has a mandated in-person consenting law
10 that requires that individual patients meet with the provider
11 who will be providing their abortion at least 72 hours in
12 advance of their procedure in person to receive oral
13 consenting.

14 Q. And so you testified that about every four weeks you
15 provide services at the St. Louis health center. Are you
16 missing those days right now to be here?

17 A. I am.

18 Q. And why aren't you able to go there more frequently?

19 A. So my job actually entails much more than just
20 providing abortion care, so I need to -- as I sort of already
21 alluded to, my responsibilities are split between multiple
22 different clinical responsibilities, which include things
23 outside of abortion care, as well as my research and academic
24 responsibilities. So the totality of all of those pieces
25 really prevents me from changing my schedule any further.

1 Q. So just to be clear, would you be able to change your
2 schedule and go to the Columbia health center or the St. Louis
3 health center more frequently than you do currently?

4 A. Unfortunately, no.

5 Q. And currently, what abortion methods do you provide in
6 St. Louis and what methods do you provide in Columbia?

7 A. At the St. Louis affiliate, we provide both medication
8 and surgical abortion; and at the Columbia clinic, we are
9 currently providing surgical abortion.

10 Q. And why are you not currently providing medication
11 abortion there?

12 A. Because of the regulation at hand today.

13 Q. And focusing on the time since you were able to start
14 providing abortion services in Columbia in 2017, do you know
15 how long you were able to provide medication abortion services
16 before you had to stop because of this regulation?

17 A. We provided one day of medication abortion services.

18 Q. Now, I'd like to shift gears now to talk about how
19 abortion complications are handled at Planned Parenthood's
20 health centers in Missouri.

21 And first, is medication abortion a safe service?

22 A. It's exceedingly safe.

23 Q. How many years have you been providing medication
24 abortion?

25 A. Seven.

1 Q. Now, Dr. Grossman has testified in this area
2 extensively already, so I'll keep this section of my
3 questioning short. But I would like to ask you to speak to
4 some of these items in terms of the specifics of how care is
5 provided here in Missouri.

6 So if a patient has a complication from medication
7 abortion, when is that complication likely to occur?

8 A. So because of the way that medication abortion is
9 provided, if a patient was going to have a concern or a
10 complication, it would be remote from their clinic visit, often
11 days or sometimes weeks from their initial visit.

12 Q. And in your years of providing medication abortion,
13 have you ever had a complication occur while the patient was
14 still at the health center?

15 A. I have not.

16 Q. Are your patients given instructions of what to do --
17 excuse me, what to expect after the procedure?

18 A. Of course. Every patient is given a series of
19 instructions with ranges of normal and expected symptoms and
20 side effects, as well as a number to call if those symptoms or
21 concerns fall outside of those ranges.

22 Q. And if someone calls that number, who do they speak
23 with?

24 A. The nurse that's on call.

25 Q. Are there any times that the nurse is not available to

1 speak?

2 A. No.

3 Q. So a patient calls the number, describes the symptoms
4 that she's having. What will most patients be directed to do?

5 A. Well, the vast majority of patients that call the
6 on-call nurse call with symptoms that ultimately are deemed to
7 be within the normal expected range of post-medication abortion
8 symptoms.

9 So for the vast majority of patients, they receive
10 reassurance and then are reminded of the parameters by which we
11 want them to call for if symptoms change and fall outside of
12 those categories.

13 Q. And suppose the nurse directs a patient to return for
14 in-person evaluation of her symptoms. Can you walk me through
15 what would happen next in that scenario?

16 A. Sure. So what happens next depends a little bit on
17 what her symptoms are and what the concern is. For most
18 patients who are going to return for some concern or secondary
19 evaluation, it's going to be because of bleeding concerns.

20 So in that instance, the patient would first undergo
21 an ultrasound. Generally that is performed by our
22 ultrasonographer. Those images would then be reviewed with the
23 clinician available, which almost entirely is going to be the
24 nurse practitioner. And then, depending again on the patient's
25 symptoms or concern, they might then undergo a pelvic exam.

1 Q. I think it's clear from the testimony that you just
2 gave, but just to make sure, is this an evaluation that it
3 takes a physician to do?

4 A. No.

5 Q. And typically if a nurse directs a patient to return
6 for an inpatient evaluation, is that done on an urgent basis?

7 A. No. In general, most of the time because people are
8 calling with symptoms that are well within the range, most of
9 the in-person follow-up is going to be really initiated because
10 of patient concern, not necessarily because of medical concern.
11 And so for the vast majority of even the patients who we
12 recommend coming in for a secondary evaluation, that's going to
13 be done at their earliest convenience.

14 Q. And if the nurse practitioner determines that some
15 intervention is needed, what are the options for those
16 interventions?

17 A. So, in general, for stable patients we have three
18 options. The first is actually what we call expectant
19 management, so do nothing and wait and see. And for the vast
20 majority of patients who have something in the uterus, which
21 most commonly is going to be retained blood clots, about 85
22 percent of those will pass that blood clot on their own without
23 any intervention.

24 If the patient requests or prefers to have an
25 intervention, they can choose a medication, so we would offer a

1 second dose of the misoprostol. That's the second medication
2 of the abortion regimen. They would be administered that
3 medication in the clinic to self-administer at home.

4 The third option would be aspiration, which would be
5 an in-clinic procedure to remove whatever is left in the
6 uterus.

7 Q. Typically is there a medical basis to recommend one
8 option over another?

9 A. In a stable patient, the decision to intervene or, if
10 intervening, what intervention, is completely driven by the
11 patient's preference.

12 Q. And approximately what form -- excuse me, what
13 percentage of medication-abortion patients have symptoms that
14 raise the option of having some form of follow-up care?

15 A. Generally we see somewhere between 2 and 5 percent will
16 have some post-medication abortion concern that requires
17 secondary evaluation.

18 Q. And what would the most common causes be?

19 A. The vast majority of them have blood clot retained in
20 uterus, and a much smaller proportion will have some sort of
21 retained tissue or an ongoing pregnancy.

22 Q. And to make this a little bit more concrete, let's
23 focus on your patients in Columbia. So you testified that you
24 provided medication abortion services in 2017 for one day, and
25 you also provided medication abortion services in 2015 for a

1 period until you lost your local hospital privileges and had to
2 stop.

3 So focusing on those patients in 2017, and then the
4 much greater number of patients from 2015, did any of those
5 patients have bleeding or any other complication that required
6 any form of follow-up care?

7 A. No.

8 Q. And is that surprising?

9 A. No. As I said, the rate of intervention or rate of
10 complication following medication abortion is extremely low, so
11 I'm not surprised.

12 Q. Suppose that this is the rare instance, the rare
13 instance where a patient has retained tissue or blood and opts
14 to be treated with repeat miso. Is that something that needs
15 to be provided by a physician?

16 A. No. In general, that's a service that's provided by
17 the nurse practitioner.

18 Q. And the same thing with expectant management?

19 A. Correct.

20 Q. And focusing on your patients in Columbia, do you know
21 how many days a week a nurse practitioner is at the Columbia
22 health center?

23 A. A nurse practitioner is available Monday through
24 Friday.

25 Q. Suppose you were still providing medication abortion in

1 Columbia. If a patient from Columbia has bleeding that makes
2 an intervention appropriate and she chooses an aspiration
3 procedure, how would that patient be handled?

4 A. If the patient's choosing -- is being reevaluated in
5 the Columbia clinic and is choosing aspiration as her mode of
6 intervention, she would be offered a series of things.

7 If I'm available in the clinic that day, we could
8 perform the aspiration that day. If I'm not available, she can
9 be scheduled to return on a day that I am available in the
10 clinic.

11 She has the option to present to her primary OB-GYN.
12 Most women who have abortions also already have children, and
13 so they have established OB-GYN care, and certainly presenting
14 to their own physician is a reasonable option, as well.

15 And then lastly, we in the community know several
16 competent and compassionate physicians who would be willing to
17 take care of patients if the timing of my presence in the
18 clinic wasn't desirable for the patient.

19 Q. And could that patient also be referred to see you when
20 you're in St. Louis?

21 A. Absolutely. And they certainly could travel either to
22 the St. Louis or to the Kansas City affiliate.

23 Q. Now, currently a woman can't get medication abortion in
24 Columbia, right?

25 A. Correct.

1 Q. And what's the closest place that she can go to get a
2 medication abortion?

3 A. Well, depending on where she actually lives, it would
4 be either St. Louis or Kansas City.

5 Q. So suppose a woman from Columbia goes, for example, to
6 St. Louis for a medication abortion and she experiences
7 bleeding that requires an in-person assessment. Would that be
8 apparent while she was still in St. Louis?

9 A. It would not.

10 Q. So currently with the complication plan in effect, so
11 that patient travels to St. Louis or Kansas City for her
12 medication abortion, and then she's back in Columbia and she
13 needs a follow-up aspiration, what would her options be?

14 A. The same as I've already described. So she can return
15 to the St. Louis affiliate to be managed there, she could
16 present to her own primary OB-GYN, she can ask the affiliate to
17 refer her to a local OB-GYN, or she could wait until I would be
18 available in the Columbia facility.

19 Q. So just to be clear, does the complication plan
20 requirement have any impact on that patient's care?

21 A. No, clearly it doesn't. Patients who don't live in St.
22 Louis have no benefit from the complication plan imposed in St.
23 Louis.

24 Q. And does it have any effect on the practicalities of
25 their life in other ways?

1 A. No. I mean, other than the fact that the reality is
2 that imposing this complication plan means that the entire
3 middle of Missouri doesn't have medication abortion, therefore,
4 resulting in one of two situations, the first being that women
5 are forced to choose a method of abortion that they don't
6 prefer, or that they have to endure the additional logistics of
7 traveling much farther to secure their preferred method of
8 abortion.

9 Q. Dr. McNicholas, on a slightly different topic, is there
10 any clinical reason to require a physician providing a
11 follow-up aspiration procedure on an outpatient basis to have
12 local admitting privileges?

13 A. No. Outpatient aspiration is routinely performed in
14 OB-GYN offices for indications other than abortion. That's to
15 say the same exact procedure is performed all the time in a
16 clinic setting for things like miscarriage management, for
17 example.

18 Q. You testified earlier about the 24-hour on-call phone
19 system. Suppose a woman calls that number and she's
20 experiencing what I understand is a very rare, more serious
21 complication. Where would she be instructed to go?

22 A. If the patient is describing symptoms to the nurse that
23 she feels are requiring urgent or emergent evaluation, the
24 nurse would refer the patient to the closest emergency room.

25 Q. In that scenario, would you be notified?

1 A. Generally speaking, yes, the nurse would notify me.
2 Not always before she tells the patient to go to the emergency
3 room, but she will then either notify myself or whoever the
4 on-call physician is.

5 Q. And what's the purpose of that notification?

6 A. That helps us to make sure that we're following up with
7 patients after they present for secondary care outside of our
8 facility.

9 Q. Now, focusing on a patient that you treated at the
10 Columbia health center, if that patient is advised to go to the
11 emergency room, would you follow up with her?

12 A. Of course.

13 Q. And how often does it happen that a patient is directed
14 to go to the emergency room?

15 A. It's incredibly rare.

16 Q. Has this ever happened with a patient that you provided
17 medication abortion to at the Columbia health center?

18 A. It has not.

19 Q. And for a patient who travels to reach the health
20 center, would she be instructed to go to a hospital near the
21 health center where she had the abortion? For example, in St.
22 Louis?

23 A. She would be instructed to go to the emergency room
24 that is closest to where she physically is at that moment.

25 Q. Dr. McNicholas, switching gears a little bit, from your

1 experience providing care and teaching in the state, do you
2 have a general understanding of how urgent gynecological care
3 is provided at hospitals across the state?

4 A. I do.

5 Q. And what's the basis for that understanding?

6 A. As part of my job as an attending physician at
7 Barnes-Jewish Hospital and at Washington University School of
8 Medicine, I provide emergency room coverage for gynecologic
9 patients, obstetric and gynecologic patients. And that covers
10 not only the care of my own patients who might present to the
11 emergency room, but also the care of patients who present who
12 either don't have an OB-GYN, or for whom their OB-GYN doesn't
13 have privileges at our hospital, or for a patient for whom
14 their OB-GYN is not available.

15 Additionally, we are a referral-based center at
16 Wash U and Barnes-Jewish, and so we provide both a phone
17 consultative service for local or regional hospitals around the
18 area, as well as we accept transfers of patient care for any
19 services that other outside hospitals can't provide.

20 Q. And in your experience, are hospitals in Missouri well
21 equipped to handle abortion complications?

22 A. They are.

23 Q. And are emergency room doctors qualified to manage a
24 patient who is experiencing bleeding following a medication
25 abortion?

1 A. Absolutely.

2 Q. And why is that?

3 A. So the complications or concerning symptoms following
4 medication abortion present identical to what those of a woman
5 having a miscarriage does. And, you know, miscarriage is one
6 of the most common things that a reproductive-aged woman will
7 experience in her life. And so given that the presentation is
8 so common, ERs across the state have certainly treated many
9 women under those same circumstances.

10 Q. And I think this is clear from your answer, but just to
11 make sure, from a medical perspective, is there any difference
12 between the management of bleeding from miscarriage and the
13 management of bleeding following a medication abortion?

14 A. No.

15 Q. Now, suppose the bleeding from a miscarriage management
16 or a medication abortion requires an aspiration or the patient
17 is electing an aspiration and the ER doctor is not trained for
18 that procedure. How would that be handled?

19 A. Just as it would be handled for any other medical
20 service they don't provide at the emergency room. So generally
21 a patient would be stabilized. If the hospital doesn't have an
22 on-call OB-GYN, the stable patient would then be transferred to
23 a facility that does.

24 Q. And is that a common occurrence in the context of
25 medication abortion?

1 A. It's incredibly rare.

2 Q. Focusing specifically on patients who live in Columbia,
3 do you know if the hospitals in Columbia have on-call OB-GYNs?

4 A. They do.

5 Q. And how do you know that?

6 A. Well, for some amount of time, I had privileges at the
7 University Hospital, so I was familiar with their practices.
8 And in investigating the potential of privileges at Boone
9 Hospital, I also became aware of their system.

10 Q. So -- and just to be clear, how many hospital systems
11 are there in the Columbia area?

12 A. There are two.

13 Q. So in Columbia, in the very rare instance that a
14 patient needed an urgent aspiration for a complication from a
15 medication abortion, the on-call OB-GYN would be the one to
16 provide it, correct?

17 A. That's correct.

18 Q. Dr. McNicholas, in your work at Barnes-Jewish, are
19 there procedures that you provide where a patient may not have
20 access to a local backup doctor with local privileges to treat
21 any complications?

22 A. Sure. So my private gynecologic practice includes
23 women, again, from across the region, not necessarily just
24 isolated to St. Louis. And so there are many times when I
25 might provide a gynecologic surgery, a hysterectomy, for

1 example. And once the patient's surgery is complete and she's
2 stable and ready for discharge, we send them back to their home
3 community. And in that circumstance, I certainly don't make
4 any plans for a physician in that community to be able to take
5 care of a complication that might be experienced once they're
6 at home.

7 Q. And the procedures in this category that you were
8 discussing, does that include procedures where the patient may
9 go home the same day as the procedure?

10 A. Yes. There's lots of minimally -- what we call
11 minimally invasive surgical procedures that are performed every
12 day in gynecology, and the vast majority of those women will go
13 home the same day.

14 Q. And can you provide some examples of those?

15 A. Sure. So there is minimally invasive or vaginal or
16 laparoscopic hysterectomy where patients may go home the same
17 day. Most of the surgery we do on ovaries, cyst removal,
18 detorsion, or unwinding a twisted ovary, surgeries for
19 endometriosis, for example, those are all procedures that we
20 provide on an outpatient basis, meaning that those patients are
21 discharged to home the same day.

22 Q. Is it within the standard of care that you, for
23 example, would do that procedure at Barnes-Jewish and then send
24 the patient back home to a rural area of the state without
25 having a backup provider in that rural area?

1 A. Absolutely.

2 Q. And how do the complication rates of the procedures
3 that you've been talking about compare to the complication
4 rates for medication abortion?

5 A. Well, the complication rates of various procedures are
6 widely different, so certainly the risk of complication with
7 hysterectomy is actually much higher than it is with medication
8 abortion. But the vast majority of, for example, procedures we
9 do on ovaries and those sorts of things have similarly low
10 complication rates.

11 Q. And for a patient who travels to you at Barnes-Jewish
12 to access a procedure, not talking about an abortion procedure,
13 but gynecological care more broadly, how do you handle
14 complications?

15 A. Much like the Planned Parenthood system. So patients
16 are given a phone number so that they can access the on-call
17 doctor, which may be me or one of my colleagues, 24 hours a
18 day. The phone call during business hours would be answered or
19 triaged by our nurse, and after hours that call goes directly
20 to the physician on call.

21 Q. And if the nurse and the consulting physician, if
22 appropriate, end up advising the patient to have an in-person
23 evaluation or some form of urgent care, how would that be
24 handled?

25 A. Depending on how urgent the evaluation needs to be, if

1 the patient's symptoms warrant an exam within the next 24 to 48
2 hours, they would be advised to return to our office for
3 evaluation. If the symptoms are concerning enough that prompt
4 evaluation is needed, she would be directed to the emergency
5 room that is closest to her.

6 Q. And is there any difference between the processes that
7 you've been describing for these other gynecological procedures
8 and what you described for Planned Parenthood's practices in
9 connection with medication abortion?

10 A. No.

11 Q. Doctor, I'd like to go back to your earlier testimony
12 about the 24-hour phone number for patients to call and speak
13 with the nurse if they're worried about symptoms following a
14 medication abortion. Are you familiar with the protocol that
15 the nurse follows in assessing those symptoms?

16 A. I am.

17 Q. Can you describe it?

18 A. So generally we give the nurses -- or nurse's protocol
19 follows a series of questions that helps them to elicit the
20 severity of the symptoms. So taking bleeding for an example,
21 they have a series of questions they ask to help quantify the
22 amount of bleeding, how long they've been bleeding that way,
23 the quality of the bleeding, are there blood clots or not, and
24 any other associated symptoms with the bleeding.

25 Q. And in your experience, how successful is the on-call

1 nurse in assessing whether a patient's symptoms require
2 intervention, and, if so, what type?

3 A. I would say the nurses are extremely successful in
4 being able to triage patients based on their symptoms and the
5 guidance that we give them.

6 Q. Suppose a patient is experiencing complications from
7 medication abortion, she calls the 24-hour phone number, and
8 it's that very rare case where, based on her symptoms, the
9 nurse directs her to the emergency room. Is there any
10 information about the history of her care that's important for
11 the hospital physicians to have?

12 A. So there's nothing unique about medication abortion,
13 the history -- or history as being initiating -- or accessing
14 this care following medication abortion. There's nothing
15 unique about that that would change the provision of the care
16 that she is provided in the emergency room.

17 Q. And why is that?

18 A. Again, because when patients present, they present in
19 the -- exactly the same way they would if they were having a
20 miscarriage. And so there's nothing unique about the fact that
21 the process started via medication versus starting
22 spontaneously.

23 Q. So if a woman chose not to tell the doctors at the
24 hospital that she had had a medication abortion, would that
25 impact her care in any way?

1 A. It would not.

2 Q. Doctor, just a few last questions in this area. One is
3 if a doctor has admitting privileges at a hospital, does that
4 mean that his or her patients will be admitted more quickly?

5 A. So when patients present to the emergency room,
6 patients are assessed in triage based on the level of urgency,
7 not based on who they know or who their physician is. So
8 although there are circumstances in which patients can be
9 directly admitted to a floor, if a patient particularly in a
10 setting of medication abortion is presenting needing urgent or
11 emergent care, that would be an inappropriate route of
12 admission. It would have to go through the emergency room
13 where they would be triaged, just like everybody else.

14 Q. And we've been talking about medication abortion in the
15 first 70 days of pregnancy, correct?

16 A. That's correct.

17 Q. Can medications also be used to induce a termination in
18 the second trimester?

19 A. They can. That process is quite different.

20 Q. And is that process one that would ever be provided at
21 a Planned Parenthood health center, to your knowledge?

22 A. No, that process is, in fact, induction of labor.

23 Q. And just to be clear, why wouldn't that be provided in
24 the Planned Parenthood health center context?

25 A. So induction of labor is an incredibly unpredictable

1 procedure, oftentimes can require many hours, sometimes days to
2 achieve that outcome, and so outpatient -- the outpatient
3 setting just isn't set up to be able to provide 24-hours-a-day,
4 in-clinic services.

5 Q. Shifting gears a little bit to a different topic, you
6 testified earlier that currently at the Columbia health center
7 you're only able to provide surgical abortions, not medication
8 abortion. Now, in your experience, are those two services
9 interchangeable for patients?

10 A. So although they are equally effective, they certainly
11 are perceived and experienced quite differently by patients.
12 So I would say from the patient perspective, no, they're
13 entirely two different procedures.

14 Q. Can you talk more about that?

15 A. So medication abortion is a noninvasive way to induce
16 pregnancy termination. It involves essentially taking one pill
17 with me at the clinic, that's the mifepristone. We then send
18 the patient home with additional medication, misoprostol, which
19 they will self-administer 24 to 48 hours later. This approach
20 to termination completely avoids any invasive exams or
21 instrumentation.

22 The flip side is a surgical abortion, which,
23 although equally effective, again, is a completely different
24 procedure. We start by doing the pelvic exam, and placing the
25 speculum much like we would a pap test, and then the procedure

1 is completed via instrumentation by placing the cannula into
2 the uterus.

3 Q. So the patient experience of those processes is quite
4 different?

5 A. Yes. Obviously.

6 Q. And, Doctor, does part of your role at Planned
7 Parenthood, or more broadly as an abortion provider, include
8 talking to patients about their decision of abortion method?

9 A. Every patient under ten weeks of gestation is -- we
10 discuss the mode of abortion, which mode of abortion is most
11 appropriate for her lifestyle and her needs and her desires.

12 Q. And how long do you usually spend talking to patients
13 about this decision?

14 A. You know, it varies from patient to patient. It can be
15 anywhere from just a few minutes to sometimes up to an hour. I
16 would say an hour to probably about ten minutes or so.

17 Q. And from those conversations, can you talk about some
18 of the reasons that patients have given you for preferring
19 medication abortion over surgical abortion?

20 A. Sure. So most women who express a desire of medication
21 abortion prioritize the fact that it's not invasive, it's an
22 opportunity to avoid a pelvic exam or instrumentation. It
23 allows them some privacy in their abortion, and they can have
24 whatever support people they choose to have with them during
25 that time.

1 For many women -- remember I said many women will
2 experience miscarriage in their life. And so for many women,
3 having had that experience, this is a way to mimic an
4 experience they've already had, something that was a successful
5 experience for them before, so they have comfort and safety in
6 having had an experience like that before.

7 Certainly patients who have a history of sexual
8 violence or any trauma tend to, not just in the setting of
9 abortion care, but in the setting of gynecologic care in
10 general, tend to want to avoid pelvic exams or invasive
11 procedures.

12 So I would say those are probably some of the most
13 common reasons I hear.

14 Q. Are there also patients for whom medication abortion is
15 medically preferable as an option?

16 A. Of course, there's always going to be patients who we
17 feel like, based on their medical history or comorbidity, that
18 medical approach would be our first choice.

19 Q. And in your experience, focusing on patient autonomy
20 and patient preference, how common is it that patients feel
21 strongly about one method, as opposed to the other method?

22 A. 100 percent of the patients I see feel strongly about
23 which method of abortion they choose.

24 Q. And are there other contexts -- you talked a little bit
25 about how some women, especially survivors of sexual assault,

1 may more likely choose medication abortion to feel more in
2 control. Are there contexts other than surgical abortion where
3 a woman's history of sexual assault or IPV comes up in your
4 practice in connection with her level of comfort in various
5 procedures?

6 A. Yes. I would say that a history of sexual violence or
7 trauma is sort of a prevailing piece of all gynecologic care of
8 survivors of assault. So that includes even making routine
9 screenings, such as pap screening, really difficult sometimes,
10 with those patients often requiring even sedation to provide
11 even the most basic of preventative care for them.

12 Q. So these are conversations that you have with patients
13 throughout your practice, not just in the medication abortion
14 context?

15 A. Absolutely.

16 Q. And in your experience, is it rare for a woman to
17 express that she wants to avoid an invasive exam or procedure
18 because of a history of sexual assault?

19 A. Not at all.

20 Q. Are you familiar with any statistics on the frequency
21 of sexual assault?

22 A. So I think the most recent estimates are that one in
23 six women in the United States are currently survivors of
24 either an attempt or a completed sexual assault.

25 Q. Turning back to the current provision of care in

1 Missouri, suppose a patient who lives in Columbia has a strong
2 preference for medication over surgical abortion. Right now
3 she would have to travel to St. Louis or Kansas City, correct?

4 A. That's correct.

5 Q. And do you know how far that trip is?

6 A. I know from Columbia to St. Louis, having driven it
7 many times, is about 125 miles.

8 Q. And to your understanding, how many times would a
9 patient have to make that trip to get a medication abortion?

10 A. Twice.

11 Q. And why is that?

12 A. They would have to present the first time for their
13 in-person, 72-hours-in-advance oral consenting by the same
14 physician who will provide her the medication abortion, and
15 then she will need to return for distribution of the medication
16 on the second visit.

17 Q. Now, Doctor, you're still providing surgical abortions
18 in Columbia. So with this hypothetical about the Columbia
19 patient, the patient who actually lives in Columbia, can she do
20 the mandatory consent day there and save herself the additional
21 trip to St. Louis?

22 A. On a rare occasion when the stars align and I'm
23 consenting and present in Columbia, and then within a short
24 amount of time will also, then, be providing care in St. Louis.
25 However, it's pretty rare that those things happen. The

1 most -- and it would really be medically inappropriate for her
2 to sign consents with me and then be delayed an additional
3 three or even four weeks, just because she's waiting to see me
4 for that service.

5 Q. And just so it's clear to the Court the constraint that
6 you're talking about, why does it have to be you personally who
7 would provide the consent and then provide the service?

8 A. To comply with the same-physician, 72-hour law.

9 Q. Doctor, how many years have you been a provider at
10 Planned Parenthood's St. Louis health center?

11 A. Approximately seven years.

12 Q. And for some of those years, St. Louis was the only
13 place in the state that a patient could get an abortion,
14 correct?

15 A. For the vast majority of those years.

16 Q. And in those years, have you had conversations with
17 patients who traveled to St. Louis from other parts of the
18 state to get an abortion?

19 A. That's probably the most common conversation patients
20 want to have with me is the distance that they have to travel
21 and how much it costs them to do that.

22 Q. And are you aware of patients who were delayed in
23 accessing abortion because of their need for travel?

24 A. So nearly every woman who lives outside of the St.
25 Louis area, at least at the time there was only one clinic, had

1 some delay in accessing care because of need to get to the
2 clinic to secure that.

3 Q. And when you say nearly every patient has that delay,
4 how do you know that? What are you drawing on?

5 A. So patient experience, right? So as I said, it isn't
6 the medicine that patients most frequently want to talk with me
7 about, it's the fact that they've been struggling to secure
8 this care for sometimes several weeks from the time that they
9 knew they wanted to have an abortion.

10 Q. And how late in pregnancy can a woman have a medication
11 abortion?

12 A. We currently provide medication abortion through ten
13 weeks of pregnancy, or 70 days.

14 Q. And can you translate that into lay terms? Like, for
15 example, how long is that after a woman misses her period?

16 A. So pregnancy dating can be a little confusing. So we
17 date a pregnancy by last menstrual period, which generally is
18 somewhere between four to five weeks before their missed
19 period. So if a patient recognizes they're pregnant the first
20 day that they miss their period, which also is uncommon,
21 there's approximately five weeks between the time they find out
22 they're pregnant until the time they can no longer have a
23 medication abortion.

24 Q. Since the regulation went into effect and you had to
25 stop providing medication abortion in Columbia, you've been

1 talking a little bit about the conversations you've had with
2 patients about what this means for them. Can you talk more
3 about that?

4 A. Sure. So in general, it usually starts with a flood of
5 tears as patients sort of realize that the method they came in
6 intending to choose was not available, and, then, furthermore,
7 that they're going to be faced with two choices, neither of
8 which is really desirable for them. And those choices being,
9 of course, choosing the less-preferred abortion method or,
10 alternatively, trying to figure out if they can manage the
11 multiple logistics to get to either the St. Louis or Kansas
12 City clinic to be able to get that care.

13 Q. And have you treated patients in Columbia who had a
14 strong preference for medication abortion that ended up getting
15 a surgical abortion to avoid the travel burdens?

16 A. So unfortunately, the vast majority of women in
17 Columbia who would prefer to have a medication abortion will
18 ultimately choose to have a surgical abortion because the
19 logistics are just so difficult for them to be able to get to
20 St. Louis and figure out the schedule, the financials, the
21 child care, the negotiating time off of work. When all of
22 those things add up, although surgical abortion may be the less
23 preferred method, it's the method that they can achieve in the
24 shortest amount of time and at least cost to them.

25 Q. And can you talk about what you have heard from

1 patients in that situation?

2 A. I think patients are angry and frustrated, particularly
3 when the discussion around why they can't have a medication
4 abortion is had. When they realize that they can't have a
5 medication abortion, not because of availability of, or desire
6 of the clinic to provide that service, but because there's this
7 regulation that requires them to travel, and that, in fact, the
8 regulation doesn't even apply to them because they're going to
9 come back home to their own community, people feel violated in
10 their right to make autonomous health care decisions for
11 themselves.

12 Q. And on the flip side, have you treated patients who
13 traveled to St. Louis to get a medication abortion because they
14 could have only gotten a surgical abortion in Columbia? And
15 can you talk about what you've heard from patients in that
16 situation?

17 A. Yeah. So there certainly have been fewer women who
18 refused to concede their preferred method, and they do figure
19 out a way to navigate the system such that they can get that
20 care in St. Louis or in Columbia -- or excuse me, in Kansas
21 City.

22 But I will tell you that, just like the women who
23 were traveling to St. Louis when there was only one clinic,
24 they still express real frustration and difficulty with
25 managing those logistics and real pain about the things that

1 they have to give up in order to make that happen.

2 Q. When you say the things that they have to give up to
3 make that happen, can you explain that?

4 A. Yeah. So, you know, taking this example specifically,
5 so this is a woman that I'm seeing in Columbia, so she's
6 already taken one day off of work. So she now knows that she
7 has to take a second and third day off of work. So she has to
8 negotiate that. And for many women, that is not only
9 difficult, but impossible to do. You know, just last month we
10 had a patient who lost her job because she could not provide
11 her job with a reason that she felt comfortable with in why she
12 had to have multiple doctor visits in such a short amount of
13 time when she appeared just so healthy. So there's some real
14 consequences for these women. That's just one example, right?

15 If we're talking about figuring out the financials,
16 how to financially pay for the gas to get to and from St.
17 Louis, not once, but twice, we're talking about what are you
18 not going to pay this month? Can you not pay your electric
19 bill? Can we spend less on groceries? And these are not
20 things in the abstract, these are things that patients talk
21 about every single day.

22 Q. Doctor, do you know if many of your patients are poor?

23 A. So I would say nationally, the data suggests that
24 approximately 75 percent of the patients who are seeking
25 abortion are low income. I will also say that abortion is a

1 service that's accessed by women across socioeconomic status.
2 It's just a matter of how difficult that access is, depending
3 on how much money they have.

4 Q. Do patients talk to you about child care burdens?

5 A. So as I said, the vast majority of women already have
6 children. National statistics say approximately 60 percent of
7 women who are having abortion already have children, and I
8 would say my experience in Missouri is that it's probably a
9 little bit higher here in Missouri, that a little bit more than
10 that already have children.

11 So navigating school drop-off and pickup or nanny
12 coverage, again, multiple times is incredibly difficult for
13 patients.

14 Q. And have you had patients lose the confidentiality of
15 their abortion decision because of the need to make
16 arrangements for travel?

17 A. Unfortunately, yes. You know, most people think, oh,
18 just get a doctor's note. But there's -- certainly getting a
19 doctor's note with a header from Planned Parenthood is
20 certainly a different entity than getting a doctor's note from
21 Washington University School of Medicine. Whether you're at
22 Planned Parenthood for an abortion service or not, the
23 presumption is that you're there for an abortion. And so even
24 that option for many patients isn't realistic.

25 Q. Dr. McNicholas, as we're getting close to the end of

1 your testimony, I wanted to talk a little bit about your
2 ability to comply with the regulation.

3 So you testified earlier that you used to have local
4 privileges in Columbia, and, just to be clear, from a medical
5 standpoint, did you need those privileges to be able to safely
6 provide abortion care at the Columbia health center?

7 A. No, I needed those privileges to comply with the law.

8 Q. And can you explain to the Court how it came about that
9 you no longer have those privileges?

10 A. So in 2015, the Missouri legislature convened a special
11 committee that they called the committee -- I think it was
12 called the Interim Committee on the Sanctity of Life. And
13 through the work of that committee, it was identified that the
14 Planned Parenthood in Columbia had restarted services. And
15 clearly with the knowledge that they would have to provide --
16 or find a provider who had local admitting hospital privileges,
17 the committee then took on the task of figuring out how those
18 privileges were secured.

19 THE COURT: If I could interrupt you for just a
20 minute.

21 Can you explain to me how this issue is going to be
22 relevant to the ultimate decisions I'm going to have to make in
23 this particular case.

24 MS. SANDMAN: Yes, Your Honor. The state is making
25 an argument that plaintiffs have not adequately attempted to

1 comply with the regulation, and the history of her loss of
2 privileges in Columbia goes directly to the ability to get a
3 backup doctor there --

4 THE COURT: Okay.

5 MS. SANDMAN: -- with local privileges.

6 THE COURT: About how much longer do you think you
7 have with this witness?

8 MS. SANDMAN: Not very long, Your Honor. I would
9 guess about five minutes.

10 THE COURT: Okay. Why don't we go ahead and
11 continue.

12 MS. SANDMAN: Thank you.

13 BY MS. SANDMAN:

14 Q. And, Doctor, do you know if the Interim Committee on
15 the Sanctity of Life took any action in connection with that
16 hospital relationship?

17 A. They specifically asked the University Hospital to
18 investigate the circumstances by which I was granted the
19 privileges.

20 Q. And did the hospital take any action in connection with
21 your privileges?

22 A. The hospital ultimately decided to remove the entire
23 class of privileges for which I held.

24 Q. And how many people held that class of privileges that
25 were eliminated?

1 A. Including myself, two.

2 Q. And when did the elimination happen in relation to the
3 committee hearings and the letter?

4 A. So the letter requesting investigation into the
5 privileges was sent. Several weeks later, the decision to
6 eliminate the class of privileges was made, and all of that was
7 happening in the context of continuing hearings by this
8 committee.

9 Q. And just to connect the dots, did you understand the
10 action that the hospital took to be in response to the Interim
11 Committee on the Sanctity of Life's hearings and letter?

12 A. Well, the timing suggested that it had to have been.
13 If not for the actual committee, there would have been no
14 investigation of the circumstances by which I was receiving
15 privileges.

16 Q. And, Doctor, did you apply for another category of
17 privileges at the hospital?

18 A. I did. I applied for full admitting privileges.

19 Q. And were you able to obtain those privileges?

20 A. I was not.

21 Q. And as part of your efforts to obtain those privileges
22 two years ago, did you try to identify a backup doctor?

23 A. I did.

24 Q. And why was that?

25 A. The hospital bylaws required that of anybody with

1 admitting privileges.

2 Q. And do you know what efforts were made in order to try
3 to identify a backup physician?

4 A. The Department of OB-GYN itself at University Hospital
5 was asked to provide backup, as well as other local OB-GYN
6 physicians that the clinic had already some knowledge or
7 affiliation with.

8 Q. And were those efforts successful?

9 A. They were not.

10 Q. And just to be clear, did your loss of privileges at
11 the hospital have anything to do with the quality of care that
12 you provided?

13 A. No. In fact, the Executive Committee in sending me a
14 letter noting the discontinuation of privileges specifically
15 stated it had nothing to do with that.

16 Q. Do you know if the story of the investigation and the
17 loss of privileges, were those stories that got any news
18 coverage?

19 A. They certainly were all over the print media.

20 Q. Did any Missouri OB-GYN colleagues talk to you about
21 this event?

22 A. So this event is part of what has been in continuous
23 and ongoing conversation I have with colleagues about what it's
24 like to fold abortion care into the provision of care that you
25 provide, and sort of the potential repercussions of doing so.

1 Q. And can you explain a little bit more what you mean by
2 that?

3 A. So the most common question that I get from colleagues,
4 residents, fellows, other physicians who are thinking about
5 incorporating abortion care into their practice first and
6 foremost is generally around security and safety, and
7 particularly in instances like this where my name was in the
8 newsprint probably daily for several months. I think that
9 really for many people provides a level of caution and concern
10 that prevents many people from providing not only abortion
11 care, but providing any outward-facing association with Planned
12 Parenthood.

13 Q. And when you say outward-facing association with
14 Planned Parenthood, what do you mean by that?

15 A. I mean it results in reluctance to be a backup
16 physician or to have any formal agreement with the institution
17 to provide or help them comply with regulations such as this.

18 Q. Doctor, is there any way that you personally at this
19 point in time could get admitting privileges at the remaining
20 hospital in Columbia?

21 A. No.

22 Q. And why is that?

23 A. So similar to the University Hospital, the bylaws of
24 the institution require different things that I'm just not able
25 to comply with. Most hospital admitting privileges require

1 that you actually admit patients, and, because abortion is
2 incredibly safe, it is highly unlikely that I would admit
3 patients.

4 Q. And in your work for Planned Parenthood in Missouri,
5 have you encountered anti-abortion protests?

6 A. Every day we're at clinic.

7 Q. Does that include in Columbia?

8 A. Yes.

9 Q. And can you describe for the Court what those
10 interactions are like?

11 A. Generally they start with some either videotaping or
12 taking pictures as we drive into the clinic space, writing down
13 the license plate and the type of car that I drive. That
14 generally is followed by shouting at me things about the care
15 that I provide, trying to shame me about the services that we
16 provide, false accusations about care that I provide, and it
17 usually concludes with yelling at patients in my presence about
18 the subsequent harm that they will serve, or be served at my
19 hands.

20 Q. Have you taken security precautions?

21 A. Yes, I do have some what I think are common sense
22 security approaches. So I alter the way that I drive most
23 every day. We are incredibly cautious about making sure we
24 know who is behind us or following us, particularly when we're
25 driving from clinic.

1 I have both a security and camera system at my home.
2 The police chief in my neighborhood and the school
3 superintendent and principal that my child goes to is aware of
4 the services that I provide, and they are given detailed
5 instructions about how my kid gets to and from school and the
6 importance in not veering from that.

7 So, yes, there is a variety of security precautions
8 we take, just to be careful.

9 Q. And you mentioned security at your home. Have you had
10 protesters at your home?

11 A. We have.

12 Q. And do you know whether other doctors in the medical
13 community in Missouri are aware of the threats and harassment
14 that you face as an abortion provider?

15 A. So there certainly has been a substantial uptick in the
16 violence against abortion providers and clinics. Vandalism at
17 one of the St. Louis clinics, the shooting in the Colorado
18 clinic, the assassination of Dr. Tiller, all of those things
19 receive national media.

20 In addition to that, if you are a physician in St.
21 Louis or in Columbia and you drive down two of the major
22 streets in the city, you will see the protesters there with
23 signs and bullhorns. So it's impossible for me to believe that
24 they aren't aware of it.

25 Q. And were you personally involved, Doctor, in efforts to

1 talk to any Columbia physicians about the possibility of
2 entering into agreements with Planned Parenthood to be backup
3 doctors?

4 A. I was not.

5 Q. And why weren't you?

6 A. Partly because as a contracted provider, that's not
7 part of the job I do for Planned Parenthood, but also because
8 if there was a physician in Columbia that would provide that, I
9 would have contacted them a long time ago.

10 Q. And are you aware of the efforts that Comprehensive
11 Health took in Columbia?

12 A. I am.

13 Q. And what are those efforts that you're aware of?

14 A. I am aware that they sent a letter to the
15 geographically appropriate OB-GYNs in the community, asking if
16 they would be willing to serve in this role for them.

17 Q. And just so the record is clear, when you say
18 geographically appropriate, what do you mean by that?

19 A. I mean locally, to comply with the regulation.

20 Q. Doctor, is it possible that there's an OB-GYN who lives
21 in Columbia and is willing to act as a backup doctor for
22 Planned Parenthood that just nobody has called them up and
23 talked to them?

24 A. No.

25 Q. Just to be clear, why do you say that?

1 A. I think there's -- sort of historically, and when I say
2 historically, I mean over the last two or three years, we have
3 lots of examples of how we have reached out to the community,
4 both in an effort to secure our admitting privileges at the
5 University Hospital and provide backup in that situation, and
6 then now more recently in the setting to comply with this
7 regulation.

8 Q. And, Doctor, do you know how many OB-GYN practices
9 there are in Columbia?

10 A. I can't say how many there are, including private
11 practice. I mean, there's two hospital-based practices, I know
12 that.

13 Q. And the state has suggested -- one more question in
14 this area.

15 The state has suggested that if you really want to
16 find a backup doctor, you would personally pick up the phone,
17 talk to doctors that you know, and ask them. Why haven't you
18 done that?

19 A. So, again, if there was a doctor that I felt there was
20 even a remote chance that they would do it, I would have picked
21 up the phone to call them. But all of these avenues have been
22 exhausted multiple times, and there's nothing new about March
23 of 2018 that makes me feel like the answer would be any
24 different today than it was six months ago or two years ago.

25 Q. Doctor, I only have two more questions for you. One

1 is, given the challenges that you've been describing, why do
2 you continue providing abortions in Missouri?

3 A. So safe and legal abortion, or, more specifically, I
4 should say access to safe and legal abortion has been one of
5 the most important public health developments for women in the
6 last 50 years. And as an OB-GYN, when I decided to be such, I
7 committed myself to providing all of the care that I was
8 capable of doing across the reproductive lifespan.

9 That includes abortion care. You know, when 25
10 percent of all of the women I will see will have an abortion in
11 their lifetime, to me it's medically unacceptable to not
12 provide that care.

13 And the truth is, at the end of the day, it's the
14 stories that I hear from patients, it's sort of really, truly
15 understanding the impact that abortion has in their life that
16 has sort of brought me to a place where honestly my humanity
17 just demands that I provide that care.

18 Q. And, Doctor, one final question. I think this is clear
19 in your testimony, but in your opinion, is there any medical
20 benefit to requiring a complication plan?

21 A. No.

22 Q. And what is the -- is the requirement helping women in
23 any way?

24 A. No, I think -- as I've said before, I think -- my
25 opinion is that it just hurts women.

1 MS. SANDMAN: Thank you, Doctor.

2 THE COURT: Why don't we go ahead and take an
3 afternoon break. We'll take a 15-minute break until about
4 approximately 3:30.

5 (A recess was taken from 3:11 p.m. to 3:33 p.m.)

6 THE COURT: Mr. Sauer, are you ready to proceed?

7 MR. SAUER: Yes, ma'am.

8 THE COURT: You may do so.

9 MR. SAUER: Thank you, Your Honor.

10 - - -

11 CROSS-EXAMINATION

12 By Mr. Sauer:

13 Q. Good afternoon, Dr. McNicholas.

14 A. Good afternoon.

15 Q. Dr. McNicholas, could I direct your attention to your
16 CV, which I think is Plaintiffs' Exhibit --

17 A. 22.

18 Q. Exhibit 22. This is a true and correct reporting of
19 your qualifications, correct?

20 A. It is.

21 Q. And it doesn't reflect that you have any expertise in
22 mathematics, correct?

23 A. Correct.

24 Q. And it does not reflect that you have any expertise in
25 statistics or econometrics, correct?

1 A. I do have a Master's Degree in clinical investigation,
2 which is a research degree, and that includes training in
3 epidemiology and statistics.

4 Q. So you have some training in statistics; is that fair
5 to say?

6 A. Correct.

7 Q. And in your expert report, in your deposition, and in
8 your testimony, your direct exam testimony today, you have not
9 purported to offer any quantifying analysis of the number of
10 women who would be prevented from obtaining a medication
11 abortion by this regulation, correct?

12 A. That is correct.

13 Q. You have also not purported to provide any quantifying
14 analysis of how many women might delay obtaining a medication
15 abortion by this regulation, correct?

16 A. That's correct.

17 THE COURT: Mr. Sauer, if I could interrupt you, I
18 apologize. Before we started, I intended to tell the parties
19 we're going to have to wrap up at 5:30 today. The CSOs and the
20 court security leave at about 6 o'clock, so I just want to give
21 you a heads-up that at 5:30 we will have to move on to resume
22 in Kansas City so we can get everything out of here by the time
23 the CSOs leave.

24 Again, I apologize I forgot to mention that when I
25 came in.

1 BY MR. SAUER:

2 Q. Dr. McNicholas, you have not attempted to provide any
3 sort of quantifying analysis of the number of women who might
4 be diverted to obtain surgical abortion instead of a preferred
5 medication abortion by this regulation, correct?

6 A. I have not.

7 Q. And none of your analysis is quantifying -- is
8 quantifying analysis as to any of the issues relating to the
9 burdens, the alleged burdens on access to abortion from this
10 regulation, correct?

11 A. Correct.

12 Q. And you are qualified in obstetrics and gynecology,
13 correct?

14 A. Correct.

15 Q. But you don't purport to offer testimony as to what is
16 standard care in other areas of obstetrics and gynecology,
17 other than abortion, correct?

18 MS. SANDMAN: Objection, Your Honor. I think that
19 that actually misstates the testimony that she's given so far.

20 THE COURT: Well, the doctor can go ahead and answer
21 the question.

22 A. I consider myself an expert in the delivery of
23 obstetrics and gynecology. My subspecialty is in family
24 planning, so abortion and contraceptive care.

25 BY MR. SAUER:

1 Q. Let me ask you this. In your expert declaration, you
2 refer to procedures such as LEEP, loop excision of -- what does
3 LEEP stand for?

4 A. Loop electrosurgical excisional procedure.

5 Q. And you referred to hysteroscopy, correct?

6 A. That's correct.

7 Q. And you referred to endometrial ablation, correct?

8 A. Correct.

9 Q. And you referred to one other procedure, I think
10 excision of skin cancers in a gynecologic setting, correct?

11 A. Correct.

12 Q. And those are procedures you perform.

13 A. They are.

14 Q. But those are not procedures that you're offering
15 testimony today as to how -- what other doctors do commonly,
16 correct?

17 A. I can't speak to what other physicians do. I can just
18 tell you what I do.

19 Q. Particularly in your deposition, I asked you whether
20 you knew whether other doctors who performed those procedures
21 commonly engage in a coverage arrangement where they have a
22 doctor lined up to treat complications from those procedures in
23 the event that they're not available to treat the
24 complications, and you indicated that you couldn't speak to
25 that; is that right?

1 A. That is correct.

2 Q. And, in fact, in your deposition, you've said, (quoted
3 as read) "I can affirmatively state that I have no idea what
4 other people's practice is in that particular connection,"
5 correct?

6 A. That is correct.

7 Q. Your expert report is Exhibit 21; is that correct?
8 Plaintiffs' Exhibit 21?

9 A. My declaration?

10 Q. Correct, yes.

11 A. Yes.

12 Q. And this declaration, you testified, was not written by
13 you in the first instance, correct?

14 A. The initial draft was not written by me, but I
15 certainly edited it to fit what I feel was the most appropriate
16 content.

17 Q. And when I asked you in your deposition, you couldn't
18 identify anything in particular in there that's your own words,
19 as opposed to the words of the counsel who drafted it, correct?

20 A. I can't tell you what parts I changed, no.

21 Q. But the entire first draft was written by lawyers for
22 the plaintiffs in this case, correct?

23 A. So the entire first draft was drafted by counsel after
24 conversations with me regarding the content, correct.

25 Q. Turning back to your CV, Exhibit 22, you've provided

1 expert testimony on one other occasion, correct?

2 A. I have not provided expert testimony.

3 Q. I apologize. You've served as an expert witness in one
4 other case, correct?

5 A. I have not -- I am possibly serving as an expert
6 witness. I haven't provided any testimony or deposition in
7 that case.

8 Q. Have you submitted a declaration in that case?

9 A. I have.

10 Q. What case is that?

11 A. That's the Oklahoma D&E ban.

12 Q. And so that's another case that involves a
13 constitutional challenge to abortion procedures, correct?

14 A. That's correct.

15 Q. And similar to this case, in that case you're
16 testifying on behalf of plaintiffs, correct?

17 A. That's correct.

18 Q. And in both cases you're arguing against the
19 constitutionality of some sort of regulation that relates to
20 abortion, correct?

21 A. I'm testifying to the medical necessity and
22 appropriateness of the regulations or laws. I can't testify to
23 constitutionality. I'm not aware.

24 Q. Let me ask you this. You're serving as an expert for
25 the plaintiffs in both cases, correct?

1 A. That's correct.

2 Q. And plaintiffs in both cases are bringing
3 constitutional challenges to abortion regulations, correct?

4 A. That's correct.

5 Q. You also testify in front of state legislatures
6 frequently; is that fair to say?

7 A. That is fair.

8 Q. I think you estimated about one to two times per year
9 for the last ten years; is that about right?

10 A. That's about right.

11 Q. And your testimony in those cases has to do with
12 proposed -- legislation that would propose regulation of
13 abortion, typically, correct?

14 A. It typically has to do with either abortion or
15 contraceptive legislation.

16 Q. And when you have testified in front of legislatures,
17 typically you've testified in opposition to legislation that
18 would, in your view, restrict access to either abortion or
19 contraception, correct?

20 A. That is correct.

21 Q. And you also teach a sort of class for people in the
22 community about how to lobby a legislature on those issues,
23 correct?

24 A. I don't teach a class about lobbying. I teach a
25 class -- or I participate in several different courses around

1 advocating and using sort of your medical voice to advocate for
2 medicine and science in the legislature.

3 Q. So, in other words, you teach a course that's really
4 open to the public at large; is that fair to say?

5 A. Yes.

6 Q. And in this course, you advise people or teach people
7 how to advocate for positions in the legislature, correct?

8 A. Yes.

9 Q. And you draw on your experience as an advocate against
10 various forms of legislation that would restrict access to
11 abortion and contraception in your view, correct?

12 A. That's correct.

13 Q. In your direct testimony, you testified that you were
14 not directly involved in any attempts to recruit physicians to
15 provide coverage for the Columbia facility where you perform
16 abortions, correct?

17 A. Correct.

18 Q. And you testified the same thing in your deposition. I
19 believe when I asked you that, you said you were not involved,
20 correct?

21 A. Correct.

22 Q. Now, you've testified on direct examination that you
23 had made attempts in 2015 to contact doctors in Columbia,
24 correct?

25 A. So we, as the collective we. The institution in

1 Columbia, not me specifically.

2 Q. Were you not -- in 2015 you were not involved in
3 directly reaching out to doctors to try and find someone to
4 perform abortions at the Columbia facility?

5 A. No.

6 Q. And you were not involved in directly reaching out to
7 doctors to try to find a backup physician to arrange for you to
8 get the relevant kind of admitting privileges, correct?

9 A. Correct again. The Planned Parenthood facility was --
10 did do those things, but I personally did not.

11 Q. And then you testified to a period two years ago, and I
12 assume you were referring to those efforts in 2015 that the
13 Planned Parenthood facility engaged in but you did not engage
14 in, correct?

15 A. Correct.

16 Q. And then you talked about efforts that were made six
17 months ago on your direct examination, and it wasn't clear to
18 me what you were referring to.

19 A. I was --

20 Q. What efforts were done six months ago that you were
21 referring to?

22 A. I apologize. I was using broad terms to demonstrate
23 that there had been multiple attempts since, trying to secure
24 admitting privileges, not specifically that there was something
25 exactly six months ago that was done.

1 Q. So the multiple attempts occurred in 2015; is that fair
2 to say?

3 A. So, again, because I wasn't the person to sort of do
4 those things, I can't tell you exactly when they were done. I
5 can just tell you globally around the time that we were
6 attempting to secure admitting privileges, and then again
7 globally around the time that we were trying to comply with the
8 new regulation.

9 Q. None of those efforts -- when you say globally around
10 the time to comply with the new regulation, you're talking
11 about the complication plan regulation that's challenged in
12 this case?

13 A. That is correct.

14 Q. And do you know what efforts were taken six months ago
15 to attempt to provide coverage doctors to comply with the
16 regulation as to the Columbia facility?

17 A. Again, to clarify, I'm not entirely sure it was six
18 months ago. But what I'm aware of is that the Planned
19 Parenthood facility in Columbia reached out via letter mailed
20 to the local OB-GYN providers in the community to ask them to
21 serve as backup in this role.

22 Q. And you don't know whether any phone calls were made to
23 follow up on those letters, do you?

24 A. I do not know.

25 Q. And, in fact, you yourself did not make any such phone

1 calls; is that correct?

2 A. That is correct.

3 Q. And you didn't do it at any time with respect to this
4 particular regulation, correct?

5 A. That is correct.

6 Q. So you never got -- picked up the phone and called a
7 doctor and asked them to provide coverage for you and your
8 patients in the Columbia facility in order to comply with the
9 regulation.

10 A. I personally did not call any local OB-GYNs in the
11 Columbia community to ask them to provide that coverage.

12 Q. And I gather back in 2015 when there was an attempt to
13 locate doctors for other purposes that we talked about, you
14 were not the one who picked up the phone to call anybody at
15 that time, as well, correct?

16 A. That is correct.

17 Q. You testified on direct examination that there are a
18 group of **compassionate, competent physicians in the Columbia**
19 **community who accept referrals from the Planned Parenthood**
20 **facility in Columbia, correct?**

21 A. That's correct.

22 Q. And you have not telephoned any of them, for example,
23 in an attempt to provide -- find and locate coverage for the
24 Columbia facility, correct?

25 A. So I personally have not done that, but the clinic has.

1 Q. So you think the clinic has called people on the phone;
2 is that fair to say?

3 A. I think that the clinic has made every single attempt
4 that they possibly can to find a physician to provide coverage
5 to comply with this regulation.

6 Q. Specifically, have they called those referral
7 partners -- the doctors at those referral partners, to your
8 knowledge?

9 A. I can't tell you specifically that they have, but I
10 would be surprised if they haven't.

11 Q. So you don't know one way or the other as you sit here
12 whether that has occurred.

13 A. That's correct.

14 Q. You provide abortions in the St. Louis facility of RHS,
15 correct?

16 A. That's correct.

17 Q. And you do that one week per month?

18 A. Roughly.

19 Q. And then you also two to three days per month provide
20 abortions in the Columbia facility?

21 A. That is correct.

22 Q. And then you travel out of state to a couple of other
23 facilities to provide abortions there, as well, correct?

24 A. That's correct.

25 Q. In the St. Louis facility, you are a part of a -- in

1 St. Louis, you're part of a faculty group of OB-GYNs; is that
2 fair to say?

3 A. So my position resides in the Division of Family
4 Planning in the Department of OB-GYN, so the family planning
5 group is a group of -- a faculty group within that department.

6 Q. And I think you testified there's four doctors in that
7 group; is that fair to say?

8 A. Correct, there are four attending physicians.

9 Q. And then there are also residents that are supervised
10 by those doctors; is that right?

11 A. That is correct.

12 Q. And one of those four is you, correct?

13 A. Yes.

14 Q. And then all four of those doctors, I take it, also
15 provide abortions at the St. Louis facility, correct?

16 A. They do.

17 Q. And then all four of those doctors -- the four of you
18 each have one week per month of responsibility to provide
19 coverage for patients of the St. Louis facility while you are
20 on call at Barnes-Jewish, correct?

21 A. So our faculty practice takes sort of a comprehensive
22 OB-GYN call, and we rotate that on a weekly basis, so that
23 covers our private GYN patients, as well as family planning
24 patients.

25 Q. In that connection, about one week per month you're

1 responsible for being on call at Barnes-Jewish, correct?

2 A. That is correct.

3 Q. And that week, you are providing coverage for potential
4 post-abortion complication patients from the St. Louis
5 facility, correct?

6 A. Correct.

7 Q. And you're also on call for other gynecologic
8 emergencies that might arise from other patients, as well, at
9 that hospital, correct?

10 A. Yes.

11 Q. And during that week, you are also -- or during that
12 one-week time frame, you're also the doctor who the triage
13 nurse at the St. Louis facility may call if she's consulting a
14 patient and wants to talk to that patient, correct?

15 A. Yes.

16 Q. And it's that arrangement that the St. Louis facility
17 has offered in its complication plan as providing coverage for
18 abortion patients in St. Louis, correct?

19 A. Correct.

20 Q. And that's approved by the department, correct?

21 A. Yes.

22 Q. And to your knowledge, the department has also approved
23 the complication plan for the Kansas City facility, correct?

24 A. To my knowledge. I'm not involved with the Kansas City
25 affiliate.

1 Q. Then the proposed -- are you familiar with the proposed
2 Columbia plan that was submitted on November 14th of 2017?

3 A. I am.

4 Q. And that is -- basically, that plan proposed offering
5 you and Dr. Moore in Kansas City as the coverage physicians for
6 the Columbia facility, correct?

7 A. Correct.

8 Q. And it did not offer any doctor in the Columbia area to
9 provide coverage for abortion patients of the Columbia
10 facility, correct?

11 A. Correct.

12 Q. And you testified earlier that you are -- you spend two
13 to three days per month at the Columbia facility providing
14 abortions, correct?

15 A. That's correct.

16 Q. And that's the only time that you're routinely in
17 Columbia, correct?

18 A. Yes.

19 Q. Dr. Moore, to your knowledge, is located in Kansas
20 City, correct?

21 A. I believe so.

22 Q. Are you aware if he ever comes to provide health care
23 at the Columbia facility?

24 A. I don't know.

25 Q. And that particular complication plan stated explicitly

1 that Dr. Moore, when he was treating complications, would do it
2 in Overland Park, Kansas, correct?

3 A. I believe so.

4 Q. And it also stated that when you would provide
5 coverage, you would do it in -- in the St. Louis area, correct?

6 A. Or if I was in the Columbia area.

7 Q. Right. And so you would be in the Columbia area two to
8 three times per month, right?

9 A. Correct.

10 Q. And if a patient presents at the healthcare facility,
11 to the clinic with a significant but not emergency
12 complication, if you were there that day, you would be one who
13 would likely treat that complication, correct?

14 A. Yes.

15 Q. And I believe in your deposition you said that the
16 presiding clinician would be the one who would have principal
17 responsibility to treat a patient who presented in those
18 circumstances, correct?

19 A. Correct.

20 Q. So, for example, if a woman had called the 24-hour
21 hotline and had been told to come to the clinic at the next
22 available office hours the next morning, whoever the presiding
23 clinician at that facility would be would be the one to assess
24 and potentially take responsibility for treating that patient
25 in Columbia, correct?

1 A. Correct.

2 Q. And that presiding clinician is you two to three days
3 per month, correct?

4 A. Correct.

5 Q. And then most of the other times, it's the nurse
6 practitioner, correct?

7 A. That's correct.

8 Q. And the nurse practitioner is Nurse Metcalf-Wilson,
9 correct?

10 A. Yes.

11 Q. And I believe you testified in your deposition that she
12 is not trained to perform aspirations, correct?

13 A. She is not.

14 Q. And you're not aware that there's any other time where
15 a doctor is regularly present at the Columbia facility,
16 correct?

17 A. I am not aware.

18 Q. By other times, I mean other than the two to three days
19 per month that you are there, correct?

20 A. I couldn't say, I don't know.

21 Q. Ms. Sandman asked you some questions on your direct
22 examination about the safety of abortion procedures. Do you
23 recall that?

24 A. Yes.

25 Q. And you testified that medication abortion is, quote,

1 exceedingly safe; is that correct?

2 A. That's correct.

3 Q. Could I direct your attention to the Defendants'
4 Exhibit 17?

5 THE COURT: I think it's in Volume --

6 MR. SAUER: I apologize.

7 THE COURT: -- II?

8 MR. SAUER: If you could, yeah, look at Volume II of
9 the black binders.

10 THE WITNESS: I don't have a II. This is II.

11 BY MR. SAUER:

12 Q. Do you see Exhibit 17?

13 A. I do.

14 Q. And is that the study by Dr. Upadhyay and Dr. Grossman
15 and others?

16 A. It is.

17 Q. And you're aware that that study reports that the
18 complication rate for medication abortion is 5.19 percent based
19 on surveying women who obtain medication abortion in
20 California, correct?

21 A. So in this study, complication was defined to include
22 any patient who required secondary evaluation or intervention,
23 not necessarily patients who had a major complication.

24 Q. Right. So the definition of complication there would
25 include retained products or retained tissue, correct?

1 A. Retained blood or tissue, yes.

2 Q. And retained blood clots, you mentioned, correct?

3 A. Correct.

4 Q. And ongoing pregnancy, potentially?

5 A. Correct.

6 Q. And then I think it defines major complications as
7 those requiring surgery or hospital admission or transfusion or
8 death, correct?

9 A. That's correct.

10 Q. You don't -- and I believe it found the major
11 complication rate to be 0.31 percent, correct?

12 A. Yes.

13 Q. And it found the all-other-complication rate to be 5.19
14 total, correct?

15 A. That is correct.

16 Q. And the minor complication rate, so to speak, was 4.88
17 percent in that study, correct?

18 A. That's correct.

19 Q. And you don't dispute the findings of that study, do
20 you?

21 A. No.

22 Q. In fact, you don't have any reason to think that that
23 study overstates the complication rate for medication abortion,
24 do you?

25 A. I think the study can only provide the information it

1 has, so -- because this study was based on Medi-Cal data, and
2 that's the only data they have. So it certainly is possible
3 that there's a pool of patients who aren't accounted for in
4 there. And if you assume -- and you can assume one -- both
5 ways. If you assume that all of the unaccounted patients did
6 not have complications, which is the most likely thing, given
7 the low rate of complication, in fact, this would be an
8 overestimate of the complication rate.

9 Q. So can you explain that to me again? I'm sorry.

10 A. Yeah.

11 Q. So you say this study may overstate the complication
12 rate?

13 A. So all studies need to be taken and understood in
14 context of the data they're providing. So in this particular
15 study, the sampling pool comes from billing data, billing data
16 from the Medicaid system.

17 So there's certainly patients who obtain abortions
18 who either don't have insurance, who use private insurance, or
19 who may pay out of pocket. So those patients, that entire pool
20 of patients are not accounted for in this study. So given --

21 Q. How -- go ahead.

22 A. So given the fact that the vast majority of patients
23 who undergo medication abortion do not actually have either a
24 complication or an adverse event, such as retained blood
25 tissue -- blood or tissue, you can assume that the denominator

1 is actually much higher, which would bring down that
2 complication rate.

3 Q. I'm not sure I understood that. So you're saying that
4 this study wouldn't account for women who -- this study
5 wouldn't account for women who didn't seek medication abortions
6 among the Medicaid -- from the Medicaid program, correct?

7 A. I'm saying that this study only is looking at patients
8 who with Medicaid accessed medication abortion.

9 What I'm saying is that, in fact, there are many
10 more women who access medication abortion in this state who
11 don't use this mode, and so using billing data from the single
12 system isn't going to reflect the totality of women seeking
13 abortion in California.

14 Q. Do you have any reason to think that the rate of
15 complications for medication abortion would be lower or higher
16 or different in any way among women who had financed their
17 medication abortion in some way other than Medicaid?

18 A. Well, actually -- so social determinants of health
19 include things like geography, where you live, access to care,
20 access to insurance. And, actually, there's plenty of data to
21 suggest that, yes, that outcomes are different in women who
22 have better access to health care, who are of higher
23 socioeconomic status and who are privately insured, but I think
24 that is not actually the relevant point to what I'm trying to
25 say.

1 What I'm trying to say is that when the outcome is
2 incredibly rare and you eliminate a large number of people from
3 the denominator, you're falsely elevating the overall rate that
4 you're seeing.

5 Which is not to say this is a bad study. It's an
6 excellent study, it's just it has to be read and interpreted in
7 the context in which it provides the data.

8 Q. So you're saying that it's possible that this study may
9 have overstated the complication rate for medication abortion
10 because it was looking only at Medicaid patients and not other
11 patients.

12 A. I think that's possible.

13 Q. Is it also possible that it understated the rate of
14 medication abortion complications?

15 A. That is also possible.

16 Q. In particular, the study itself points out that
17 complication rates are underestimated by low follow-up rates,
18 correct?

19 A. That's what the document says, yes.

20 Q. And the reason this study focused on Medicaid patients
21 in particular was an attempt to capture more patients who had
22 sought treatment for post-abortion complications somewhere else
23 than the original provider, correct?

24 A. Yeah, so abortion data is difficult to obtain for many
25 reasons, including the stigma around abortions. So as we've

1 already talked about, many patients will not report that
2 they're having an abortion when they're seeking care, for
3 example. So there are many reasons why abortion data is
4 difficult to obtain, and so methodology such as this where
5 we're using a single system certainly does provide some
6 advantages when looking at data.

7 Q. But you point out one reason for underreporting might
8 be that women -- many women who seek treatment for
9 post-abortion complications may not tell the treater that they
10 had an abortion.

11 A. That is true.

12 Q. Okay. And in any event, you testified on direct that
13 you believe that a -- based on the literature you've reviewed,
14 an appropriate estimate of the complication rate for medication
15 abortions would be to say that in 2 to 5 percent of the cases,
16 there's a need for secondary evaluation for possible
17 intervention, correct?

18 A. Correct. So I believe that the -- again, I believe
19 that a complication includes an ongoing pregnancy or requiring
20 admission or transfusion for which the rate is less than 1
21 percent. However, including people who require secondary
22 intervention, regardless -- or, excuse me, secondary
23 evaluation, regardless of whether they require an intervention,
24 does provide us with a range of somewhere between 2 to 5
25 percent.

1 Q. And so, in other words, if a complication is defined to
2 include the things that are called minor complications in the
3 Upadhyay study, then you estimate the complication rate at 2 to
4 5 percent?

5 A. Correct. If you include adverse anticipated events,
6 such as retained blood in the uterus, then the rate would be 2
7 to 5 percent.

8 Q. And that study refers to the problems of underreporting
9 due to loss of follow-up, correct?

10 A. Correct.

11 Q. And loss of follow-up means that the clinic that
12 performed the abortion since loses contact with the patient
13 and, therefore, does not know whether that patient suffered a
14 post-abortion complication, correct?

15 A. That's what loss of follow-up means, yes.

16 Q. So in certain circumstances, women who suffer
17 post-abortion complications seek treatment from another
18 provider who they may not even tell they've had an abortion,
19 correct?

20 A. Although that's possible, that hasn't been my
21 experience. My experience is that the patients have a trusted
22 relationship with their abortion provider, and they call the
23 abortion clinic when they are experiencing symptoms that
24 they're concerned with. And so regardless of whether they
25 achieve that secondary intervention at the clinic, the clinic

1 is made aware that there is a concern, and they can follow up
2 with the patient, and I think they do that very well.

3 Q. But, of course, the class of women who never come back
4 to your clinic for treatment, you just have no way of knowing
5 how many such women exist, correct?

6 A. So that's a small proportion of patients for whom we
7 can no longer -- who either don't follow up as planned or for
8 whom we don't have telephone or other contact with.

9 Q. So there's some patients who you don't hear back from,
10 and you don't know whether they -- if they suffer complication,
11 correct?

12 A. Of course.

13 Q. And Missouri has a law that requires the filing of
14 complication reports by any physician who is treating a
15 post-abortion complication, correct?

16 A. That is correct.

17 Q. And as we discussed in your deposition, that law was
18 largely ignored up until 2017, correct?

19 A. I can tell you that I was personally not aware of that
20 law until 2017.

21 Q. And so just from your personal experience -- you've
22 been providing abortions in Missouri for how many years?

23 A. Approximately seven years.

24 Q. For the first six years or so of that, you weren't
25 aware that you had to file a complication report every time you

1 treated a post-abortion complication, correct?

2 A. That's correct.

3 Q. And you did not, in fact, do so until you became aware
4 of that law in 2017?

5 A. Correct.

6 Q. And that applies both to post-abortion complications
7 that you've treated when you were on call at the hospital and
8 post-abortion complications that you've treated at the
9 facilities -- the clinics where you provide abortion, correct?

10 A. So my understanding of the law is that the person
11 responsible for filing the complication plan is the person who
12 is treating the complication. So if the patient presents to
13 the hospital, the treating physician at the hospital would
14 submit that complication plan. Or I'm sorry, complication
15 report.

16 Q. Turning back to the -- when you treat complication --
17 let me ask you this.

18 Under the proposed complication plan for the
19 Columbia facility, it's my understanding that you would be
20 personally available to treat complications in two scenarios.

21 First, if you were the presiding clinician two to
22 three days a month in the Columbia facility, as you testified
23 earlier, you would be available to treat complications of
24 patients who came to the facility with a nonemergency
25 complication, correct?

1 A. That's correct.

2 Q. And then if a patient who had obtained an abortion in
3 Columbia happened to present to the emergency room at
4 Barnes-Jewish in a week when you were the on-call physician,
5 you might be involved in treating a post-abortion complication
6 in those circumstances, as well, correct?

7 A. Or if they presented to my private clinic or to the
8 Planned Parenthood in St. Louis or any other practicing
9 location that I would be at, correct.

10 Q. But those would be the only scenarios when you would be
11 treating post-abortion complications from people who suffered
12 those complications in Columbia, correct?

13 A. So to be clear, we're talking about providing
14 aspiration, I'm assuming.

15 Q. Any kind of treatment for post-abortion complication.

16 A. So in cases where women who are accessing abortion care
17 at the Columbia clinic have a secondary evaluation that
18 determines that there is something retained in the uterus, they
19 still do have two treatment options that can be executed by the
20 nurse practitioner. Or if she feels more comfortable, she can
21 certainly consult me by phone to execute that plan.

22 If the patient requires an aspiration, a procedural
23 intervention, or prefers a procedural intervention, then her
24 options are when I'm at Columbia, or she can come to St. Louis
25 in any of the clinical settings that I practice.

1 Q. And specifically, if a woman in Columbia is sent to the
2 hospital, even if you were in Columbia providing abortions that
3 day, you would not anticipate being involved in the treatment
4 of the emergency complication in any way, correct?

5 A. I'm sorry. Can you say that again?

6 Q. Under the proposed complication plan for Columbia, if
7 you -- if a woman experienced an emergency complication and
8 went to the hospital, even if you were in Columbia that day,
9 you would not be involved in treating that complication,
10 correct?

11 A. So if I was in the clinic in Columbia, the patient
12 would be directed to present to the clinic in Columbia where I
13 could treat her. It's exceedingly rare that if I was able to
14 provide care in the clinic that I would just refer her to the
15 emergency room if I think it's something that I can personally
16 handle.

17 Q. So if you were in the clinic, that patient, even a
18 patient experiencing an emergency complication would be told to
19 go to the clinic, not to the ER?

20 A. It completely depends on what her symptoms are and what
21 the concern is. If the concern is bleeding and I think the
22 ultimate required therapy is an evacuation or aspiration and
23 she otherwise sounds stable, then absolutely she can come to
24 the clinic and have that procedure done. It completely depends
25 on individual patient symptoms and, you know, their

1 complication.

2 Q. So there may be situations or sets of symptoms where
3 the patient would be sent straight to the ER, even if they
4 called in during office hours.

5 A. Yes.

6 Q. And even when you, the doctor, were present there and
7 could perform an aspiration.

8 A. Correct.

9 Q. I think we talked about one of those scenarios in your
10 deposition where there is a combination of severe bleeding and
11 dizziness that could be -- or fainting, that could be a sign of
12 a very serious complication, correct?

13 A. That's correct.

14 Q. And I think you testified before that in a scenario
15 like that, if you were the on-call OB-GYN at the hospital, if
16 you heard that that patient was coming in, you would proceed
17 straight to the ER to meet the patient, correct?

18 A. Likely, yes.

19 Q. I think you said, "That's what I would do, but I can't
20 say what other doctors would do," correct?

21 A. If that's what I said. I don't have any deposition in
22 front of me, but...

23 Q. That's consistent with what you're saying now, correct?

24 A. Yes.

25 Q. We talked something about the symptoms that present.

1 Post-abortion -- post-medication abortion complications can
2 have a constellation of symptoms; is that fair to say?

3 A. Yes.

4 Q. So, in other words, bleeding is a -- could be a symptom
5 of a post-abortion complication?

6 A. It could be.

7 Q. And fever is another one?

8 A. Correct.

9 Q. And abdominal pain or discomfort, correct?

10 A. Yes.

11 Q. And dizziness or fainting we referred to a minute ago,
12 correct?

13 A. Correct.

14 Q. In addition, there's a large number of side effects to
15 misoprostol that are similar to those in some ways, correct?

16 A. I wouldn't say there's a large number of side effects.
17 There are side effects that are shared between potential, you
18 know, side effects of the medication and potential indications
19 of other processes happening.

20 Q. And those side effects are extremely common, not that
21 there are a large number of symptoms, but that a large number
22 of women who take medication abortion experience at least one
23 side effect from the medication.

24 A. You would have to quantify which side effect you're
25 talking about for me to be able to tell you how common it is.

1 Q. Can you look at Exhibit 22 in the black binder? That's
2 the FDA label for mifepristone, correct?

3 A. That's correct.

4 Q. And could you turn to Page 7 of that document? And the
5 FDA label reports that about 85 percent of patients report at
6 least one adverse reaction following administration of Mifeprex
7 and misoprostol, and many can be expected to report at least
8 one such reaction, correct?

9 A. That's what it says.

10 Q. And the most commonly reported adverse reactions are
11 nausea, weakness, fever/chills, vomiting, headache, diarrhea,
12 and dizziness, correct?

13 A. That's what it says.

14 Q. You don't dispute the accuracy of that information on
15 the FDA label, do you?

16 A. I don't dispute that they pulled that from evidence,
17 no.

18 Q. And so 85 percent indicates that there's a very large
19 number of women, proportionately speaking, who suffer from at
20 least one side effect that's not a symptom of a complication,
21 but is a side effect of the drug, correct?

22 A. I wouldn't describe it to the patient as a side effect.
23 Particularly cramping, for example. So we talk to patients
24 about the intended effect of the medication, and so the
25 intended effect of misoprostol is to cause cramping. And so we

1 don't talk about that as a side effect because we actually
2 expect that that will happen.

3 Similarly, other things that we think are more
4 likely or possible to happen, for example, on this is nausea.
5 So we often -- not often, we always send patients with an
6 antiemetic or nausea medication to help prevent some of those.

7 So it might seem like nuanced semantics, but I think
8 when you talk to patients about what is expected versus a side
9 effect, there is a difference.

10 Q. You testified on direct, I think, that when patients
11 call in on the 24-hour hotline to report difficulties that
12 they're experiencing, the majority of those patients are really
13 not experiencing a complication at all, correct?

14 A. That's correct.

15 Q. And given that a very large majority of the patients
16 are going to experience some sort of adverse reaction of some
17 kind, it's not surprising the patients may have concerns that
18 they call in about but that aren't really needing immediate
19 medical attention of any kind, correct?

20 A. Right. So the vast majority of patients don't call at
21 all because they're given anticipatory guidance about what to
22 expect and what's normal and what's not normal. And so the
23 vast majority of patients don't call at all.

24 Amongst the subset of patients who do call with
25 concerns, it is true that most of those patients just need

1 reassurance.

2 Q. Do you know how many patients actually call in
3 proportion of the total number of medication-abortion patients?

4 A. I don't know.

5 Q. Do you know how many medication abortions you have
6 performed in the Columbia area?

7 A. I do not know.

8 Q. I take it very few this year, correct?

9 A. One in 2017.

10 Q. One day or one medication --

11 A. One day. I don't know how many.

12 Q. And then I take it that was the only time you performed
13 medication abortions in the Columbia clinic, correct?

14 A. Since 2015.

15 Q. So in 2015 you performed some.

16 A. In 2015, we were only providing medication abortion.

17 Q. In your deposition testimony and in your testimony on
18 direct examination and in your declaration, in none of those
19 places have you argued or offered evidence that the
20 unavailability of medication abortion in Columbia or
21 Springfield is causing any kind of congestion or undue wait
22 times for patients at the St. Louis or Kansas City facilities,
23 correct?

24 A. Given that I just provide abortion care and don't have
25 any administrative knowledge or working knowledge of those

1 day-to-day workings, I can't testify to the specific amount of
2 times that people are waiting.

3 What I can say is that the patients particularly in
4 St. Louis that we are seeing are having abortions at later
5 gestational ages than they had previously been having them.

6 Q. But you are not -- you have no specific evidence about
7 whether or not there's been an increase in wait times at the
8 St. Louis facility, for example, since the complication plan
9 regulation went into effect.

10 A. By wait time, can you tell me what you mean?

11 Q. A patient comes to the facility and has to wait a long
12 time before she can get an abortion.

13 A. I can tell you that on days, particularly when I'm
14 providing consenting, patients are sometimes waiting six and
15 seven hours to see me. So, yes, they're waiting a long time.

16 Q. But not waiting, you know, days where they have to --
17 they've called in, and they have to wait three weeks before
18 they can get an appointment.

19 A. So occasionally, yes, that actually is happening. So
20 patients are both delayed on the front end, they're delayed at
21 the time of consenting, and then they have to wait for the next
22 day that I will be available. And in the event that, for
23 example, as has happened already this year, the provider is
24 sick or their kid gets sick or for whatever reason they can't
25 make their appointment, they're rescheduled to be consented

1 again with another provider with another delay and another
2 appointment.

3 Q. To be clear, my question has to do with the
4 complication plan regulation, not the seeing-physician
5 requirement. You understand that -- as I take it, you're
6 testifying that because the same physician has to do the
7 consent procedure as to the medical risks who performs the
8 abortion, that's resulting in some delays at the St. Louis
9 facility, correct?

10 A. Okay. I guess I'm misunderstanding what you're saying.
11 So...

12 Q. My question is do you have any reason to believe that
13 the patients are coming from Columbia to seek medication
14 abortion in St. Louis in a way that increases congestion in the
15 St. Louis facility?

16 A. So I can speak to it from the patient side. Again, I
17 can't speak to it from sort of the administrative side of
18 Planned Parenthood in St. Louis.

19 I can say that in the instances in which I've seen
20 somebody in the Columbia clinic with the intention of having an
21 abortion who ultimately decided to not concede her preferred
22 method of abortion and to figure out how to get to either
23 Kansas City or St. Louis, just by nature of the fact that they
24 had one visit with me and then now are required to figure out
25 scheduling in one of the other places to consent with another

1 physician and then ultimately get their medication, from the
2 patient standpoint, yes, that provides a delay. From the
3 administrative standpoint, I can't speak to that.

4 Q. Just focusing in on the administrative standpoint, you
5 don't have anything to say about that.

6 A. Correct.

7 Q. Ms. Sandman asked you some questions about the reasons
8 women choose medication abortion, correct?

9 A. Yes.

10 Q. And I believe you testified that 100 percent of your
11 medication-abortion patients chose it because they strongly
12 preferred it, correct?

13 A. That's not what I said. I said 100 percent of the
14 patients who choose abortion, who are having an abortion, have
15 a strong opinion about the mode of abortion that they're
16 choosing.

17 Q. When you say a strong opinion, that means that they
18 strongly prefer one method or the other?

19 A. That's correct.

20 Q. So in your experience, there aren't patients who are
21 open or indifferent, let's say, between medication and surgical
22 abortion?

23 A. We're talking about the difference between taking a
24 pill and having an invasive pelvic exam. People have strong
25 opinions about the difference between those two. They're not

1 even close to having the same experience, so my experience is
2 that patients have a very strong preference of one or the
3 other.

4 Q. And some women, of course, prefer surgical abortion
5 over medication abortion, correct?

6 A. Absolutely.

7 Q. And I take it your testimony is the same, that those
8 patients would have strong preferences, as well, correct?

9 A. Absolutely.

10 Q. And some reasons women prefer surgical abortion might
11 be that they don't like putting pills in their body or they
12 want to get the procedure over with or they don't want to
13 experience prolonged bleeding and symptoms of that nature,
14 correct?

15 A. That's correct.

16 Q. I think you testified that women who preferred
17 medication abortion give reasons like they want to complete the
18 procedure in privacy, they want to have a noninvasive procedure
19 with no pelvic exam, and they might want to mimic a prior
20 experience, for example, a prior experience of miscarriage,
21 correct?

22 A. Correct.

23 Q. And I think you testified that there's some patients
24 for whom there's a medical reason that medical abortion is
25 preferable, correct?

1 A. That's correct.

2 Q. But in those cases, the vast majority of those women
3 would not be a situation where they cannot have a surgical
4 abortion, but just that there are reasons why it's medically
5 preferable or advisable to try the medication abortion first,
6 correct?

7 A. I would never say that they couldn't have a surgical
8 abortion, but the constellation of their medical or ana --
9 usually anatomical situation is such that medication is likely
10 to be either more successful or safer for them.

11 Q. In particular, in your deposition I think you agreed
12 that that group of patients as a whole who have a physical
13 condition that makes medication abortion preferable is 5
14 percent or less of total patients seeking first-trimester
15 abortions, correct?

16 A. Yes.

17 Q. Okay. And I believe you said that -- you know, with
18 respect to that group, that 5 percent group, you said that if
19 we say that medication abortion is preferred, it does not mean
20 that surgical abortion isn't an option typically, just that the
21 medication abortion is the preferred option, correct?

22 A. Correct. It means that based on medical judgment,
23 given the constellation of their medical condition,
24 comorbidities, or anatomy, that the medical approach is the
25 better option to either maximize safety or effectiveness.

1 Q. And given that 2 to 5 percent of medication-abortion
2 patients may need a follow-up aspiration, obviously it would be
3 problematic if aspiration was absolutely contraindicated for
4 them to have medication abortion, correct?

5 A. Correct.

6 Q. You testified that in your experience, many women who
7 have experienced sexual trauma, rape, sexual abuse, things of
8 that nature, have an aversion to having pelvic exams, correct?

9 A. Yes.

10 Q. And in your experience, some of those women may
11 strongly prefer medication abortion to surgical abortion,
12 correct?

13 A. Correct.

14 Q. Now, in your deposition, I asked you if you were aware
15 of any studies that address that topic or seek to quantify
16 that, and you said you're not aware of any, correct?

17 A. That's correct.

18 Q. And so -- and that's true still today that you're not
19 aware of any studies that would seek to quantify that
20 particular phenomenon, correct?

21 A. That's correct.

22 Q. And then I also asked you whether or not your patients
23 had confided that reason to you, correct?

24 A. You did.

25 Q. And you said that some patients had done that, correct?

1 A. Yes.

2 Q. But you were not able to identify -- you were unable to
3 say whether any patient had done that within the past three
4 months, the past six months, or the past year, correct?

5 A. I was unable to quantify that, but I did also couch it
6 in the understanding that, given the prevalence of sexual
7 assault and sexual violence, that many women who are seeking
8 abortion have that history. And it's not only if the pregnancy
9 is a result of that sexual violence that this becomes an issue.
10 That is actually a continuing issue for women throughout the
11 remainder of her life.

12 Q. And just a specific question of attempting to quantify
13 that specific question of women expressing preference for
14 medication abortion because of a history of sexual trauma, you
15 indicated that you cannot quantify how frequently that occurs,
16 correct?

17 A. Correct.

18 Q. And in particular, you couldn't say whether any patient
19 has confided that concern in you within the past three months,
20 six months, or year, correct?

21 A. I can't tell you a specific patient name, no.

22 Q. In your deposition, you discussed attempting to
23 quantify how many women may be traveling to St. Louis to get a
24 medication abortion from the Columbia area instead of getting
25 surgical abortion in their community, correct?

1 A. Yes.

2 Q. And in your deposition, I think you testified that you
3 really couldn't, you didn't have any data that would quantify
4 that particular phenomenon, correct?

5 A. Right. So it would be -- it's very difficult to do
6 that, given the fact that if a patient in sort of mid-Missouri
7 calls the Columbia clinic with already an established
8 preference for medication abortion, those patients will be told
9 that that service is not available, and so those are patients
10 that I may never see.

11 So I can only give you, again, the experiences of
12 the patients that I've seen, who have come to the Columbia
13 clinic, either not sure what mode of abortion is the most
14 appropriate for them, or that they prefer, but I can't speak to
15 the ones who I never see.

16 Q. So, in other words, you just don't really know -- of
17 women in Columbia who otherwise would prefer medication
18 abortion, you don't know how many of them are forgoing having
19 an abortion at all, correct?

20 A. I'm sorry.

21 Q. Let me rephrase the question.

22 Consider women in the Columbia area seeking an
23 abortion who would prefer medication abortion. You don't know
24 how many of those women are traveling to St. Louis or Kansas
25 City to get a medication abortion, as a proportion, correct?

1 A. I don't know the answer to that.

2 Q. And you don't know how many of those women, as a
3 proportion of women seeking first-trimester abortions, would be
4 staying in Columbia and getting surgical abortion at the
5 Columbia facility, correct?

6 A. No.

7 Q. No, you do not?

8 A. I'm confused about -- so there certainly are a number
9 of patients in the Columbia clinic who ultimately choose to
10 have a surgical abortion, despite the fact that that's not
11 their preferred method of abortion, because it is more
12 appropriate for all of the other logistics of their life.

13 Q. And my only question is you don't know how -- in terms
14 of a proportion of those patients, how that group compares to
15 the group that does travel to St. Louis or Kansas City to
16 obtain the preferred medication abortion there.

17 A. Proportion of what? I guess I'm confused what's the --

18 Q. Which is --

19 COURT REPORTER: I'm sorry.

20 THE COURT: We can only talk one at a time, so why
21 don't you go ahead and rephrase the question and give the
22 doctor the opportunity to answer.

23 BY MR. SAUER:

24 Q. Comparing those two groups to each other, and you don't
25 know which is larger or smaller, correct?

1 A. I don't know anything about the first group, so I can't
2 compare it to anything.

3 Q. And you haven't attempted to quantify how many women as
4 a proportion of all first-trimester medication --
5 first-trimester medication-abortion patients are delaying
6 seeking a medication abortion as a result of the regulation,
7 correct?

8 A. I can't quantify that.

9 Q. And you also haven't attempted or cannot quantify how
10 many women may be prevented from obtaining an abortion at all
11 by the regulation, correct?

12 A. Well, I can quantify sort of globally and say that
13 women in mid-Missouri who desire to have a medication abortion,
14 however, end up having a surgical abortion in Missouri, have
15 been prevented from having a medication abortion.

16 Q. But my question is about how many women are prevented
17 altogether from having an abortion, whether medication or
18 surgical. You don't know how many women fall into that
19 category, do you?

20 A. So in the Columbia -- if somebody is presenting to the
21 Columbia facility, I have never had an experience where, if
22 there's only one abortion mode available, patients will choose
23 to just continue the pregnancy if it's not their preferred
24 method.

25 Q. So your view would be the vast majority of patients

1 will either travel for a medication abortion or obtain a
2 surgical abortion in Columbia, rather than forgo any abortion
3 altogether.

4 A. Yes.

5 Q. Turning back to the proposed complication plan for
6 Columbia, we had -- we have a -- when I say turning back, I
7 didn't mean turning back to a document, I mean turning back to
8 the topic.

9 Turning back to the topic of the proposed
10 complication plan for Columbia, I think you testified earlier
11 that you don't believe there's another doctor who provides any
12 kind of services at the Columbia facility, correct?

13 A. I don't know.

14 Q. And so the only doctor you're aware of is yourself,
15 correct?

16 A. That's correct.

17 Q. And the nurse practitioner at the Columbia facility
18 cannot do aspirations, correct?

19 A. That's correct.

20 Q. And emergency room doctors are usually not trained to
21 do aspirations, as well, correct?

22 A. That's correct.

23 Q. Under the proposed complication plan, I believe you
24 testified that you would not go to the emergency room to treat
25 a complication in Columbia, even if you were in Columbia as the

1 presiding clinician that day, correct?

2 A. As I don't have admitting privileges or privileges at
3 the hospital, I would not be able to do so, whether I was
4 willing to or not.

5 Q. So you would not be directly involved in the treatment
6 of any emergency care in the Columbia facility, correct? Or,
7 sorry.

8 You would not be directly -- under the proposed
9 complication plan, you would not be directly involved in
10 providing any kind of emergency care to patients experiencing
11 post-abortion complications in the Columbia area, correct?

12 A. If a patient accessing abortion care from the Columbia
13 facility required emergency care and presented to a hospital in
14 Columbia, which means that that would have to be geographically
15 the closest emergency room to her, I would not be present to
16 participate in that care.

17 Q. And, in fact, you say you could not be because of the
18 lack of privileges at that hospital, correct?

19 A. Correct.

20 Q. Sometimes -- you talked about the groups of symptoms
21 that medication-abortion patients may experience. Is it fair
22 to say that generally those symptoms may be symptomatic of a
23 serious problem, or a less serious problem in certain
24 circumstances?

25 A. The symptoms experienced following medication abortion

1 can be a range of things from normal to potentially serious.

2 Q. And, for example, bleeding might be something that's a
3 symptom of a minor problem, and it might be a symptom of a very
4 serious problem; is that fair to say?

5 A. It's fair to say that bleeding is required for a
6 successful medication abortion. It could also be slightly out
7 of the normal range or a problem.

8 Q. And abdominal pain would be something that could be a
9 symptom of something serious and something less serious,
10 correct?

11 A. Again, abdominal pain and cramping is a requirement of
12 the procedure. It also could be something reflective of a
13 minor or more serious complication.

14 Q. I think you testified in your deposition that every
15 clinical situation is different, in fact, correct?

16 A. Absolutely.

17 Q. So every patient would have a different set of symptoms
18 of different severity, and every patient would have their own
19 unique medical history that might be relevant, as well,
20 correct?

21 A. Correct.

22 Q. And in certain cases, a face-to-face assessment of the
23 patient is appropriate or helpful, correct?

24 A. Yes.

25 Q. And in those cases, under the Columbia plan, proposed

1 complication plan, that would be done at the next convenient --
2 or available office hours of the Columbia facility by a nurse
3 practitioner, correct?

4 A. That's correct.

5 Q. Unless, of course, you happen to be there in those two
6 or three days per month, correct?

7 A. Yes.

8 Q. But the other, you know, 28, 27 days a month, only a
9 nurse practitioner would be available to do a face-to-face
10 assessment of that patient, correct?

11 A. That's correct.

12 Q. In certain cases when there's an emergency
13 complication, an emergency aspiration needs to be performed at
14 the hospital, correct?

15 A. Yes.

16 Q. And needs to happen very promptly in an emergency
17 situation sometimes; is that fair to say?

18 A. Yes.

19 Q. And sometimes there may be a situation where an
20 aspiration -- it would be advantageous to perform the
21 aspiration promptly, even if it's not of such severity that the
22 patient is sent to the emergency room, correct?

23 A. Yes.

24 Q. And under the Columbia proposed complication plan, no
25 doctor would be available at the Columbia facility itself to

1 perform that aspiration, correct?

2 A. Outside of the days that I'm available, correct.

3 Q. And so those -- for 27 to 28 days per month, that would
4 not be possible, correct?

5 A. Correct.

6 Q. Do you know -- you were asked on direct examination
7 about waiting times at the emergency room. Do you know what
8 are typical wait times to receive treatment at emergency rooms
9 in Missouri hospitals?

10 A. I think it completely depends on the hospital, the
11 volume of patients they're seeing, and the acuity of the
12 patient level.

13 Q. So you don't have any figures that quantify that in
14 terms of averages or in terms of, you know, the time of day or
15 anything like that?

16 A. It completely depends on the hospital itself, the
17 location, the volume of patients.

18 Q. And you don't have any firsthand knowledge of waiting
19 times at the hospitals in the Columbia area; is that fair to
20 say?

21 A. I have no knowledge.

22 Q. And the same is true of the Springfield -- the
23 hospitals in the Springfield area, you have no knowledge of how
24 long waiting times may be at the ERs in those hospitals,
25 correct?

1 A. Correct.

2 Q. You mentioned in your deposition that there was a,
3 quote, cohort of physicians that are referral partners for the
4 Columbia Planned Parenthood facility, correct?

5 A. I mentioned that there are local OB-GYNs for whom the
6 Columbia clinic has established a relationship that they can
7 refer patients who require services that they don't provide,
8 services, for example, such as LEEP procedures, sterilization,
9 some of those other GYN procedures that we talked about.

10 Q. Without mentioning those names, are those doctors
11 personally known to you?

12 A. No.

13 Q. Okay. But they are personally known to the people in
14 Columbia?

15 A. I believe so.

16 Q. Do you know whether the people at the Columbia facility
17 have firsthand knowledge of the skill and experience of those
18 doctors?

19 A. I don't know -- I don't know what the Columbia clinic
20 knows about them.

21 Q. Is it fair to say that the skill and experience of a
22 doctor who is treating a post-medication abortion complication
23 is a very important determinant of how successful the treatment
24 is?

25 A. I think it's fair to say that the skill and knowledge

1 of a physician in general is important to the outcome and
2 patient experiences.

3 Q. And that principle would apply to the treatment of
4 post-medication abortion complications?

5 A. Yes.

6 Q. You mentioned that some women, or even many women may
7 be reluctant to tell a strange doctor that they'd had an
8 abortion at all, correct?

9 A. I didn't say strange doctor.

10 Q. I mean -- not strange. Strange in the sense of
11 personally unfamiliar to them, correct?

12 A. Yes. Some women are reluctant to share that they've
13 had an abortion.

14 Q. But I think you testified that even if a woman is
15 reluctant to tell, for example, a doctor in the emergency
16 department that the symptoms she's experiencing came after a
17 medication abortion, that should have no impact on the care
18 she's provided, correct?

19 A. Correct.

20 Q. Can you think of any situations where a doctor in an
21 emergency department treating a post-medication abortion
22 complication would need to know that this patient had had a
23 medication abortion?

24 A. No.

25 Q. You agree that fostering effective communication among

1 doctors is important in facilitating effective patient
2 handoffs, correct?

3 A. Globally speaking, yes.

4 Q. And you agree that face-to-face communication can be a
5 preferred and more effective method of communication in
6 delineating clear lines of responsibility among doctors in
7 treating a patient, correct?

8 A. When communicating about patients in the hospital
9 setting, particularly around handoffs, for example, in changes
10 of venue, so from the operating room to the ICU, from the
11 emergency room to the floor, face-to-face handoff is
12 preferable.

13 In communicating about outpatients or patients
14 presenting from somewhere without -- outside the hospital
15 system, face-to-face communication is not the standard. In
16 fact, most of the time that communication happens usually via
17 telephone.

18 Q. In certain circumstances, obviously, face-to-face
19 communication can't be done, right?

20 A. Cannot be done, is that what you said?

21 Q. Correct.

22 A. Correct.

23 Q. For example, if you had a patient who called in and was
24 in another state experiencing an emergency, that patient would
25 be sent to the emergency department, correct?

1 A. Correct.

2 Q. And you would obviously not engage in face-to-face
3 communication with any doctor in the geographically remote
4 emergency department, correct?

5 A. Correct.

6 Q. But when you're providing coverage for patients in
7 Barnes-Jewish Hospital, sometimes you would engage in
8 face-to-face communication with, for example, the emergency
9 department team, correct?

10 A. That's pretty rare. In fact, generally patients
11 present to the emergency room and are triaged and initially
12 treated by emergency room physicians, who then consult other
13 services, such as OB-GYN.

14 Q. So there are circumstances where you, as the on-call
15 OB-GYN, would be communicating directly face to face with
16 members of the emergency department team, correct?

17 A. Only in instances in which I had to come and actually
18 see the patient, which, again, is incredibly rare.

19 Q. But there are circumstances where the on-call OB-GYN
20 comes to see the patient, correct?

21 A. Yes.

22 Q. You say they're incredibly rare. Are they incredibly
23 rare as a subset of all emergencies, or are they incredibly
24 rare as a subset of all abortions?

25 A. Actually, in the setting of all patients who present to

1 the emergency room. So the vast majority of women of
2 reproductive age who are presenting to the emergency room for
3 gynecologic complaints do not have emergencies that require
4 immediate evaluation or surgical intervention. They're
5 patients who have complaints about a variety of things that
6 typically the emergency room will treat and then either call
7 the OB-GYN service to help arrange follow-up care, or in some
8 instances, for example, when I get calls from outside hospitals
9 where there are no OB-GYNs available, just to sort of run by
10 the -- run the patient by me to get my medical opinion, and I
11 don't ever see that patient.

12 Q. You testified on direct examination about certain
13 procedures like ovarian cyst removal, detorsion -- was that the
14 word you used?

15 A. Yes.

16 Q. And endometriosis, correct?

17 A. Endometriosis.

18 Q. Can you tell me again what those procedures are?

19 A. So the ovary can have a variety of different
20 pathologies, including cysts or masses on the ovary that on
21 occasion need to be removed, so that would be an ovarian
22 pathology in which we do a cystectomy, for example.

23 A detorsion means that the ovary -- and bear with me
24 here for a minute. If you think about the uterus like a
25 butternut squash, okay? And then there are tubes from the top

1 of that squash where the ovaries are. So the ovaries generally
2 hang somewhat free, and on occasion it can turn on itself, at
3 least intermittently interrupting the blood flow to the ovary,
4 which is incredibly painful, and can have implications for
5 fertility in the future.

6 Q. I believe you discussed -- thank you, by the way. That
7 was very informative.

8 I believe you discussed those procedures as
9 procedures that -- it was very informative.

10 I believe you discussed those procedures as
11 procedures which would be done on an outpatient basis and the
12 patients would be sent home after they had had the procedure,
13 correct?

14 A. That's correct.

15 Q. I think Ms. Sandman asked you -- correct me if I'm
16 wrong. I think she asked you, people might travel from
17 significant distances to have you perform those procedures and
18 be sent home the same day, correct?

19 A. Correct.

20 Q. And you wouldn't -- I think you testified that you
21 don't have a coverage physician available in their community to
22 cover their complications, correct?

23 A. Correct.

24 Q. But you do have coverage physicians available in the
25 St. Louis area, specifically at Barnes-Jewish Hospital, that

1 would apply to patients who had those procedures, as well,
2 correct?

3 A. Correct. So our hospital does maintain 24-hour
4 coverage for obstetric and gynecologic emergencies.

5 Q. So there is coverage available, but it would be
6 coverage available in the St. Louis area, correct?

7 A. At my hospital.

8 Q. Specifically at Barnes-Jewish, correct?

9 A. Correct.

10 Q. And I take it you don't know what other doctors do who
11 perform those kinds of procedures outside of the hospital
12 setting elsewhere in Missouri, correct?

13 A. I can't speak specifically to their practices, but I
14 can tell you sort of globally that those procedures
15 specifically that I just mentioned are universally accepted as
16 outpatient procedures.

17 Q. But you don't know whether doctors who perform them on
18 an outpatient basis, other than yourself, typically provide --
19 have some coverage arrangement like your coverage arrangement
20 in the event that something goes wrong with those.

21 A. I can't say.

22 Q. Dr. McNicholas, I think you testified -- you agreed
23 with me in your deposition that providing comfort and
24 confidence to a patient is a valuable thing to do, in and of
25 itself, correct?

1 A. Yes.

2 Q. And I believe you testified that you don't think that
3 it would provide comfort or confidence to your patients in
4 Columbia if a doctor other than yourself and Dr. Moore were
5 available in the Columbia area to treat complications that may
6 arise from medication abortion, correct?

7 A. So in the event that a complication is experienced,
8 it's unlikely that the patient is going to present to the
9 hospital in Columbia, given that most people don't live
10 geographically right at the center of the clinic. So I think
11 that providing a specific name of somebody who may or may not
12 be available is irrelevant to patients because they won't
13 access the care through that system.

14 Q. So some of your patients in Columbia actually come from
15 the Columbia area directly, correct?

16 A. Some of them do.

17 Q. And some of them come from outlying counties; is that
18 fair to say?

19 A. Correct.

20 Q. And you don't think it would be comforting to them to
21 be told, look, here is a procedure that has a 2 to 5 percent
22 rate of secondary evaluation that may lead to further
23 treatment, but we have a doctor who we know who we have an
24 agreement with who is going to be available to treat you in the
25 event that I, Dr. McNicholas, may not be in town.

1 A. So in the event that they required an intervention --
2 an aspiration intervention, because, again, that would be the
3 only intervention that the clinic itself wouldn't be able to
4 handle in the event that I wasn't there, I think what they
5 would value is having somebody who is competent and capable of
6 providing the procedure, and there's nothing specific about an
7 individual with whom they have no relationship that would make
8 them feel any better.

9 Q. And, in particular, you don't think it would be
10 comforting or provide confidence to them to be told that there
11 is a doctor other than the doctors at the hospital emergency
12 department who are available to treat complications, correct?

13 A. Most of these patients already have that. They have a
14 primary OB-GYN who can treat their gynecologic needs.

15 MR. SAUER: Your Honor, I don't have any further
16 questions right now.

17 THE COURT: Okay, thank you. Any redirect?

18 MS. SANDMAN: I do, Your Honor.

19 - - -

20 REDIRECT EXAMINATION

21 By Ms. Sandman:

22 Q. Dr. McNicholas, just a few more questions for you.
23 First Mr. Sauer asked you some questions about the way that
24 your declaration was drafted. In your declaration, were the
25 medical observations yours or mine?

1 A. Mine.

2 Q. The medical conclusions, yours or mine?

3 A. Mine.

4 Q. And the medical opinions, yours or mine?

5 A. They were mine.

6 Q. And did you communicate those observations,
7 conclusions, and opinions to the lawyers that you were working
8 with?

9 A. I did.

10 Q. And are the medical observations, conclusions, and
11 opinions in your declaration yours?

12 A. They were and still are.

13 Q. Now, Mr. Sauer also asked you a lot of questions --
14 some questions about your testimony to legislatures and courts
15 about abortion restrictions.

16 If you believed that a law or a bill governing how
17 abortion care is provided would actually be good for patient
18 care, would you testify against it?

19 A. No.

20 Q. Mr. Sauer asked some questions about whether you were
21 personally involved in talking to doctors, trying to find
22 someone who could act as a backup doctor in Columbia, either in
23 the recent context of this regulation or when you were trying
24 to obtain replacement privileges after losing your privileges
25 at MU.

1 Do you personally have relationships with doctors in
2 Columbia?

3 A. No.

4 Q. Do other people at Planned Parenthood have those
5 relationships?

6 A. Yes.

7 Q. Mr. Sauer asked some questions about filing
8 post-abortion complication reports which you testified that you
9 were not filing until 2017. And you testified that these
10 reports are supposed to be filed by each person or entity who
11 treats the complication. Do you know if any hospitals in
12 Missouri were filing those reports prior to 2017?

13 A. They were not.

14 Q. Do you know if any OB-GYN offices were filing them?

15 A. They were not.

16 Q. Are abortion facilities licensed and inspected by the
17 Department of Health?

18 A. They are.

19 Q. Do you know if the Department of Health had access to
20 information about complications treated by Planned Parenthood?

21 A. They do.

22 Q. Mr. Sauer asked you some questions about how symptoms
23 like abdominal pain or bleeding can be either an expected part
24 of the medication abortion process or a symptom of a problem.

25 Do you know what protocols the on-call nurse uses to

1 distinguish between bleeding that is cause for concern and
2 bleeding that is not cause for concern?

3 A. I do.

4 Q. And what are those protocols?

5 A. So the nurses have a range of questions and a guide to
6 help them understand several different components of patients'
7 bleeding that help them triage the urgency of the symptoms.

8 So, for example, they ask a series of questions
9 around how long they've been bleeding, how heavy they've been
10 bleeding, and generally we quantify that by the number of pads
11 that are soaked per hour. They also ask questions relating to
12 the quality of the bleeding, for example, the presence or
13 absence of blood clots. And the constellation of all of those
14 questions gives the nurse an excellent idea of whether the
15 bleeding is of concern or not.

16 Q. And you were also asked some questions, similar
17 questions about abdominal pain as being something that could be
18 an expected part of the process or cause for concern. Do you
19 know what the protocols are that the on-call nurse would use to
20 distinguish between those different types of abdominal pain or
21 cramping?

22 A. Yes. Similarly, the nurses are instructed to ask
23 questions to quantify and qualify that symptom, as well. So
24 the duration of the cramping, associated -- whether the symptom
25 is associated with any other symptoms, for example, the passage

1 of a blood clot, whether it's constant or intermittent, if
2 they've taken any of the medication that we've provided to them
3 to help alleviate pain. So, again, there's a number different
4 questions that the nurses have available to them to help them
5 assess the acuity of the patients' symptoms.

6 Q. And then my last series of questions, Mr. Sauer also
7 asked if you know whether other physicians provide procedural
8 care to patients who travel to them for services without
9 arranging for a backup physician to provide care in the
10 patient's hometown.

11 Do you know whether other OB-GYNs in your group
12 decline to treat patients who would be traveling from an area
13 where they do not have such a backup physician?

14 A. So we do not refuse care to any patient; and, in fact,
15 as I believe I testified earlier, our -- the hospital serves as
16 a referral center, and we take care of patients for whom either
17 their doctor doesn't have privileges at a hospital, their
18 doctor may be out of town, or they may be presenting to a
19 hospital for whom there is no OB-GYN available.

20 Q. So just to be clear, it's not part of the protocol for
21 assessing whether you would treat a patient to determine
22 whether there's a -- whether the treating physician has a
23 relationship with a backup physician in whatever town that
24 patient is traveling from, correct?

25 A. Correct. I would treat a patient, regardless of

1 whether there was a relationship or not.

2 Q. And is that the case for the other doctors in -- do you
3 know whether that's the case for the other doctors providing
4 service in Barnes-Jewish, as well?

5 A. That is absolutely the case.

6 Q. And is that the way you teach your residents and
7 medical students to provide care, as well?

8 A. Yes.

9 Q. And is that, to your understanding, part of the
10 standard of care in this area?

11 A. It is.

12 MS. SANDMAN: No further questions.

13 THE COURT: Any recross?

14 MR. SAUER: Nothing, Your Honor.

15 THE COURT: Thank you, ma'am, you may step down.

16 As I said, we can go until 5:30, so if the plaintiff
17 has another witness to put on, I would suggest that we proceed.

18 MS. SANDMAN: Your Honor, we would just have a
19 question. So the witness is here. She flew in from Syracuse.
20 We would love to put her on. I know we have a hard stop at
21 5:30. So my question is just if -- I'm hopeful -- I think our
22 direct will be short, and I'm hopeful that the state would be
23 able to finish. In the event that that turns out not to be
24 possible, would it be possible to arrange to finish the
25 cross-examination, if necessary, with testimony from a

1 courthouse in Syracuse?

2 THE COURT: I don't have any problem having the
3 testimony via videoconference. We do it rather frequently. I
4 would obviously be open to objections if the parties had some
5 type of objection.

6 MS. DODGE: That would be better than by phone, Your
7 Honor, if we can arrange that, but I'm hoping to at least get
8 to some of my cross today.

9 THE COURT: Let's go ahead and proceed. If we need
10 to her -- do a portion of the testimony via VTC, we can.

11 Ma'am, if you could step forward. You need to go to
12 the center and around. And if you would come forward to my
13 right, your left, first to be sworn.

14 - - -

15 COLLEEN HEFLIN,
16 being first duly sworn by the courtroom deputy, testified as
17 follows:

18 - - -

19 DIRECT EXAMINATION

20 By Ms. Ratakonda:

21 Q. Dr. Heflin, can you please introduce yourself to the
22 Court?

23 A. Sure, my name is Colleen Heflin.

24 Q. And you'll see a white binder in front of you that
25 states plaintiffs' exhibits. Do you see that?

1 A. Yes.

2 Q. Can you please turn to the tab marked 20 in that
3 binder? And you can put that --

4 A. Yeah, I was trying to -- 20?

5 Q. Yeah, Tab 20. And do you recognize that document?

6 A. I do. It's my academic curriculum vitae.

7 Q. Did you prepare that document?

8 A. I did, with help from an administrative assistant,
9 uh-huh.

10 Q. And is that document up to date?

11 A. I think I've had a new publication since then, but
12 otherwise, yes.

13 MS. RATAKONDA: And, Your Honor, plaintiffs move
14 Exhibit 20 into evidence.

15 MS. DODGE: No objection.

16 THE COURT: Exhibit 20 will be admitted.

17 (Plaintiffs' Exhibit 20 was admitted into evidence.)

18 BY MS. RATAKONDA:

19 Q. Dr. Heflin, I don't want to spend too much time on your
20 credentials, but what is your current position?

21 A. I'm currently a full professor in the Department of
22 Public Administration and International Affairs at Syracuse
23 University, and a Senior Research Associate at the Center For
24 Policy Research.

25 Q. And how long have you been a professor at Syracuse

1 University?

2 A. I just moved at the beginning of the academic year.

3 Q. What was your position before that?

4 A. Before that, I was a full professor at the University
5 of Missouri at the Truman School of Public Affairs, Co-Director
6 of the Population, Education and Health Center, and Co-Director
7 of the University of Missouri Research Data Center.

8 Q. How long were you at the University of Missouri?

9 A. Ten years.

10 Q. What professional degrees do you hold?

11 A. I have a Ph.D. in sociology from the University of
12 Michigan; a master's in public policy, also from the University
13 of Michigan; and a bachelor's with honors from the University
14 of Michigan.

15 Q. What is the focus of your work?

16 A. My work focuses on poverty and social policy,
17 generally.

18 Q. And do you teach in this field?

19 A. Yes. I regularly teach social welfare policy classes,
20 as well as program evaluation and quantitative methods at the
21 graduate level.

22 Q. Do you conduct research in this field?

23 A. Yes, I do.

24 Q. What is the focus of your research?

25 A. So my work focuses on low-income households and

1 trade-offs they make in terms of how they make ends meet, and
2 the role that social policies play in those trade-offs.
3 Sometimes I talk about it in terms of I study the determinants
4 and consequences of material hardship or whether people can
5 make ends meet.

6 Q. What do you mean by trade-offs? Can you please
7 explain?

8 A. Sure. So in the work I do, I document the extent to
9 which low-income households are unable to meet their monthly
10 expenses. Sometimes in the literature people talk about having
11 more month than money, and so households have to make
12 trade-offs between food and medical care, food and gas. They
13 simply don't have enough money to cover everything, and so they
14 literally have to prioritize one set of needs over others.

15 Q. Have you authored publications in this field in
16 peer-reviewed journals?

17 A. Yes, I've authored over 35 peer-reviewed articles
18 total, and probably about 20 of these are relevant to the
19 current case I'm testifying on today.

20 Q. And what do you mean by those articles are relevant to
21 the current case?

22 A. So they inform my understanding of what low-income
23 households face, the extent to which they experience material
24 hardships or trade-offs of essential expenses, and the role
25 that public policy and benefits play in those decisions.

1 Q. During the ten years when you were at the University of
2 Missouri until 2017, did your work have a Missouri-specific
3 focus?

4 A. I continued to work at the national level, but I did
5 send new -- I had to take on some new research projects that
6 had a specific Missouri focus, yes.

7 Q. Can you give some examples of work that you did with a
8 Missouri focus?

9 A. Sure. So there are probably two that are relevant
10 here.

11 One was some work I did with colleagues at the
12 Interdisciplinary Center for Food Security, and this work was
13 funded by the U.S. Department of Agriculture, and it was a
14 participant survey of people who had received food from food
15 pantries that were in the distribution area of the food bank
16 that was centered in Columbia, Missouri. So we created a set
17 of surveys and sent graduate students out that interviewed
18 people individually, and we were able to track how they used
19 the food, trade-offs that they made between food and other
20 essential expenses. They got demographic information and some
21 health information on them.

22 Another project that has had a Missouri focus has
23 used Medicaid and what I'm going to call SNAP, kind of what
24 Missouri people think of as food stamps, administrative data,
25 and I was able to link these in order to show within a month's

1 variation, as well as variations with benefit levels in terms
2 of health-seeking behavior in the emergency room and specific
3 disease -- specific disease conditions.

4 Q. Based on your work on these projects, what generally
5 did you learn about poor, low-income households in Missouri?

6 A. So both the pantry clients surveyed, as well as my
7 SNAP/Medicaid survey, really documented the extent that
8 low-income households in Missouri are forced to make trade-offs
9 in essential expenses. Again, I'm thinking specifically food
10 and medical care, food and gas, food and housing, or food and
11 utility costs. And so this work shows that this is more common
12 than you might think it would be among low-income households in
13 Missouri.

14 The work with the SNAP/Medicaid data actually showed
15 that there's -- that -- we were looking for differences in the
16 monthly food cycles, and we showed that pregnant women -- some
17 work under review right now demonstrates that pregnant women
18 who, after they receive their food stamp benefits, they're less
19 likely to go to the emergency room in the next week, which we
20 infer that to indicate that this means that they were
21 potentially food insufficient before then, and so this extra
22 boost in resources for food had an improvement in their health
23 for that next week.

24 There's other work showing that food benefit -- that
25 food stamps are exhausted over the month very quickly once

1 recipients get the benefits, and so we were able to tie that to
2 a health condition and frequency of health care utilization.

3 Q. Have you published any papers related to your work on
4 poverty in Missouri?

5 A. Yes. So there's one paper that's currently published
6 in the *Journal of Public Health and Nutrition*, and I have
7 others under review, and still others in preparation.

8 MS. RATAKONDA: Your Honor, plaintiffs move to
9 qualify Dr. Heflin as an expert in issues facing women living
10 in poverty in the United States, and in Missouri, in
11 particular.

12 MS. DODGE: No objection.

13 THE COURT: The witness will be qualified as
14 requested.

15 BY MS. RATAKONDA:

16 Q. Dr. Heflin, are you familiar with the regulation being
17 challenged in this case?

18 A. I am.

19 Q. And do you understand the regulation to affect the
20 provision of abortions in Missouri?

21 A. Yes.

22 Q. In what way?

23 A. My understanding is that it limits the ability in the
24 Springfield and Columbia areas to offer medication abortions.

25 Q. Please turn to Tab 19 in your binder. This is

1 Plaintiffs' Exhibit 19.

2 And, Dr. Heflin, do you recognize this document?

3 A. I do.

4 Q. What is it?

5 A. This is the report that I prepared for this case.

6 Q. Did you author this report?

7 A. Yes, I did.

8 Q. And does it accurately reflect your opinions in this
9 case?

10 A. Yes, it does.

11 MS. RATAKONDA: Your Honor, the plaintiffs move
12 Exhibit 19 into evidence.

13 MS. DODGE: No objection.

14 THE COURT: Exhibit 19 will be admitted.

15 (Plaintiffs' Exhibit 19 was admitted into evidence.)

16 BY MS. RATAKONDA:

17 Q. Dr. Heflin, are you offering an opinion about the
18 impact of the regulation?

19 A. I am.

20 Q. What is that opinion?

21 A. It's my opinion that that regulation places a severe
22 burden on low-income and -- low-income and poor women in the
23 Springfield and Columbia communities by requiring them to leave
24 their community to obtain medication abortion services.

25 It's based on my -- it's based on my analysis that

1 poor women in the Springfield area are going to face trade-offs
2 in essential expenses, again, such as food and medical care,
3 food and utilities, or food and gas, in order to cover the
4 expenses of travel, lost wages and child care. Other women --
5 many other women are going to be delayed in their ability to
6 obtain services, and others are going to be prevented.

7 In the Columbia area where there are currently
8 surgical abortions available, women are going to have to make
9 trade-offs in order to have access to the abortion method of
10 their choice. Many women are going to be delayed, and others
11 are going to be prevented.

12 Q. Now, how do you define poor women?

13 A. I'm using the federal poverty line for women who are
14 100 percent the income threshold for their family size I
15 consider to be poor.

16 Q. And you also mentioned low-income women. How do you
17 define low income?

18 A. In my field, it's very common to use a low-income
19 definition of 200 percent of the federal poverty line.

20 Q. What is the federal poverty line?

21 A. The federal poverty line is a needs standard created by
22 the federal government in the early 1960s that's designed for a
23 particular household size that's sort of to be the kind of
24 income that's required to make ends meet.

25 Q. What is the poverty line for a family of two?

1 A. For a family of two, it's -- I think it's \$16,653
2 annually.

3 Q. And is that for a specific year that you're referring
4 to?

5 A. In 2016.

6 Q. And does the federal poverty line accurately reflect
7 what a household needs to make ends meet?

8 A. So most poverty researchers consider the federal
9 poverty line needs standard to be too low currently. When it
10 was created in the 1960s, food was -- comprised about one third
11 of the full household budget. Currently, that's closer to one
12 seventh or one eighth of the budget. Housing costs, child care
13 costs, medical costs, on the other hand, have grown much more,
14 and there's many other consumptive goods, like dishwashers and
15 microwaves and cellphones, which weren't in existence in the
16 1960s and aren't really part of that initial needs standard at
17 all.

18 Q. So is there another formula that you believe better
19 reflects the amount of income that a household needs to make
20 ends meet?

21 A. So in my field, poverty researchers often use 200
22 percent of the federal poverty line, and this is actually
23 pretty consistent with federal guidelines. So -- to qualify
24 for many programs, so you actually, it goes well above 100
25 percent of the poverty line, so for WIC it goes up to 185

1 percent of the federal poverty line. For free school, reduced
2 or free lunches -- for school lunch programs it goes up to 185
3 percent, as well. So it's consistent, actually, with how the
4 federal government thinks about what families still need help
5 getting by.

6 Q. And what percentage of women who seek abortions are
7 poor or below 100 percent of the federal poverty line?

8 A. According to both national and state statistics, about
9 50 percent of all women who seek abortions are below the
10 poverty line, and about 75 percent are below the low-income
11 line.

12 Q. And when you say state statistics, are you referring to
13 Missouri?

14 A. I'm referring -- I'm referring to Missouri vital
15 statistics information.

16 Q. And going back to your opinions in this case, you
17 mentioned that there was a difference in Columbia and
18 Springfield. So how does that affect the opinions you're
19 providing today?

20 A. So in the Columbia area, there's currently surgical
21 abortions available. But women -- but medication abortions are
22 not available, so women there are prevented from having --
23 receiving the abortion method of their choice. Whereas, in the
24 Springfield area, there's no access to abortion of any type,
25 and that's the primary difference.

1 Q. And what is the basis for your opinion that the
2 regulation will force all poor women to make trade-offs?

3 A. So I did a budget analysis which basically lays out
4 the --

5 Q. What is a budget analysis? Can you explain?

6 A. Yeah. So a budget analysis basically assumes that -- a
7 certain level of income, and then assumes a set of expenses
8 that a household of that size might incur. So in this case, I
9 took somebody who was earning minimum wage, and I had them work
10 full time for a year, and that comes out to about \$16,000 a
11 year. So still below the federal poverty line, but pretty
12 close. And then I estimated a set of expenses based on the
13 best available data I could find that was Missouri-specific.

14 Q. Before we get into your budget analysis a bit more, is
15 the methodology that you undertook to create your budget
16 analysis standard in your field?

17 A. Absolutely. So this is something poverty researchers
18 have been using for 100 years, and this is the type of analysis
19 that actually the federal government uses to determine
20 eligibility, so they ask people to come in and show these types
21 of expenses. And like I said, the federal poverty line itself
22 is sort of prefaced on what a standard budget would be for a
23 household size. So this is a very common approach in my area,
24 my field.

25 Q. Is your budget analysis laid out in your expert report?

1 A. Yes, it is.

2 Q. Can you point the Court to where in your expert report?
3 And this is, again, Exhibit 19.

4 A. So it's in Paragraph 26 and 27, so Pages 13 through 15.

5 Q. In looking at your budget analysis, did you, in fact,
6 calculate two sampled monthly budgets?

7 A. I did. So the first budget analysis assumes that the
8 woman is completely self-sufficient. The second budget
9 analysis assumes that she receives the full set of safety net
10 programs that she could access through state and federal
11 programs.

12 Q. And what types of expenses did you list in your
13 analysis?

14 A. So I start out by putting in rent expenses, and those
15 are specific to the Columbia, Missouri, area and based on HUD
16 fair market rents. Then I include transportation expenses,
17 utilities, food, child care expenses, telephone expenses,
18 health care, I put in a little bit for personal and household
19 items, and then I have a total of that.

20 Q. And aside from rent which you mentioned was specific to
21 Columbia and Springfield, are any of your other expenses
22 specific to Missouri?

23 A. Yes. So the utilities comes from a Springfield
24 statistic that I found, and I think it's -- I actually used 75
25 percent of the average utility bill there, assuming that -- I

1 picked sort of a smaller-than-average household apartment size,
2 so I'm trying to be conservative as possible there. I also
3 think it's likely that utilities may be more expensive in
4 Columbia than Springfield, but I used the Springfield number in
5 both cases. The child care estimate is an estimate that is
6 specific to Missouri. The health care estimate is specific to
7 Missouri, as well.

8 Q. In your sample budget, did you account for all of the
9 expenses that a poor woman may typically face?

10 A. So these would really be essential expenses. There are
11 a lot of other things that are not included in this, like
12 furniture, clothing, things like birthdays or, you know, Easter
13 like we just celebrated. So there's -- I think it's definitely
14 an underestimate.

15 Q. And generally what does your budget analysis show?

16 A. So the first budget that doesn't include any benefits
17 has a deficit for a woman living in the Columbia area of \$900 a
18 month and the Springfield area that's \$841 a month, so this
19 means that their expenses are over their income. And so this
20 is a woman that's going to be scrimping whatever she can,
21 juggling, and may actually be accruing debt through this
22 period.

23 For the person in Budget 2 where they're getting the
24 full amount of benefits, I still find that for a woman in the
25 Columbia area, she still has a \$41-a-month deficit. Someone in

1 the Springfield area, because of the lower housing costs, is
2 \$24 a month in the black, but these are still women that are
3 going to be living very close to the edge and not have a lot of
4 extra money to spend on unexpected expenses.

5 Q. So in Sample Budget 1, why did you exclude benefits?

6 A. So not every woman gets every benefit, for one. So the
7 participation rate in many of these programs is much less than
8 100. The earned income tax credit, which is worth quite a lot,
9 is actually only given annually. It's something low-income
10 women get when they file their tax returns. I put it in here
11 as a monthly credit, but that's not actually how it's received.

12 As well as, there's a lot of transaction costs to
13 staying on these programs. So women have to go in and be
14 requalified frequently, they have to take in extra
15 documentation, so women frequently experience gaps in services.
16 And so it's sort of a very optimistic budget. So I think that
17 everything worked across all of the programs and that her
18 earned income tax credit is being allotted on a monthly basis
19 from that annual, I think it's very optimistic.

20 Q. In your budget analysis, do you take into account
21 financial or other contributions by cohabiters, meaning other
22 adults who might live in the households, such as roommates or
23 romantic partners?

24 A. No, I do not.

25 Q. Why not?

1 A. For several reasons. So nonromantic partners -- again,
2 I've only -- I've estimated that this woman is living in a
3 two-bedroom apartment, so if she's living there with her and
4 her child, there's really not room for nonromantic cohabiters.
5 And there's no reason to think nonromantic cohabiters would be
6 sharing expenses or would be contributing to the welfare of the
7 mother and her child of this unit.

8 For romantic partners, you know, those come with
9 both positives and negatives. There's no guarantee that the
10 person is contributing extra money. They could also be
11 promoting chaos and violence, domestic violence or drugs to the
12 household.

13 There's some good empirical literature, as well, to
14 tell us that cohabiters don't share their income in the same
15 way that married partners do. And so -- as well as cohabiters
16 are often more transitory, it's a less permanent status, and
17 there's often not, as we find in the literature, even agreement
18 on the housing. Some people think they're just staying over
19 some nights, where another partner interprets that as
20 cohabiting.

21 So it's a fluid status. And it's really hard to pin
22 down, and it's pretty clear that the resource allocation is
23 different with cohabiting partners than it is with married
24 partners. As well as, you know, the federal programs would not
25 take into account cohabiters, so married -- marriage is sort of

1 a status that's fully acknowledged.

2 Q. And you spoke a bit earlier about the, what you believe
3 the impact of the regulation will have on poor and low-income
4 women in the Columbia and Springfield areas. So if a woman has
5 to travel long distances to obtain an abortion, what type of
6 burdens does she face?

7 A. If a woman has to travel, she's going to face travel
8 costs, work-related expenses, and child care expenses, in
9 addition to a potential loss of privacy.

10 Q. So let's take those one at a time, starting with travel
11 costs. Did you determine how much it would cost women to
12 travel from Springfield and Columbia to a health center that
13 provides medication abortion?

14 A. I did. That appears on Page 20, or Paragraph 35 is the
15 summary table there.

16 Q. And how did you go about making this determination?

17 A. Well, I started out by assuming if a woman had a car, I
18 assumed that the car would get 25 miles to the gallon, and I
19 looked at the current rate -- the current price of gas per
20 gallon at the time that I was writing the report.

21 But then, because you can't assume that every woman
22 is going to have access to the car, I also looked at the public
23 transportation options. And then where it was clear that the
24 women wouldn't be able via public transportation to make the
25 trip there and back in one day, I also included overnight costs

1 for a hotel.

2 Q. And in total, what did you determine the additional
3 travel costs to be?

4 A. So for one trip -- let me give you the two-trip,
5 because women in Missouri, because there's a 72-hour waiting
6 period, are going to be required to make -- incur these
7 transportation costs twice in a relatively short period of
8 time. And so the two-trip is what appears in this table here.

9 So for a woman going from Columbia to St. Louis,
10 that ranges from \$43 to \$356. For a woman from going from
11 Columbia to Kansas City, that's 43 to \$400. For a woman going
12 from Springfield to Kansas City, that's 57 to \$544.

13 Q. And why did you assume that a woman would make two
14 trips instead of staying overnight?

15 A. It seemed very unlikely that a woman could be gone from
16 her community for 72 hours, I think, given that she has -- I've
17 estimated her as having a full-time job and having one child.
18 It seems like it would be very hard to get that much time off
19 work, that would mean even more lost wages, and, again, those
20 child care issues seem like they would become insurmountable.

21 Q. And why are the cost ranges so wide in your analysis?

22 A. The costs are so wide because if a woman has access to
23 a car, it's still, according to my estimate, going to take up 3
24 to 4.6 percent of her monthly budget; but if she has to travel
25 by public transportation, that's a lot more expensive and

1 oftentimes requires an overnight, particularly for women in the
2 Springfield area.

3 Q. Do you have an estimate of what percentage of poor
4 women in these areas have access to a car?

5 A. I don't have data from Missouri, but according to
6 national figures -- they're a little bit old, I think from
7 2011. Let me make sure I have that. One in nine low-income
8 women do not have their own car.

9 Q. And if a poor woman has access to a car, can she use
10 that car to travel to obtain an abortion?

11 A. Yeah. So that's not -- there's no way to tell that for
12 sure. So oftentimes low-income households will share cars
13 across many -- even across different households. So maybe with
14 a neighbor, maybe a cousin comes and picks somebody up. So
15 they could have access to a car in terms of getting to work or
16 getting to the store, but not actually be able to have full
17 control of that car. Or if it's their car, taking it out of
18 the community may deprive somebody else from getting to work.

19 As well as cars for poor women are likely to be
20 probably not of great quality, and so being able to get around
21 to and from work or the grocery store is a little bit different
22 than undergoing a several-hundred-mile trip. And so there
23 would probably be some concern about the quality of the cars
24 there too.

25 Q. And you also mentioned that taking time off work can be

1 a burden. So why is that the case?

2 A. So for low-wage workers, they often don't have control
3 of their schedules. So they're often -- they can't ask for
4 days off, so having paid sick leave is -- is very uncommon for
5 low-wage work. And so, additionally, work schedules are often
6 highly variable and not told to people very far ahead of time.
7 So there's a large percentage of low-wage workers who are only
8 told their schedules several days ahead of time.

9 Additionally, 50 percent of all workers work more
10 than one job. And so trying to call ahead and make a schedule
11 for services would be really difficult if you don't know when
12 you can get that time off work.

13 Q. And you also mentioned child care as a potential
14 burden. Can you explain why this is a burden?

15 A. Yes. So, according to the bus schedules I looked at,
16 if a woman had to rely on public transportation, or even if she
17 was able to drive herself, to leave the community and drive to
18 St. Louis or Kansas City requires a very long day, and that's
19 most likely going to require child care outside of normal child
20 care hours, and so that's something that she's going to require
21 help in terms of taking her child to day care or picking up
22 from day care in her absence. Additional expenses are likely
23 to go along with that help, as well as a likely loss of privacy
24 to have to explain why that help is necessary.

25 Q. And you had mentioned public transportation schedules.

1 Do you lay out the public transportation options available to a
2 woman in Columbia and Springfield in your expert report?

3 A. I do, yes.

4 Q. And, Dr. Heflin, if you can now turn to the last page
5 of Exhibit 19, you'll see two -- it's double-sided, so there
6 are two tables on this page. Are these tables submitted as
7 part of your expert report?

8 A. Yes, they are.

9 Q. So let's walk through the data on these tables. How
10 did you -- I'm looking at the first table which is titled
11 Abortion Totals and Estimates, Columbia Area, and it lists a
12 number of counties. How did you select the counties listed in
13 this table?

14 A. These are counties that are closer to Columbia than
15 they are to St. Louis or Kansas City.

16 Q. And if you turn to the second table, which is titled
17 Abortion Totals and Estimates, Springfield Area, how did you
18 select the counties that are listed here?

19 A. So these are counties that are closer to Springfield
20 than they are to St. Louis or Kansas City. And I should just
21 point out that Benton County is sort of equidistance between
22 the two, so it appears on both of those pages.

23 Q. On both tables, there's a column titled Number of
24 Abortions 2016. What does this column show?

25 A. This is, according to Missouri vital statistics, the

1 number of abortions to women in that county.

2 Q. And in the year 2016?

3 A. In the year 2016.

4 Q. And there are also two columns on each of these tables
5 titled Estimated Abortions to Women With Incomes 100 Percent
6 FPL or Lower, and Estimated Abortions to Women 200 Percent of
7 FPL or Lower.

8 How did you estimate the number of abortions to
9 women at incomes at 100 percent of the federal poverty
10 threshold or lower?

11 A. So based on both state and national statistics that
12 indicate half of all abortions are to poor women, the second
13 column basically takes the first column and multiplies it by
14 .5.

15 Q. And what about the column titled Estimated Abortions to
16 Women With Incomes 200 Percent of FPL or Lower, how did you
17 make those estimates?

18 A. So based on both national and Missouri-specific
19 statistics that indicate that 74 percent of abortions are
20 performed on women below 200 percent of the federal poverty
21 line, the third column takes the first column and multiplies it
22 by .74.

23 Q. And so turning to the Springfield-area table, based on
24 the numbers here, in your expert opinion, how will the
25 regulation affect poor women in the Springfield area?

1 A. So 76.1 percent of abortions in the State of Missouri
2 are performed on women who have -- are ten weeks or less, are
3 pregnant ten weeks or less. And so I would multiply that
4 number by .761, and I get 228. And so my estimate there is 228
5 is the number of poor women in the Springfield area who are
6 being forced to make trade-offs according to the current
7 regulation in terms of their essential expenses.

8 Q. And so are you saying that 228 poor women would be able
9 to have a medication abortion locally, but for the regulation?

10 A. That's exactly what I'm saying. 228 is the current
11 number of women, according to my estimate, that are being
12 burdened by the current regulation and are being forced to make
13 trade-offs. Others -- many others are currently being
14 prevented -- being delayed, and probably others are being
15 prevented, as well.

16 Q. And do the numbers reflected in your tables include
17 women who didn't make it to obtain an abortion?

18 A. No. Unfortunately, I have no way to estimate those
19 here.

20 Q. And so, to be clear, when you say others are prevented,
21 are those a part of the 228 poor people that you are saying are
22 already burdened?

23 A. No, they're not.

24 Q. So these are additional women?

25 A. Those are additional women, yes.

1 Q. And how will the regulation affect low-income women in
2 the Springfield area?

3 A. So to estimate the number of women, of low-income
4 women, I would take that 443 number, again, multiply that by
5 76.1 percent, and there I get -- I believe it's 338 low-income
6 women are currently being burdened by the regulation and are
7 being forced to make trade-offs in essential expenses.

8 Q. So we've already spoken a bit about poor women or women
9 at 100 percent of the federal poverty threshold, but do you
10 believe that the regulation will severely burden low-income
11 women, as well?

12 A. I do. According to my budget analysis, poor women are,
13 particularly those that are not receiving assistance, are so
14 far in arrears that many women who are earning even more are
15 still going to face essential trade-offs.

16 Q. And let's now turn to the Columbia area. How will the
17 regulation affect poor women in that area?

18 A. So to estimate the number of women impacted in the
19 Columbia area, I took the 258 total number of poor women
20 currently receiving abortions in 2016, I multiplied that times
21 40 percent, and that's the number of women statewide in
22 Missouri who received medication abortions.

23 And there, I find 103 women are currently being
24 burdened by the regulation and are being forced to make
25 trade-offs in essential expenses. Many of these are likely

1 being delayed in their ability to seek treatment, and others
2 are being prevented.

3 Q. And how will the regulation affect low-income women in
4 Columbia?

5 A. To get the estimate for low-income women, I take the
6 381 total there, I multiply that times 40, and there, I
7 believe, I got 153 low-income women are currently being
8 burdened by the regulation in terms of being forced to make
9 trade-offs in essential expenses in order to cover the expenses
10 of leaving their community in order to receive services.

11 Q. For the Columbia area, what if some of these women who
12 would have to forgo food and other necessities in order to
13 travel to obtain a medication abortion instead stayed in
14 Columbia and got a surgical abortion, does that change your
15 testimony regarding how they're burdened?

16 A. No, that seems like a large trade-off. I think that's
17 another -- another example of a burden. That if the
18 finances -- the financial situation does not allow you to
19 receive the abortion service of your choice, I think that is
20 absolutely a burden in itself.

21 Q. And, Dr. Heflin, one last question. Overall, how will
22 the regulation affect poor and low-income women in the Columbia
23 and Springfield areas?

24 A. So in my field where we're studying poor and low-income
25 women, we often look at women that are really trying to balance

1 their expenses and their needs. And some months will be a
2 little bit better, some months will be a little bit worse, and
3 they sort of sit there balancing on the edge of their cliff.
4 And we identify precipitating events that sort of push them off
5 the cliff and force them into this cascade of traumatic events,
6 cause them to miss their rent payment and be evicted, cause
7 them to not feed their children and have their children put in
8 protective custody. And so my concern in this case is that the
9 expenses required to leave the community to seek abortion
10 outside of the community could be one of those precipitating
11 events that has very dire consequences, both for the woman, as
12 well as her child.

13 MS. RATAKONDA: Thank you.

14 THE COURT: Given the fact that it's 5:25, I'm open
15 to you asking a few questions if you'd like, but we could also
16 take a break now and just have the witness appear via VTC on
17 Friday.

18 MS. DODGE: With the Court's permission, I'd like to
19 use the handful of live minutes I do have with this witness --

20 THE COURT: Sure.

21 MS. DODGE: -- and then by video.

22 THE COURT: Sure.

23 - - -

24

25

CROSS-EXAMINATION

1
2 By Ms. Dodge:

3 Q. Ma'am, we've spoken about the hypothetical budget that
4 you created in Paragraph 27 of your report for a hypothetical
5 one parent/one child household in Missouri, correct?

6 A. Yes.

7 Q. That family's income I think is \$16,014, but, in any
8 event, it's a little bit below the federal poverty threshold,
9 right?

10 A. Yes.

11 Q. And when you created that budget in Paragraph 27, you
12 said here today that your second analysis in Paragraph 27
13 assumes that this household is receiving, I think you said, the
14 full set of state and federal benefits that they could access?

15 A. I think the full set that they would be likely to
16 access, yes.

17 Q. And in your deposition, you said you assumed the
18 household was participating, at least at one point you said in
19 all government assistance programs that it would be eligible
20 for, correct?

21 A. So certainly the ones that have high participation
22 rates, yeah, I think the ones that they're most likely to
23 participate in.

24 Q. And in creating your sample budgets in this report, you
25 used the cost of day care for a four-year-old child, correct?

1 A. Yes, so what I could find had infant care,
2 four-year-old, and then school-aged. And so I was estimating
3 my budget on a three-year-old, but the closest I could come
4 from that was a four-year-old, yeah.

5 Q. And you co-authored a journal article entitled "The
6 Impact of Aging Out of WIC on Food Security in Households with
7 Children" that was published in 2016, correct?

8 A. Yes.

9 Q. Children are eligible to receive WIC until they turn
10 five years old, correct?

11 A. While they're absolutely eligible, unfortunately,
12 there's a high level of nonparticipation. In fact, the
13 majority of children past infant age do not receive the
14 benefits for which they're eligible. Only about one quarter of
15 women with children that are age four actually receive WIC. So
16 it's unfortunately not very common.

17 Q. Ma'am, I apologize for interrupting. I don't mean to
18 be rude, I know you have to get back home, but my time is
19 short. So if you can try to listen to my question and just
20 answer it, I would appreciate that.

21 If a parent in this household in Paragraph 27 is a
22 woman seeking an abortion, that means she is pregnant, right?
23 We can assume that.

24 A. We can assume that.

25 Q. And you said that households of pregnant women, at

1 least, are eligible for WIC if their household income is at or
2 below 185 percent of federal poverty level, right?

3 A. Yes, but most women don't get on WIC very early in
4 pregnancy. That is usually much later.

5 Q. When you prepared the budgets in your report, you did
6 not consider WIC benefits that a one-parent, one-household
7 child [as spoken] would be eligible for, correct?

8 A. I did not, because it's not common for women of this
9 age children to actually receive WIC benefits.

10 Q. Did you research the Department of Social Services
11 website to see if a four-year-old child in your hypothetical
12 household would qualify for Medicaid?

13 A. My -- I believe they would. The health care costs that
14 I estimated were for the mother whose income would be too high
15 to qualify in Missouri.

16 Q. Did you consider the woman's eligibility from MO
17 HealthNet for pregnant women?

18 A. Considering in my scenario she was planning on ending
19 her pregnancy, I was sort of thinking of what the circumstances
20 were before that. I assumed that eligibility ends as soon as
21 she terminates the pregnancy, and so that would be sort of very
22 short-term eligibility and would not reflect her situation in
23 the month before she learned she was pregnant, for example, or
24 the month after.

25 Q. You're familiar with the SNAP program, correct?

1 A. Yes, I am.

2 Q. Are you aware that a household at or below 135 percent
3 of the poverty level that is receiving SNAP for at least one
4 household member is eligible for Lifeline service to help pay
5 for telecommunications service?

6 A. So I just learned this in my deposition, and that turns
7 out to be an underprescribed program. Only about 20 percent of
8 the population that's eligible for that in the state of
9 Missouri actually take that up. It tends to be focused on
10 elderly, disabled, and veterans. So I think it's very unlikely
11 in this scenario that she would participate, but it seems to be
12 valued at about \$17 a month, I learned.

13 Q. So you did not take that into account in preparing your
14 budgets, correct?

15 A. No, I did not. It doesn't seem very likely.

16 Q. When you budgeted for utilities in Paragraph 27 of your
17 report, you did not assume that this household was eligible for
18 light, heat, or for other forms of utility assistance, correct?

19 A. So that's not a guaranteed benefit, so those benefits
20 run out frequently in many counties, and so I did not assume
21 that it was available to her.

22 Q. Okay. You assumed that the one-parent, one-household
23 child [sic] would be in a smaller-than-average, two-bedroom
24 apartment, correct?

25 A. Sure. So that's the way I was conservative with

1 utilities.

2 Q. When you budgeted for the cost of rent, though, you
3 also assumed that this household would be paying the median
4 fair market rent for a two-bedroom apartment in either the
5 Columbia or Springfield metropolitan area, correct?

6 A. HUD fair market runs the way the standard expenses are
7 estimated. Yes, that's what I used.

8 Q. A one-parent, one-household child -- a one parent/one
9 child household with an income below the federal poverty line
10 would be eligible for Section 8 vouchers, correct, to help with
11 housing?

12 A. While she might be eligible, in most counties in
13 Missouri there's a wait list, and it's very unlikely that
14 that -- that she's going to actually receive those. Tends to
15 be priority of eligibility for homeless, elderly, and victims
16 of domestic violence. So I think it's unlikely that -- in my
17 scenario that she would rise to the top, given the high demand
18 for those Section 8 vouchers.

19 Q. So you did not assume that in creating in your budget.

20 A. No, it didn't seem like that was very likely.

21 MS. DODGE: Your Honor, would you like me to stop
22 now?

23 THE COURT: Yes.

24 MS. DODGE: I'm sorry, I didn't realize it was past
25 5:30.

1 THE COURT: That's okay. If this is a good point to
2 stop, then, yes, why don't we stop.

3 So we'll continue your testimony via video. It's
4 crucially important that you get in touch with IT at the Kansas
5 City courthouse so that they can set up the videoconference. I
6 don't think it will be a problem, but they have to be able to
7 test it ahead of time. As I said, we've done it a number of
8 times, so please do that before Friday.

9 Does plaintiff have any additional witnesses on
10 Friday other than this witness?

11 MR. MUNIZ: We do not, Your Honor.

12 THE COURT: Okay. And then the defendants?

13 MR. SAUER: Your Honor, we anticipate calling Dr.
14 Williams and Dr. Solanky.

15 THE COURT: Okay.

16 MR. SAUER: If it's a hard stop at 5 p.m. on Friday,
17 it might be hard to get them both in with cross-examination
18 remaining of this witness, as well.

19 THE COURT: Well, after Friday -- if we need to
20 continue this to another day, after Friday morning, I'll know
21 more of what my schedule is later in April. I will tell you
22 that the trial the week of -- the trial the week of the 16th
23 went to mediation today, and it was not successful, and so that
24 case -- if I were a betting woman, it's going to trial.

25 The trial the week of the 23rd, I will know more

1 about how long they expect that to last after we have our
2 pretrial on Friday morning. There's a possibility that if we
3 have to continue the evidence that we could squeeze it in
4 sometime on the week of the 23rd. So that's a possibility.

5 MR. SAUER: Your Honor, I anticipate we could
6 probably be able to complete Dr. Williams at least on Friday,
7 so I think we would just be talking about Dr. Solanky. I think
8 he does have wide flexibility, so I think we probably could be
9 able to work with whatever availability the Court has. I'll
10 need to check that with him.

11 THE COURT: And then the week of the 30th, that case
12 has been set for mediation, I think.

13 LAW CLERK: Yes.

14 THE COURT: But it hasn't occurred yet.

15 LAW CLERK: It has not occurred yet.

16 THE COURT: It has not occurred yet, so there's a
17 possibility that the week of the 30th could open up too. So
18 why don't we reconvene at 1 o'clock on Friday.

19 LAW CLERK: Judge, I take that back. You won't be
20 talking to them until Friday morning.

21 THE COURT: Oh, you're right.

22 LAW CLERK: So it won't be set.

23 THE COURT: You're right. That has not been set.

24 So let's reconvene on Friday and see what we can get
25 done on Friday; and if we need to move it to another date, I

1 should have more information regarding our schedule at that
2 point. We'll probably have to conclude pretty close to 5
3 o'clock on Friday because, again, the court security -- I'll
4 have to check if it closes at 5:30 or 6:00, but I think it's
5 pretty similar in all of the courthouses.

6 MS. SANDMAN: There's no chance of starting slightly
7 early, is there?

8 THE COURT: There's not. I have something I think
9 almost every half an hour, and two of them are pretrial
10 conferences that could take longer. So unfortunately Friday at
11 1:00 is my -- is the earliest that we can start on Friday.

12 MS. SANDMAN: Your Honor, may we just confer with
13 the witness very briefly? We had talked broad strokes about
14 scheduling, and I want to make sure that 1 o'clock is --

15 THE COURT: Sure. I'm going to give the exhibits
16 back to the parties so that we don't have to have custody of
17 them while this is pending.

18 MS. RATAKONDA: Yes, that works, Your Honor.

19 THE COURT: Okay. Then we will reconvene at 1
20 o'clock on Friday in Kansas City and see if we can conclude the
21 evidence at that point. So see everyone then.

22 (Hearing adjourned for the evening.)

On the Front Lines of the Abortion Wars

Dr. Colleen McNicholas zig-zags across the Midwest—considered an "abortion desert"—to provide women with care that's harder and harder to come by. In part two of Marie Claire's series on reproductive rights, she takes us with her.

Oh, Colleen, you're here to butcher the babies again, aren't you?" That's how an antiabortion protester greets Dr. Colleen McNicholas as she maneuvers her silver SUV into the parking lot of the Planned Parenthood clinic in St. Louis' Central West End on an unseasonably warm day in mid-February. McNicholas pulls into a spot—she likes to park in front of the fence nearest the protesters so patients don't have to—and heads to the entrance, carrying two dozen bagels she brought for the clinic's staff.

Once inside, an armed guard waves her through the metal detector and a set of auto-lock doors (the second won't open until the first one shuts). She has just enough time to change into scrubs, shove a few bites of a bagel into her mouth (she'll munch on this one bagel all day in lieu of a lunch break), and wash her hands for the required three minutes before it's time for the first abortion.

By the end of her eight-hour workday, she will have terminated 31 pregnancies.

McNicholas is one of a dwindling group of doctors performing abortions in the Midwest, which, along with the South, is known to pro-choice advocates as the abortion desert. According to the Guttmacher Institute, as of 2011, the most recent year for which data are available, 94 percent of counties in the Midwest had no abortion clinic to serve the 13.2 million women of reproductive age who live there. She works two days every three weeks at the Planned Parenthood in St. Louis—the only remaining abortion clinic in Missouri—flies once a month to the Wichita, Kansas-based clinic where Dr. George Tiller practiced until he was shot dead in 2009 by an antiabortion zealot, and in June will begin traveling to Oklahoma City to work at a newly opened clinic. "Part of the problem with being so committed and feeling so passionate about an issue is that it's hard to say no," McNicholas, 35, says. "It's hard to say, 'I can't do that,' because that means somebody is going without care, and what that means is, they're probably going to have a baby they don't want. So ultimately, I end up saying, 'I can do one more day' or 'I can go one more place.'"

McNicholas leaves her house around 5 a.m. for a flight to Wichita, Kansas.
(Image credit: Rebecca Greenfield)

When she's not crisscrossing the Midwest, she's treating patients at her obstetrics and gynecology practice at St. Louis' Washington University School of Medicine, where she is an attending physician and assistant professor. She also drives two hours to Jefferson City, Missouri, a few times a year to testify before the state Legislature in opposition to bills restricting access to abortions. Once a year, she goes to Washington, D.C., with other doctors to lobby legislators that science ought to trump politics when it comes to providing a procedure that, according to Guttmacher, one-third of all American women will have before age 45. Some nights, she meets with the board members of the abortion-access fund she founded to help Missourian women afford the procedure. (At Planned Parenthood in St. Louis, patients pay from \$545 to \$1,470, most often out of pocket, as state law prohibits Missouri-based insurance companies from covering the cost, except when the woman's life is at risk.) Whatever precious hours she has left are spent at home with her 5-year-old son (a basketball star in the making) and her partner, an anesthesiologist, who didn't want her name used out of concern for her safety.

It's an exhausting schedule ("Good thing you learn how to not sleep in med school, huh?"

McNicholas says, laughing), but one she feels she has to maintain. Soon, however, and to her dismay, her workload may get a whole lot lighter. In June, the U.S. Supreme Court may issue a decision in *Whole Woman's Health v. Hellerstedt*, the most significant reproductive-rights case to come before the high court in more than two decades—the outcome of which will determine the state of abortion access nationwide for years to come.

(Image credit: Rebecca Greenfield)

McNicholas travels to Wichita once a month to provide care.

At issue is HB2, a law passed by Texas in 2013 that requires abortion clinics to maintain the standards of ambulatory surgical centers, and doctors performing abortions to have admitting privileges at a hospital within a 30-mile radius. Twenty-two states, including Missouri, Kansas, and Oklahoma, have passed similar surgical-center-requirement laws, while 14 states require abortion providers to have some affiliation with a local hospital. Such legislation is known to advocates for abortion access as Targeted Regulation of Abortion Providers, or

TRAP laws. In the past five years, states have enacted 288 laws restricting abortion—the most in any five-year period since abortion was legalized in 1973, according to Guttmacher. Since 2011, at least 162 abortion providers of the estimated 553 clinics nationwide have shuttered or stopped offering the procedure, according to *Bloomberg Businessweek*. Texas saw at least 30 clinics close, and, as a result, women there have had to wait as much as three weeks longer for an appointment and drive an average of four times as far to get to a clinic, according to a survey by the Texas Policy Evaluation Project, a University of Texas–based project to determine the impact of the state's reproductive policies. The survey also found that between 100,000 and 240,000 Texas women between the ages of 18 and 49 have tried to end a pregnancy themselves. "When abortion is illegal, it becomes unsafe and women die—it doesn't go away," McNicholas says. "People think we say that because it sounds scary, but we say it because it is true."

“ When abortion is illegal, it becomes
unsafe and women die—it doesn't go
away. ”

In order to determine the legality of the Texas law, the justices will have to revisit a 1992 Supreme Court decision in *Planned Parenthood v. Casey* that said states are permitted to pass measures regulating abortion care so long as such laws do not impose an "undue burden" on a woman's right to terminate a pregnancy. Proponents of TRAP laws say the requirements are necessary to protect women. "Abortion, whether accomplished by an invasive surgery or potent drugs, has significant risks to women," says Anna Paprocki, a staff attorney with Americans United for Life. "Health and safety standards are not a prohibition on abortion ... [they] are common-sense standards that aim to provide maximum patient safety."

Yet the American Medical Association, the American College of Obstetricians and Gynecologists, the American Academy of Family Physicians, and the American Osteopathic Association filed a brief with the Supreme Court in October saying such requirements are "contrary to accepted medical practice and are not based on scientific evidence" and "fail to enhance the quality or safety of abortion-related medical care and, in fact, impede women's access to such care by imposing unjustified and medically unnecessary burdens on abortion providers."

Crosses erected by protesters outside the South Wind Women's Center in Wichita.
(Image credit: Rebecca Greenfield)

All three states where McNicholas performs abortions have admitting-privileges laws on the books. Texas may have put such laws on the map, but Missouri pioneered the legislation, passing the nation's first admitting-privileges law in 1986. Kansas and Oklahoma have also passed privileges laws, but both are currently on hold pending legal challenges. McNicholas has admitting privileges only in St. Louis, which means if HB2 is upheld and Kansas' and Oklahoma's pending laws are enacted as a result, she will no longer be able to perform abortions anywhere outside St. Louis. The clinics in Wichita and Oklahoma City may be left scrambling to find a doctor with privileges, and in the meantime, the women they currently serve—who come from as far away as Texas and Arkansas—will have to drive farther, wait longer, and spend more money in order to get an abortion. "If that happens, it will feel like a whole lot of steps backward," McNicholas says. "I think the word for how I would feel is *deflated*—disappointed, frustrated, and deflated."

At 7:25 a.m. the next day, McNicholas takes a call from a patient while she brews coffee in the kitchen of her ranch-style home on a tree-lined street on the west side of St. Louis. When McNicholas and her partner moved in about a year ago, they installed an alarm system and

Last September, an antiabortion blogger threatened to protest at McNicholas' home in order to "expose the hidden works of darkness," prompting her to send a letter warning neighbors and asking them to report any suspicious people to the police. And in March, when McNicholas and her partner hosted a Hillary Clinton campaign event at their home with Planned Parenthood president Cecile Richards, protesters picketed on the street out front.

McNicholas was raised on the South Side of Chicago in a family that was "supportive of me being whatever I wanted," she says. In high school, most of her friends were on birth control and some had abortions, and none of them thought of it as an "Oh, my God, crisis," she says. It wasn't until McNicholas went to medical school in rural Kirksville, Missouri, that she realized how different her experience was. "There wasn't anywhere within miles and miles and miles of Kirksville where someone could get an abortion if they needed one," she says. Once McNicholas decided to pursue obstetrics and gynecology (she liked the idea of treating "overall healthy people in a mostly preventive way"), performing abortions wasn't even a question. "As a doctor, my job is not to have an opinion on abortion," she says. "My job is to care for patients."

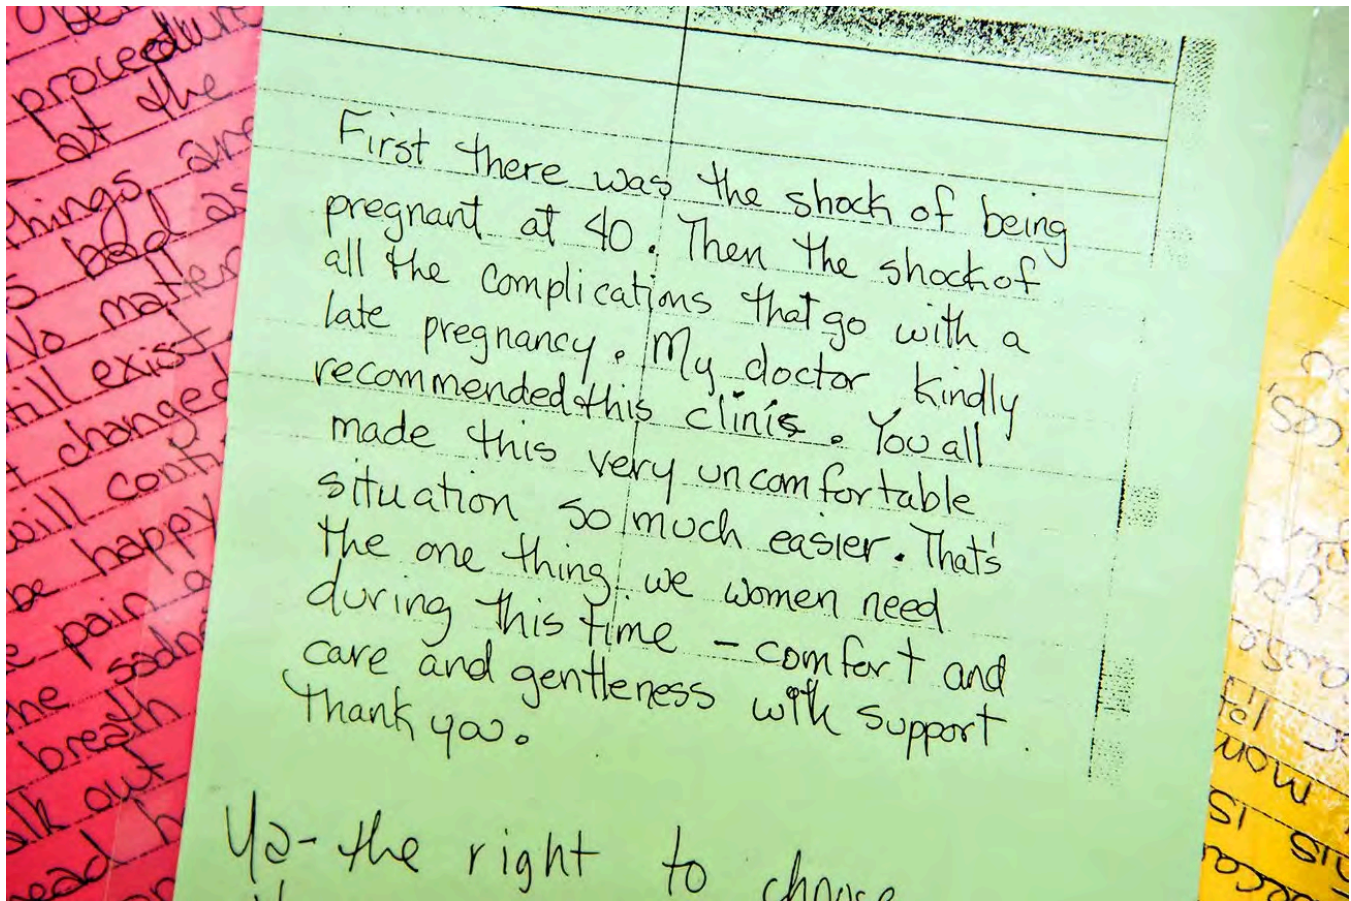

Coalition for Life St. Louis protesters outside Planned Parenthood in St. Louis.

She didn't get involved with advocacy at first. "I thought doing the procedure was advocacy enough," McNicholas says. But during her family-planning fellowship in 2013, she testified before the Missouri Legislature on a bill restricting access to medical abortions. "It was so eye-opening," she says. "The folks testifying for the bill were all men. I felt like if you're going to make decisions that affect half the population, you should have input from them." But finding other women to testify alongside her was difficult. "When I first started doing advocacy, I would think, *Where are all the women who have abortions? Why aren't they standing here with me?*" she says. "But as time went on, I was like, *Well, we don't expect the people who have colonoscopies to come and talk to the legislature about it.*" She often ends her testimony with an invitation for legislators to come spend a day with her. "I say, 'Do you want to meet any of these women? Do you want to see what it's like? Do you want to see what kind of impact you're having?'" she says. "Of course, nobody ever does."

“ If you're going to make decisions
that affect half the population, you
should have input from them. ”

Just before 8 a.m., a smattering of protesters stands on the sidewalk near the parking lot entrance. An intern with Coalition for Life St. Louis, who declined to be interviewed, wears a hot-pink vest (Planned Parenthood's unofficial color) and is holding a clipboard next to a sign reading, "Check in here"—a seemingly deliberate attempt to confuse arriving patients. Even though Planned Parenthood warns women about the protesters when they schedule their appointments, many patients stop or pause when greeted by a protester's friendly wave. Others drive in as the intern yells after them, "You have options!" or "Just give us the opportunity to comfort you!" She then scribbles down the car's license plate number and a description of the passengers (she won't say what the information is used for). If any patients

stop, the protesters direct them to Thrive St. Louis' mobile unit parked across the street. They tell women they can get a free pregnancy test and ultrasound on the bus, but don't mention that such centers typically counsel women against having an abortion.

Letters written by former patients in a waiting room at Planned Parenthood in St. Louis.
(Image credit: Rebecca Greenfield)

Once patients are safely in the parking lot, they're greeted by a volunteer from the advocacy group NARAL Pro-Choice America, who escorts them inside. There are 22 abortions on the schedule today. The majority of patients in McNicholas' care fit the profile of women seeking abortions in the U.S. Nationally, more than half (58 percent) are in their 20s, 61 percent already have one or more children, and nearly 70 percent are economically disadvantaged.

Of the patients McNicholas will see today, one is a 24-year-old mother of three from St. Louis whose IUD—the most effective form of contraception available—failed. "This is a situation I tried to prevent," she says, adding that she just started nursing school. She's fired up about her right to make her own decisions about having more children. "I mean, how would you feel if someone came to you, telling you, 'You shouldn't do this because I believe in God?'" she asks. "That's like saying, 'I'm a vegetarian, so you can't eat meat.'" Another

patient is a 24-year-old who drove from a small town about three hours away. She says she was drugged and raped at her own housewarming party. "I never in my mind thought I would be here—this is a nightmare," she says. "But this is a decision I had to make because, yeah, I could do adoption, but when that kid hunts me down one day, they're going to say, 'Why?' And I'd have to say, 'Well, you're a product of rape.' That's nothing to put on a kid."

Whether McNicholas is performing a medical abortion, where the patient takes one pill at the clinic and a single dose of four others within the next 48 hours at home, or a surgical abortion, where the pregnancy is suctioned out of the uterus, she only needs about 10 minutes with each patient. She enters the room with a big smile and a cheerful hello, immediately trying to put patients at ease. The first question from surgical patients is usually, "Will it hurt?" McNicholas tells them she can't promise it will be painless—most patients experience varying levels of cramping—but she can say it will be over quickly. The actual procedure only lasts three to five minutes. "You can handle anything for three minutes," she tells patients.

The 40-person staff at the Planned Parenthood in St. Louis constantly worry that the state Legislature will find a way to shut them down. "Anytime there's some new restriction, we have to step back and say, 'What is our current work flow, and how does that need to change? What's our current paperwork, and how does that have to change? What's our current training, and how does that have to change?'" says Mary Kogut, president and CEO of Planned Parenthood of the St. Louis Region and Southwest Missouri. The clinic's medical director, David Eisenberg, adds, "We have spent so much time, energy, and money defending ourselves against these attacks. If they can't stop us from taking care of women, they're hoping they can bleed us dry in the process."

Feeling like they have a target on their backs is not without cause. The state Legislature is currently trying to pass a measure to defund Planned Parenthood, pulling nearly \$380,000 in financial support. Legislators successfully stopped the state's only other abortion provider—a Planned Parenthood clinic in Columbia, home to the University of Missouri—from performing abortions last winter. The Columbia clinic had been unable to provide abortions since 2012, when its doctor left for a military deployment. In 2014, when Laura McQuade took over as president and CEO of Planned Parenthood of Kansas and mid-Missouri, one of her primary goals was to get abortion care up and running again. She started looking for a doctor and eventually connected with McNicholas. After a lengthy licensing, inspection, and

"Within one week," McQuade says, "our schedule was full."

(Image credit: Rebecca Greenfield)

The very same day, however, the Center for Medical Progress (CMP), an antiabortion organization, began releasing undercover videos purporting to show Planned Parenthood officials discussing donating fetal tissue from abortions to research. CMP used the heavily edited videos to make the case that Planned Parenthood was illegally selling fetal tissue for profit, which Planned Parenthood denies. (CMP's director, David Daleiden, has since been indicted on a felony charge of tampering with a governmental record and on a misdemeanor charge related to intent to purchase human organs, and faces up to

20 years in prison; he has petitioned the court to have the charges dismissed.

Twelve state investigations have cleared Planned Parenthood of any wrongdoing.)

Within days, Missouri's Senate formed an ad hoc committee, called Sanctity of Life, to investigate the state's Planned Parenthood clinics, though neither participates in a fetal-tissue-donation program. The committee applied pressure on the University of Missouri, where McNicholas had obtained admitting privileges, and in December, the college revoked the category of privileges McNicholas had been granted, making it so the Columbia clinic could no longer provide abortion care. "I'm horrified that Missouri has gone back to being a one-provider state," McQuade says. "We remain deeply frustrated that we are unable to provide women the health care that they deserve and that we have the ability to provide, but [we] are being blocked by a hostile legislature."

“ The result is few doctors with privileges—often none in the same town or city as a clinic—so doctors like McNicholas rack up frequent-flier miles, jetting from state to state to provide care. ”

—

They aren't alone: Admitting privileges are often incredibly difficult, if not impossible, to secure. Many hospitals refuse to grant privileges on religious grounds (nearly one out of nine hospital beds in the country is in a Catholic-run facility), or because they receive a large

portion of their funding from a state legislature (as is the case for state- and university-run hospitals) and don't want to risk losing their financial support by becoming embroiled in the politics of abortion. Other hospitals may have requirements that all physicians with privileges admit a certain number of patients a year, which is an impossible quota for abortion providers to meet because the procedures are extremely safe (Guttmacher estimates that the risk of major complications requiring hospitalization is less than 0.05 percent). The result is few doctors with privileges—often none in the same town or city as a clinic—so doctors like McNicholas rack up frequent-flier miles, jetting from state to state to provide care.

On Friday, McNicholas' alarm rings at 4 a.m. She's on one of the first flights of the day to Wichita, where she will spend the next two days at the South Wind Women's Center, one of three clinics in Kansas. It's run by the Trust Women Foundation, which opens abortion clinics in underserved communities (its second is slated to open in June in Oklahoma City; McNicholas will fly in to work there once a month). Named in honor of Dr. George Tiller, who often wore a button reading, "Trust Women," the foundation reopened the clinic in the same facility four years after Tiller was assassinated in 2009 in his church by antiabortion extremist Scott Roeder. (Roeder was convicted of murder and is serving a life sentence.)

Founder and CEO Julie Burkhart heads both the foundation and the clinic. She worked for Tiller for seven years and has six photos of him framed in her office. Burkhart says she "felt a calling" to reopen the clinic after his death. When she approached McNicholas to work at the facility, McNicholas carefully considered the decision. "I certainly don't make light of security," she says. "But one of the things that drove me was that I felt it was a really important stance from the abortion community to say, 'You're not scaring us—we're not going to stop doing what we're doing just because you walked into somebody's place of worship and murdered them.'"

McNicholas puts a patient at ease.
(Image credit: Rebecca Greenfield)

Today, like most days, protesters have set up a dozen small wooden crosses and a handful of gruesomely graphic signs outside the center's entrance. One protester screams, "Children do not deserve the death penalty—they don't want to be torn limb from limb! Repent before the hand of God comes against you!" as patients make their way inside. The woman has also knitted a baby blanket to show to arriving patients. "It helps women realize it is a baby and if they let it live, they will enjoy it," she says.

McNicholas is ushered inside by an armed security guard who worked as Tiller's personal bodyguard for 17 years. (He wasn't with Tiller that day in the church; "He felt pretty safe there," says the security guard, who didn't want to be identified.) Within 10 minutes, she's inside an exam room with the first patient. She will perform 24 abortions today and 17 tomorrow before heading home. "Lots of people assume the hardest part of my job is the work—abortion after abortion, how sad that is," she says. "But the truth is, the hardest part of my job is when I have to say no to somebody." Most often, McNicholas says, she has to say no not for a medical concern, but a legal restriction—increasing numbers of women are getting abortions later because it takes time for them to scrape together enough money to

Case 2:22-cv-00223-Z Document 194-7 Filed 10/11/24 Page 406 of 1331 PageID 8367
drive hours away, stay in a hotel, and afford the procedure. By the time they arrive, they've passed the legal limit on the number of weeks pregnant they can be and still have an abortion. (In Kansas, the law permits abortions at or after 20 weeks if the woman's life is endangered.) "It's so devastating to me to see a woman's face when they don't want to be pregnant and you're the last person who can help them, and you can't," she says. "They are forced to continue with their pregnancy by law."

“ It's so devastating to me to see a
woman's face when they don't want to
be pregnant and you're the last
person who can help them, and you
can't. ”

—

With the Supreme Court decision looming, McNicholas can't help but think of the many more women she may have to say no to in the coming months as a result. "I don't know what is going to happen, or what changes or requirements we will have to take on," she says. "But those of us who provide abortion care are an innovative, creative, and determined bunch—we will continue to find ways to make sure women have access." For now, she remains focused on her current patients. "The best part is when somebody gets off the table and gives me a hug because they feel like, *I just got my life back. I'm going to walk out of here and have a new start—whatever my goals are, I'm going to reach them*," she says. One of her hopes for telling her story, she says, is that other doctors will say, "If she can perform abortions in three places, then I can do it in one."

"It does feel overwhelming and daunting to take this on," McNicholas admits. "But it's doable—you really just need that first hug from a patient and then you're hooked."

Back in Wichita, she completes the last abortion of the day just before 3 p.m. She checks on her patients in the recovery room, and then she's out the door, with 30 minutes until her flight takes off. She makes it through airport security just in time to board the plane. She'll have one day at home with her family tomorrow before it all begins again.

This article appears in the June issue of Marie Claire, on newsstands now. (An earlier version of this article inaccurately stated that the results of the survey of Texas women were those who have tried to end their pregnancy after HB2 was enacted, when in fact the study did not focus on post-HB2 attempts. The error has been fixed.)

#WeCount Report – Society of Family Planning

#WeCount Report

April 2022 to March 2024

Released: August 7, 2024

This is the seventh in a series of reports. Please see www.SocietyFP.org/WeCount for past and future reports. Cite this report using the following DOI: <https://doi.org/10.46621/878086iuzegt>

Introduction

#WeCount is a national abortion reporting effort that aims to measure monthly abortion utilization, nationally and by state, following the 2022 *Dobbs v Jackson's Women's Health Organization* US Supreme Court decision. The *Dobbs* decision overturned the 1973 ruling in *Roe v Wade*, thereby allowing states to ban abortion at any point in pregnancy. In the wake of the *Dobbs* decision, some states implemented near or total abortion bans, while some states activated pre-*Roe* abortion laws. Many of these abortion restrictions were and are being litigated in court, resulting in dynamic legal status changes at the state level. The result has been confusion for the public, for people needing abortions, and for providers. At the same time, lawmakers in other states have passed legislation to protect providers and/or increase access for state residents and people traveling there from states with bans. Additionally, citizens have voted to protect abortion access and there have been increases in funding and logistical support for abortion care. To understand the impact of this dynamic legal and healthcare environment, the #WeCount national reporting study measures abortion utilization by state and by month, starting in April 2022. #WeCount has released six reports previously, reporting on the number of abortions from April 2022, per month, nationally, by state, and by restrictiveness level.

#WeCount data include clinician-provided abortions, defined in this report as medication or procedural abortions completed by a licensed clinician within the US in a clinic, private medical office, hospital, or virtual-only clinic (ie, clinics that only provide telehealth abortions). This report does not reflect any self-managed abortions, defined as ending a pregnancy outside the formal healthcare system, including using medications, herbs, or something else, or obtaining pills from friends or online without clinical assistance. These data reflect the status of abortion provision in the US and can be used by healthcare systems, public health practitioners, and policymakers so that their decisions can be informed by evidence.

This report documents the number of abortions from April 2022 to March 2024, representing 21 months of abortion delivery post-*Dobbs* (Table 1-2022, 1-2023, and 1-

2024). This report also quantifies the number of abortions that would have been expected, had 14 states not banned abortion (Table 2). Finally, this report includes data regarding abortions provided via telehealth (Tables 3 and 4).

We define a telehealth abortion as medication abortion offered by a clinician through a remote consultation with the patient (via video, phone, or messaging) that results in medications dispensed via mail. All telehealth abortions are counted according to the state to which the medications are mailed. Since the start of #WeCount in April 2022, we have been reporting telehealth abortions provided by virtual-only clinics, defined in this report as clinics that offer only telehealth services. Starting in July 2023, #WeCount began to enumerate telehealth abortion numbers provided by brick-and-mortar abortion facilities, which were previously included as part of the state and national totals, separately to provide a more comprehensive picture of the total number of telehealth abortions. In addition, also starting in July 2023, we began to include abortions provided by licensed clinicians in states with shield laws in place. Shield laws give some legal protections to clinicians who offer abortion care via telehealth to people living in states with total abortion bans, 6-week bans, or restrictions on telehealth abortion. These abortions fall within the scope of #WeCount and, as of July 2023, our national telehealth abortion counts include abortion provision under shield laws, unless otherwise specified.

Due to the ongoing recruitment and enrollment of providers, we have more complete data than shared in prior reports. With each report, we continue to refine our imputations and estimates for missing clinics or missing months of data. Thus, monthly totals in some states have been revised from our previous reports.

National findings

- Abortion volume was higher in 2024 than it was in 2023 or 2022, as captured by #WeCount. Abortion volume continues to vary modestly month-to-month, consistent with prior #WeCount findings (Table 1-2022, 1-2023, and 1-2024).
- For the first time since #WeCount began, the national monthly total number of abortions has exceeded 100,000. In the three most recent months of data collection, January 2024 to March 2024, we observed between 94,670 and 102,350 abortions per month, with a monthly average of 98,990 (Figure 1).
- Analysis of monthly abortion volume in the US from April 2022 through March 2024 (Figure 2) illustrates both the seasonality of abortion provision and increases throughout 2023 and 2024. Part of the increase, starting in July 2023, is due to the provision of abortions under shield laws. These abortions may have previously occurred outside the formal healthcare system prior to the use of shield laws.
- Even excluding abortions provided under shield laws, we still observe more abortions per month in January-March 2024 (monthly average of 89,770 abortions) as compared to the same period January-March 2023 (monthly average of 86,967 abortions), a 3% increase.
- This increase in the national totals appears to be driven by the increase in telehealth abortions. Excluding abortions provided under shield laws and by brick-and-mortar

clinics (as collection of these data by #WeCount began in July of 2023), the national monthly number of telehealth abortions in January-March 2024 is 28% higher than the national monthly number of telehealth abortions in January-March 2023. The national monthly number of in-person abortions in January-March 2024 is about the same (1% lower) than the national monthly number of in-person abortions in January-March 2023.

Figure 1. Abortions in the US from April 2022 to March 2024 (both including and excluding abortions provided under shield laws)

Figure 2. Abortions in the US from April 2022 to March 2024, year over year (includes abortions provided under shield laws)

States with abortion bans

- In total, 14 states (Alabama, Arkansas, Idaho, Kentucky, Louisiana, Mississippi, Missouri, North Dakota, Oklahoma, South Dakota, Tennessee, Texas, West Virginia, and Wisconsin) have had total abortion bans for the majority of the 21 months since *Dobbs*. These states have experienced massive declines in the number of abortions provided by clinicians in-state (Figure 3).
- We estimate that overall, if abortion had not been banned in these 14 states, approximately 208,040 abortions would have occurred in-person in these states in the 21 months since *Dobbs* (Table 2). This represents a national monthly average of 9,900 abortions that would have occurred in these 14 states. Of note, abortion access in these states was severely restricted before *Dobbs*, and so these numbers may represent an underestimate of the actual need for abortion in these states.
- States with the greatest cumulative declines in abortion volume over 21 months include Texas (64,710), Georgia (39,245), Tennessee (24,775), Louisiana (16,175), and Alabama (13,335).
- In Wisconsin, where an estimated 11,350 fewer abortions were provided over 21 months, abortion is now available again—albeit with numerous restrictions including on telehealth abortion.
- The future of abortion access in the southern central and southeastern region of the US is particularly uncertain with a Florida law banning abortion at 6 weeks enacted on May 1, 2024. How this law will impact abortion volume is beyond the scope of this report, but is projected to have impacts beyond Florida, given the relatively high number of abortions in that state and the total abortion bans in the contiguous swath

of states in the region: Texas, Oklahoma, Arkansas, Louisiana, Mississippi, Alabama, and Tennessee.

Figure 3. Monthly total for in-person abortions in states with total abortion bans for the majority of months from April 2022 to March 2024

States where abortion remained legal or became legal

- During the period of January-March 2024, states that provided the largest average number of abortions per month included California (16,217), New York (9,660), Illinois (8,243), Florida (7,470), and New Jersey (4,983).
- Comparing the first quarter of 2024 with the first quarter of 2023, the states with the largest increases in the average number of abortions per month include New York (1,357), California (957), Virginia (597), Kansas (503), and Pennsylvania (430).
 - Among these five states, when comparing the first quarter of 2024 with the first quarter of 2023, the average number of **in-person** abortions per month increased by 29% in Kansas, 18% in New York, 13% in Virginia, and 4% in California, and decreased by 7% in Pennsylvania.
 - The average number of **virtual-only telehealth** abortions was up by 59% in Kansas and 53% in Virginia. Virtual-only telehealth abortions declined by 2% in both California and New York. Pennsylvania had no telehealth abortions in January-March 2023, so all of the virtual-only telehealth in January-March 2024 represents increases.
- Florida's high monthly average of nearly 7,500 abortions provided during the first quarter of 2024 is noteworthy, and is expected to decline given the law banning abortion after six weeks gestation that was enacted on May 1, 2024.

- Another state with a notable increase within the first quarter of 2024 was Wisconsin. We recorded between 580 and 700 abortions per month before *Dobbs*, dropping down to fewer than 10 abortions per month after the *Dobbs* decision. Abortion provision resumed on September 23, 2023, and in January to March 2024 we recorded between 350 and 450 abortions per month (lower than pre-*Dobbs* abortion volume).

Figure 4. Abortions in the US, 2022-2024 quarterly totals and distribution between in-person versus telehealth

Note: 2023 Q3 reflects the first period in which telehealth abortions provided by brick-and-mortar facilities were disaggregated from total abortions and reported to #WeCount; additionally, 2023 Q3 reflects the start of abortion provision under shield laws.

Telehealth findings

- As the number of abortions has been increasing nationally, so too has the proportion of abortions that are done through telehealth (Figure 4).
- Nationally, telehealth abortions grew from 4% of all abortions in April 2022 to 20% in March 2024 (Figure 5).
- Telehealth represented 21% of all abortions in January 2024, 19% in February, and 20% in March.
- The number of telehealth abortions provided by all categories of providers (eg, virtual-only, brick-and-mortar) appear to be increasing (Figure 6).
- In January-March 2024, there was a national average of nearly 1,900 brick-and-mortar telehealth abortions per month (Table 4-2024 Q1), representing a 33% increase from the October-December 2023 average of over 1,400.

- In January-March 2024, there was an average of over 6,700 monthly telehealth abortions provided under shield laws to people in states with total abortion bans or 6-week bans, and nearly 2,500 monthly telehealth abortions provided under shield laws to people in states with restrictions on telehealth abortion (Table 4-2024 Q1). The average monthly number of all telehealth abortions provided under shield laws in January-March 2024 of over 9,200 represents a 16% increase from the October-December 2023 average.
- In January-March 2024, there was an average of nearly 19,700 telehealth abortions (all types) per month, representing a 14% increase from October-December 2023 (Table 4-2023 Q4, Table 4-2024 Q1).
- During January-March 2024, the proportion of abortions provided by telehealth (in states where permitted) ranged from 7% in New York to 57% in Wyoming. (Figure 7).

Note: Prior to July 2023, brick and mortar telehealth abortions were categorized as in-person.

Figure 6. Telehealth abortions in the US from April 2022 to March 2024 (includes abortions provided under shield laws, July 2023 to March 2024)

Note: Prior to July 2023, brick and mortar telehealth abortions were categorized as in-person.

Figure 7. Percentage of abortions provided by telehealth in states where abortion is permitted from January to March 2024

Figure 7 does not include abortions provided under shield laws.

Methods

In early 2022, #WeCount developed a database of all clinics, private medical offices, hospitals, and virtual clinic providers in the US known to offer abortion care. We started with the Abortion Facility Database from Advancing New Standards in Reproductive Health (ANSIRH) at University of California, San Francisco. We also included providers who were participating in the Ryan Training program and the Complex Family Planning Fellowship, as well as others identified through outreach from AbortionFinder.com, the Society of Family Planning, and the Society for Maternal-Fetal Medicine. Throughout the study period, we added new providers to our database as we became aware of them. In January 2024, we conducted searches within all 50 states and Washington, DC using AbortionFinder.com and INeedanA.com to confirm that our database was updated. We added new clinics that had opened and noted clinics that had closed. This report includes abortions provided under shield laws by US-based licensed providers who are following their own state law.

The data in this report includes the monthly counts reported by providers for April 2022 through March 2024. We continued to recruit abortion providers and request reporting throughout the study period, incorporating and updating their numbers into each data release. The Society provided compensation to participating facilities for each monthly submission.

In total, 82% of the abortions we counted across the study period were based on data obtained from providers or health departments, while the remaining 18% of the data were imputed. The magnitude of imputation in each state is noted with symbols in the data tables. In 20 states, we had complete reporting from all abortion providers known to #WeCount. In another four states (Florida, Indiana, Texas, and West Virginia) we used state health department data and thus we did not have to impute any data for those states. In some cases, we divided yearly or quarterly counts into months based on the distribution of abortion volume from sites that did report monthly numbers in that state. In 27 states, we had at least one clinic or hospital known to provide abortions that did not submit any data to #WeCount. In those states, we imputed the number of missing abortions for those clinics or hospitals. We used information from news articles, contacts known to the non-reporting clinics, knowledge of the abortion volumes by state, or the median #WeCount number for the clinic or hospital type. To compute medians, we categorized reporters to #WeCount into five types of facilities and calculated the median for April and May 2022 for each category: 1) small abortion clinics, 2) large abortion clinics, 3) primary care clinics, 4) low volume hospitals, and 5) high volume hospitals. In 31 states, we used clinic-level imputations for at least one clinic in the state that submitted most but not all 21 months of data. For these, we calculated the average percent change in abortion volume in the state and imputed values for clinics with missing months.

We estimated the number of abortions by state restrictiveness level using three categories: states that banned abortion, states that restricted abortion to before detection of embryonic cardiac activity, also referred to as a “6-week bans”, because detection of such activity usually occurs around that point, and states that permitted abortion. These categories were based on the abortion policy in each state on the 15th of each month as reported by the [New York Times](#).

#WeCount estimates the number of abortions in all 50 states. While #WeCount is the only effort that reports the total number of abortions provided via telehealth by state and by month, complementary data collection efforts are critical to the understanding of abortion volume in the years since the *Dobbs* ruling. One such effort is the Guttmacher Institute’s [Monthly Abortion Provision Study](#) which estimates the number of clinician-provided abortions that take place each month in each US state without a total ban. While #WeCount aims to survey all clinicians providing abortions in the United States, Monthly Abortion Provision Study is based on data from samples of providers, which is combined with extensive historical facility-level data on variations in caseloads over time. In addition to the number of abortions in states without a total ban, the Monthly Abortion Provision Study also systematically collects additional data beyond abortion counts, including state of residence, gestational duration and a rotating topic relevant to the current policy landscape.

#WeCount was deemed exempt by Advarra IRB. All major decisions were guided by a Research Steering Committee [listed here](#). This research was sponsored by the Society of Family Planning. In the tables, total abortions are presented per month by state, for the US, and by state policy category (banned, 6-week bans, or permitted) for April 2022 to March 2024. Monthly state totals were rounded to the nearest 10. Data that are suppressed are represented by a dash (—) in the table. If the number of abortions for a given state was 0 to 9 for a single month, it was either rounded up to 10 or represented as a dash. Thus, any cell with a dash could represent 0 abortions provided. For states where we did not collect data for a particular time period, geographic region, or service type, we indicate this with an ellipsis (...). In states where abortion and telehealth abortion were permitted by law, telehealth abortions were counted as part of the total for the state to where the medications were mailed. For states where abortion was banned, states with 6-week bans, or states where telehealth was restricted, telehealth abortions were aggregated and counted as part of the national abortion counts.

Data limitations

Measuring abortion access and use is fraught with challenges.¹ Our findings are all reported at the level of the state, so we cannot describe how individual facilities experienced increases or decreases. Observing the raw data, it is clear that the trends we report at the state level are not universally experienced by each facility. In addition, we imputed, or estimated, a large number of abortions in California, New Jersey, and New York, contributing to some uncertainty in those estimates.

Regarding abortion provided via telehealth, we are limited in our ability to document the total number of telehealth abortions provided by at least one large brick-and-mortar clinic that is not reporting telehealth data to #WeCount. Additionally, we started measuring telehealth provided by brick-and-mortar clinics in July 2023, so cannot compare to past months. Finally, while we have an accurate count of how many telehealth abortions were mailed to patients, #WeCount cannot confirm how many patients did not take the pills that were sent to them.

Telehealth provision under shield laws started in June 2023, which triggered their inclusion in #WeCount in July 2023. Clinicians were mailing medications to residents of states with abortion bans, states with 6-week bans, and states with restrictions on telehealth prior to June 2023, but these occurred outside the formal healthcare system and were not measured by #WeCount. Because of this transition in abortion provision from outside to within the formal healthcare system, there is no comparison possible to previous months.²

In addition, providers in the formal healthcare system, including those protected by shield laws, are not the only source of abortion medications. We are unable to estimate the number of abortions that occurred outside clinician-provided care, including those provided by online stores that sell abortion medications, volunteer accompaniment networks, and other types of self-managed abortion.

Finally, the inability to access abortion was a reality for many people before total abortion bans came into place,^{3,4} and remains a reality for many, even in states that permit abortion. We are documenting the number of abortions that occur, and cannot estimate the number of people who wanted and were unable to obtain abortion care.

Implications

Despite the dramatic declines in access in states that have enacted total abortion bans and 6-week bans, overall the national monthly abortion volume has increased, with the 2024 monthly average greater than the 2023 and 2022 monthly averages.

Increased numbers of abortions in states that permit abortion likely represent a combination of two main factors: people traveling from states where they cannot access care, and increased abortions among residents of states where abortion remains legal.^{5,6} Such volume increases are likely influenced by reductions of barriers to abortion care, including reduced burden of cost^{7,8} and travel by use of telehealth, increased financial support for low-income abortion seekers, and improved access via care navigation from practical support groups and public health departments.

Over the study period, monthly fluctuations can be seen at state and national levels. These changes are due to dynamic combinations of state-level changes in access (decreases and increases) and seasonal variation in the need for abortion.

The provision of medication abortion via telehealth increased across the study period and continues to increase. Telehealth, as a service-delivery model for many types of healthcare, has increased in the past few years, in part due to the COVID-19 pandemic.^{9,10} The use of shield laws has brought access to telehealth abortions to residents of states where it was previously not available. While the majority of abortions occur within an in-person model of care, abortions provided via telehealth are an important and complementary model of care. Yet many states ban the use of telehealth for abortion care even while in-person abortion care remains legal.

Nevertheless, our data show that due to total abortion bans or 6-week bans, at least 208,000 fewer abortions were provided in-person. People in states with abortion bans or severe restrictions were forced to delay their abortions, travel to another state, obtain care from a provider in a shield law state, self-manage their abortions, or continue a pregnancy they did not want.¹¹ Regardless of their outcome, lack of access to safe, legal, and local care has grave consequences for people who need abortions.

Table 1 national totals include telehealth abortions provided under shield laws. Abortions provided under shield laws are reported in aggregate only and thus are not included in the state totals.

All numbers in Table 1 have been rounded to the nearest 10. Data that are suppressed are represented by "—". Numbers 0-9 have been rounded up to 10 or are represented by "...". Data that were not collected are represented by "...". Numbers have been corrected as needed for missingness with imputation.

For states marked * there is less than 1% imputation, † 1-4% imputation, ‡ 5-14% imputation, § 15-29% imputation, || 30-44% imputation, ¶ >45% imputation. States with no notation by their name have no imputation for missingness. In Florida, Indiana, Texas, and West Virginia, we used state health department data and thus we did not have to impute any data for those states.

Legal status is time varying, and we use the status for each state as reported by the New York Times on the 15th of each month.

6-week ban	2,690	2,390	2,840
Permitted	89,980	83,730	87,580

Table 1 national totals include telehealth abortions provided under shield laws. Abortions provided under shield laws are reported in aggregate only and thus are not included in the state totals.

All numbers in Table 1 have been rounded to the nearest 10. Data that are suppressed are represented by "-". Numbers 0-9 have been rounded up to 10 or are represented by "-". Data that were not collected are represented by "...". Numbers have been corrected as needed for missingness with imputation.

For states marked * there is less than 1% imputation, † 1-4% imputation, ‡ 5-14% imputation, § 15-29% imputation, || 30-44% imputation, ¶ >45% imputation. States with no notation by their name have no imputation for missingness. In Florida, Indiana, Texas, and West Virginia, we used state health department data and thus we did not have to impute any data for those states.

Legal status is time varying, and we use the status for each state as reported by the New York Times on the 15th of each month.

Table 2. Summary of pre-post-Dobbs changes to in-person abortion care for states with abortion bans and 6-week bans for the majority of post-Dobbs months

	Pre-Dobbs monthly average number of abortions, April and May 2022	Post-Dobbs monthly average number of abortions, July 2022 through March 2024	Cumulative sum of differences, all post-Dobbs months compared to average of April and May 2022	Average monthly difference in post-Dobbs months compared to average of April and May 2022
Totals in all states with abortion bans or 6-week bans	12,620	2,713	-208,040	-9,907
Alabama	635	0	-13,335	-635
Arkansas	315	0	-6,615	-315
Georgia [‡]	4,385	2,516	-39,245	-1,869
Idaho [§]	220	18	-4,240	-202
Kentucky	345	13	-6,965	-332
Louisiana	785	15	-16,175	-770
Mississippi	350	0	-7,350	-350

Oklahoma	310	0	-6,510	-310
South Dakota	30	0	-630	-30
Tennessee*	1,205	25	-24,775	-1,180
Texas	3,090	9	-64,710	-3,081
West Virginia	200	12	-3,950	-188
Wisconsin [†]	640	100	-11,350	-540
Restrictiveness level				
Banned	8,235	197	-168,795	-8,038
6-week ban	4,385	2,516	-39,245	-1,869

Table 2 does not include any telehealth abortions provided under shield laws.

Numbers have been corrected as needed for missingness with imputation. For states marked * there is less than 1% imputation, † 1-4% imputation, ‡ 5-14% imputation, § 15-29% imputation, || 30-44% imputation, ¶ >45% imputation. States with no notation by their name have no imputation for missingness.

Georgia numbers include both in-person and telehealth abortions.

Legal status is time varying, and we categorize states based on the status they had for the majority of the post-Dobbs period.

Table 4 includes abortions provided by virtual-only clinics, including telehealth abortions provided under shield laws, and telehealth abortions provided by brick-and-mortar facilities.

All numbers in Table 4 have been rounded to the nearest 10. Data that are suppressed are represented by "–". Numbers 0-9 have been rounded up to 10 or are represented by "–". Data that were not collected are represented by "...". Numbers have been corrected as needed for missingness with imputation.

Reproductive rights are under attack. Will you help us fight back with facts?

[**Donate**](#)

New Guttmacher Institute research from the [Monthly Abortion Provision Study](#) shows that there were approximately 642,700 medication abortions in the United States in 2023, accounting for 63% of all abortions in the formal health care system. This is an increase from 2020, when medication abortions accounted for 53% of all abortions.

Sources: Guttmacher Abortion Provider Census and Monthly Abortion Provision Study, [guttmacher.org](https://www.guttmacher.org)

Medication abortion using mifepristone was first approved for use in the United States by the U.S. Food and Drug Administration (FDA) in 2000, and reliance on medication abortion has increased steadily as it has become more accessible over time. The two-drug combination of mifepristone and misoprostol is the most common medication abortion regimen offered by US providers, and decades of research have established that medication abortion using mifepristone is **highly safe and effective**. Increased access to and use of medication abortion is likely one reason why the overall number of abortions in the formal health care system **increased 10% nationally** between 2020 and 2023.

The medication abortion counts for 2023 do not include **self-managed medication abortions** that take place outside of the formal health care system or abortion medication mailed to people in states with total abortion bans. While there are no comprehensive data on the number of self-managed medication abortions in the United States, evidence suggests they **have been increasing** in the past several years. Therefore, the total count of medication abortions nationally is higher than our count of those offered within the formal health care system.

¹ Unfortunately, gains in access to and use of medication abortion are at risk. The US Supreme Court will hear a case on March 26—*Alliance for Hippocratic Medicine v. FDA*—

and reinstate the requirement for the drug to be provided in person. If outdated and medically unnecessary restrictions are placed on the provision of mifepristone—in contrast with the FDA’s evidence-based protocol—access to abortion across the country would be greatly impacted.

Medication Abortion Has Become More Widely Available

For many people, medication abortion is more accessible than a procedural abortion. In 2021 (the most recent year with available data), 40% of facilities known to provide abortion care [offered only medication abortion](#). And, starting in 2021, the FDA lifted medically unnecessary restrictions that had required in-person provision of mifepristone. That [regulation change](#), which the FDA finalized in January 2023, meant that health care providers and online pharmacies could mail abortion medication to patients, including those who live far from a provider or are otherwise unable to make an in-person visit. In addition, brick-and-mortar pharmacies can now become certified to [dispense and fill mifepristone prescriptions](#), so access is expected to continue growing.

The number of US providers offering a telemedicine consultation—by video, phone call, text or online platform—and [mailing abortion pills increased](#) from 7% of all providers known to offer medication abortion in 2020 to 31% in 2022. Online-only clinics, after first appearing as a new type of abortion provider in 2021, accounted for [8% of all abortions](#) provided within the formal health care system in the first six months of 2023.

Medication abortion provided via telemedicine is as [safe and effective](#) as provision in a health care facility. Offering options besides in-person care can reduce, or even remove, some of the secondary costs related to seeking an abortion, such as transportation, child care and missed wages from taking time off work. Like with other types of health care, having the option to access abortion care via telemedicine allows for more flexibility and can expand [person-centered care](#) by meeting patients where they want to be served.

Not All People Prefer Medication Abortion Over Procedural Abortion

While broader access to medication abortion has likely contributed to its increased use, it does not necessarily indicate that all people are getting their preferred method.

Since the Supreme Court’s *Dobbs v. Jackson Women’s Health Organization* decision in June 2022 ended a right to abortion nationally, there has been an increase in patients at clinics in states where abortion continues to be available. Sixteen percent of abortion

banned. At the same time, abortion has also increased among residents in almost all of these bordering states. In some places, these developments have led to **wait times** of two weeks or longer for abortion care.

Some individuals may opt to access care through telehealth options to avoid long wait times for appointments, even if they would have preferred in-clinic care. Even at brick-and-mortar clinics, wait times may be shorter for medication abortion than procedural abortion since the pills can be offered by methods such as “**quick pick-up**.” Finally, for some patients, the closest abortion provider may only offer medication abortion, limiting their access to a procedural abortion unless they can travel to a clinic where it is offered.

When procedural abortion is harder to access relative to medication abortion, the impact of those restricted options falls hardest on groups of people historically marginalized within the health care system. For example, research suggests that Black individuals, people who have had a prior abortion and those with incomes below the federal poverty level are less likely than other groups **to prefer**, and **to have**, a medication abortion (vs. a procedural abortion).

State Restrictions on Use of Medication Abortion

Anti-abortion policymakers have been working to restrict access to abortion care on many fronts. Besides the 14 states that are **enforcing a total ban on abortion**, five states where abortion remains legal until at least six weeks’ gestation have laws that restrict access to medication abortion via telemedicine. Arizona, Nebraska, North Carolina, South Carolina and Wisconsin require that a patient being prescribed medication abortion have an in-person visit with a physician, and Arizona and North Carolina also ban mailing medication abortion pills to a patient. Furthermore, 15 states require medication abortion to be provided by a physician, despite evidence that advanced practice clinicians can provide it safely, as they do in other states.

It Is Critical to Ensure Full Access to Medication Abortion

Medication abortion has proven to be a game changer in expanding abortion care in the United States. Unfortunately, legal attacks and restrictive policies continue to challenge access. When the Supreme Court rules on the case challenging access to mifepristone this spring, it will have to decide whether to ignore the FDA and reimpose unnecessary

Any return to restrictions on medication abortion provision via telemedicine would be detrimental for people who either prefer or only have access to abortion using telemedicine. While the current court case only affects use of mifepristone—and a misoprostol-only regimen is also a [safe and effective method](#) of medication abortion—everyone seeking an abortion should have access to the full range of safe, effective options.

Methodology

Data on medication abortion for 2023 are from Guttmacher's [Monthly Abortion Provision Study](#), which produces national and state estimates of the number of abortions provided within the formal health care system in the United States based on data collected from samples of abortion providers. Questions about medication abortion were included in versions of the survey distributed to providers in August and September 2023 and in February 2024 (with the latter asking providers for annual medication abortion figures for 2023). Estimates include abortions provided at brick-and-mortar facilities (including those that use telehealth) and online-only providers. These estimates do not include abortions obtained outside of the formal health care sector or any abortions—whether self-managed or provided by out-of-state clinicians—involving medication mailed to states with total abortion bans.

KANSAS JAN 2023 - JUN 2024

Detailed estimates of clinician-provided abortions in Kansas

About the study

The Monthly Abortion Provision Study estimates the number of clinician-provided abortions that take place each month in each US state without a total ban. It collects data on procedural and medication abortions provided at brick-and-mortar health facilities (such as clinics or doctor's offices), as well as medication abortions provided via telehealth and virtual providers in the United States. Abortions are counted as having been provided in the state in which a patient had a procedure or where pills were dispensed.

In addition to **median estimates** for each month, we provide a **range (uncertainty interval)** that describes the precision of the estimates: A bigger range means that the estimate is more uncertain for a specific state and month, while a smaller range indicates that the estimate is more precise.

New State Abortion Data Indicate Widespread Travel for Care

What we're tracking

The Monthly Abortion Provision Study estimates the number of clinician-provided abortions provided in each US state without a total ban for each month since January 2023. It collects data on procedural and medication abortions provided at brick-and-mortar health facilities (such as clinics or doctor's offices), as well as medication abortions provided via telehealth and virtual providers in the United States. Abortions are counted as having been provided in the state in which a patient had a procedure or where pills were dispensed.

In addition to median estimates for each month, we provide a range (uncertainty interval) that describes the precision of the estimates: A bigger range means that the estimate is more uncertain for a specific state and month, while a smaller range indicates that the estimate is more precise.

To understand shifts in abortion provision over time, the study compares estimates from 2023 to 2020 data from [our most recent Abortion Provider Census](#), which gathers comprehensive data on US national and state-level abortion incidence and care.

Read more about Guttmacher's efforts to track abortion since *Roe v. Wade* was overturned

How do I interpret the uncertainty intervals?

Why is there uncertainty in these estimates?

Do these data reflect self-managed abortions?

Do these data reflect abortions provided under the protection of shield laws?

Why am I seeing different data now than when I checked this website last month?

Can I use these data for my own analysis?

How do I cite this work?

How we collect the data

The Monthly Abortion Provision Study leverages an innovative methodology—monthly collection of data from samples of abortion providers—to produce timely estimates of clinician-provided abortions in states without total abortion bans. The primary aim of the study's design is to meet the need for up-to-date data on the impact of rapidly changing state abortion policies, while minimizing the burden we place on providers. Estimates are generated by a statistical model that combines data collected from monthly samples of providers with historical data on the caseload of every provider in the United States; as more data is collected each month, estimates for past months become more precise.

How does the Monthly Abortion Provision Study differ from other Guttmacher efforts to measure abortion incidence?

How does the Monthly Abortion Provision Study differ from #WeCount?

Acknowledgments

The Guttmacher Institute is profoundly grateful to the staff at abortion-providing facilities who supplied data to this study—for their participation in this work, as well as for the care they provide to patients every day. The Institute is also grateful to the fielding team (Mariah Menanno, Lauren Mitchell, Aisiri Murulidhar and Cici Osias), who work tirelessly to collect and check the data on which this study relies.

The Monthly Abortion Provision Study is supported by the *Eunice Kennedy Shriver* National Institute of Child Health & Human Development, the Office of Research on Women's Health, and the Office of Behavioral and Social Sciences Research of the National Institutes of Health, under award number R61HD112921. The content is the sole responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health.

EXHIBIT 93

Medication Abortion State Laws and Policies Guttmacher Institute

Medication Abortion

Laws and regulations on mifepristone are rapidly changing across the United States since the District Court for the Northern District of Texas ordered the Food and Drug Administration in April to revoke its approval of mifepristone, one of two pills used in medication abortions, in *Alliance for Hippocratic Medicine v. US FDA*. As a result, some information here may be out of date. Our team is working diligently to update this resource. Thank you for your patience.

Medication abortion has been available in the United States since 2000, when the US Food and Drug Administration (FDA) approved the use of mifepristone for early abortion. Unlike procedural abortion, medication abortion does not have to be done in a clinical setting; the pills—mifepristone, followed by misoprostol—can be taken in one's own home. Decades of studies have shown that medication abortion is safe and effective. By 2020, medication abortion accounted for more than half of all abortions obtained in the United States, up from 39% in 2017.

In the wake of *Dobbs v. Jackson Women's Health Organization*, the US Supreme Court decision in June 2022 that overturned the federal constitutional right to abortion, states across the country have banned the procedure. Near-total or early gestational age bans in those states have restricted both procedural and medication abortion.

In January 2023, the FDA lifted restrictions that prevented patients from obtaining medication abortion pills from a retail pharmacy. Pharmacies must complete a certification form from the manufacturer to dispense the pills. Individuals cannot obtain the medication at a pharmacy in states that have a near-total abortion ban.

Many of the states that allow abortion have imposed unnecessary restrictions on medication abortion that only serve to increase barriers to care; almost half of those states limit its provision solely to physicians. This policy contradicts findings from the World Health Organization and other health and medical organizations that advanced practice clinicians, such as physician assistants and advanced practice nurses, can safely provide medication abortion. Currently, medication abortion is approved by the FDA for use up to 10 weeks of gestational age and it is used safely off-label at later gestations.

medication abortion despite clinical evidence that this practice is appropriate and safe. Other ways to limit access to medication abortion are requiring that the provider observe the patient taking the first dose and prohibiting a provider from mailing the medications to a patient. Allowing use of telehealth would expand access to medication abortion, particularly for patients in rural areas and in areas with few abortion providers.

Highlights

- 14 states have a near-total ban on abortion in effect (Alabama, Arkansas, Idaho, Indiana, Kentucky, Louisiana, Mississippi, Missouri, North Dakota, Oklahoma, South Dakota, Tennessee, Texas and West Virginia). All of these states have separate laws limiting the provision of medication abortion, although these are not currently applicable because providers have stopped offering all abortion care.
- 15 states restrict access to medication abortion.
 - 15 states require that medication abortion be provided by a physician.
 - 5 of these states require the patient to have an in-person visit with a physician.
 - 1 state requires that the first of the two-drug regimen for medication abortion be taken in the presence of a physician.
 - 1 state bans mailing pills for medication abortion to a patient.

Plaintiffs,)	
)	
v.)	
)	
U.S. FOOD AND DRUG)	
ADMINISTRATION, et al.)	
)	
Defendants.)	

SECOND DECLARATION OF JULIET CHARRON

I, Juliet Charron, hereby declare and swear as follows:

1. I am over 18 years of age, have personal knowledge of the matters set forth here, and am competent to make this declaration.
2. I currently work in the Idaho Department of Health and Welfare (DHW) as the Deputy Director for Medicaid & Behavioral Health.
3. In my role with DHW, I am familiar with the administration of the Idaho Medicaid program.
4. The statements in this declaration are based on my professional knowledge and experience.

Idaho Medicaid & Health claims data.

5. When a provider seeks coverage for medical services, it submits a claim to Idaho Medicaid.
6. The claims typically include information regarding services rendered, diagnosis

codes, and payment amounts.

7. In my role with DHW, I am familiar with Idaho Medicaid claim records, and in preparing this declaration, I've reviewed a subset of paid claim amounts for Calendar Years 2019 and 2022.

Idaho Medicaid covers abortion complications.

8. As a matter of State policy, Idaho Medicaid provides coverage for treatment and follow-up care at hospitals following abortion complications, including complications from abortifacients like Mifepristone.

9. Often, the cost to Idaho for providing such coverage is not quantified, or is difficult to identify, in the medical records due to a range of factors, such as coding variances and State resources spent administering such coverage.

10. Nonetheless, through a manual review of a subset of Idaho's Medicaid records for the Calendar Years 2022 and 2019, I have identified the below coverage costs to the State of Idaho provided for treatment and follow-up care at hospitals following abortion complications, including complications following abortions from Mifepristone.

11. In Calendar Year 2019, Idaho Medicaid expended at least \$10,086.47 total funds (\$3,025.94 state funds and \$7,060.53 federal funds) covering treatment and follow-up care for abortion medical complications. The abortion medical complications covered by State Medicaid dollars included emergency care after women took RU 486, sometimes also known as Mifepristone or Mifeprex.

12. In Calendar Year 2022, Idaho Medicaid expended at least \$12,658.05 in total funds (\$3,797.42 state funds and \$8,860.64 federal funds) covering treatment and follow-up care for abortion medical complications. The abortion medical complications covered by State Medicaid

dollars included emergency care after women took RU 486, sometimes also known as Mifepristone or Mifeprex. Some Idaho Medicaid patients presenting in emergency rooms with abortion medical complications in CY 2019 and 2022 reported that Planned Parenthood provided them with abortion pills.

Idaho Medicaid covers medical intervention needed following use of mifepristone.

13. Idaho Medicaid provides coverage for medical intervention needed resulting from a medication abortion, which sometimes includes Mifepristone's use.

14. For example, in Calendar Year 2022, Idaho Medicaid provided coverage for a woman presenting to the emergency room with bleeding following a failed medication abortion, reportedly provided by Planned Parenthood. The medical intervention that was required and that Idaho Medicaid covered was dilation & curettage.

Idaho and the Federal Government both spend money on Idaho Medicaid.

15. Idaho Medicaid is a federal/state partnership. Both Idaho and the federal government pay money to cover Idaho Medicaid claims. For instance, from July 2020 to June 2021 Idaho Medicaid expended \$3.24 billion on services for Medicaid participants. Of this amount, approximately \$2.27 billion was federal money.

Number of Idahoans on Idaho Medicaid

16. From July 2020 to June 2021 Idaho Medicaid average monthly enrollment was 379,954 participants.

17. During that time, Idaho Medicaid average monthly enrollment was 97,055 women between the ages of 14 and 45.

* * * * *

I declare that the foregoing is true and correct to the best of my knowledge, information and belief.

Executed on September 16, 2024.

Affidavit of Missouri Department of Health and Senior Services

Exhibit 39

DHSS Abortion Data Affidavit

THE STATE OF MISSOURI)
)ss.
COUNTY OF COLE)

AFFIDAVIT

Before me, the undersigned authority, personally appeared Christy Higgins, who being by me duly sworn, deposed as follows:

1. My name is Christy Higgins, I am of sound mind, capable of making this affidavit, and personally acquainted with the facts stated herein:
 2. I am the custodian of records of the Missouri Department of Health and Senior Services.
 3. Attached hereto are eight (8) pages of records from the Missouri Department of Health and Senior Services, consisting of:
 - Missouri Abortion Complication Reports, April 28, 2018 – Aug. 23, 2023 (1 page)
 - Graph D. Resident Abortion Ratios per 1,000 Live Births: Missouri, 1971-2021 (1 page)
 - Table 11. Resident Teen-Age Pregnancies and Abortions by Selected Ages by County of Residence: Missouri, 2021 (2 pages)
 - Table 12A. Resident Abortions by Race, Age, and Type of Procedure by Weeks of Gestation: Missouri, 2021 (1 page)
 - Table 12B: Recorded Abortions by Race, Age, and Type of Procedure by Weeks of Gestation: Missouri, 2021 (1 page)
 - Table 12C. Post-Abortion Complication Report: Missouri, 2021 (1 page)
 - Table 13: Resident Abortions by Age, Marital Status, and Education by Race and Hispanic Origin: Missouri, 2021 (1 page)
 4. These eight (8) pages of records are kept by the Missouri Department of Health and Senior Services in the regular course of business, and it was the regular course of business of the Missouri Department of Health and Senior Services for an employee or representative of the Missouri Department of Health and Senior Services with knowledge of the act, event, condition, opinion, or diagnosis recorded to make the record or to transmit information thereof to be included in such record; and the record was made at or near the time of the act, event, opinion, or diagnosis. The records attached hereto are the original or exact duplicates of the original.
- I declare under penalty of perjury that the foregoing is true and correct.

Affiant, Christy Higgins, Custodian of Records

In witness whereof I have hereunto subscribed by name and affixed by official seal this.
Subscribed and affirmed before me this 1st day of November, 2023.

EXHIBIT 96

Declaration of Lora Brown

DECLARATION OF LORA BROWN

1. I am over 18 years of age, have personal knowledge of the matters set forth here, and am competent to make this declaration.

2. I work for the Missouri Department of Social Services (DSS) as the Research Data Analysis Manager. I have worked for DSS for over thirty years.

3. As part of my position with DSS, I am familiar with the DSS's data for purposes of producing data reports for DSS, for federal agencies, and for external requesters.

4. The statements in this declaration are based on my professional knowledge and experience.

5. Some data reports are made available publically through the Department of Social Services website at <https://dss.mo.gov/mis/cqfacts/>. The information contained on DSS's website is normally pulled by me or a member of the DSS Research Data team. Per data published at <https://dss.mo.gov/mis/cqfacts/>, between July 2020 and June 2021, an average of 1,030,053 Missourians were enrolled for MO HealthNet Services at the end of each month.¹

6. Per data reported as of October 31, 2023, 398,945 women between the ages of 14 and 45 were eligible² for MO HealthNet services.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on November 3, 2023

/s/ Lora K. Brown

¹ <https://dss.mo.gov/mis/cqfacts/>

² Eligibility for Medicaid services indicates that an individual meets eligibility criteria for a Medicaid program. Enrollment in Medicaid is contingent upon payment of a premium or spend down for certain eligibility categories.

*Statistically significant ($p \leq 0.05$). Notes: All counts are rounded to the nearest thousand. "Other" category includes those covered by the military or Veterans Administration as well as nonelderly Medicare enrollees. Low-income=those in families with incomes below the federal poverty level (\$21,330 for a family of three in 2019). Data include some information on undocumented immigrants, although that information is generally acknowledged to be a considerable undercount.

POLICY ANALYSIS

The proportion of women of reproductive age (15–44) who were uninsured dropped by 41% between 2013 and 2016, over the first three years of the Affordable Care Act's (ACA) major expansions to Medicaid and private insurance coverage. This considerable decline in the uninsured rate, calculated by the Guttmacher Institute using data from the U.S. Census Bureau's American Community Survey, mirrors broader national insurance trends, and was particularly pronounced in states that had expanded Medicaid under the ACA. These gains are now endangered, as conservatives in the Trump administration and Congress are determined to repeal the ACA and slash investments in affordable insurance coverage.

Guttmacher Policy Review

INFOGRAPHIC

Overall, the proportion of reproductive-age women without health insurance fell from about 20% (12.5 million women) in 2013 to 12% (7.4 million) in 2016. The change was driven by substantial gains in both Medicaid coverage and private insurance. Medicaid, the federal-state health insurance plan for low-income individuals and families, covered 21% of reproductive-age women in 2016 (13.2 million).

Women of reproductive age have benefited greatly from the Affordable Care Act

Medicaid, Reproductive Health in Crisis

Gains in insurance coverage among reproductive-age women who live below the poverty line were substantial as well, with a 37% drop in the proportion who were uninsured and a 20% increase in the proportion covered by Medicaid. That program covered about half of women aged 15–44 with incomes at or below the federal poverty level in 2016. Despite these overall improvements, women of reproductive age who live in poverty were almost twice as likely to be uninsured in 2016 as reproductive-age women overall.

Other disparities in coverage also persist. Hispanic women of reproductive age were far more likely than white or black women to be uninsured in 2016. Similarly, immigrant women of reproductive age who are not citizens had close to four times the uninsured rate of U.S.-born women in 2016. That gap grew wider between 2013 and 2016, likely because many immigrants are barred from eligibility for subsidized private coverage under the ACA and for Medicaid coverage. In fact, nearly half of noncitizen immigrant women aged 15–44 living at or below the poverty level remained uninsured in 2016.

At the state level, improvements in insurance coverage across the country are tied to the ACA's coverage expansions, particularly the major Medicaid expansion now adopted by 32 states and the District of Columbia. The uninsured rate declined significantly in almost every state in the country between 2013 and 2016. Collectively, states that implemented the ACA's Medicaid expansion experienced steeper declines than nonexpansion states and had one-half the uninsured rate in 2016 (8% vs. 17%).

The Affordable Care Act has led to nationwide gains in insurance coverage for women of reproductive age

*Indicates a statistically significant change from 2013 to 2016. Note: Column percentages do not sum to 100 due to exclusion of the "other" insurance category.

These gains in insurance coverage have major implications for access to health care in general and to sexual and reproductive health care in particular. That is because **Medicaid** and **private insurance** include robust coverage for many sexual and reproductive health care services, including family planning services and supplies and maternity care. In fact, Medicaid accounts for three-quarters of all public dollars spent on family planning in the United States and covers half of all U.S. births.

Alarming, conservatives in Congress spent much of 2017 trying to dismantle the ACA and reverse these gains in coverage. Although their full-scale repeal attempts have so far failed, Congress has repealed key pieces of the ACA, including the requirement that individuals maintain health coverage or else pay a tax penalty (a provision designed to stabilize the private insurance market and tamp down premiums).

The Trump administration has also worked on multiple fronts to undermine the ACA broadly and reproductive health coverage in particular, including by granting **sweeping new authority** for employers and universities to deny contraceptive coverage for employees, dependents and students. The administration is also working to reshape Medicaid in ways that would undermine its role as basic health insurance coverage, such as by establishing **work requirements** for many potential enrollees. Meanwhile, Congress and the Trump administration have also **repeatedly attacked** many of the safety-net family planning providers that both insured and uninsured people rely on for their care, and that will be needed even more if gains in insurance coverage are reversed.

State policymakers have the power to mitigate some of the potential damage and even to expand coverage for reproductive health services. For example, **nine states** over the past few years have adopted new requirements for private insurance plans to cover contraceptive methods and services without patient out-of-pocket costs—a move that mirrors the federal contraceptive coverage guarantee and **protects against a rollback** by the Trump administration. Similarly, states could protect against potential Trump administration actions to undermine Medicaid's coverage of reproductive health care by **establishing strong state-level coverage protections**.

Even with these positive actions taken in some states, members of Congress who recognize the value of health coverage overall and reproductive health coverage

specifically must continue to fight attempts to repeal or otherwise undermine the ACA and Medicaid. Health insurance coverage—provided by both private plans and publicly funded programs—is critical to enabling women to avoid unwanted childbearing and have healthy pregnancies and births when they so desire, and to addressing persistent reproductive health disparities in the United States.

Costs of Emergency Department Visits in the United States, 2017

STATISTICAL BRIEF #268 December 2020

Brian J. Moore, Ph.D., and Lan Liang, Ph.D.

Introduction

Emergency department (ED) visits have grown in the United States, with the rate of increase from 1996 to 2013 exceeding that for hospital inpatient care.¹ In 2017, 13.3 percent of the U.S. population incurred at least one expense for an ED visit.² Furthermore, more than 50 percent of hospital inpatient stays in 2017 included evidence of ED services prior to admission.³ Trends in ED volume vary significantly by patient and hospital characteristics, but an examination of nationwide costs by these characteristics has not yet been explored in the literature.⁴

This Healthcare Cost and Utilization Project (HCUP) Statistical Brief presents statistics on the cost of ED visits in the United States using the 2017 Nationwide Emergency Department Sample (NEDS). Total ED charges were converted to costs using HCUP Cost-to-Charge Ratios based on hospital accounting reports from the Centers for Medicare & Medicaid Services (CMS). ED visits include patients treated and released from the ED, as well as those admitted to the same hospital through the ED. Aggregate costs, average costs, and number of ED visits are presented by patient and hospital characteristics. Because of the large sample size of the NEDS data, small differences can be statistically significant. Thus, only percentage differences greater than or equal to 10 percent are discussed in the text.

Findings

Aggregate costs for emergency department (ED) visits by patient sex and age group, 2017

Figure 1 presents aggregate ED visit costs by patient sex and age group in 2017 as well as number of ED visits. Estimates of aggregate cost use the product of the number of cases and the average estimated cost per visit to account for records with missing ED charge information. Aggregate cost decompositions among different descriptive statistics or using multiple levels of aggregation in a single computation could lead to slightly different total cost estimates due to the use of slightly different and more specific estimates of the missing information.

Highlights

- There were 144.8 million total emergency department (ED) visits in 2017 with aggregate ED costs totaling \$76.3 billion (B).
- Aggregate ED costs were higher for females (\$42.6B, 56 percent) than males (\$33.7B, 44 percent); 55 percent of total ED visits were for females.
- Average cost per ED visit increased with age, from \$290 for patients aged 17 years and younger to \$690 for patients aged 65 years and older.
- As community-level income increased, shares of aggregate ED costs decreased and average cost per visit increased.
- In rural areas, one half of ED visit costs were for patients from the lowest income communities.
- The expected payer with the largest share of aggregate costs was private insurance in large metropolitan areas (31.4 percent of \$39.5B) and Medicare in micropolitan (34.0 percent of \$7.6B) and rural (37.3 percent of \$5.5B) areas.
- Patients aged 18-44 years represented the largest share of aggregate ED costs in large metropolitan, small metropolitan, and micropolitan areas (36.4, 34.2, 32.5 percent, respectively). Patients aged 65 years and older represented the largest share of aggregate ED costs in rural areas (32.5 percent).

Figure 1. Aggregate ED visit costs by patient sex and age, 2017

Abbreviation: ED, emergency department

Notes: Statistics for ED visits with missing or invalid patient characteristics are not presented. Patient age and sex were each missing for <0.1% of ED visits. About 13% of all ED visits (weighted) in the 2017 NEDS are missing information about ED charges, from which costs are estimated.

Source: Agency for Healthcare Research and Quality (AHRQ), Healthcare Cost and Utilization Project (HCUP), Nationwide Emergency Department Sample (NEDS), 2017

Bar chart that shows the aggregate ED visit costs and the number of ED visits by patient sex and age group in 2017. All ED visits: \$33.7 billion (64.6 million visits) for males; \$42.6 billion (80.2 million visits) for females. 0-17 years: \$4.0 billion (13.8 million visits) for males; \$3.8 billion (13.0 million visits) for females. 18-44 years: \$10.7 billion (21.7 million visits) for males; \$15.9 billion (32.3 million visits) for females. 45-64 years: \$10.4 billion (16.5 million visits) for males; \$11.4 billion (18.3 million visits) for females. 65+ years: \$8.6 billion (12.6 million visits) for males; \$11.5 billion (16.7 million visits) for females.

• **Aggregate ED visit costs in 2017 were higher overall for females than for males.**

Of the \$76.3 billion in aggregate ED visit costs in 2017, females accounted for \$42.6 billion (55.9 percent) and males accounted for \$33.7 billion (44.1 percent). This cost differential was largely driven by a difference in ED visit volume, with females having a larger number of ED visits than males (80.2 vs. 64.6 million visits, or 55.4 vs. 44.6 percent of visits). Females had higher aggregate ED visit costs and more ED visits for all age groups except children. The discrepancy was highest for patients aged 18-44 years, with aggregate ED visit costs for females approximately 50 percent higher than costs for males (\$15.9 vs. \$10.7 billion), followed by patients aged 65 years and older, for which aggregate ED visit costs were approximately one-third higher for females than for males (\$11.5 vs. \$8.6 billion).

Costs of ED visits by patient characteristics, 2017

Table 1 presents the aggregate and average costs for ED visits, the number of ED visits, and the distributions of costs and visits, by select patient characteristics in 2017.

Table 1. Aggregate costs, average costs, and number of ED visits by patient characteristics, 2017

- **In 2017, aggregate ED visit costs totaled \$76.3 billion across 144.8 million ED visits, with an average cost per visit of \$530.**

Aggregate ED visit costs totaled \$76.3 billion in the United States in 2017, encompassing 144.8 million ED visits with an average cost per visit of \$530.

Routine discharge was the most frequent disposition from the ED, representing 80.8 percent of aggregate ED costs and a similar share of ED visits. Transfers represented 6.2 percent of aggregate ED costs but just 3.0 percent of ED visit volume because they had the highest average cost of any discharge disposition at \$1,100 per ED visit. In contrast, ED visits resulting in an inpatient admission to the same hospital had the lowest average cost of any discharge disposition at \$360 per ED visit and represented 9.4 percent of aggregate ED costs and 14.0 percent of ED visits.

- **The share of aggregate ED visit costs attributed to patients aged 65 years and older was higher than the share of ED visits for this group, and the average cost per visit was highest among patients aged 65 years and older.**

Aggregate ED visit costs among patients aged 65 years and older totaled \$20.2 billion (26.4 percent of the \$76.3 billion total for the entire United States in 2017) despite just 29.2 million ED visits from patients in this age group (20.2 percent of the 144.8 million total). Conversely, the share of aggregate ED costs attributed to patients aged 17 years and younger was substantially lower than this group's corresponding share of ED visits (10.3 percent of ED costs vs. 18.5 percent of ED visits). This differential is due in part to the difference in average cost per visit, which increased with age. The average cost per visit among patients aged 65 years and older was more than twice as high as average costs among patients aged 17 years and younger (\$690 vs. \$290 per visit).

- **Medicaid as the primary expected payer had the lowest average cost per ED visit, more than 50 percent lower than average costs for Medicare and one-third lower than for private insurance.**

Medicaid as the primary expected payer had an average cost per ED visit that was more than 50 percent lower than average costs per visit for Medicare (\$420 vs. \$660 per visit) and one-third lower than average costs for private insurance (\$420 vs. \$560 per visit). Due in part to these differences in average costs by expected payer, Medicare represented 30.1 percent of aggregate ED visit costs but 24.1 percent of total ED visits. In contrast, Medicaid represented 25.0 percent of ED costs but 31.5 percent of ED visits.

- **As community-level income increased, the share of aggregate ED visit costs decreased and average cost per ED visit increased.**

The share of ED visit costs and ED visits decreased as community-level income increased. Patients residing in communities with the lowest income (quartile 1) represented roughly one-third of aggregate ED visit costs and ED visits (31.4 and 34.3 percent, respectively). Patients residing in quartiles 2 and 3 represented approximately one-fourth and one-fifth of aggregate ED visit costs and ED visits, respectively. Patients residing in communities with the highest income (quartile 4) represented less than one-fifth of aggregate ED costs and ED visits (18.1 and 16.0 percent, respectively).

In contrast, average cost per ED visit increased as community-level income increased, ranging from \$480 in communities with the lowest income (quartile 1) to \$600 in communities with the highest income (quartile 4).

- **The share of aggregate ED visit costs was highest among patients residing in large metropolitan areas.**

Aggregate ED visit costs for large metropolitan areas totaled \$39.5 billion in 2017, more than half of the \$76.3 billion in ED costs for the entire United States. The share of aggregate ED costs in large metropolitan areas was analogous to the overall distribution of ED visits in these areas: 51.8 percent of aggregate ED costs and 50.4 percent of ED visits.

Distribution of aggregate ED visit costs for location of patient residence by patient characteristics, 2017

Figures 2-4 present the distribution of aggregate costs for ED visits based on the location of the patient's residence by age (Figure 2), community-level income (Figure 3), and primary expected payer (Figure 4).

Figure 2 presents the distribution of aggregate costs for ED visits by patient age based on the location of the patient's residence in 2017.

Figure 2. Aggregate ED visit costs by age and patient location, 2017

Abbreviations: B, billion; ED, emergency department; M, million

Notes: Statistics for ED visits with missing or invalid patient characteristics are not presented. Patient age and patient location were missing for <0.1% and 0.5% of ED visits, respectively.

Source: Agency for Healthcare Research and Quality (AHRQ), Healthcare Cost and Utilization Project (HCUP), Nationwide Emergency Department Sample (NEDS), 2017

Bar chart that shows the distribution of aggregate costs for ED visits by patient age and location of the patient's residence in 2017. Large metropolitan (N=73.1 million visits, \$39.5 billion): 0-17 years: 10.0%; 18-44 years: 36.4%; 45-64 years: 29.0%; 65+ years: 24.7%. Small metropolitan (N=46.2 million visits, \$23.3 billion): 0-17 years: 11.1%; 18-44 years: 34.2%; 45-64 years: 27.8%; 65+ years: 26.9%. Micropolitan (N=15.0 million visits, \$7.6 billion): 0-17 years: 10.0%; 18-44 years: 32.5%; 45-64 years: 28.2%; 65+ years: 29.2%. Rural (N=9.8 million visits, \$5.5 billion): 0-17 years: 9.9%; 18-44 years: 29.8%; 45-64 years: 27.8%; 65+ years: 32.5%.

- **Patients aged 18-44 years represented the largest share of aggregate ED visit costs in all locations except rural areas where patients aged 65 years and older represented the largest share.**

Compared with other age groups, patients aged 18-44 years represented the largest share of aggregate ED visit costs in large metropolitan areas in 2017 (36.4 percent). The share of ED costs attributed to patients aged 18-44 years also was larger than for other age groups in small metropolitan and micropolitan areas (34.2 and 32.5 percent, respectively). Overall, the share of ED costs attributed to patients aged 18-44 years decreased as urbanization decreased, from 36.4 percent in large metropolitan areas to 29.8 percent in rural areas.

In rural areas, patients aged 65 years and older accounted for the largest share of aggregate ED visit costs (32.5 percent) compared with other age groups. The share of ED costs attributed to patients aged 65 years and older increased as urbanization decreased, from 24.7 percent in large metropolitan areas to 32.5 percent in rural areas.

The share of aggregate ED visit costs attributed to patients aged 45-64 years and those aged 17 years and younger were similar across all patient locations (approximately 28 and 10 percent, respectively).

Figure 3 presents the distribution of aggregate costs for ED visits by quartile of community-level household income in the patient's ZIP Code based on the location of the patient's residence in 2017.

Figure 3. Aggregate ED visit costs by community-level income and location of patient's residence, 2017

Abbreviations: B, billion; ED, emergency department; M, million

Notes: Statistics for ED visits with missing or invalid patient characteristics are not presented. Community-level income and patient location were missing for 1.7% and 0.5% of ED visits, respectively. Household income quartiles are defined by the ZIP Code of the patient's residence.

Source: Agency for Healthcare Research and Quality (AHRQ), Healthcare Cost and Utilization Project (HCUP), Nationwide Emergency Department Sample (NEDS), 2017

Bar chart that shows the distribution of aggregate costs for ED visits by community-level household income quartile and the location of the patient's residence in 2017. Large metropolitan (N=73.1 million visits, \$39.5 billion): quartile 1: 26.6%; quartile 2: 20.2%; quartile 3: 24.4%; quartile 4: 28.1%. Small metropolitan (N=46.2 million visits, \$23.3 billion): quartile 1: 33.1%; quartile 2: 29.8%; quartile 3: 25.3%; quartile 4: 10.3%. Micropolitan (N=15.0 million visits, \$7.6 billion): quartile 1: 39.7%; quartile 2: 41.6%; quartile 3: 14.0%; quartile 4: 2.6%. Rural (N=9.8 million visits, \$5.5 billion): quartile 1: 48.8%; quartile 2: 37.5%; quartile 3: 10.6%; quartile 4: 1.2%.

- **In large metropolitan areas, patients residing in communities with the highest and lowest incomes represented the largest shares of aggregate ED visit costs. For other locations, patients in communities with lower incomes represented the largest share of ED costs.**

Patients residing in communities with the highest and lowest incomes (quartiles 4 and 1) accounted for 28.1 and 26.6 percent, respectively, of the \$39.5 billion in aggregate ED visit costs in large metropolitan areas in 2017. In contrast, patients residing in communities with the two lowest income quartiles represented the largest share of ED costs for other patient locations (small metropolitan, micropolitan, and rural).

- **As urbanization decreased, the share of aggregate ED visit costs for patients in the lowest income quartile increased and the share for those in the highest income quartile decreased.**

The share of aggregate ED visit costs attributed to patients residing in communities in the lowest income quartile (quartile 1) increased as urbanization decreased, from 26.6 percent in large metropolitan areas to 48.8 percent in rural areas. In contrast, the share of ED visit costs attributed to patients residing in communities in the highest income quartile (quartile 4) decreased as urbanization decreased, from 28.1 percent in large metropolitan areas to 1.2 percent in rural areas.

Figure 4 presents the distribution of aggregate costs for ED visits by primary expected payer based on the location of the patient's residence in 2017.

Figure 4. Aggregate ED visit costs by primary expected payer and patient location, 2017

Abbreviations: B, billion; ED, emergency department; M, million

Notes: Statistics for ED visits with missing or invalid patient characteristics are not presented. Expected payer and patient location were missing for 0.3% and 0.5% of ED visits, respectively.

* Self-pay/No charge: includes self-pay, no charge, charity, and no expected payment.

Source: Agency for Healthcare Research and Quality (AHRQ), Healthcare Cost and Utilization Project (HCUP), Nationwide Emergency Department Sample (NEDS), 2017

Bar chart that shows the distribution of aggregate costs for ED visits by primary expected payer and the location of the patient's residence in 2017. Large metropolitan (N=73.1 million visits, \$39.5 billion): Medicare: 28.0%; Medicaid: 25.7%; private insurance: 31.4%; self-pay/no charge: 11.4%; other: 3.4%. Small metropolitan (N=46.2 million visits, \$23.3 billion): Medicare: 30.9%; Medicaid: 25.4%; private insurance: 29.9%; self-pay/no charge: 9.7%; other: 4.0%. Micropolitan (N=15.0 million visits, \$7.6 billion): Medicare: 34.0%; Medicaid: 23.9%; private insurance: 28.3%; self-pay/no charge: 9.1%; other: 3.7%. Rural (N=9.8 million visits, \$5.5 billion): Medicare: 37.3%; Medicaid: 20.8%; private insurance: 27.9%; self-pay/no charge: 8.9%; other: 4.0%.

- **Private insurance as the primary expected payer accounted for the largest share of aggregate ED visit costs among patients living in large metropolitan areas. Medicare represented the largest share of ED costs in micropolitan and rural areas.**

Compared with other primary expected payers, private insurance represented the largest share of aggregate ED visit costs among those living in large metropolitan areas in 2017 (31.4 percent). The share of ED costs attributed to private insurance decreased as urbanization decreased, from 31.4 percent in large metropolitan areas to 27.9 percent in rural areas.

More than one-third of ED visit costs were attributed to Medicare as the primary expected payer in micropolitan and rural areas. The share of ED costs attributed to Medicare increased as urbanization decreased, from 28.0 percent in large metropolitan areas to 37.3 percent in rural areas.

Costs of ED visits by hospital characteristics, 2017

Table 2 presents the aggregate and average costs for ED visits, the number of ED visits, and the distributions of costs and visits, by select hospital characteristics in 2017.

Table 2. Aggregate costs, average costs, and number of ED visits by hospital characteristics, 2017					
Hospital characteristic	Aggregate costs		Average cost per visit, \$	ED visits	
	\$, billion	%		N, million	%
Total	76.3	100.0	530	144.8	100.0
Region					
Northeast	14.4	18.8	550	26.2	18.1
Midwest	18.5	24.3	560	33.2	22.9
South	27.5	36.1	480	57.9	40.0
West*	18.0	23.5	650	27.6	19.0
Ownership					
Private, for-profit	8.8	11.5	420	21.2	14.6
Private, nonprofit	55.0	72.0	540	100.9	69.6
Public	12.5	16.4	550	22.8	15.7
Teaching status					
Nonteaching	27.4	36.0	510	54.2	37.4
Teaching	48.9	64.1	540	90.6	62.6
Trauma level designation					

Trauma center level I	13.9	18.3	600	23.2	16.0
Trauma center level II	12.0	15.7	520	23.2	16.0
Trauma center level III	10.2	13.4	530	19.3	13.3
Not a trauma center	40.0	52.5	510	79.2	54.7
<p>Abbreviation: ED, emergency department</p> <p>* In 2017, about 13% of all ED visits (weighted) in the NEDS are missing information about ED charges; therefore, ED cost cannot be estimated. The missing information is concentrated in the West, where 58.9% of ED visits (weighted) are missing ED charges.</p> <p>Source: Agency for Healthcare Research and Quality (AHRQ), Healthcare Cost and Utilization Project (HCUP), Nationwide Emergency Department Sample (NEDS), 2017</p>					

• **Aggregate ED visit costs were highest for hospitals located in the South in 2017.**

Aggregate ED visit costs in the South were \$27.5 billion in 2017 (36.1 percent of the total \$76.3 billion for the United States). The share of ED visit volume for the South was even larger (40.0 percent of the 144.8 million total visits).

The distribution of aggregate ED visit costs across other hospital characteristics largely followed the pattern of the number of ED visits. Aggregate ED costs were highest in private, nonprofit hospitals; teaching hospitals; and hospitals not designated as a trauma center (72.0, 64.1, and 52.5 percent of ED costs, respectively).

ED visits at private, for-profit hospitals had lower average costs per visit than did visits at either private, nonprofit or public hospitals (\$420 vs. \$540 and \$550 per visit).

About Statistical Briefs

Healthcare Cost and Utilization Project (HCUP) Statistical Briefs provide basic descriptive statistics on a variety of topics using HCUP administrative healthcare data. Topics include hospital inpatient, ambulatory surgery, and emergency department use and costs, quality of care, access to care, medical conditions, procedures, and patient populations, among other topics. The reports are intended to generate hypotheses that can be further explored in other research; the reports are not designed to answer in-depth research questions using multivariate methods.

Data Source

The estimates in this Statistical Brief are based upon data from the HCUP 2017 Nationwide Emergency Department Sample (NEDS).

Definitions

Types of hospitals included in the HCUP Nationwide Emergency Department Sample

The Nationwide Emergency Department Sample (NEDS) is based on emergency department (ED) data from community acute care hospitals, which are defined as short-term, non-Federal, general, and other specialty hospitals available to the public. Included among community hospitals are pediatric institutions and hospitals that are part of academic medical centers. Excluded are long-term care facilities such as rehabilitation, psychiatric, and alcoholism and chemical dependency hospitals. Hospitals included in the NEDS have EDs, and no more than 90 percent of their ED visits result in admission.

Unit of analysis

The unit of analysis is the ED visit, not a person or patient. This means that a person who is seen in the ED multiple times in 1 year will be counted each time as a separate visit in the ED.

Costs and charges

Total ED charges were converted to costs using HCUP Cost-to-Charge Ratios based on hospital accounting reports from the Centers for Medicare & Medicaid Services (CMS).^a Costs reflect the actual expenses incurred in the production of hospital services, such as wages, supplies, and utility costs; charges represent the amount a hospital billed for the case. For each hospital, a cost-to-charge ratio constructed specifically for the hospital ED is used. Hospital charges reflect the amount the hospital billed for the entire ED visit and do not include professional (physician) fees.

Total charges were not available on all NEDS records. About 13 percent of all ED visits (weighted) in the 2017 NEDS were missing information about ED charges, and therefore, ED cost could not be estimated. For ED visits that resulted in admission, 24 percent of records were missing ED charges. For ED visits that did not result in admission, 11 percent of records were missing ED charges. The missing information was concentrated in the West (59 percent of records missing ED charges). For this Statistical Brief, the methodology used for aggregate cost estimation was analogous to what is recommended for the estimation of aggregate charges in the Introduction to the HCUP NEDS documentation.^b Aggregate costs were estimated as the product of number of visits and average cost per visit in each reporting category. If a stay was missing total charges, average cost was imputed using the average cost for other stays with the same combination of payer characteristics. Therefore, a comparison of aggregate cost estimates across different tables, figures, or characteristics may result in slight discrepancies.

How HCUP estimates of costs differ from National Health Expenditure Accounts

There are a number of differences between the costs cited in this Statistical Brief and spending as measured in the National Health Expenditure Accounts (NHEA), which are produced annually by CMS.^c The largest source of difference comes from the HCUP coverage of ED treatment only in contrast to the NHEA inclusion of inpatient and other outpatient costs associated with other hospital-based outpatient clinics and departments as well. The outpatient portion of hospitals' activities has been growing steadily and may exceed half of all hospital revenue in recent years. On the basis of the American Hospital Association Annual Survey, 2017 outpatient gross revenues (or charges) were about 49 percent of total hospital gross revenues.^d

Smaller sources of differences come from the inclusion in the NHEA of hospitals that are excluded from HCUP. These include Federal hospitals (Department of Defense, Veterans Administration, Indian Health Services, and Department of Justice [prison] hospitals) as well as psychiatric, substance abuse, and long-term care hospitals. A third source of difference lies in the HCUP reliance on billed charges from hospitals to payers, adjusted to provide estimates of costs using hospital-wide cost-to-charge ratios, in contrast to the NHEA measurement of spending or revenue. HCUP costs estimate the amount of money required to produce hospital services, including expenses for wages, salaries, and benefits paid to staff as well as utilities, maintenance, and other similar expenses required to run a hospital. NHEA spending or revenue measures the amount of income received by the hospital for treatment and other services provided, including payments by insurers, patients, or government programs. The difference between revenues and costs includes profit for for-profit hospitals or surpluses for nonprofit hospitals.

Location of patients' residence

Place of residence is based on the urban-rural classification scheme for U.S. counties developed by the National Center for Health Statistics (NCHS) and based on the Office of Management and Budget (OMB) definition of a metropolitan service area as including a city and a population of at least 50,000 residents. For this Statistical Brief, we collapsed the NCHS categories into four groups according to the following:

Large Metropolitan:

- Large Central Metropolitan: Counties in a metropolitan area with 1 million or more residents that satisfy at least one of the following criteria: (1) containing the entire population of the largest principal city of the metropolitan statistical area (MSA), (2) having their entire population contained within the largest principal city of the MSA, or (3) containing at least 250,000 residents of any principal city in the MSA
- Large Fringe Metropolitan: Counties in a metropolitan area with 1 million or more residents that do not qualify as large central metropolitan counties

Small Metropolitan:

- Medium Metropolitan: Counties in a metropolitan area of 250,000-999,999 residents
- Small Metropolitan: Counties in a metropolitan area of 50,000-249,999 residents

Micropolitan:

- Micropolitan: Counties in a nonmetropolitan area of 10,000-49,999 residents

- Noncore: Counties in a nonmetropolitan and nonmicropolitan area

Community-level income

Community-level income is based on the median household income of the patient's ZIP Code of residence. Quartiles are defined so that the total U.S. population is evenly distributed. Cut-offs for the quartiles are determined annually using ZIP Code demographic data obtained from Claritas, a vendor that produces population estimates and projections based on data from the U.S. Census Bureau.^e The value ranges for the income quartiles vary by year. The income quartile is missing for patients who are homeless or foreign.

Expected payer

To make coding uniform across all HCUP data sources, the primary expected payer for the ED visit combines detailed categories into general groups:

- Medicare: includes fee-for-service and managed care Medicare
- Medicaid: includes fee-for-service and managed care Medicaid
- Private insurance: includes commercial nongovernmental payers, regardless of the type of plan (e.g., private health maintenance organizations [HMOs], preferred provider organizations [PPOs])
- Self-pay/No charge: includes self-pay, no charge, charity, and no expected payment
- Other payers: includes other Federal and local government programs (e.g., TRICARE, CHAMPVA, Indian Health Service, Black Lung, Title V) and Workers' Compensation

ED visits that were expected to be billed to the State Children's Health Insurance Program (SCHIP) are included under Medicaid.

Region

Region is one of the four regions defined by the U.S. Census Bureau:

- Northeast: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania
- Midwest: Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas
- South: Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas
- West: Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, and Hawaii

Discharge status

Discharge status reflects the disposition of the patient at discharge from the ED and includes the following categories reported in this Statistical Brief: routine (to home); admitted as an inpatient to the same hospital; transfers (transfer to another short-term hospital; other transfers including skilled nursing facility, intermediate care, and another type of facility such as a nursing home); and all other dispositions (home healthcare; against medical advice [AMA]; died in the ED; or destination unknown).

Hospital characteristics

Data on hospital ownership and status as a teaching hospital was obtained from the American Hospital Association (AHA) Annual Survey of Hospitals. Hospital ownership/control includes categories for government nonfederal (public), private not-for-profit (voluntary), and private investor-owned (proprietary). Teaching hospital is defined as having a residency program approved by the American Medical Association, being a member of the Council of Teaching Hospitals, or having a ratio of full-time equivalent interns and residents to beds of 0.25 or higher.

Hospital trauma level

Trauma designation for trauma centers treating adults and children were identified through the Trauma Information Exchange Program (TIEP) database, a national inventory of trauma centers in the United States.^f A trauma center is a hospital that is equipped to provide comprehensive emergency medical services 24 hours a day, 365 days per year to patients with traumatic injuries. In 1976, the American College of Surgeons Committee on Trauma (ACS/COT) defined five levels of trauma centers:^g

- Level I centers have comprehensive resources, are able to care for the most severely injured, and provide leadership in education and research.
- Level II centers have comprehensive resources and are able to care for the most severely injured, but do not provide leadership in education and research.
- Level III centers provide prompt assessment and resuscitation, emergency surgery, and, if needed, transfer to a level I or II center.
- Level IV/V centers provide trauma support in remote areas in which no higher level of care is available. These centers resuscitate and stabilize patients and arrange transfer to an appropriate trauma facility.

For this Statistical Brief, trauma hospitals were defined as those classified by the ASC/COT as a level I, II, or III trauma center. This is consistent with the classification of trauma centers used in the NEDS. The ACS/COT has a program that verifies hospitals as trauma level I, II, or III.^h It is important to note that although all level I, II, and III trauma centers offer a high level of trauma care, there may be differences in the specific services and resources offered by hospitals of different levels. Trauma levels IV and V are designated at the State level (and not by ACS/COT) with varying criteria applied across States.

About HCUP

The Healthcare Cost and Utilization Project (HCUP, pronounced "H-Cup") is a family of healthcare databases and related software tools and products developed through a Federal-State-Industry partnership and sponsored by the Agency for Healthcare Research and Quality (AHRQ). HCUP databases bring together the data collection efforts of State data organizations, hospital associations, and private data organizations (HCUP Partners) and the Federal government to create a national information resource of encounter-level healthcare data. HCUP includes the largest collection of longitudinal hospital care data in the United States, with all-payer, encounter-level information beginning in 1988. These databases enable research on a broad range of health policy issues, including cost and quality of health services, medical practice patterns, access to healthcare programs, and outcomes of treatments at the national, State, and local market levels.

HCUP would not be possible without the contributions of the following data collection Partners from across the United States:

Alaska Department of Health and Social Services
Alaska State Hospital and Nursing Home Association
Arizona Department of Health Services
Arkansas Department of Health
California Office of Statewide Health Planning and Development
Colorado Hospital Association
Connecticut Hospital Association
Delaware Division of Public Health
District of Columbia Hospital Association
Florida Agency for Health Care Administration
Georgia Hospital Association
Hawaii Laulima Data Alliance
Hawaii University of Hawai'i at Hilo
Illinois Department of Public Health
Indiana Hospital Association
Iowa Hospital Association
Kansas Hospital Association
Kentucky Cabinet for Health and Family Services
Louisiana Department of Health
Maine Health Data Organization
Maryland Health Services Cost Review Commission
Massachusetts Center for Health Information and Analysis
Michigan Health & Hospital Association
Minnesota Hospital Association
Mississippi State Department of Health
Missouri Hospital Industry Data Institute

Montana Hospital Association
Nebraska Hospital Association
Nevada Department of Health and Human Services
New Hampshire Department of Health & Human Services
New Jersey Department of Health
New Mexico Department of Health
New York State Department of Health
North Carolina Department of Health and Human Services
North Dakota (data provided by the Minnesota Hospital Association)
Ohio Hospital Association
Oklahoma State Department of Health
Oregon Association of Hospitals and Health Systems
Oregon Office of Health Analytics
Pennsylvania Health Care Cost Containment Council
Rhode Island Department of Health
South Carolina Revenue and Fiscal Affairs Office
South Dakota Association of Healthcare Organizations
Tennessee Hospital Association
Texas Department of State Health Services
Utah Department of Health
Vermont Association of Hospitals and Health Systems
Virginia Health Information
Washington State Department of Health
West Virginia Department of Health and Human Resources, West Virginia Health Care Authority
Wisconsin Department of Health Services
Wyoming Hospital Association

About the NEDS

The HCUP Nationwide Emergency Department Sample (NEDS) is a unique and powerful database that yields national estimates of emergency department (ED) visits. The NEDS was constructed using records from both the HCUP State Emergency Department Databases (SEDD) and the State Inpatient Databases (SID). The SEDD capture information on ED visits that do not result in an admission (i.e., patients who were treated in the ED and then released from the ED, or patients who were transferred to another hospital); the SID contain information on patients initially seen in the ED and then admitted to the same hospital. The NEDS was created to enable analyses of ED utilization patterns and support public health professionals, administrators, policymakers, and clinicians in their decision making regarding this critical source of care. The NEDS is produced annually beginning in 2006. Over time, the sampling frame for the NEDS has changed; thus, the number of States contributing to the NEDS varies from year to year. The NEDS is intended for national estimates only; no State-level estimates can be produced. The unweighted sample size for the 2017 NEDS is 33,506,645 (weighted, this represents 144,814,803 ED visits).

For More Information

For other information on emergency department visits, refer to the HCUP Statistical Briefs located at www.hcup-us.ahrq.gov/reports/statbriefs/sb_ed.jsp.
